New York, N. Y.—Charles Millang has acquired a five years' lease of the premises on the ground floor of the Coogan Building, 55 W. 26th street, recently vacated by B. S. Sinn.

Flower Market Reports.

BOSTON. Business is decidedly off this week as compared with last. Beautiful sunny weather has, as usual, its two effects, which always offset one another—good transient demand but augmented supply—and although there is a quite active call, prices are broken badly and while published quotations are practically unchanged large quantities of material have changed hands this week at prices more appetizing to the buyer than to the seller. A sanguine spirit prevails, however, and a noise is heard approaching which is much like the sound of Decoration Day hustle.

BUFFALO Trade was quite active the past week, especially in the carnation line, the demand for white being as heavy as for St. Patrick's day and prices holding firm throughout the week. The supply in all colors shortened up considerably, but there was plenty to supply all demands. Bride and Bridesmaid roses have been abundant, while Carnot, Kaiserin, Richmond and Killarney were shorter in supply but all were of excellent quality. American Beauties have been in heavy supply with demand more for mediums and short grades. Sweet peas have taken the place of violets and sell readily, also daisies, lily of the valley and pansies. Outdoor material has made its appearance, also daffodils, tulips, etc. A few days of hot weather and warm rain have forced them in rapidly. The only scarce articles at present are good ferns and smilax; other greens are quite abundant.

The first week of May **CHICAGO** opened brisk and everything went at good prices. Carnations sold well and the demand for roses was very gratifying. The supply of Beauties is large and the quality excellent. The extremely high temperature of the early part of the week, brought on the stock and the market experienced a lively increase in business. Later the thermometer dropped and rain put an end to the business flurry, though it was felt most on Saturday. Most growers held back their stock Friday looking for better weather but Saturday was one of those raw days that drive away trade. The first of this week found business generally dull and flowers left over from Saturday. Mother's Day developed no special demand for white carnations in this market. Several houses reported extra shipments to various large towns on Friday but their home sales were not above normal. Southern peonies are arriving in rather poor condition. Some consignments have fallen to pieces as soon as removed from the box. Red gladioli, forced, are in the market and sell fairly well at \$1.50 per dozen. If cold weather continues outdoor stock will be very scarce for Memorial Day.

The cut flower **INDIANAPOLIS** trade has been somewhat better in certain lines, due more to the shortening up of supplies than to any increased demand. This has manifested itself more the past week than any time this spring, owing to dark, cool

weather. The quality of Beauties, tea roses, and carnations has not been better this spring, with the demand ahead of the supply. Sweet peas continue one of the best selling items on the list. Iris, pansies and lilac are much called for. The cool weather has held back the bedding plant trade which will come with a rush as soon as the weather permits. All kinds of greens seem to be scarce especially smilax and good common ferns. Violets are a thing of the past for this season. Pot hydrangeas and Crimson Ramblers are about the only things seen in the flowering plant line.

With the exception of a little spurt towards the end of the week on white flowers, there was very little life in last week's market. On Friday, Saturday and Sunday the demand for white carnations and white roses consequent on

the so called "Mother's Day" was very brisk and prices on these soared to Christmas and Easter figures. American Beauty roses were very plentiful, and this (Monday) morning the week starts out with a regular avalanche of these. Other varieties of roses are practically in the same boat. The crop of carnations is not quite so redundant and these move off better on the whole than roses. There are enough orchids for all demands. Gardenias are not moving quite so freely as last week. The quality of the sweet pea crop is exceptionally fine at present and while prices rule low immense quantities are disposed of. They are the popular low priced flower of this season and fill the gap caused by the absence of the violet. Peonies promise well for Decoration Day the buttons being as large as a quarter May 10th. They should be in bloom

Flower Market Reports.

(Continued from page 707)

by the 25th if weather is favorable. The early officialis variety—red, pink, and white,—has been in for ten days. Outdoor irises, blue and yellow mostly, are conspicuous—as are also lilac and dogwood sprays. Church work called for a good many Easter lilies at the wind up but not enough to absorb the week's surplus.

The oldest inhabitant of the wholesale flower district recalls no time when the trade prices of roses and carnations sustained such a sudden and stunning blow as they have experienced during the past few days. Conditions as described in our trade report for last week only hinted at the demoralization which was impending. All items in the list are keeping company together at the foot of the toboggan slide and in fact our price quotations as published afford only a very inadequate idea of the facts as known to those who are on the spot as growers and wholesale dealers. It would seem that every rose and carnation plant is bent upon putting forth a belated product sufficient to even up in numbers for any and all remissness during the recent winter season. Of American Beauty roses there are veritable carloads—sufficient to have produced snug fortunes for their owners had they been obtainable a few

weeks ago but now, alas, hardly able to realize the cost of cutting, packing and transportation and to rub it in "good and proper," other markets in a similar predicament are unloading their surpluses here as a last ditch resort. All other roses are in proportionately the same fix, carnations bringing scarcely 25 per cent of the returns of a few days back. Southern lilacs are coming in by the dozen bales and the climax of faith in New York's capacity to digest anything that comes along is seen in bundles of undeveloped peony buds sent all the way from Missouri. It is, indeed, an experience altogether calculated to cause anyone building new greenhouses to sit down and do some figuring and induce something akin to the shivers in any grower pinning his faith to the old-time houses and the ways of "the good old days."

San Francisco florists report good business, orchids, carnations, violets and roses being in good demand.

INCORPORATED.

Madera, Cal.—The Tighe Ranch Co., W. C. and H. B. Tighe, W. B. Broyle; capital, \$50,000; to engage in horticulture, agriculture, viticulture, etc.

Chatham, N. J.—The Noe Farm, to carry on farming and rose growing; capital, \$150,000.

PHILADELPHIA NOTES.

August Doemling of Lansdowne, is well under way with the erection of his new greenhouse addition of five houses, each 20 x 200 ft. In this new range which is a duplicate of his first roses will be grown under the solid bed system. Lord & Burnham are furnishing the materials.

W. A. Leonard of Wycombe Ave. will plant three houses in My Maryland this season. He has proved this variety to be profitable for eleven months out of the twelve. Two houses will be devoted to White Killarney.

Wm. Didden & Sons have opened a new retail store at 224 South 52nd St. The premises are 60 feet deep and 20 feet wide and are being fitted up in style suitable for artistic up-to-date trade.

Many growers of Easter lilies are dubious about planting giganteums this season on account of the early Easter, 1910. August Doemling says he has no misgivings on the point and can get them in easily by March 15th. He has promised to write a short account of how to do it for the benefit of HORTICULTURE's readers. Look for this valuable story in an early issue.

7000 white carnations were distributed by the company among the subway trolley employees on Saturday. Each donation has this tag attached:—

"All I am or hope to be,
I owe to my sainted mother."

—Abraham Lincoln.

Frank Polites had the order for these.

Strawbridge & Clothier's big department store celebrated "Mother's Day" by giving away to its customers many thousands of white roses. Now let some one start a Daddy's Day. Give the old man a chance.

The J. Ellwood Lee Co. of Conshohocken, have just finished planting a forty acre field of Belladonna plants at this point for use in their medical factory. There are signs up all around the field "Danger" to warn off children and chickens from the deadly nightshade. We trust the local hotel men will not mistake this for mint for their juleps. The secretary of the P. H. S. lives there.

Visitors this week: Edward Roehrs, Rutherford, N. J.; W. C. Langbridge, Cambridge, N. Y.

FIRE RECORD.

Astoria, N. Y.—W. H. Siebrecht's place was badly damaged and considerable stock lost on May 2 through a fire that started near the boiler.

Jamestown, N. D.—Fire which is supposed to have originated in the furnace room of the Wheeler Floral Co., on May 2, destroyed about \$2,000 worth of property.

The Century Club has offered the following prizes for the annual show of the El Paso County Horticultural Society to be held at Colorado Springs, Colo., in August: Silver cup, valued at \$15, for best exhibit of sweet peas; \$20 cup for best kept premises of any club member; \$20 cup for best kept home premises of a member of fire or police departments.

FOR SALE—500 Rhododendron Catawbiense, this season's importation. 2 1/2 ft. high, full of bud, \$12 per doz.; \$80 per 100. Wagner Park Conservatories, Sidney, Ohio.

MISCELLANEOUS WANTS

WANTED TO BUY—Complete green house plants and all kinds of greenhouse material, to be taken down and removed at once. Terms cash. Address I. Sweeney, 229 Livingston St., Newark, N. J.

WANTED—One Pandanus Utilis, large plant; state size and price. Scott Bros., Elmsford, N. Y.

WIND AND HAIL.

Coraopolis, Pa.—T. F. Beckert lost considerable glass in the recent severe wind storm.

Cleveland, O.—Mrs. E. G. Wilson's greenhouse was completely destroyed by the heavy storm of last week.

De Haven, Pa.—F. H. Westhoff is reported to have suffered to a considerable extent during the heavy storm of wind and rain that recently visited this locality.

Omaha, Nebr.—The Omaha Bee reports 150,000 square feet of glass

THE WHITE FLY.

Editor HORTICULTURE:

Would you please ask through your columns what remedies are used against white fly on tomatoes, lettuce, pelargoniums, etc., under glass? They are trying to eat me up almost, they are so numerous. Smoking with tobacco paper causes the floor to be white next morning but does not check the hatching of new generations. They seem to hatch in a very short time. Is there an inexpensive, practical remedy for this pest? G. B.

Circular No. 19 of the Massachusetts Agricultural Experiment Station, issued November, 1908, gives the following information relative to the white fly and its destruction. By C. E. Hood, B. S.

This insect has become a very serious pest in greenhouses, and were it not possible to hold it in check, the crop each winter where it is present would be a total failure. It is not confined to the tomato alone but also attacks cucumbers, lettuce, melons, tobacco, geraniums and many other plants, and is not only important in hot houses, but in summer does considerable damage out of doors.

The egg of the white fly is oval in shape, somewhat pointed at one end. The rounded end of the egg is fastened to the leaf so the egg will hang down if the leaf is horizontal. In about two weeks these eggs will hatch into tiny young, which crawl around for a few hours and then insert their beaks into the leaf and suck the juices until full grown, which is about two weeks from the time they hatch. After passing through the pupa stage, a T-shaped opening is made in the back and the adult fly emerges. The mouth parts of both the young and fly are formed for sucking. They push their beaks into the succulent portions of the leaf and extract the juices, and as a result, the leaf soon dies and falls to the ground. Most of the harm, however, seems to be done by the young. Some time after the leaves are infested, there is a sticky substance exuded over the leaf, on which a black fungus grows, which soon covers the entire under surface of the leaf, making it sooty in appearance.

Remedies.

There are two methods of attacking this insect. 1. Fumigating with hydrocyanic acid gas. 2. Spraying with contact insecticides, such as a solution of Bowker's Tree Soap.

Fumigation is the most successful and most satisfactory method for the control of this insect that has as yet been discovered, though the gas produced is a deadly poison and extreme caution must be exercised in its use. It is essential in fumigating that the cubic contents or amount of space in the house be known, that the right amount of chemicals to use may be determined. The best proportions to use of the cyanide, sulphuric acid and water are:—

- 1 part cyanide of potassium (98 per cent or 99 per cent).
- 2 parts commercial sulphuric acid.
- 4 parts water.

The water should be first poured into an earthen or granite ware receiving vessel (do not use a metal one), the acid is then added and finally the cyanide, as directed more fully below. Use 50 grams of cyanide per cubic foot of space in the house or box to be fumigated. When the amount of cyanide necessary has been determined, put it in a paper bag. Close the ventilators and firmly fasten every door of the house except the one used by the operator. When all is ready, take the cyanide, fill the lungs with air, drop the cyanide into the vessel containing the acid and leave the house immediately, lock the last door and notice the time.

After the required time has passed, open the doors and give the gas plenty of time to escape before you enter. The gas is very poisonous, so do not enter the house during treatment. Fumigate after sunset, allowing three hours exposure. In ventilating afterward, the amount of artificial light can be supplied and the outside temperature must be taken into consideration, so that no injury to the plants will result from the lowering of the temperature. Three such treatments, at intervals

of about twelve days, will usually completely rid the house of the white fly.

Johnson's work entitled "Fumigation Methods" is indispensable to anyone who has occasion to use hydrocyanic acid gas as an insecticide. The book can be purchased for \$1.00 of the publishers, Orange Judd Co., 52 & 54 Lafayette Place, New York City. To those interested in greenhouse fumigation, pages 9-11, 118 and 124-14, are especially recommended.

If the cyanide treatment seems undesirable, use a fumigant and a contact insecticide, such as "Nicotidine," manufactured by The Tobacco Warehousing and Trading Co., Louisville, Kentucky, for the fumigant and Bowker's Tree Soap, manufactured by The Bowker Insecticide Co., Boston, Mass., for the insecticide.

For each 2000 cubic feet of space, from one to two ounces of Nicotidine should be used according to the tightness of the house. This treatment should last all night, and the next day the plants should be syringed with a solution of Bowker's Tree Soap at the rate of one ounce in one gallon of water. One such combined treatment should be sufficient for several weeks. If a second treatment is desirable, fumigate the same as before, one week later, and spray as before two weeks after the first treatment.

NEWS NOTES.

Cheswick, Pa.—Arthur and John Ames have started in the L. I. Neff greenhouses.

Centerville, Ia.—T. M. Stagner has started in the greenhouse business on South 21st St.

Uniondale, Ind.—Miss Eva Brickley is in charge of the greenhouse recently erected here.

Enid, Okla.—A. D. Zimmerman, formerly of Ottawa, Kan., is starting in the florist business here.

Stratford, Conn.—F. E. Beach, florist, has purchased the Wells greenhouse and is having it removed.

Des Moines, Ia.—The Lozier Floral Co. has purchased the building at 410 E. 6th St., and will occupy it immediately.

Gardner, Mass.—Riverside Greenhouses, Incorporated, has asked through counsel for dissolution of the corporation.

Jefferson City, Mo.—A bill to prevent the dissemination of the San Jose scale throughout the state passed the House on April 28.

Cuyahoga Falls, O.—M. Crawford, has sold his stock of gladiolus bulbs to Mallory & Bridge, Lake Mills, Wis. He will give his attention henceforth to raising seedlings.

Anaheim, Cal.—The Eucalyptus Hardwood Company has been organized by C. S. Crisney, A. G. Williams and C. S. Gibbs. 960 acres of land have been purchased in Kern County and will be planted to eucalyptus trees.

Sparkill, N. Y.—W. C. Duncan, florist, is reported as having disappeared and his relatives are anxiously searching for tidings of him. He was last seen at the New York Cut Flower Exchange, 55 West 26th street, on May 4. Anyone who can throw any light on his whereabouts will confer a favor by notifying the family. He is 6 feet 2 inches tall and weighs 250 pounds. He lived in Astoria for many years before going to Sparkill.

New York, N. Y.—John Wendell, florist at 611 Central avenue, was driving across the Williamsburg bridge on May 11 when a rein snapped and at the same instant the shrill

WHY THE U-BAR WINS

If you would just take the time to go and see a U-Bar house and talk with a U-Bar gardener, then you would appreciate how downright truthful we are in saying it is the lightest, most productive house built.

The main structural point of the U-Bar house is the combining of the rafter and roof bar in one, making the U-Bar. This combination is no larger than the single roof bars used in other houses. It does away entirely with the heavy iron supporting members, and makes possible the only successful curved eave.

The glass is spaced 24 inches instead of 16.

The core bar is soaked in a chemical preservative, before putting it in the galvanized steel U-Bar casing.

All iron parts are painted with a special aluminum finish which remains bright for years without attention.

To sum it up then — the U-Bar is indisputably the highest type of greenhouse construction. The ideal construction for private estates, parks, public institutions and florists' showrooms. Send for the catalog.

**NEW
ROSE****WHITE KILLARNEY**

We Know You Will Want to Buy White Killarney

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 18th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

"In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities."

W. N. RUDD.
We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2¼ inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

Cattleyas in California

The accompanying illustration shows one side of a cattleya house at the well-known establishment of Mr. J. B. Coryell, Menlo Park, California. The entire house is filled with *Cattleya Trianae*, between two and three thousand plants, and finer stuff I have never seen. The entire stock was imported two years ago, and at the present time shows decided evidence of the care and attention which Mr. McDonald, the head gardener, has given them.

Mr. Coryell is catholic in his tastes and there is no phase of gardening in which he does not take pleasure. In addition to a large and varied collection of orchids occupying several large houses, there are a number of houses devoted to stove and greenhouse plants, all of which show evidence of a high degree of cultural skill.

W. W. Ch. Brown.

Menlo, California.

Orchids at the Berlin International Exhibition

There was no favorable position set apart for orchids at this exhibition, and the hall was spoilt for these plants by its many dark corners due to the cathedral glass of the windows. Herr Otto Beyrodt, Marienfelde, exhibited a large group containing many species and varieties. Especially good were the plants of *Cymbidium insigne* (syn. *C. Sanderæ*), a large number of which were imported a few years ago. This species is difficult to bring into flower; and is grown under cold treatment by some, and slightly warm by other cultivators. Once the cultivation is carried out under rational treatment it will take its place as a free-flowering

plant for cutting purposes. Of this exhibitor's other plants mention may be made of the large-flowered white *Miltonia* x *Bleuana*. Herr Beyrodt had among others a *Cattleya Trianae* Blue King, with broad sepals and petals and a peculiar colored lip; a pretty *Cattleya Schroderae* with almost white petals and sepals, lip broad with a border of a light tint, and a dark colored patch in the centre. To the right and left of his large group, Herr Beyrodt showed a large variety of orchids for affording cut bloom. In every way he had not spared expense or trouble, to show the importance and purposes of his establishment, and he was awarded the Prize of Honor given by the city of Berlin.

Herr W. Hennis, Hildesheim, put up a portion of an importation of orchids in excellent condition, together with several *Cattleya Schroderae* alba, and a white *Calanthe Hennisiana* as varieties.

M. Firmin Lambeau, Brussels, showed a group of the handsomest cypripediums, odontoglossums and cattleyas, all of them crosses or hybrids. This amateur, an enthusiastic and celebrated orchidist, who spares no expense in adding to his collection, has accumulated an enormous capital in his glasshouses; and it frequently happens that at the orchid auctions in London, he will purchase plants which he may be desirous of obtaining, without any price limit. These treasures are cultivated by his clever headgardener, De Munter, who appears especially to have much success with miltonias. *Cypripedium* x *Delbekeanum*, a variety which has marks of *C. bellatulum* strain, was bought in England for a few shillings where it probably never came to perfection. It is now flowering for the first time with M. Lambeau, and is one of the finest cypripediums extant and worth a lot of money. Of other crosses mention may be made of those of odontoglossums: viz., the three wine-red, *O. x von Arnim Criewen*, *O. x Kronprinz Wilhelm*, *O. x Empereur Guillaume II*. Further there were the following: *Odontoglossum crispum* W. J. Whitely, flowers large with brown spotting on the sepals. *O. c. Fascinator*, *O. ardentissima*, whose almost wholly brown flowers are a strikingly conspicuous feature; *O. c. var. Rolfæ*, and *O. c. Loochristiense*. Among a number of remarkable cypripediums was *C. x Dr. Clinge Doorenbos* which is fine variety for cutting. The plant bore enormous flowers on stalks two feet in height; the color green with brown stripes. Of cattleyas the more interesting were the beautiful albino *C. x Suzanne Hye de Crom*, *Lælio-cattleya x Firmini*, a large-flowered hybrid with deep yellow sepals and petals and deeper colored lip (*C. Mossiæ* x *L. cinnabarina*). There were several other hybrids of *Lælia* and *Cattleya* including some in which *C. aurea* was one of the parents; but few showed any influence of this last species. *C. x nivea* is a hybrid of *C. intermedia* alba and a large-flowered white cattleya, and is a handsome flower, similar to one shown at Ghent last year under the name of *C. x Dusseldorffii* var. *Undine*. There were likewise some fine *Brassavola* hybrids, viz., *Brasso-cattleya x Queen Alexandra* (*Brassavola Digby* x *C. Mossiæ* alba) with pure white sepals and petals and prettily fringed lip. Similar was *Brasso-cattleya x Langleyensis*, in which *C. Schroderae* was one of the parents; and *Brasso-cattleya x Veitchii*, in which *C. Mossiæ* played a part. *L. c. x Fredk Boyle* (*Lælia anceps* x *Cattleya Trianae*) a var. midway between the two parents. This exhibitor was awarded the magnificent prize of Honor given by the Prince of Thurn and Taxis for his admirable group.

We announce with pleasure the return of HORTICULTURE's valued correspondent, Alfred Rehder, from his European visit. The new hardy things collected by Mr. Wilson in China for the Arnold Arboretum are now sufficiently advanced to furnish Mr. Rehder with the material for some exceedingly interesting and valuable contributions and these will appear in HORTICULTURE exclusively.

Memorial Day possibilities

Only one week more intervenes until the great national floral holiday comes around again. This is the florists' own day in many communities; it should be in all, from the Atlantic to the Pacific.

Full of sentiment, full of pathos, each year its hold upon the heart of the people becomes stronger, its observance more impressive. The florist is called upon to do his part and the day and its ceremonies are inseparably linked with his art. It is his duty to prepare for it, lavishly and confidently. Wisely handled there is almost no limit to the Memorial Day flower market. Moderate prices and generous liberality are the key to the situation. Let the florist meet them on these grounds and the people will not go afield for their Memorial flowers. There is no good reason why this anniversary should not far outstrip Christmas and Easter in the magnitude of its flower trade, everywhere, as indeed it already does in many of the New England cities and towns.

The salesman's ally

Not long ago a certain dealer who had been advertising to a considerable extent in the horticultural trade papers for some years confided to us his intention to cut out the greater part of his trade advertising as he concluded that his traveling salesmen accomplished much more for him in the way of business. Should he carry out his expressed purpose we believe he has some unpleasant experiences ahead—not immediately perhaps, but by the time his aggressive trade rivals have begun to encroach on his domain, as any firm which backs up its traveling representatives with liberal and systematic advertising of the goods they carry is bound to do sooner or later. Every salesman on the road realizes the great value of the advance publicity which trade journal advertising gives. The advertising paper actually does the work of a vast number of van-couriers at an infinitesimal cost and the drummer, called upon to follow after, finds the road far smoother and his task much easier than when he has to start out unheralded and unaided. Those dealers who do not realize this truth through their natural discernment are likely to have it forced upon them sooner or later, for trade advertising, in the opinion of long-headed judges, is only in the "rooted cutting" stage as yet.

The outlook for the nurserymen

The next important national society event on the 1909 program is the thirty-fourth annual convention of the American Association of Nurserymen which takes place at Rochester, N. Y., early in June. No doubt it will be a record breaker for the nurserymen in some respects, for their time-honored association will find abundant stimulus to renewed activity and vigor in the place of meeting this year, a city which stands pre-eminent, without a rival as a nursery centre and rich in all the resources which contribute to the success of such a gathering and, further, such an organization cannot but feel the inspiration of the awakening of the American people to a keener appreciation than ever before of the utility and beauty of trees and shrubbery in landscape, park and garden. Our beautiful gardens, avenues and parks on the one side and fruitful orchards with their product on the other, stand as living monuments to the nursery industry, but what we see today is little more than the beginning. The nursery interests are destined to increase rapidly as the resolution grows upon our people to convert the desert and waste places into gardens and restore to nature the charms of which we have been robbing her for centuries. The Nurserymen's Association has before it the duty and the privilege to carry the standard and uphold the prestige of the great industry which it represents and, under broad policies and wise leadership, its opportunity for useful work would seem to be almost unlimited.

Winter Color in the Garden

When one considers the large number of people who spend the winter and early spring months in their country homes it is somewhat surprising that more attention is not given to the beautifying of the garden at this period for, while every effort is made to produce a bright display during the spring, summer and autumn months one very rarely sees any attempt made to make the grounds more interesting and brighter throughout the dull season of the year. Among hardy ornamental shrubs there is an abundance of excellent material suitable for this purpose which, I believe, only requires to be better known to become more largely used, and if a portion of our public gardens and grounds was devoted to the grouping of these shrubs with brightly colored stems their value would soon become apparent. In the Arnold Arboretum and on the Boston parkways, especially around Jamaica Pond some good examples, principally of the scarlet barked willow, may now be seen and one can easily imagine the brilliant mass of coloring produced by planting a group of so highly ornamental a shrub as this.

The number of subjects capable of producing a bright effect with their stems, is as I have previously said, quite large and if one has sufficient space to devote the best results are obtained by planting groups, either large or small, of different varieties in a juxtaposition to each other so that the various scarlets, whites, greens, browns and reds of different shades form a most pleasing contrast. Such planting when once accomplished requires very little attention, but some of the varieties, which I shall enumerate, must be pruned hard to the ground every spring so soon as the sap commences to rise, for by only allowing the varieties to make an annual growth the color is much more vivid and uniform.

In addition to their winter beauty many of the under mentioned shrubs are valuable for their flowering properties while others are conspicuous in the autumn by reason of their highly colored foliage or ornamental fruits, and for massing on the banks of streams or ponds some are specially well adapted, the reflection in the water being doubly effective. No country possesses better advantages for producing these vivid colors at their best than North America as the warm sunlight of summer is necessary to thoroughly ripen the wood and the subsequent frosts also help to intensify the various shades of the barks.

The majority of shrubs with scarlet or bright stems belong to the Cornus or Dogwood family and conspicuous among them are *C. alba* and its varieties *siberica*, *Goucheaulti* and *variegata*. The two latter have, in addition to their bright red stems, very handsome variegated foliage which produces a most effective sheet of color when grouped. *Cornus Baileyi* and *C. stolonifera* are also very desirable, the stems of both being of a brilliant color. One of the brightest reds we have is the Red Osier or scarlet-barked willow which is a very excellent subject for grouping and will grow freely in any good soil though one naturally expects to find it by the water's edge; a position in which it looks thoroughly at home. Golden barked shrubs are not quite so numerous but there are two very excellent varieties which contrast well with the reds. They are *Salix alba vitellina*, the golden stemmed willow and *Cornus stolonifera flaviramea*, Golden Dogwood. All the above excepting the last named produce the most pleasing results if pruned hard back to the ground every year and the Golden Dogwood is improved by receiving this treatment occasionally. Shrubs with bright green stems are very ornamental if planted in quantity and specially noteworthy sorts are *Kerria Japonica* and its two varieties *flore-pleno* and

variegata. These require very little pruning, it being only necessary to remove the old stems when they become brown with age. For sheltered positions where the North and East winds will not mar their appearance the *Cytisus* and *Genistas* are very valuable, for few shrubs are more admired when in flower and in winter they are an effective mass of green. The most suitable varieties of *Cytisus* are: *albus*, *præcox* and the several forms of *C. Scoparius*, all of which resent being pruned after they have attained a fair size.

A large number of flowering shrubs have warm brown stems in winter which associate well with the brighter hues and materially assist in producing a pleasing combination of color. Some of the most desirable are *Spiræa Douglasii*, which should be pruned right down every year when it will form a level bed of pink blossom in summer; *Spiræa canescens*, a white flowered species; *Forsythia suspensa* with pale brown stems; *Berberis vulgaris* and the *Symphoricarpos*. Although the *Pyrus* family are not particularly noticeable, in the same way as the dogwoods, for the beauty of their stems in winter there are two varieties, viz: *P. nigra* and *P. arbutifolia*, which are very attractive when planted in quantity. In the Eastern Nurseries at Holliston I recently saw two fine plantations of these pyruses and the color of the stems which is red with a suffusion of white made them very attractive. In addition to their winter beauty these two shrubs are desirable for their wealth of spring blossom and magnificent foliage in the autumn.

The above list includes only a few varieties suitable for this kind of planting and is by no means exhaustive. There are, in fact, many more equally useful as I have mentioned, which are hardy, of easy cultivation and have something to recommend them at all seasons of the year.

Arthur E. Thatcher
Arnold Arboretum.

Beautifying the Waste Plots

The societies which are in operation in New York and Philadelphia for cultivating the waste lands in the towns have their counterpart in an organization which has been formed on this side. Mr. Joseph Fels, the Hon. Sec., informs me that the work of the English Vacant Land Society during its first season has been so successful in actual tangible results that it now feels justified in applying for further financial support. From landowners or their agents the committee solicit the loan of unused and vacant plots of land, either in the Metropolis or in the country. The committee agree to give up possession of the land within seven days, if required to do so. An appeal is made to seedsmen, growers and merchants for seeds, plants and garden tools for the use of the cultivators. Financial support is also invited from the public for the approaching season, when some £20,000 will be needed. Already a successful start has been made in the cultivation of vacant plots in various parts of London, and it is now hoped to considerably extend this list in the approaching season. R. Lewis Castle, who has a wide experience in commercial horticulture, is acting as the superintendent, and he is doing his utmost to promote the complete success of the undertaking, which fills an undoubted want amongst our British institutions.

W. H. Adsett.

London, Eng.

NEWS OF THE CLUBS AND SOCIETIES

PENNSYLVANIA HORTICULTURAL SOCIETY.

An invitation has been extended to the Chrysanthemum Society of America to hold their next annual convention and exhibition under the P. H. S. auspices in Philadelphia next November, on the dates fixed for the regular local exhibition, Nov. 9th to 12th. William Kleinheinz made a report from the executive committee of the Gardeners' Society in regard to the prizes for the spring show. Thirty-two cups have been donated so far and these will be awarded for meritorious exhibits other than the usual subjects covered by the P. H. S. prize list. The latest offering is a gold medal by the Lord & Burnham Company which will be awarded to the best group of foliage and flowering plants. A silver gilt cup will be given to winner of the most prizes, the award to be made on points—three for firsts, two for seconds and one for thirds. The peony exhibition will be held afternoon and evening of May 27th. All exhibits to be staged before three o'clock. The date for the rose show will be announced later.

Certificate of merit for culture was awarded to Samuel Batchelor for an exhibit of May-flowering tulips; special mention to William Fowler for two varieties of tree peonies, Countess of Clews and Christine Kelway; certificate of merit to Henry A. Dreer for Ampelopsis Lowi, a new and graceful variety with small foliage.

Prize list for the peony show can be had on application to the secretary, David Rust, Broad and Locust St., Philadelphia.

NASSAU COUNTY HORTICULTURAL SOCIETY.

This society held its regular monthly meeting on Wednesday evening, May 14th, in Pembroke Hall, Glen Cove, N. Y. President Everett occupied the chair. There was a good attendance, about fifty members being present.

Messrs. Johnston, Duthie and Mackenzie acted as judges at the monthly exhibition. Paul Reul led in the points competition with a meritorious exhibit of mixed antirrhinums which stood about 6 feet high, with about 2½ feet of flower stem. The awards were as follows: P. Reul, antirrhinums, 90 points; G. Wilson, carnations, 80 points; H. Gaut, culinary peas, 86 2-3 points; O. Cleres, Asparagus Sprengeri, 83 1-3 points.

There was, as usual, a very good display of flowers and vegetables for exhibition, noteworthy amongst which was a vase of Gladiolus Blushing Bride, staged by E. Fardell, Great Neck. Blushing Bride is a fine thing and ought to be more widely grown than it is. A. Reidenbach was awarded a cultural certificate for a vase of sweet peas, as were also V. Cleres and H. Gaut for cauliflower and Lima beans, respectively.

A. Mackenzie read a very able paper on "Growing Chrysanthemums for Exhibition." The Society accorded Mr.

Mackenzie a vote of thanks for his excellent paper.

Mr. Johnston, who a few weeks ago returned from a three months' visit to Scotland, has promised to give an account of his travels at the June meeting.

The Society holds its Rose Show on June 23rd.

WM. H. MACKENZIE,
Corresponding Secretary.

COMMERCIAL FLORISTS' ASSOCIATION OF ROCHESTER, N. Y.

This hustling association is planning for a flower show to be held November 2, 3 and 4. It is expected that every florist in Rochester will have an exhibit and in addition there will be choice displays from the gardens of prominent Rochester and neighborhood amateur florists. The show will be unique in so many ways that it is expected to attract the attention of members of the trade in all parts of the country. It will be original in that there will not be a vase or table in the exhibit. Convention Hall, where the show is to be given, will be laid out as a garden and the exhibits will all be placed on the floor. Instead of walking up and down between flower laden tables, spectators will pass along beautiful walks, under arbors, through palm forests, and to a cascade that will have its origin back on the stage at one end of the hall. The garden idea will be carried out from plans already prepared by a well known landscape artist. Ceilings and side walls will be hung with southern smilax.

Florists and nurserymen who are interested in the show, which has been under consideration since the florists held their banquet last winter, met last Saturday night at James Vick's Sons' offices for the purpose of going over the floor plans and perfecting other details. Every one present was enthusiastic. Charles H. Vick is chairman of the general committee and H. B. Stringer is secretary. The subcommittee are: Floor and decoration—F. J. Keller, E. P. Wilson, R. G. Salter, G. B. Hart. Finance—W. L. Keller, Wm. C. Barry, Sidney R. Clarke, W. H. Dildine, A. H. Salter. Exhibitions and awards—J. M. Keller, Ambrose Secker, F. W. Vick, F. R. Schlegel, C. B. Ogsten. Music—F. W. Vick. Advertising—Sidney R. Clarke, Thomas F. Brown, A. H. Salter, William Pitkin, Charles J. Brown.

DAYTON FLORISTS' CLUB.

The last meeting of this club was with J. F. Young. After the preliminary business was over, E. E. Schaefer spoke on the subject, "Would a co-operative supply house be a benefit to the florist?" and the discussion that followed showed that the florists were generally in favor of buying their supplies as they were required. Mrs. Bertha Hendricks' remarks on "Giving away flowers," favored making a gift to a good customer when paying a bill, but the donation of flowers in quantity to churches, lodges, etc., was deprecated by all who took part in the after discussion.

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

Prof. Lipman, of the New Jersey Agricultural and Experiment Station of New Brunswick, N. J., gave a lecture before the Morris County Gardeners' and Florists' Society on the evening of May 12 on "Soils and Fertilizers." Fifteen years of hard work at the station in this line eminently fitted the professor for giving us an interesting and instructive talk, and the fifty-two members who heard him got up as one man to give him a rising vote of thanks. To enable the farmer and the gardener to work intelligently is the aim of the station, and all over the state experiments are carried on with this object in view. "To produce the most at the minimum of cost in the aim of us all, and to do this older methods have to be laid one side, and changing conditions have to be met. Soils are not what they were, and so we are learning to supply just what is needed for our crop," said the doctor.

Many questions were asked, and Professor Lipman was always ready to discuss a point and throw light on little understood problems.

We had quite an informal exhibition. Wm. Duckham had a collection of flowering shrubs, hardy herbaceous flowers and spring bulbs. Alexander Brown, gardener to Geo. Macculloch Miller, had a fine lot of antirrhinum. G. F. Neipp of Floral Hill Gardens, Chatham, had a fine collection of tulips, and so had Alexander Michel, gardener to Chas. R. Hedden, Madison. John Dunn, Alfred Neipp and Wm. Wilschrey were elected to membership. The annual flower show for this year is to be held in Madison on Oct. 27 and 28, Wednesday and Thursday. The schedule is nearly revised and next meeting will complete it. During July and August there will be no meeting, as has been the custom for some years.

E. REAGAN, Sec'y.

ENGELMANN BOTANICAL CLUB.

The Engelmann Botanical Club of St. Louis held its annual field meeting Saturday, May 8, at the old U. S. Grant farm, which is owned by the Adolphus Busch estate. L. P. Jensen, head gardener for the Busch estate, had charge of the meeting and saw to it that the members were made comfortable during their stay. The visitors roamed over the fields all day, gathering wild flowers of all kinds, and a fine spread was served after the meeting. The club held its regular meeting the following Monday, May 10, in the Central High School building, where all the flowers and plants from the field meeting were displayed. The meeting was a well attended, very interesting one, especially the discussion on the flowers of Arkansas and south western Missouri, there being several noted visitors present from kindred societies.

NEWPORT HORTICULTURAL SOCIETY.

At the meeting of this society held on the evening of May 11th three tropaeolum plants were on exhibition in competition for prizes offered by Mr. L. L. Lorrillard. The first prize of \$12 was awarded to Andrew Downard, gardener for Mrs. T. J. Emery, for a very large and handsome specimen in bush form; a double red for a centre surrounded by a double yellow. The second prize of \$8 was awarded to Stewart Ritchie for a very pretty plant of double yellow trained in pyramid shape. The third plant was the variety Jarrattii trained in balloon shape. The accompanying pictures give an idea of how all looked.

ST. LOUIS FLORIST CLUB.

This club held its May meeting on the afternoon of May 13, with thirteen present, in Bowman's Hall. After the regular opening exercises had been disposed of, President Young called for reports from all committees.

The trustees reported that they wish more time to find a suitable meeting hall and at next meeting they would make a favorable report. They were by a vote instructed to make all arrangements for the club's annual outing to take place some time in July. As the club has gone out of the show

Trained Nasturtium, First Prize.
Newport Horticultural Society.

business the trustees were ordered to sell to the highest bidder all belongings of the club for holding flower shows, which have been in storage for the past two years.

The communication from the St. Louis Horticultural Society asking the club's co-operation and the offer of a special prize for the best fall show will be taken up for discussion at the June meeting of the club.

The president appointed W. C. Smith to take charge of the club delegation to the S. A. F. convention, look after transportation and other details to make the members comfortable in their trip to Cincinnati and return. A large delegation of members have pledged themselves to make the trip. Fred Weber, treasurer, reported plenty of money on hand. The matter of life membership was taken up and fully discussed and assigned to the June meeting. Before adjournment, Mr. J. F. Windt and Henry Johan announced that both had become grandfathers since the last meeting, so after the adjournment the members feasted at their expense and hearty congratulations were extended.

NATIONAL DAHLIA SOCIETY.

The recent issue of this Society's schedule of prizes for 1909 reminds us that the London Dahlia Union and the National Dahlia Society of London are now one. The amalgamation took place early in the year, and the show arrangements are practically the same as before. There will be one held on the 2nd and 3rd of September at the Crystal Palace and another on 21st and 22nd September in the Royal Botanic Society's Gardens, Regents Park. Accompanying the schedule is the 1909 supplement to the official catalogue which contains lists of the new dahlias to be sent out in 1909 and revised selections in the different sections of this popular flower. Mr. E. F. Hawes and Mr. H. H. Thomas the old secretaries of the two societies thus united have been appointed joint secretaries of the N. D. S.

C. H. P.

NEW JERSEY FLORICULTURAL SOCIETY.

W. A. Manda addressed the society at their regular monthly meeting on the 14th, which was observed as a special rose night. The speaker stated that his special attention had been given to out-door grown rather than greenhouse stock and then, dividing his topic into classes, made a rapid survey of the best varieties now in general use in the various departments of horticulture. Among the interesting points that he brought out were the facts that the Cherokee rose will not cross; that dry leaves and hemlock boughs make the best protection in winter; that by the use of barbed wire fencing a more effective display may be made where Wichuraiana is employed. He spoke also of the inspiration that recent shows had been under the guidance of the Rose Society and of the forth-coming shows in England next year.

John Hayes told of a grafted rose which had been growing for between thirty-five and forty years under glass at "The Terraces." Rev. Louis H. Lightpe, botanist to the society, spoke of the vigor of the Cherokee rose in the southern states particularly around Jacksonville, Fla. He also described the process of freezing where the stem splits the same as a water-pipe and if covered and permitted to thaw in the dark, no bad result will follow. The floral display was from neighboring estates and quite up to the usual standard. W. A. Manda and John Hayes were the judges for the evening.

TICULTURISTS.**

Window Glass and the Tariff.

As a commodity affecting the thousands of greenhouse men, large and small, glass stands a very important factor. The duty levied on glass per pound practically cut out European competition, and prices until about eighteen months ago ran high. The gradation of import price is pound rate of 1 3-8c. for size not exceeding 10 x 15, for size not over 16 x 24 1 7-8c., and so on running higher as the increase of sizes goes until 4 3-8c. per pound is reached.

When the section of the Tariff Bill came up before the Senate for action, the Hon. Elihu Root, Senator from New York State, took up the side of reduction, urging a modification of the present rates. Senator Simmonds of North Carolina, ably took the same ground, urging at any rate a material reduction upon the sizes in common use. The introduction of machine to take the place of hand-blown glass, and the contest for control of the market is the cause of prevailing low price during the past year. The bill as it goes back to the House of Representatives will in many cases show marked changes. The national demand is surely on all lines for a reduction of duties when summed up as a whole; localities will and do urge strongly in favor of their own interest. Mr. Frank R. Pierson, chairman of the S. A. F. Tariff Committee, has been to Washington twice on behalf of the interests of the S. A. F., and no one not in close touch with affairs realizes the clash of interests one with another, and how some remote and unlooked for item will affect even the flower grower.

BENJAMIN HAMMOND,
Secretary Tariff Committee S. A. F.

**GARDENERS' AND FLORISTS'
CLUB OF BOSTON.**

The May meeting, held at Horticultural Hall, Boston, last Tuesday evening, was attended by one hundred and forty members, all interested in the promised lecture on Aquatic Gardening by Peter Bisset of Washington. Unfortunately, Mr. Bisset was unable to be present in person, but his paper was well-presented by J. W. Duncan as reader, and James F. M. Farquhar as operator of the stereopticon. The slides sent by Mr. Bisset were very beautiful.

There were no less than fifteen queries in the question box, which called forth interesting answers and sometimes lively debate. Among the subjects thoroughly discussed was the substance called "Tanglefoot" as to its effect when used as a band on tree trunks to prevent the ascent of insects. It was unreservedly condemned as injurious by practically all who had tried it. It was acknowledged, however, that the harm noted may have, in some instances, been caused by too deep scraping of the bark.

Votes of thanks were accorded to the following exhibitors: Eber Holmes for Canna Tarrytown and Killarney rose, Wm. T. Fletcher for Hoya carnosa and F. W. Fletcher for

SOUTHERN GROWN BEAUTIES.

The accompanying illustration shows a vase of American Beauties with 9 to 12 ft. stems, grown in solid beds by the Metairie Ridge Nursery Company, New Orleans, La. These plants are three years old and were planted on benches the first year and transplanted to solid beds two years ago. The secretary writes that they find, after several years' trial of roses on benches, that the solid beds are the best for that climate, and they are now planting all

their roses in solid beds for next year. This seems to prove beyond question that long-stemmed roses, especially American Beauties, can be grown in southern latitudes as well as elsewhere. Years ago it was always contended that roses, especially Beauties, could not be grown under glass in that climate. It adds something to our editorial note of two weeks ago concerning the growing of carnations of good quality outdoors in New Orleans.

Everblooming Salvia and pink Marguerite.

CINCINNATI FLORISTS' SOCIETY.

There was a good attendance at the May 8th meeting. Henry Schwarz read an interesting paper on the history of the society. The present officers were re-nominated as they have begun the work in connection with the entertainment of the S. A. F. in August, and could more readily complete it than a new board. R. Witterbaker for the financial committee stated that money is coming in well for the entertainment fund. The directors and chairmen of the various committees will meet every Monday evening at the Sinton Hotel until after the convention.

NATIONAL SWEET PEA SOCIETY.

This flourishing English Society has recently issued its annual Year Book for 1909, and its schedule of prizes. The ninth annual Exhibition in London will be held on July 23, next, in the Royal Horticultural Hall, Westminster, and the third provincial show will take place at Saltaire on the 13th of the same month. It is a comprehensive publication of 50 pages, containing all information as to the classes provided and several illustrations of the handsome silver cups offered for competition. The annual report, balance sheet and list of officers also appear. Roughly speaking, the income for 1908 amounted to a total of \$2865.

HARDY PERENNIALS AND THEIR VARIOUS USES.

By Robert Cameron.

Continued from Page 702, Issue of May 15.
Florists and Their Homes.

Are the florists and the nurserymen doing the best they can to make their homes and places of business pleasing and attractive and are they trying to teach the people to love and use plants more abundantly around their homes? Some florists have very beautiful grounds, nicely kept, while others have miserable dilapidated places. There is less reason for a florist, above all others, to have an unsightly and untidy place. He has always plenty of material growing around him and knows how to make it grow. Therefore around his home there should always be a pleasing and satisfying picture. If you don't keep your place neat and tidy and have plenty of plants and flowers around your places of business and homes, how can you expect to urge your customers to grow more plants when you do not show them a good example?

Immortal Burns has said:

"O wad some Power the giftie gie us
To see ourselves as others see us,
It wad frae mair a blinder view us,
An' foolish notion."

Private Estates.

I am pleased that some of our large private estates have taken up this subject seriously and are naturalizing bulbs and other plants by the thousands, in woodlands and other places. William N. Craig of North Easton, is doing this work finely. Charles Sander at Prof. Sargent's place has done excellent work. Mr. Henry Hunnewell, of Wellesley, has planted liberally and has obtained good results. And on the North Shore we have quite a number of good examples.

In England this kind of work is done on a very large scale. At Kew Gardens a few years ago they had only a few small patches of plants that were naturalized. Now they have acres of snow-drops, crocuses, squills and many other things which are seen and enjoyed when they are in bloom, by hundreds of thousands of people from the thickly populated parts of London.

Some of you will say, these bulbs are too expensive to plant in such large quantities as I have recommended. You will be surprised if you buy in large quantities to find how cheaply they can be bought.

The Herbaceous Border.

There are many ways in which hardy perennials can be used, but the most common way is in the mixed border. Many persons think it is an easy matter to plant and maintain a herbaceous flower border, but if one is to have flowers during the Spring, Summer and Fall, and maintain a good scheme of color, it is by no means the easy thing that it is commonly supposed to be. A person may have many plants of good kinds and they may grow satisfactorily, but that does not make a border or garden; that merely makes a collection.

So, if we are to have beautiful gardens and borders, the chief point we should keep in view is to use them with careful selection and definite purpose, always aiming that they shall make beautiful pictures. Two borders may contain the same number and kinds of plants; the one may be plant-

A Prosperous Florist is like the Bee - Never Idle

We have plants to sell, so have thousands of other florists.

But we have quantity, quality and prices that few can offer.

Our immense stock of bedding plants is now ready, every hole and corner full for immediate shipment.

Geraniums, S. A. Nutt (best crimson), John Doyle and other reds, Mme. Thibaut and Jean Vland (pink), 4-in. pots, \$7.00 per 100.

Poleitene, Albion (single white) **Ivy geraniums**, \$7.00 per 100.

Scarlet Sage Clara Bedman, 4-in., \$7.00 per 100; 3-in., \$4.00 per 100.

Ageratum, best of the blue dwarf, 4-in. pots, in bloom, \$6.00 per 100.

Heliotropes, best of blue dwarf variety, 4-in. pots, in bloom, \$7.00 per 100.

Begonia Vernon, best dark red, and others, \$7.00 per 100.

Begonia Flambeau, on account of its wary foliage (pink flowers in summer), is valuable for window boxes, vases, and makes a striking appearance, 5 1/4-in. pots, \$2.00 per doz.; 4-in. pots, \$1.00 per doz.

Fuchsias, assorted, in bud, 4-in. pots, \$6.00 per 100.

Petunias, double assorted, 4-in. pots, \$7.00 per 100.

Lanterns, assorted, 4-in. pots, in bloom, \$7.00 per 100.

Nasturtiums, dwarf assorted, 4-in. pots, \$6.00 per 100.

Stocks, German, six weeks, 4-in. pots, \$7.00 per 100.

Vincas, variegata and periwinkle, 4-in. pots, \$12.00 per 100.

Colours scandens, 4-in. pots.

Cannas, 4-in. pots, Henderson, Poleitene, Bismarck, Mlle. Berat, etc., \$8.00 per 100; King Humbert, 4-in., 10c.

Mignonette, 4-in., 7c.

Aster Victoria, German, 5 best sorts, \$3.00 per 100.

Honeysuckle, large, 6-in., 50c; 10 plants sold at 100 rates.

SMALL PLANTS

Petunia California Giant, 3-in. pots, \$4.00 per 100.

Petunia Inimitable, 2 1/2-in. pots, \$3.00 per 100.

Verbenas, assorted, in bud, 2 1/2-in. pots, \$3.00 per 100.

Colens, Verschaffeltii, Golden Bedder and Queen Victoria, \$3.00 per 100.

Colens, fancy leaved, 2 1/2-in. pots, \$4.00 per 100.

Marigold, Tagetes or French dwarf, 3-in. pots, \$3.00 per 100.

Centaurea Gymnocarpa (Dusty Miller), 2 1/2-in. pots, \$3.00 per 100.

Parlor or German Ivy, 2 1/2-in. pots, \$3.00 per 100.

Salpiglossis, assorted, 2 1/2-in. to 3-in. pots, \$3.00 per 100.

Lobelia Crystal Palace (blue), 2 1/2-in. pots, \$3.00 per 100.

Tradescantia, green and variegated, 2 1/2-in. pots, \$3.00 per 100.

Kenilworth Ivy, 2 1/2-in. pots, \$3.00 per 100.

Thunbergia, or Black Eyed Susan, 2 1/2-in. pots, \$3.00 per 100.

Cuphea, or cigar plant, 2 1/2-in. pots, \$3.00 per 100.

Vinca variegata, 3-in., \$4.00 to \$5.00 per 100.

Ageratum, blue, dwarf, 3-in. pots, \$4.00 per 100.

Asparagus Plumosus Nanus, 3-in. pots, \$4.00 per 100; 2-in. pots, \$3.00 per 100, \$2.50 per 100.

Cosmos, early varieties, separate colors, made up 3 plants in a pot, \$3.00 per 100.

Summer Chrysanthemums, best varieties, 3-in. pots, \$4.00 per 100; 4-in. pots, \$7.00 per 100.

Erythrum Aureum (Golden Feather), 2 1/2-in. pots, \$3.00 per 100.

Roses, Climbing Lady Gay, Crimson Rambler, Dr. Perkins, 5 1/2-in. to 6-in. pots, 25c, 30c to 40c.

Arancaris Robusta Compacta and **Excelsa** Glauca, Specimen plants, 7 to 8 in. pots, 25 to 35 inches high, \$1.50, \$2.00, \$2.50, \$3.00 each.

Arancaris Excelsa, 25, 35 to 40 inches high, 6-in. pots, 5 to 6 tiers, \$1.00, \$1.25, New crop, 40c, 50c, 60c, 75c.

Kentia, **Belmoreana** and **Forsteriana**, just arrived from Belgium per steamer Manitou, in first class shape, 75c, \$1.00, \$1.50 to \$2.00 each.

MOONVINES.

4-in. pots, nicely stocked up, \$12.00 per 100; 3-in. pots, \$8.00 per 100; 2 1/2-in. pots, \$7.00 per 100.

All goods must travel at purchaser's risk. Cash with order, please.

Rutherford, N. J.

ed in such a way that everything is jarring, displeasing and unrestful, while the other may be planted with the same material but, in such a way that it makes an impression of pleasing satisfaction; in fact, it makes a series of satisfying pictures. To learn to see the difference in these pictures and how to put them in their right places, is to recognize gardening as a fine art.

In forming plantations and borders, the right thing to do is to place the plants with such care that they shall form a part of a harmonious whole and that portions will show a series of pictures.

The Color Scheme.

We do not give enough attention to our color scheme, and in almost every garden I know this is a very weak point. Much of the success of a border

or garden depends on giving thought and study to get pleasing color effects. Many times good material is useless in our scheme, either from ignorance or lack of forethought. A plant may not be ugly in itself, but, when placed in a wrong environment, may make a very distasteful picture. We all know how to grow the plants, but it is another question of how to place them that they may give the best effects and make the most beautiful pictures. If we are to be successful with our borders we ought to give more study to the color scheme, as there is so much depending on it that we certainly can greatly profit by giving much more attention to it than we have in the past. I am not posing as one who can teach you in this line, but I can see where most of us are very unsuccessful in making our border compositions.

speciosissima and 12 of the best varieties of *Cypripediums*.

ORCHID SPECIALIST
Alphonse Pericat, COLLINGDALE, PHILA., PA.

Rose Standish Nichols, who is an authority on garden color, has this to say: "Harmony is closely connected with scale and proportion. It is to be obtained not merely by the right combination of contrasting colors, but by the skillful association of various shades of the same color. The importance and position to be allotted to the dominant colors must be thought out carefully.

"Green is the foundation of all gardens. Other colors may come and go but, so long as the vegetation retains a vestige of life, green is bound to predominate, though it tints the foliage, not the flowers. To the uneducated eye all green looks alike, but to the trained observer it includes an infinite number of different shades varying from the pale gray of the mullein leaf to the rich purplish bronze of the galax. As a foil and as a background the foliage of a plant, apart from its flowers, should weigh in the decision as to its location.

"Now as to the arrangement of flower colors. An easy road to success is to begin by selecting only flowers of the same color and of such shades as will go together anyhow and anywhere. Then, if accidents occur and a plant strays from its appointed place, no harm results.

"Blue (varying from pale lavender to indigo and the deepest purple) is the best color for this experiment. In Summer, when green is invariably the predominant hue of the landscape blue is its most agreeable complement. Besides, few shades of blue are apt to swamp each other, though all do not go equally well together.

"Yellow is more dangerous to use

freely. Masses of deep yellow or orange are too glaring to be agreeable in the foreground; only the paler lemon shades can be employed in large quantities, yellow is apt to become too prevalent.

"Red is peculiarly difficult to handle successfully. There are certain of its shades which are almost sure to strike a false note in any symphony of color—intense magenta, crude vermillion and fiery orange-scarlet are so hard to assimilate that it is better to omit them altogether in the beginning. Salmon-pinks and maroon-reds are far more satisfactory.

"In small quantities white is excellent, but a little goes a long way. A pre-eminently white garden is rather flat and uninteresting. It is better as a contrasting accessory than as a dominating color. Also it is useful in bridging over a transition or graduation from one color to another.

"Contrast, cleverly introduced, enhances the value of every color. Blue becomes bluer and red, redder, when foiled against pure white. Look at Madonna lilies beside larkspur. Where red is used in such large quantities that it might pall upon the eye, it is delightfully relieved by an admixture of blue. The beauty of vast fields of red poppies, mingled with blue cornflowers, never fails to command admiration. Purplish irises and yellow day-lilies are also a familiar but always pleasing combination.

"The height of this kind of art is to know when and where to introduce a dash of harmonious discord. Just the right amount of discord in the proper place adds a touch of piquancy to the composition, as salt to meat. Large

beds of Shirley poppies, for instance, are prettier for including both salmon and rose-pink, both crimson and scarlet. Yet, under other conditions, these shades are impossible to combine. Indeed, harmonious discord is the last expression of color in the garden and should not be attempted by an amateur."

Size of Masses.

The scale in proportion of grouping the plants must be given serious consideration. If we are planning our borders for an arrangement of color the first thing we must consider is to get general effect. Individual specimens, although they may be beautiful, must be sacrificed if they catch the eye too forcibly. Bold planting is always best and plants should be grouped in numbers of the same kind, varying in quantity according to the size of the garden border. Large groups of plants can be massed and repeated at intervals, if desired, but parallel lines should be avoided as far as possible.

Planting the Border.

The old-fashioned border, when only a few bulbous plants were used, is a thing of the past. The modern border must contain a liberal supply of all kinds of bulbs and all sorts of hardy herbaceous plants which will give a continuous show of blossoms from early Spring until the end of October. The charm of a border like this is its changeableness. One has not to look at the same picture for more than one week or sometimes for not more than one day. Our border is never tiresome, its past is a pleasant memory, its future a delightful anticipation and its blossoms an accurate calendar of

the seasons. There is a continual change of flowers. It is here where the herbaceous border has the advantage over the bedding system. Not only is the frequent changing of the flowers of special interest, but in early Spring to a keen observer the color effects of the young foliage and stems are quite conspicuous and very interesting. The herbaceous border comes nearer nature's way of doing things than the bedding system, hence the reason why we enjoy it so much.

Background and Location.

No doubt a herbaceous border is more attractive and gives more satisfaction when it has a suitable background. A background of shrubbery is always pleasing, but such a background is not always procurable. There is one precaution which one should always take and that is to see that the border is not near large trees. Otherwise there is sure to be failure and disappointment. The roots of the trees get into the border and steal the food from the plants. The strong-growing kinds soon become weak and sickly and fail to give the expected show of flowers.

The outline of the border is not of so much importance, but the one that gives the most satisfaction is one where the lines are uneven or sinuous. **Best Kinds of Soil and Its Preparation.**

After selecting the location the next consideration is the soil. If of moderate depth, any kind of soil will grow the plants; that is, many of the kinds, provided that plenty of manure is given; but a deep loam, if well trenched, of medium texture that does not need an annual supply of manure

is the best. Of course, all have not such a soil at their command and therefore recourse must be had to supplying the most suitable ingredients to the varying soils that have to be dealt with. A deep loam, if well trenched and given a good dressing of well rotted manure, will need little, if any, other dressing for four or five years. This is of great importance, both as regards saving labor and well doing of the plants, as many kinds of herbaceous perennials attain their most perfect development when left undisturbed for years. The only safe way to enrich the border during this long period is to give it a liberal top dressing late in the fall of well rotted stable manure. The snow, frost and rain will wash most of the top dressing into the soil before the plants begin to grow. We like stable manure much better than commercial fertilizers as it is much more lasting and gives better results. Clay soils should be trenched at least two feet deep, and plenty of leaf soil worked in with manure.

Replanting the Border.

Every fourth or fifth year we dig all the plants from our herbaceous borders and trench the ground. In this process of trenching the earth is completely turned over to the depth of two feet and we work into the soil a liberal supply of well rotted cow manure. In turning over the soil to this depth it gives an opportunity to remove all roots and weeds from it. Not only does the soil need enriching but there are many of the strong growing kinds of herbaceous plants that need lifting and breaking up. The

plants are degenerate, the growth becomes weak, the flowers small and few in number; examples of such are phloxes, larkspur, asters, rudbeckias and chrysanthemums. When overhauling the border in this way there are many plants that require just as careful handling as if moving a large tree. The plants are very sensitive to rough handling and, if not done with care, they do not grow or flower as well for some time afterwards. Examples of such plants are Adonis vernalis and Statice latifolia. Clematis recta if not lifted and planted with care does not grow more than eighteen inches the first season, whereas it ought to grow four feet. The best time to do this kind of work is in September. The nights begin to get cool then, we are liable to get showers, the soil has not lost any of its warmth and the plants are able to make new roots and growth before Winter sets in.

How to Arrange the Plants.

In planting our borders we try to get the tallest plants near the back and are careful not to get plants of the same height to follow one another, as an uneven line when the plants are fully grown is much more pleasing. We work the smaller plants to the front where they have not to struggle with the tall-growing kinds and, as they are mostly all lovers of sunshine, in such a position they have a much better chance to get sufficient light.

Of late years we have adopted the system of setting the large plants in the back rows about four feet apart and in the spaces between we grow large colonies of bulbous plants.

A MODERN METHOD OF GRAFTING CACTUS, ETC.

We note in *Die Gartenwelt* a method of grafting *Epiphyllum truncatum* on stems of *Pereskia aculeata*. The time of year chosen is that customary in this country, viz. January and February, at which period the plants are at rest, and require but little moisture. The grafts are simply attached by applying the two surfaces of stock and scion together. The stock is grasped firmly at a point 8-10 inches above the soil, and a cut made slantingly over a bud, and the thorns found at that height are carefully removed, and in order that the scion may be readily attached the leaf is cut off. The scion should be round and of the same size as the stock, and it must be cut slantingly in like manner; having done this the two surfaces should be placed together and a pin of some metal other than steel, run through both so that they are held firmly, and be bound carefully with thin bast, and then tied to a stick, and the pin removed. In this manner 8-12 scions may be worked on a plant. The grafted plants should then be laid in a sloping manner on the propagating bed, the tops being somewhat raised. In bright weather shade is required, and a moderate amount of moisture applied. In about three weeks the union is complete; and the young shoots formed on the stock may be removed, and struck as cuttings if such are wanted. After a few weeks, the leaves on the stock are cut off, and if necessary the ligatures, and air is afforded. The plants may be placed on a shelf or stage in an intermediate house, so that new shoots may develop on the crowns. In the middle of the month of May place the plants in a lukewarm frame and later report them. As a potting compost a friable soil consisting of two parts decayed wood, if possible that of decayed bark, one part leaf mould, and one part dung bed soil. Good drainage is very essential. The plants should be ventilated, syringed and shaded according to their needs. They will in the course of the summer make pretty little bushes. About the middle of September, a warm, light house or pit should be cleared for them, and at the beginning of October they will be showing their flower buds, which in early flowering species develop with rapidity. At this period the plants should be afforded water regularly, and must not be allowed to become dry at the root, or be exposed to the fumes of smoke or to gas, or the buds will drop.

Epiphyllums are much too seldom grown. The old method of wedge grafting seldom affords compact crowns, and several years go by ere a good plant is developed. Owing perhaps to this lack of knowledge of a more rapid method, the Epiphyllums have retreated into the background as saleable subjects. They are however paying plants in the winter months, good for the decoration of rooms, and readily acustoming themselves to the prevailing conditions. Early flowering varieties are *E. alba violacea*, *violacea grandiflora*, and *violacea grandiflora superba*; the last named two having long extended large flowers, coming in abundance, in November. *E. truncatum*, and *truncatum multiflorum*, both having pendant growths and rich red flowers are later in blooming. *E. spectabilis* rosea with a pendant habit of growth, and short stubby flowers, and pretty little heads, and *E. purpureum*, with dark green stems, an extraordinary fast grower, and somewhat pendant habit, having bright purple flowers, are useful decorative plants. Others of the genu deserving of attention are *E. Ruckerianum*; *Harrisoni*; *salmoneum album* and *rubrum*, the last two being miniature, small-flowered varieties, with pendant growth. *E. tricolor* blooms freely and is a beautiful variety, as likewise *E. Gaertneri*. *E. phyllantoides* with rose colored flowers, coming early in the year, and flowering three to four times annually, is a valuable plant. It seeds

CHRYSANTHEMUMS

We have the following ready for immediate delivery, which are the best for Commercial use. We do not include the Exhibition sorts, but will be pleased to quote those desiring such.

25 of a kind at 100, 250 at 1000 rate.

EARLY

Clementine Touse—Second early white, Oct. 20.

FORESTRY AT MASSACHUSETTS AGRICULTURAL COLLEGE.

From the beginning the Massachusetts Agricultural College has paid considerable attention to forestry. Courses of lectures have frequently been given, prizes offered and interest aroused in other ways. A considerable number of graduates from the institution have gone into forestry work and some of these are recognized today as amongst the leading professional foresters of the country. Nevertheless, there has been a strong feeling in recent years that the college ought to do more for forestry, and that in particular there should be established permanent courses dealing with modern professional forestry and forest management.

While something still depends upon the action of the present legislature, matters have progressed far enough now to make it seem fairly certain that the work can be opened up to advantage this coming autumn, with the opening of the fall semester, September, 1909. The plan is definitely to establish a complete and permanent department of forestry in the Division of Horticulture. President Butterfield and Professor Waugh have been for some months engaged in a quiet search for a suitable man to head this department. While the man has not been selected, there are two or three very promising candidates in view. No serious trouble is anticipated in securing a good man for the work.

The present plan is to offer two straight years of professional forestry. These will be given in the form of elective courses covering junior and senior years, and will have very much the same standing in the college curriculum as landscape gardening and botany now have. The courses will be available, therefore, not only to men who wish to become professional foresters, but a certain amount of the work can be elected by landscape gardeners, tree doctors, farm managers, or any other students who, for any reason, are interested in forestry. In all probability some short courses will also be given. Professor F. William Ranc, state forester, will continue on the staff of the college faculty as lecturer in forestry and will assist the department in various ways.

The courses of study proposed, though strictly professional and reasonably complete in themselves, are not expected to duplicate the work done at such forestry schools as Harvard and Yale. The work in those in-

stitutions is post graduate in character, while at Massachusetts Agricultural College, the courses will be of undergraduate grade. Furthermore, a definite understanding has been secured between the Massachusetts Agricultural College and the two institutions named looking toward direct cooperation. It is expected that men who take forestry courses at M. A. C. and afterward go to Yale and Harvard forest schools will receive full credit for such courses.

The establishment of this new department means a decided advance. It is a big undertaking, but one which is sure to succeed because of the widespread interest in forestry.

BOOM THE CHRYSANTHEMUM SOCIETY.

Editor of HORTICULTURE:

Dear Sir:—As a member of the Chrysanthemum Society of America I wish to express my appreciation and extend my hearty support to President Smith's appeal for an increase in membership of that organization. Mr. Smith very truly points to the benefits conferred to the growers of chrysanthemums generally by the work of the C. S. A. and its committees. And while he does not do so he undoubtedly could have offered practical suggestions which if acted upon would materially increase the benefits conferred. The work of the organization may not be above criticism (if you happen to know anything in the universe that is, please hold up your hand) and sincere criticism is solicited. But standing off with your hands in your pockets and criticising the other fellow, seldom accomplishes anything. In traveling the highway of human progress, you have probably noticed that it is pretty generally up hill, and for every one that is willing to give a helping hand to push the benzine buggy, there are nine who meander contentedly along, either doing nothing themselves or ridiculing the efforts of those who are, but ready to get in and ride as soon as the machine decides to go, or the top of the hill has been reached and there is prospect of a comfortable coast down the other side.

Perhaps it may seem like imposing upon good nature to ask it, but will not each member of the C. S. A. make a special effort to get at least one new member during the remainder of the year? I will guarantee to send one myself.

I. L. POWELL.

Millbrook, N. Y.

NEWS NOTES.

Seattle, Wash.—According to the annual report of the State Commissioner of Horticulture, a total of 1,186,470 packages of fruit grown in the state were taken by the Seattle market. In apples alone Seattle took 468,917 boxes as compared with 75,600 boxes taken by Tacoma and 62,169 boxes taken by Spokane.

Rochester, N. Y.—The McCollom tract of 120 acres has just been purchased by the Champlain Realty Company, a subsidiary company of the International Paper concern whose agent has charge of all its woodlands and proposes to use this tract as a nursery for raising Norway spruce and pine. 600,000 seedlings will be planted this year, and it is the plan to plant this number every year, at the end of four years transplanting them in the field, thus maintaining a steadily growing supply of spruce and pine. The forestry policy of this company may well be studied by many owners of waste lands so called.

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendel, Cleveland, O., Secy and Treas. Twenty-seventh annual convention June 22-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Bruggerhof, Pres.; Buret Landwehr, Sec'y.

Unfavorable Weather Conditions.

Occasional complaints of seeds rotting in the ground are drifting in, and the number of such complaints are likely to be legion as the weather could not better serve that purpose than the assortment we have been getting for several weeks. As a rule complainants are not considerate enough to admit that the failures in germination are due to the weather, but charge such failure directly to the seeds. Explanations are usually ineffective, and though veteran seedsmen may consider themselves immune, the manner in which many of these complaints are made is, to be very mild, most irritating. It goes with the business, however, and there is no escape.

Planting Delayed.

From numerous reports received during the past week, things are not going serenely in the planting of seed crops. Wisconsin and Michigan have been too cold and wet to permit the planting of peas, excepting in a very few instances, where small lots of Alaskas and other hardy peas have been "mudded" in, and these will prove largely a failure. As late as May 12th not ten per cent. of the peas had been planted. This means that they will blossom just at the hottest time of midsummer followed by the unavoidable blight. How serious this may prove none can say but it is causing growers some anxiety even now. Of course it may be all in the cards for the season to give us a bumper crop, but beyond dispute it starts under a decided handicap. Still let us hope for a fair crop, or a short one even, in preference to anything of the bumper order, as no greater misfortune could befall the growers than such a crop at this juncture, and particularly of the canners' varieties.

The Coming Convention.

Only a few weeks more and the seedsmen will gather at Niagara Falls, and they should have a most enjoyable time if good weather smiles on them. If it is only proverbial June variety nothing more can be asked—for "What is so lovely as a day in June?"

Retail trade continues active, but in lessening volume each week. It will be well into June before the business subsides, and it will be found one of the most prosperous the trade has ever experienced.

Personal.

Mr. and Mrs. Burpee are planning their third annual trip to Europe and it is said their two eldest boys will accompany them. This comes to us by wireless, but the sailing date is not known.

Howard M. Earl will start shortly on his annual or semi-annual trip to the Pacific Coast. It is said Mr. Earl may visit Europe on his return from the coast. While there is doubtless much enjoyment to be extracted from these trips, they mean hours and days of most strenuous physical and mental labor.

Notes.

Sioux Falls, S. D.—The O. S. Jones Seed Co. have decided to build at once a re-enforced concrete building to cost about \$35,000. It will be three stories and basement, 44 feet front, 142 feet deep, and must be completed before November 1 according to the terms of the contract. Bids will be asked for as soon as plans are completed.

From the vicinity of Chicago we learn that some of the onion set growers in the Bowmanville district have been so delayed by the spring rains that they are only just able at this writing to get on their ground to plant it. In the neighborhood of Pullman and Riverside the ground is higher and more progress has been made. But while the season is late, still the old advice may safely be followed, "Plant onion seed while the cherries are in bloom."

Leesley Bros., growers of onion sets outside the Chicago limits on the south west, have only just completed their planting. The cold wet spring has greatly delayed this work. A little over one hundred pounds of seed to the acre is used, making an enormous aggregate on such a large place. They plant by means of a beet drill and by attaching four of these, are able to cover the ground very rapidly. Leesley Bros. are progressive young men. They have lately leased a tract of two hundred more acres to further extend their business.

CATALOGUES RECEIVED.

James Cocker & Sons, Aberdeen, Scotland—Descriptive Catalogue of Roses, Border Plants, Shrubs and Trees.

Erhard-Frederiksen, Swindingegaard, Denmark—Wholesale price list of cauliflower, cabbage, and turnip seeds and grains.

Barrett Manufacturing Company; address, all leading cities in U. S.—Illustrated book of Tarvia, the great dust-laying composition for roadways.

John Gerard, New Britain, Conn.—Wholesale Price List of Pansy Seeds. Mr. Gerard is probably the most widely known importer of high grade pansy seed in America. His list is exceedingly useful and every pansy grower should ask him for a copy. The product of seven of the best pansy specialists in Europe is represented.

DETROIT NOTES.

Detroit and Mt. Clemens florists can congratulate themselves over the lucky escape from a hurricane last Saturday afternoon. This storm has done a good deal of damage around Kalamazoo, in fact early press dispatches state that several florists lost every light of glass, but this could not be verified. The storm passed out to Lake St. Clair, between Detroit and Mt. Clemens, destroying over a mile of telephone and suburban railway poles. The telephone service was seriously crippled for several hours and suburban railways had to be abandoned altogether.

Mr. Klage has just finished a beautiful cold storage room 20 x 25 all concrete—the best of its kind in this district.

Mrs. J. F. Sullivan made her first appearance in the store Saturday. We all are glad and congratulate her on her recovery from a 9-weeks' serious illness with blood poison.

NEWS NOTES.

Dayton, O.—The National Plant Co. is in the hands of a receiver and has been advertised for sale.

Attica, Ind.—The greenhouses of the Attica Floral Co. were severely damaged by a recent hail storm.

One hundred and fourteen entries have been made in the contest for the Springfield (Mass.) Republican's prizes for attractive door yards.

CHICAGO NOTES.

Among the Growers.

H. C. Blewitt of Des Plaines, Ill., regards the price of sweet peas as having averaged too low the entire season to be profitable, though he is by no means intending to abandon them. He has fourteen benches, seventy-five by five feet, and grows the standard varieties in pink, white and lavender. He is testing a new shell pink and a lavender that is almost a sky blue which, if they prove worthy, he will grow extensively next year. The old variety, Emily Henderson, he finds the best summer white.

Trade in the vicinity of the cemeteries is unusually lively. The backward season has made this work, always crowded into a small space of time, more than ever so. The man with stocky geranium plants in bloom now, is much sought after. The supply is not likely to meet the demand.

Frank Ben thinks there will be no geraniums to spare on Decoration Day, as advance orders are taking everything unusually early. Vincas appear to be a little scarce also, owing probably to the dry summer of last year.

Frank Oechslin looks for a prolonged spring trade. Geraniums not in bloom now will come on late and help out in the shortage so generally found in early June.

A. W. Myers handles a great many lilacs. He says that while they are later than last year, the few hot days have hurried them on so that they will be all past by Decoration Day.

Sam Pearce is still cutting daffodils and his stock looks as fresh as early in the season. He reports bulbous stock on the whole as much more of a success this year than last.

The A. L. Randall Co. has secured a ground floor location at 98 Lake St. for their seed and poultry department and have put the business in charge of Mr. Seeley, formerly with Vaughan's Seed Store.

Personal.

Ernest Oechslin is able to be about his greenhouses again, but feels decidedly weaker for the terrible experience he has gone through.

The home of J. Meschler, superintendent of the Jewish Cemetery, was entered and money and clothing stolen, it is reported.

Miscellaneous.

H. R. Hughes has again been drawing crowds with a modern advertisement—a May party participated in by French dolls. Posted above the outside of the entrance was an invitation to one hundred children to come to a May party Saturday night, a real affair a stage to be placed in the window where the children were to dance to the music of an orchestra and a May queen to be crowned on a throne. When the evening came the crowd on the street must have numbered one thousand. They began to arrive by six o'clock, and at ten there were many still watching the happy scene. The Sunday papers had cuts and Mr. Hughes probably scored his best entertainment in the history of the store. Mr. Hughes' methods of advertising are unique and costly but he says they pay.

What looks like a good carnation support will be put on the market by

a leading supply house and full description given next week. It is the invention of Mr. French of Poehman Bros.

Two warm days, May 12th and 13th, brought out the blossoms on the fruit trees. There was no gradual opening up. The trees were perfectly bare on the 12th and in full bloom on the 13th.

Florists will have no trouble getting their ice. The differences between the dealers and their drivers have been settled.

The Bohannon Floral Co. will move on June 1 to the new University Club building, 11 Monroe street.

Roses and
Carnations
A Specialty.....WHOLESALE
GROWER of CUT FLOWERS**CLUB AND SOCIETY NOTES.**The Northern Horticultural Society
of the United States, Inc., held its
annual meeting at the Hotel
Macon, Chicago, May 18-19.The Florida State Horticultural Society
held its annual meeting at the
Hotel Macdonald, Tampa, May 18-19.
The commission that
was organized for
handling citrus fruit in California
has been organized.The growing industry were to be fully
assured.A delegation of the garden com-
mittee of the Massachusetts Horticul-
tural Society visited the F. L. Ames
estate at North Easton and the Har-
vard Botanical Garden at Cambridge
this week to inspect the spring garden-
ing, which is splendidly done at both
places under the superintendency of
Mr. N. C. Gray and Robert Cameron, re-
spective gardeners.

Flower Market Reports.

BOSTON. Market is reported as "no good" this week. A visit to the various marts

where flowers are distributed by growers or commission dealers confirms this assertion for the stock is piled up in hopeless profusion and values exist on paper only, for no offer, however low, is refused. Last week was fairly good and no cause for complaint was in evidence until the present week. All eyes are turned to next week with its Memorial Day activity to retrieve the losses of the present. As to quality, nothing but praise can be accorded to the stock which is being sent in. The cool weather is, no doubt, partially responsible for the excellent quality which compares favorably with the very best product of the early spring season.

A rather unsatisfactory week from a business standpoint completed the first half of May. The supply was greater than the demand in nearly all lines, especially in roses. The week opened rather slow with considerable stock on hand from Saturday and business continued dull throughout the week, Thursday being perhaps the best day. Friday, usually a good shipping day was a disappointment. Everyone has a good crop of Beauties on and all other roses are fine in quality. Kaiserins are now coming in freely, some with long stems. Pansies are plentiful but quality a little poor. They do not have the substance so desirable in pansy stock and sell slowly or are thrown away in many cases. Candytuft in white and lavender is in stock. Cattleya Mossiae are seen at McKellar's and are of fine quality. Carnations are selling too freely for such good stock and if the warm weather continues they will be hurried along faster than growers like with Decoration Day just ahead. Lilacs are not out yet but are coming in from southern Illinois. The very last of the bulbous stock is being cut now. Sweet peas are coming with very short stems. Callas are in excess of the demand, a condition which has prevailed most of the season. Flowers shipped from the south now are limited to peonies, of which there are many and of fine quality. Trillium, well known as Wake Robin, is in the market. It attracts attention but does not bring the dollars. Daisies are on rather short stems but sell fairly well. The violet season is over. The last boxes received were entirely worthless.

DETROIT All of us ought to be well satisfied with local trade conditions. When supply is good in quality, liberal in quantity and cleaned up every day we certainly have no cause for complaint. Of course, outdoor stuff is very backward and this will influence Decoration Day business, but while the weather is bad the plant man will have his inning but temporarily must exercise a good deal of patience.

PHILADELPHIA When the weather is good and business is humming it's a fairly pleasant job being a market reporter. When the weather is too good, and the market no good, there's only one job worse, and that's writ-

ing up the death notices. This week every wholesale center seems to wear sackcloth and ashes in its atmosphere—wrapt in a cloud of sable by day and the stillness of death by night. When one asks the god of the machine in such places "how's things this week?" he looks at you with a woeful countenance and points to a pile of boxes containing thousands and thousands of the choicest gems of the universe, and says: "don't ask—we haven't opened these yet and probably never will." All of which is very depressing to a sympathetic scribe who delights in describing the cheerful side of things; so he trusts that this week you will excuse him from going into the gruesome details. Some of the growers were growing last week about the smallness of their returns. When these good souls get their returns next week they better take a bracer in advance. In the words of Worcester and Webster it is surely a case of "cheer up—the worst is yet to come!" Good roses were cleaning up on Saturday, the 1st inst., to the street men, at two dollars per thousand. On the whole, we think the week ought to be baptized "Donation Week." There were no prices—if there were one would have had to use a million magnifying X-Ray microscope to see them.

NEWS NOTES.

Everett, Mass.—Osgood Bros., florists, report that two men have been soliciting orders in their name without authority, and warn the public against them.

Cambridge, Mass.—H. L. Cameron, North Cambridge, a leader in high-quality spring bedding stock for the Boston market, has the contract to supply all the bedding material for Cambridge Center and all the arrangements for November 1st. From two to three thousand geraniums are carried away every morning. In Cameron's greenhouses by peddlers. The season is backward and geraniums as well as other flowering bedding stock are very late in coming into bloom.

PHILADELPHIA NOTES.

Mr. and Mrs. Joseph Heacock sailed on the 20th inst. for Bermuda. They expect to be home again in about ten days.

David Beattie has resigned his position with Fred Ehret and engaged with Julius Wolff, Jr.

Wallace Faust, late with Keegan, intends to start in business for himself on South 13th, between Chestnut and Walnut streets, a locality in which he has long been a well-known and popular figure.

Visitor this week: John De Buck with a consignment of orchids from South America.

Alfred Burton is busy with building operations on the new range back of the old establishment and has same ready for planting. In line with the spirit of the times he is following up the demand for orchids and will devote a part of his place to this crop.

George Burton, nearby, has also been extending his area of glass—in part for orchids. On this place was noted a strong favor for the tile bench. Much has been said about this as an economical and healthy aid to commercial culture, and when a conservative like Mr. Burton takes it up there must be something worth considering. It seems the difference of cost between this and wood is only trifling.

The Joseph Heacock Co. have completed the remodeling of their plant, bringing same up to modern standards over the whole establishment. The smaller houses have been rebuilt—two and three to one in some cases—in other cases the partitions have been removed, thus giving greater facilities in heating and working operations. Besides palms, orchids and Killarney roses, which are the leading crops, an interesting specialty at present is their new pink carnation, Dorothy Gordon, a novelty which has won honors wherever exhibited and which will be put on the market next spring.

NEW YORK MARKET REPORT.

We regret that we are not able to record any appreciable change for the better in conditions in this flower market here as compared with last week. The situation remains about as recorded in our last issue. A glut of everything encumbers the market and with very little demand. There is no fixed value on anything. Among the seasonable products are lilies, which are very abundant, and peonies which are in moderate supply only as yet but are expected to add to the burden within a few days.

PERSONAL.

Visitors in Boston: H. H. Battles and George Rauch, Philadelphia.

Charles Agnew has taken a position with the Baur Floral Co., Erie, Pa.

A. Wiegand and wife of Indianapolis, Ind., contemplate a European tour this summer.

J. K. M. L. Farquhar of Boston, will start in June for an extended European trip.

St. Louis, Mo.—Charles Cannon is now manager of the store of the Maryland Floral Co. at 4651 Maryland avenue.

A. Jackson Norton, son of M. H. Norton, ex-president of the S. A. F.,

and Miss Mae Davie were married at Dorchester, Mass., on May 16.

R. W. Wells, for the past three years connected with the Central Floral Co., Kalamazoo, Mich., was presented with an elegant watch, a charm by his associates on the occasion of his departure for his new position in Chicago.

INCORPORATED.

Sheboygan, Wis.—John H. Allen Seed Co., E. M. Parmelee, W. B. Lucas, A. L. Sommer, capital, \$110,000.

NEWS NOTES.

New York, N. Y.—The Manhattan Flower Market opened for business on May 8 at 46 West 28th street.

Percy Morse, a young seed grower of Watsonville, near Salinas, Calif., was killed in an automobile accident on the 16th inst.

M. Cochrane Armour of Chicago has purchased sixty-five acres of land in Pasadena, Cal., for residence, and sunken gardens are to form one of the landscape features.

HORTICULTURE is a bang-up journal of floriculture and every florist in the trade should give it hearty support.

HORTICULTURE IN THE ASCEN- DANT.

"Man has been in quest of rural happiness ever since the expulsion of Adam and Eve from the garden of Eden. He has tried the large grain and stock farm, only to find the long winter too lonesome or his work too much isolated from his neighbors, so he gladly exchanged the country for what appeared to be a charming city life, but now we see men from all walks of city life seeking homes in the rural districts of the United States, not to become general farmers, but to take up some special phase of the work and in the majority of instances it is fruit growing."

W. S. Thornber, professor of horticulture at the experimental station at Washington State College, Pullman, said this on a recent visit to Spokane, when he also delivered an address before the Spokane County Horticultural Society.

"The Yankee of today," he added, "is true to his former traits; those living in the city are in quest of rural happiness, while those of the country are looking forward to the time when they will have money enough to revel in the joys of city life."

"Horticulture in its broad sense materially aids in solving this problem inasmuch as it demands small farms, thickly populated sections, which makes possible electric railways and lights, telephones, rural mail routes and, in a measure, combines the best of city and country in one useful and busy life.

"Many are desirous of becoming proficient in the craft, but expect to do so only in a classroom or well-equipped library. Such men can never learn to thoroughly appreciate the work until they have come in personal contact with all the practical phases of the work, but the west demands a practical man—one who can do as well as tell the other fellow how to do.

"The department of horticulture has had 26 calls for trained horticulturists in the last 12 months, at salaries ranging from \$1,200 to 1,400 a year for the small farm, to from \$3,000 to \$5,000 for the company orchards. These calls have been without exception for theoretical as well as for practical men. They say it is not good form to look ahead too far, but judging from the demands of the last 15 years a thoroughly trained horticulturist will have no difficulty in securing a first-class position in the future.

"The broad scope of the field of practical horticulture is in a measure responsible for this demand for trained men. A prominent horticulturist said recently the field is so broad that a person may follow any one of 26 general lines of work and yet remain entirely within the ranks of the profession.

"When one considers the almost unlimited opportunities that are open to trained nurserymen, florists, seedmen, landscape gardeners, fruit growers, plant breeders, experiment station workers and teachers of horticulture, he is then able to more fully appreciate the extent of the field of horticulture that has been opened to the

trained man or woman, and those who like it will make no mistake in carefully considering its merits as a life work."

Professor Thornber intimated that too many men are going into horticulture in these days of fruit growing prosperity in the Northwest as a final resort to accumulate a fortune or simply as an easy way of obtaining a comfortable income, adding:

"While the opportunities are unlimited and the profession is far from being full, let no one indulge in it with dreams of sudden riches."

GIGANTEUMS IN BLOOM BY

MARCH 20TH, 1910.

One of our most successful growers of Lilium giganteum, contrary to the general impression, says there is no difficulty about getting these in bloom by March 20th. His treatment is as follows (written specially for the benefit of readers of HORTICULTURE):

Lilium giganteum if grown successfully is one of the best paying crops. For the last five years we have grown this variety mostly and have had it in bloom almost every month in the year. Many growers are afraid to force it for an early Easter, but experience has taught us that if Easter should come on March 15th we could have giganteums in bloom then as well as April 15th.

The best and surest way to grow it is to push it as quick and fast as you are able. For an early Easter like March 27th, put up your bulbs in the first week of December and put them in the warmest house you have on the place, where the temperature runs between 65 and 70 degrees at night, under the bench, but don't forget the hose, as the water plays the important part in the beginning. Soak them every day till the tops commence to show. A lily bulb is like a good many other bulbs in that it takes a tropical temperature to give it a quick start.

In two weeks the growth will be about 2-3 inches long but keep them under the bench till the growth is about 8 inches long which will help you to get a much longer stem. It will not take longer than four or five weeks to get them 8 or 10 inches in height. From now on you can put them on top of the bench and your battle is won when you have a healthy lily 8 to 10 inches. With a moderate temperature and a skillful grower you will have no trouble in getting them in at the right time. Of course after you have them on the bench you must use the water more carefully according to the temperature of the house as the roots of a lily don't care for too much water after they are well started.

During Recess

YE WHIMSICAL SAYINGS OF H. A. B.

The "dummy" for the program of the annual picnic of the New York Florists' Club is before us. The "Greetynge" which adorns the first page, the work of the irrepressible Harry Bunyard, is decidedly original, so we reproduce it for the perusal of our readers during recess.

GREETYNGE.

Oyez! Oyez! Oyez!

About this thyme ye almanacke sayes, looke out for ye New Yorke Florists' Clubbe annual bean feast, when ye stately dames, ye faire damsels, ye gallante gentlemen and ye joyous cherubes, gather on ye greene, to gambol and frolycke, fill yerselves up at ye barbeque and toast ye one another wythe meade and milke from ye caske and gentle bossie, and smoke ye pipe of peace.

As ye lion layeth down wythe ye lambe, so will ye grower of gaye posies mingle wythe ye wholesaile and retayle merchant prince, and shie castors at ye seed man and other campe followers.

So, hail all ye workers amonge ye flowers, hail and foregather on ye annual hollidaye, leave care behind and brynge ye smile and faire spouse or blushynge mate and sweethearte and ye offsprynge, and joine in ye merrie feaste and frolycke.

Ye good ship Ysabelle will bear ye to vlyand glaydes flowynge wythe ye milke and honeye, and bear ye safely back under ye watchful and silverie moone when ye faire ladyes and younge gallants can tell each other of ye love and constancy and of ye joyous daye while dancing ye stately minuet, and dodging ye cupid's arrowe.

So ye Committee praye ye all to come on ye joyous annivsarie.

WELL SATISFIED.

Please discontinue my ad. Am well satisfied with results. Had only small surplus. Will remember you next time.

G. A. THIELE.

Frankford, Pa., May 17, 1909.

ROYAL HORTICULTURAL SOCIETY.

At the recent exhibition of this society Messrs. Barr & Sons made a fine showing of bulbous plants including many novelties. In tulips, mention may be made of T. Brunhilde with yellow and white tints, novel in coloring and of great size. Of narcissus, some of the most beautiful were, Salmonetta, a N. Leedsii with a corona of apricot color; N. poeticus grandiflorus; N. poeticus Epic; N. Leedsii Peach; N. incomparabilis Argent, in whose flower the corona is doubled; Cassandra, a N. poeticus variety; Janet Image, a giant Leedsii; N. poeticus The Bride; N. p. Glory and Dorothy Wemyss among white flowered varieties. Among yellow flowered Narcissus, Hon. Mrs. Jocelyn is a fine trumpet variety; Ranger Johnson is another. N. Gloria Mundi, an incomparabilis variety and Monarch, a trumpet, were capital flowers. This firm showed new varieties differing in some respects from older ones, some possessing coronas more brilliant in color as these are wider spread. Such are Masterpiece, N. triandrus hybrids, White Lady and others. A silver gilt Banksian medal was awarded the group.

J. Veitch & Sons showed among other interesting things a large number of hybrids of Phyllocactus, very pretty plants for early summer flowering and needing only intermediate house treatment, for which a silver gilt flora medal was awarded. Messrs. Veitch also exhibited a large collection of Himalayan rhododendrons and hybrids of these species, of which the more showy in color or size of the blooms were Mrs. Butler, pale pink flowers, fragrant; Mrs. Thiselton Dyer, flowers of a shade of lilac; Pink Pearl; Thompsoni, blood red; Kewensis a hybrid of R. Aucklandi, blush, very beautiful; Dr. Stocker (new) white with a pink eye; Falconeri; Glory of Penjerrick, a fine hybrid of R. Aucklandi, etc.

The display of roses was very extensive, all the well-known ramblers of European and American origin being shown in large numbers. Among the exhibitors in this department were Messrs. Veitch & Sons, F. Cant & Co., B. Cant & Sons, Hugh Low & Co., W. Paul & Son and G. Mount. In the group shown by the latter there were pyramids of the new H. T. Joseph Lowe, sent out by Messrs. Lowe and Sawyer, of Uxbridge, a bloom of a soft rose tint, with a very pleasing bud. Rhea Reid as shown was not the equal of Liberty or of Capt. Hayward, being smaller and less good in tint than either.

OBITUARY.

Mrs. John Galvin.

Mrs. John Galvin, widow of the late superintendent of Boston's public grounds, died at her home in Dorchester, Mass., on May 15. Mrs. Galvin had reached the ripe age of ninety years. She was born in Limerick County, Ireland, and came to this country when a young girl. She married John Galvin in 1847 and they lived happily together until the death of Mr. Galvin 54 years later; their home a centre of good cheer and a model of hospitality.

Two daughters and three sons, with many grandchildren and great-grandchildren, survive. Of the sons, John Mitchell Galvin, for a number of years Boston city clerk, and recently a candidate for Congress, is well-known in politics, and Dr. George W. Galvin is widely famed as a surgeon. Her third son, Thomas F. Galvin, has continued his father's business and is a commanding figure in the flower trade of Boston.

Her eldest daughter is the widow of Capt. George P. Ryan, room-mate of Admiral Sampson at the naval academy, who was lost off Hatteras in November, 1877. Her youngest daughter is Mrs. Charles M. Drake of Boston.

The meeting of the Connecticut Horticultural Society at Hartford, on May 14 was presided over by Vice-President John Gerard. A committee consisting of G. W. Smith, W. W. Hunt and G. T. Whiton was appointed to draft a set of resolutions of sympathy with President Huss in the loss of his wife. G. W. Smith delivered an interesting address on "Milk Analysis" for which a vote of thanks was passed by the society. Some splendid Marshall strawberries, grown under glass by Mr. Huss, received an award of merit.

If You Are Going to Build This Year

Let's get together and talk this greenhouse matter over. In another month building will be going merrily on, and you want to have things all settled, so your new greenhouse will be among the number.

Now you know the kind of house we build—and that there is none better—you know that we have a reputation for pleasant dealing, so send for our illustrated matter—and let's get together and do business.

Hitchings & Company
1170 Broadway New York

NOTE that this is the L & B Sectional Iron Frame Construction, with the Guaranteed Wrought Iron Post partly impeded in the concrete sides. Also that our Close-Working Side Ventilation Apparatus is used, and that the Ice-Clearing Eave Plate has a U-shaped Drip Gutter. This is not an experimental construction a few months old.

LORD AND BURNHAM COMPANY,
Irvington-on-Hudson, N. Y.

NEW YORK BOSTON PHILADELPHIA CHICAGO

THESE GREENHOUSES LOOK LIKE BUSINESS—AND YET HOW ATTRACTIVE

And why shouldn't a greenhouse be attractive? What is the use of building those heavy, illy proportioned affairs when you can get effects like this, and have houses that will grow more and better plants and flowers?

Everyone, of course, claims their greenhouses to be the best, but there is one thing certain, none are as light as the U-Bar, and the lighter a house is the better it is—any gardener knows that.

You see **this construction of ours is patented, and no one else can build these houses.** If you want a house freest from repairs, one that heats easily, and will out-strip any other house in the quantity and quality of flowers, then you want the U-Bar. Send for Catalog.

WHITE KILLARNEY

It is needless to say much about the value of this

NEW WHITE ROSE

its value is so well established. In support of this statement, we might say that we intend to plant not less than 20,000 for our own growing. We have a splendid stock of both grafted and own-root plants, which we can deliver immediately on receipt of order,—gilt-edged planting stock. We guarantee perfect satisfaction.

STRONG PLANTS, 2½ in. pots, own-root, \$30.00 per 100; 250 for \$70.00; \$250.00 per 1000.
GRAFTED PLANTS, \$35.00 per 100; 250 for \$82.50; \$300.00 per 1000.

HYDRANGEAS IN BUD AND BLOOM

We offer fine plants, well budded, just beginning to show color; in splendid shape for immediate use.
6-in. pots, 4-5 blooms each, \$9.00 per dozen.

Large Plants in Tubs

We have a large stock of splendid plants grown in tubs and half-barrels for July and August flowering.
Fine plants in tubs, \$2.00 each. Extra large plants in half-barrels, \$5.00 each.

A FEW SEASONABLE SPECIALTIES

BOXWOOD PYRAMIDAL. Fine plants 3 ft. high, \$2.00 each; 4 ft. high, \$3.00 each; 4½ ft. high, \$4.00 each.

RUBBER PLANTS (Ficus elastica). Very large, bushy plants in tubs 4 ft. high, fine for summer decoration, \$3.50 each; 6-in. pots, 3½ ft. high, \$9.00 per dozen.

PANDANUS VEITCHI. Fine plants, 6-in. pots, \$12.00 per dozen.

PHOENIX ROEBELENI. Extra fine plants, 5-in. pots, \$18.00 per dozen.

Davallia fijensis

The accompanying illustration represents a fine specimen of *Davallia fijensis* grown for Mrs. B. B. Tuttle of Naugatuck, Conn. It would make a nice companion to that fine specimen of *Adiantum Farleyense* grown by Mr. Urquhart and pictured in HORTICULTURE April 17 last. But it takes more than two years to grow this fern to that size.

This plant has been on the premises for the last fourteen years to my knowledge, and heaven only knows how many years prior to that. It has never been broken up or divided and has not been repotted for over six or seven years, but it keeps on growing and producing its two crops of fronds annually which are very useful for cutting as they have great lasting qualities. The specimen stands now three feet high and measures over four and one-half feet in diameter.

The plant receives liberal waterings with liquid manure while making its new fronds until these are fully

developed and hard water is gradually withheld and sparingly given until the old fronds are cut and the plant starts to grow again.

M. J. Ope

Naugatuck, Conn.

Notes from the Arnold Arboretum

The ornamental Apples have bloomed again splendidly this year at the Arnold Arboretum and particularly the large group at the foot of Peter's Hill was a mass of white and pink and presented a glorious sight while the bloom was in its prime. Among the numerous kinds more or less well known I should like to draw attention to three desirable but very little known forms. One of them is *Malus floribunda* var *Arnoldiana* (*M. Arnoldiana*) which originated at the Arnold Arboretum some time ago, but was described and published as a new variety only a few months ago. There is as yet only one plant in existence but grafts have been distributed last winter and it will probably be in trade before very long. *Malus floribunda* *Arnoldiana* is much like the well known *M. floribunda* but superior to it chiefly on account of its larger and more numerous flowers which are of a somewhat lighter color. It is a beautiful shrub, the spreading and gracefully arching branches loaded with large slender-stalked flowers carmine pink in bud and nearly white when fully open. The yellow berry-like fruits are also larger than in *M. floribunda*.

Another Apple which merits to be better known is *Malus atrosanguinea*, supposed to be a hybrid between *M. Halliana* and *M. rivularis* or perhaps *M. Toringo*. It is one of the few Apples with decidedly pink flowers and forms a shrub or small tree with slender branches densely covered with carmine pink flowers. On account of its denser habit and more closely set flowers it is a more effective shrub for planting in groups than *Malus*

Halliana, though the latter is certainly more graceful if seen at close range with its larger individual flowers of a purer pink. The third Apple with pink flowers is *M. Niedzwetzkyana* which, however, is inferior in beauty to the two others, as it is a coarser tree and less free flowering. All three are valuable for the color of their flowers as they form a pleasing contrast with other flowering Apples which all have white or but slightly pinkish flowers at least when they are fully open.

A third little known species is *Malus Sargentii* very distinct in habit from other Apples. It is a low shrub scarcely exceeding three or four feet in height with almost horizontally spreading branches loaded with pure white flowers. It blooms about a week later than most other Apples, at the same time with *M. Toringo* which it resembles much in foliage, but *M. Toringo* has smaller pinkish flowers and slenderer partly arching branches.

A few years ago we received plants of *Cercis chinensis* which have proved hardy at the Arboretum and show that this beautiful species can be grown successfully in this latitude. *Cercis chinensis* is a much finer plant than the native *C. canadensis*; it has larger flowers produced in great profusion and blooms very freely even as a young plant. It is certainly a valuable addition to our early flowering shrubs particularly as shrubs with pink flowers are not very numerous.

During the coming week the Lilacs and *Rhododendron Kämpferi* will be in full bloom and will form then the most attractive feature of the Arboretum.

theory be true that the chill comes from the numerous icebergs that have been seen floating along the coast, then a continuance of the low temperatures may perhaps be expected and the result should be greatly to the advantage of the flower business, the cool weather serving to keep people in the city later than usual. The outlook is certainly good for a lively June business and we think that those who make liberal preparation for it will not be disappointed.

Our reports from the various wholesale flower centres for the past few weeks indicate a very unsatisfactory state of affairs. The usual explanation advanced for a congested market—overproduction—is, of course, easy to fall back upon but when in the course of a day's travels in crowded shopping districts and among the residences of rich and poor alike, one sees scarcely a flower worn on the person or displayed in the window of either home or store, it seems logical to inquire why this abundance of floral material is not more generally distributed and to reason that so long as ninety-nine out of every hundred people are destitute of flowers this talk about overproduction is largely fallacy.

Standing, one morning not long since, on West 28th street, the centre of the inadequate methods of great wholesale flower trade of New York, we saw one department store wagon loaded up with a purchase said to amount to over six hundred dollars, yet that wagon load was comparatively an insignificant item in the grand total of the daily wholesale distribution through this and other channels entirely outside of what are known as the legitimate retail flower stores. It is evident to any one familiar with these wholesale marts that really a very small proportion of each day's receipts can be consumed by the regular flower stores as at present conducted and the conviction is forced upon us that there is something radically defective in our accepted methods of flower distribution. Everybody is fond of flowers; they like to see them and to have them constantly about the home, the office and the person, and in every place of public resort. To supply even a small fraction of probable buyers would require many times the biggest "over production" ever yet seen. From this distance it looks to us as if the majority of the retail flower sellers were sleeping at the post. The question of what can be done to create and stimulate a wider, more stable and permanent market is a very live one.

Important

If you have sent money or important communications by mail to this office within the past two weeks and have not received our acknowledgement of same please communicate with us with full particulars at once, as we have reason to suspect that mail addressed to us may have been stolen.

The spring we have been passing through will long be remembered for its protracted series of cold days and nights. Of course, no one can tell how soon it may veer around and give us an equally vigorous roast but if the

A forecast
for June

European Horticulture

THE BERLIN INTERNATIONAL EXHIBITION

In continuation of the remarks concerning new varieties of plants in last week's issue, mention may be made of the dwarf *Impatiens Holstii* varieties now becoming popular on the continent of Europe and in Great Britain. *I. H. nana Liegnitzia*, a variety by Herr Otto of Liegnitz in Germany, grows to a height of scarcely 10 inches, and when it is in full bloom it is a pretty object, the color being an orange red. The blooms are not so readily detached as those of *I. Sultani* varieties—an advantage. The plant does well in a pot, and as a bedder in half shady situations, and bids fair to become a general favorite.

Primula obconica grandiflora Feurkonegin is an improvement on *P. o. kermesina* the color being more fiery and carmine like. It was raised by Herr Arends, of Ronsdorf; who, it may be stated, is noted for his *P. o. gigantea* varieties, which excel the best foreign ones, surpassing even those of the Dutch raisers—a fact very noticeable at the Berlin show. In varieties of *Primula sinensis*, one named *Morgenrote* shown by Herr Palmann of Eberswalde was much admired. It is a chance seedling, and it will without doubt be speedily followed by *Abendrote* of a similar tint. This is the way with the Germans.

NEW ROSES

Madame Leon Pein is of a silvery blush tint; in the centre whitish orange, these tints being heightened by various fine shades. The flower is extraordinarily enduring. The flower bud is of the favored filbert form which on expanding shows the full beauty of the flower, set off by the shining leathery foliage. An abundant blooming variety, it is well adapted for second early and late forcing and for a solitary specimen as well as for beds. It is said to have a preference for a heavy soil. The variety is classed as a Hybrid Tea.

MARQUIS DE SINETY. This likewise belongs to the Hybrid Tea race, and of the color of red ochre—quite a peculiar one among roses. In growth the plant is vigorous and admirably adapted for producing flowers with moderately long stalks. It is a good bedding rose, or for making specimen plants.

MADAME PHIL. RIVOIRE, is an apricot-yellow rose, having a tinge of carmine, very large, and of pretty shape, inclining to globular with a fine fragrance. This variety is less adapted for forcing than for growing in cold frames, for beds, and for pot culture in the cold greenhouse.

SENA TEUR ST. ROMME. This scarcely known Hybrid Tea that was put into commerce in 1905 is of a coppery salmon red tint, and china pink, with a yellow ground color shaded carmine. The flower in the bud state is filbert shaped, and when fully expanded, it becomes a large, beautiful bloom, nearly weather proof; as is also the plant itself.

PRINCE DE BULGARIE, H. T. is getting to be well known by rosarians everywhere. The flowers are pink

on a yellowish ground color, with over all a deep rose tinge, medium size, and, in the bud stage, not very effective. The bloom is firm, of good substance, does not suffer in color or fragrance by long transportation and has a promising future as a cut flower.

THE FLORA GARDEN, COLOGNE

The municipality of Cologne have the intention to take over the large Flora Gardens, at that city, which cover 6½ hektar, and were laid out in the period 1862-1864, and are owned by a joint stock company. The authorities have the intention to turn the Garden into a botanical institute. The director of the small botanical garden facing the Vorgebirgstor, which had hitherto served for study and school purposes, is Dr. Esser. The city will acquire the site for 500,000 Flora shares.

A MATERIAL FOR TYING-IN GRAFTS AND BUDS

In this country and Germany bast by preference is the material used for ligatures in grafting and budding; whereas about Orleans, cotton or woollen thread are thus employed for roses and peaches, and bast for others. At Plantieries, Metz, the leaves of a marsh plant, *Sparganium ramosum* are used for this purpose, and it possesses considerable advantages, in its breadth; it must sometimes be divided, and it affords an airtight bandage; cutting into the bark is avoided, and removal in the spring is not required.

BERBERIS ANGULIZANS

The above species of barberry, is one amongst twenty others cultivated by the Henkel Nursery Co. at Darmstadt. It is worthy of notice by the gardener on account of the wonderful tints the foliage assumes in late summer, and retains till the leaves are destroyed by frost. The plant possesses elegant pendulous shoots, and the foliage when old, becomes leathery, and of orange and green and red tints, making the shrub exceedingly decorative in the autumn months. The leaves offer beautiful material for bouquets, and other florists' articles at that season; and the shrub has a good effect on a rockery, or as a group on the lawn.

Sunderland Province

The Eremuruses

See Cover Illustration.

The eremuruses are among the most majestic plants of the hardy garden. With their grand spikes, six to ten feet in height, of sweet scented white, pink or golden flowers they make a conspicuous object in the garden landscape in June and July. The species most desirable are *Himalaicus*, white, *Bungei*, bright yellow, *Robustus*, peach pink and *Elwesianus* rose pink. A sunny but sheltered position is to be preferred. The succulent flower scapes are easily snapped by the wind and should be staked.

The greatest difficulty in growing *Eremurus* in the latitude of New England lies in guarding the young shoots from frost. They start early in April throwing up strong shoots two to three inches in diameter which, because of their rapid growth and succulent condition, are very easily injured. A slight mulch of straw should therefore replace the heavier winter mulching which is usually removed from herbaceous borders in the early days of April.

NEWS OF THE CLUBS AND SOCIETIES

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual free May exhibition was held at Horticultural Hall, Boston, on Saturday and Sunday, 22nd and 23rd inst. It was an excellent and fairly representative show for the season, which is quite backward. Spring flowering shrubbery, bulb flowers and other early border bloom were abundant. From Robert Cameron of the Botanical garden came a most interesting selection of the best of the old and new narcissi and Darwin tulips. W. W. Rawson & Co. were represented by a very extensive collection of Darwin and Cottage tulips, said to comprise over 300 varieties. The Boston Park Department made a big display of tree and shrub flowers such as red and white flowering dogwood, Azalea Vaseyi, pyruses, etc. The largest exhibitor in this section was R. & J. Farquhar & Co., who staged great masses of lilacs, tulips, pansies, violas and other showy material among which the brilliant orange *Trollius Japonica* Excelsior attracted general attention. Francis Skinner showed fine trusses of *Rhododendron giganteum* and received honorable mention therefor.

Among the exotic displays the groups from Julius Roehrs Co., Ruth-erford, N. J., were particularly worthy. In the orchid group was a fine specimen of *Laelia-cattleya Canhamianum* var. Rex to which a first class certificate was awarded. The *Pescatorei* odontoglossums were the best-bloomed we have seen in a long time. Other attractions were a pure white *Cattleya* Mendelli and superb specimens of *Phalaenopsis Rimestadtiana*. A bronze medal was awarded for this display. The Roehrs group of stove plants also contained many gems, including *Tradescantia Regina* which was accorded honorable mention. J. T. Butterworth staged two specimen plants of *Cattleya Mossiae* which won for him a silver medal. They bore upwards of fifty perfect flowers each and were constantly the centre of a group of admiring gardeners. W. A. Riggs won a cultural certificate with some pyramidal trained ivy geraniums and *Cero-leodendron Balfourii*, the latter with unusually heavy flower trusses. A group of profusely bloomed plants of *Calceolaria ruzosa* Golden Queen, from E. J. Milton was much admired. Mrs. J. L. Gardner had a fine table of cattleyas, cyrtipediums, Miltonias, etc. In the large Farquhar group previously mentioned a quantity of forced material was included. Particularly interesting were some neat little *Cactus dahlia*s blooming in 2½-inch pots. Among them were *Rosa*, *Glory of Baarn*, *Gari-baldi*, *Duke Henry* and others. A new deep-blue hydrangea from Nikko, Japan and some forced *rhododendrons* were also among the Farquhar contributions.

The Bellevue Nurseries sent, among other interesting forced hardy plants,

oriental poppies blooming in 2½-inch pots, *Campanula Moerheimi*, etc. Old Town Nurseries were awarded honorable mention for a display of *Doronicum* excelsum. From Mrs. F. Ayer came a gorgeous display of bloom of *Campanula Medium*, all colors, and a specimen *Queen Alexandra* daisy, pink flowered. Zonal pelargoniums from W. Whitman, carnations from M. A. Patten, pansies from Mrs. A. W. Blake, and a varied display from Mrs. E. M. Gill complete the list. A bronze medal was awarded to the Park Department for their shrub group, a first-class certificate to Mrs. Ayer for pink *Marguerite* and honorable mention to R. & J. Farquhar & Co. and W. W. Rawson & Co. in addition to the special awards already mentioned.

NEW ORLEANS HORTICULTURAL SOCIETY.

The above society met May 20, at their headquarters in Kolb's Hall. The committee on last outing reported a good time at A. Alost's handsome place on Gentilly Road, and that the host had surpassed himself in his efforts to entertain the members and guests. Votes of thanks were tendered the Steckler Seed Co. and the Metairie Ridge Nursery Co. for the loan of vehicles to convey the members and guests to Mr. Alost's hospitable domicile. It was decided not to have the annual outing to Grand Isle this year, but instead to hold the July meeting at one of the suburban resorts, have election of officers and terminate the event with a banquet.

J. A. Newsham exhibited fine flowers of *Cattleya Mendelli* and *Laelia Digbyana*, and R. Eichling, of the U. J. Virgin Co., showed several specimens of the Japanese flowering beans, which are very ornamental for shade purposes and for cut flowers in the summer.

A letter was received from the secretary of the Crop Pest Commission of the state, inclosing circulars relative to the brown-tail moth and calling attention to the law which makes it obligatory to report to the Commission any importations of foreign plants.

C. R. PANTER, Sec.

HORTICULTURAL SOCIETY OF NEW YORK.

The summer exhibition of this society will be held in the Museum building, New York Botanical Garden, Bronx Park, New York City, on Saturday, June 5th, 1909, and will remain open to the public on Sunday, June 6th. Liberal premiums, open to all competitors, are offered by the New York Botanical Garden, to be awarded by the exhibition committee of the council of the Horticultural Society of New York. Peonies, hardy roses, shrubs, *rhododendrons*, irises, etc., are specially provided for and the exhibition committee has at its disposal a sum of money which may be awarded for any meritorious exhibits of hardy plants or flowers not specified in the schedule. Exhibits under this class are specially solicited.

MINNESOTA STATE FLORISTS' ASSOCIATION.

The attendance at the meeting which was held at Meriam Park, May 18, was rather small, owing to the rush of the spring business. The committee on fall flower show will report later as to whether if held the show will be in Minneapolis or in St. Paul. Messrs. Holm, A. Swanson, Nagel and Ruedlinger were appointed a committee to arrange for a picnic in July. Otto Will, who returned lately from his wedding tour around the world, gave a short but very interesting talk on Japan and China and promised to give an illustrated lecture next winter.

AMERICAN ROSE SOCIETY.

Mrs. Gertrude Hubbard, a lady of Washington, D. C., has established a Gold Medal fund for the American Rose Society, by placing the sum of two hundred and fifty dollars in the treasury of our society, the interest accruing from which shall each five years be used for a gold medal, to be awarded to the most promising new rose of American origin. Mrs. Hubbard all her life has taken much interest in stimulating and encouraging people young and old, to make attractive homes and keep surroundings pretty. She was created the first honorary member of the Rose Society. Peter Bisset, superintendent of "Twin Oaks," Washington, was Mrs. Hubbard's agent in the matter.

Doublay, Page & Co., New York City, have submitted a proposition of interest concerning the awarding of a series of medals, which will be acted upon at the next meeting of the executive committee.

Roses are being planted out this year more extensively than common, and if the rose bush growers are wise, they will throw their support to the American Rose Society by becoming active members.

BENJAMIN HAMMOND, Sec.
Fishkill-on-Hudson, N. Y., May 24, '09.

CLUB AND SOCIETY NOTES.

The next meeting of the American Peony Society will be held at Cottage Gardens, Queens, N. Y., on Tuesday and Wednesday, June 8 and 9.

The Tri-City Florists' Club met on May 13 with H. Pauli at Davenport, Iowa, and transacted routine business. Refreshments were served later.

The North Shore Horticultural Society, Manchester, Mass., was addressed on May 23, by Samuel B. Crombie of Los Angeles, Calif., on "Horticulture in California." Mr. Crombie is a native of Manchester.

At the meeting of the State Floral Society of San Francisco on May 14, President Plath reported that over \$1,250 had been contributed for cash prizes for the October flower show; also that an attractive display of fruits would be made.

The New London County Horticultural Society met at Norwich on May

17 and after a short business session Alfred Flowers of New London presented an able paper on "Herbaceous Perennials," and Mrs. E. M. Rogers spoke on the coming of spring as shown by the flowers, in an entertaining manner. A vote of thanks was accorded both speakers.

Intending exhibitors at the 1909 shows of the Massachusetts Horticultural Society should not be deterred by the absence of the usual liberal cash prizes in some of the schedule classes. At a recent meeting of the trustees the sum of \$750. was appropriated for special use by the plant and flower committee in recognition of deserving exhibits.

PERSONAL.

C. Voyes of Merrill, Wis., has gone to Washington, Ind., to start in the florist business.

Mr. H. G. Eyres of Albany has returned from a week's fishing trip spent at Twitchell Lake.

Mr. Hoffman has resigned his position as florist and landscape gardener at the Carlisle Indian School, Carlisle, Pa.

Oakes Ames was appointed head of the Botanic Gardens of Harvard University at the recent meeting of the corporation.

Visitors in Boston: Ed. Roehrs and Jas. Muller, Rutherford, N. J.; W. A. Manda, South Orange, N. J.; Mrs. Joseph M. Gasser, Cleveland, Ohio.

Edward Ashcroft and Miss Rena Shulmire, employees of the Pittsburg Cut Flower Co., Pittsburg, Pa., were married on May 14, and will reside at Avalon.

On the completion of his twenty-fifth year as grower for Bertermann Bros. Co., of Indianapolis, Alvin Schreiber was presented with a gold watch by the firm.

Visitors at Albany last week: S. D. Green, representing H. Bayersdorfer & Co., Philadelphia; M. Cohen, representing Wertheimer Bros., New York City; S. Kahn, representing H. H. Berger & Co., New York City.

Percy F. Williams of Natick, Mass., and Miss Frances K. Heard of Auburn, Ala., are to be married on June 3. Mr. Williams is a graduate of Massachusetts Agricultural College and holds the position of assistant in horticulture at the Alabama Polytechnic Institute.

Albert E. Mauff of Denver and Ira Cline of Paonia, Colo., have been appointed by Governor Shafroth as members of the Colorado State Board of Horticulture. Mr. Mauff was elected to the city council in the spring of 1907 on the Municipal Ownership ticket and served with distinction. His record in the city council and his general good citizenship commended him to the governor. He will take the place of Mrs. Martha Shute, who has been secretary of the board for more than twelve years. Mr. Mauff's name appears on the membership list of the S. A. F. from 1903 to 1906, inclusive.

Obituary.

Charles L. Allen.

This widely-known horticulturist and writer died at his home in Floral Park, Long Island, N. Y., on May 21, aged 81 years. Mr. Allen was for many years engaged in the seed, plant and bulb business in Queens and Floral Park, the gladiolus and lilies having been specialties with him. He was well informed on horticultural and scientific

CHARLES L. ALLEN

matters and was the possessor of one of the finest private horticultural libraries in this country. He was a very clever writer and entertaining talker and was the author of several valuable books. Personally, he was widely appreciated for his geniality and comradeship. His two sons, Charles H. Allen, carnation grower, of Floral Park, and Wm. Stuart Allen, the

wholesale florist, are well known in the trade.

John Cassidy.

John Cassidy, a native of Ireland, but a resident of Long Island City since early manhood, died on May 18, aged 98. He was engaged in the florist business near Calvary Cemetery and his sons, who have been associated with him for many years, will continue the business.

M. J. Jorns.

M. J. Jorns, of Iowa, horticulturist of the American department of agriculture, died in San Juan May 17, of typhoid fever. The body will be sent to New York on board the steamer Coamo.

Charles F. Hilton.

Charles F. Hilton, park commissioner for the city of Lynn, Mass., died of heart disease on May 20, in his 74th year.

THE VETERANS.

(Denis A. McCarthy, in the New York Sun.)

Every year they're marching slower,
Every year they're stooping lower,
Every year the lilting music stirs the
Hearts of older men;
Every year the flags above them
Seem to bend and bless and love them
As if grieving for the future when they'll
Never march again.

Every year that day draws nearer—
Every year the truth is clearer
That the men who saved the nation from
The severing southern sword
Soon must pass away forever
From the scene of their endeavor,
Soon must answer to the roll call of the
Angel of the Lord.

Every year with dwindling number,
Loyal still to those that slumber,
Forth they march to where already many
Have found peace at last,
And they place the fairest blossoms
O'er the silent, mould'ring bosoms
Of the valiant friends and comrades of the
Battles of the past.

Every year grow dimmer, duller,
Tattered flag and faded color;
Every year the hands that bear them find
A harder task to do,
And the eyes that only brightened
When the blaze of battle lightened,
Like the tattered flags they follow are
Grown dim and faded too.

Every year we see them massing,
Every year we watch them passing,
Sorely pausing in our hurry after pleasure,
After gain;
But the battle flags above them
Seem to bend and bless and love them,
And through all the lilting music sounds
An undertone of pain!

Newport, Ky.—Frank Ernsterhoff, a well-known florist of Highland Ave., Fort Thomas, arrested last week charged with wilful destruction of property preferred by the Bell Telephone Company, was again arrested May 17 and placed under a peace bond of \$500. The Bell Telephone also swore out this affidavit against him in Magistrate Quehl's court, charging him with threatening to shoot anyone who attempted to erect a telephone pole at the corner of his premises in Highland avenue. When employees of the company attempted to erect the pole, the police allege, Ernsterhoff appeared with a gun and threatened to shoot them. Both cases will be tried before Magistrate Quehl.—Cincinnati Com. Tribune.

HARDY PERENNIALS AND THEIR VARIOUS USES.

By Robert Cameron.

Continued from page 744, Issue of May 22.

The Rock Garden.

There are many estates and gardens which have natural rocky banks or hillsides which can be made very attractive with a rock garden and, in fact, there are many hardy perennials that give better satisfaction than when grown in any other part of the garden. A well constructed and tastefully arranged rock garden can be made one of the most pleasing features of our grounds.

The meaningless mounds of stones such as we see in our public garden is by no means the best conception of a rock garden. In fact, a rock garden should be a close imitation of a rocky mountain, though, of course, on a very small scale. It should have crevices and pockets, and these should be filled with soils to suit the requirements of the various plants.

The plants used should be largely the low growing kinds, such as aubrietias, creeping phloxes, houseleeks, sedums, columbines, pinks, ajugas, arabis and many others too numerous to mention here.

Other Uses for Hardy Perennials.

There are many other places besides the herbaceous border and rock garden where hardy perennials can be used with good effect. Lilies are at their best when planted in rhododendron beds. Along water margins there are many plants which lend themselves very pleasingly and give excellent effects, such as irises, cardinal flowers, lythrums and many kinds of grasses.

Another use which the large growing perennials are admirably adapted for, is to produce sub-tropical effects. There are quite a number of plants which can be used in this way. For example, sunflowers, compass-plants, bocconias, Arunda donax, Eulalia Japonica and its varieties, aralias, acanthuses, polygonums, rheums, heracleums, centaureas, eryngiums and echinops.

There are many hardy perennials which make showy and attractive beds on the lawn. Phlox procumbens, P. subulata and P. reptans are all good for early work. Stellaria Holostea is very good in early summer. The tall growing phloxes, peonies, irises and the tall, graceful grasses—all lend themselves readily to this kind of work.

Care is Needed to Be Successful.

Many people make a great mistake when they imagine that herbaceous plants, when once planted, will take care of themselves afterwards. There is no class of plants, that I know of, which will give good results if constant attention is not paid to them. Herbaceous plants are just like other plants—their wants and needs must be carefully looked after. An important matter is that of staking and supporting. The stakes or sticks ought never to show. They must be so arranged to give the needful support, while allowing the plant its natural freedom. The only time when stakes are tolerated is for the short time when they have been put in for plants which attain a great height. There is a great

ARABIS ALBA.

Photo by Robert Cameron

knack in staking and it takes some experience to do it properly.

A newly planted border is not always satisfactory the first year. Many of the plants do not grow vigorously enough and do not fill up the space allotted to them.

Annual Plants are Useful.

There are many annuals which blend very pleasingly with the perennials and can be used to fill up the vacancies, but care must be given to selecting the proper color so that if a color scheme has been conducted it will not be injured. Annuals are used to fill up the vacancies, where the spring bulbs have been growing in the border. I know there are some who object to using annuals among perennials, but there is no other class of plants which harmonize so pleasingly with them. One of the best writers in England on this class of plants even advocates the use of bedding plants and the plunging of plants in pots to give the proper effects. I certainly do not agree with her, but I see no harm in using annuals quite liberally. In nature we see no strict lines drawn between perennials and annuals in her groupings of plants.

Select List of Good Perennials.

There is almost an endless supply of showy hardy perennials, and it would be useless to give a very long list of them, as they can be found in most of the fine catalogues sent out by the different nurserymen. All I will do is to give the names of a few of the best things for spring, summer and fall.

The earliest plants to flower are the snowdrops, of which the best kinds are Galanthus Elwesii and G. nivalis. Next come the crocuses, of which the yellow kinds bloom first—then the whites and blues follow. In the early flowering squills the best are Scilla bifolia and S. bifolia alba, S. Sibirica and S. Sibirica alba. The glories-of-the-snow are charming. Chionodoxa Luciliae and its variety grandiflora and sardensis are the ones which give

the best satisfaction. Fritillaria imperialis and its various varieties are good, so is Fritillaria meleagris. The most pleasing of the grape hyacinths are Muscari botryoides, M. botryoides album, M. commutatum and M. compactum.

A few of the most satisfactory tulips for the border are in the early kinds, Artus, La Belle Alliance, Yellow Prince, La Precieuse, Joost von Vondel, white, Duchesse de Parma, Chrysolora.

A few of the best Darwins are Clara Butt, rosy salmon; Galatea, vivid vermilion; Glory, fiery scarlet; Gretchen, silvery white; Harry Velthe, deep maroon; Isis, fiery crimson, one of the very best; Kate Greenaway, very soft flesh-colored nearly white; Madame Krelage, a perfect beauty, soft rosy pink edged light rose. Mr. Farncome Sandars is all right, dazzling crimson red; Mrs. Cleveland, a charming flower, soft rosy pink. Pride of Haarlem beats them all, cerise-scarlet; Psyche, most lovely flower, delicate pink. Queen Wilhelmina, the best of all the rose-colored Darwins. Sieraad van Flora, one of the earliest to flower and very good indeed, vivid rosy-red. Torch is very nice fiery red. Most of the Darwin tulips are lovely things and we have grown thirty varieties, the above being the best kinds.

Cottage or late May flowering tulips. Out of thirty kinds we have grown the following are the ones we liked the best. Bouton d'Or, deep yellow, very pleasing; fulgens, very long stems, dark scarlet crimson; Gesneriana, color brilliant carmine and its forms are probably some of the most satisfactory tulips. We have some bulbs growing in the same place for twenty years. Golden Crown, very fine yellow; Inglescombe, scarlet, is very good. Isabella or Shandon Bells are good tulips, pleasing color creamy yellow changing to dark magenta; La Candeur, very handsome white. La Merveille is one of the largest tulips and probably the most fragrant, salmon-orange color. Picotee, or Maiden's Blush, one of the most satisfactory cottage tulips, white

suffused rose at the top; Dame Elegante, very good white.

We grow a number of species of tulips and the following are the kinds we prize the most: *Posterioriana*, *Kauffmaniana*, *linifolia*, *Greigii*, *sylvestris*, *Oculis-soils*, *Ostrowskiana* and *persica*.

Last spring we grew over ninety varieties of narcissi and we can't say too much in their praise as garden plants. Other bulbs which might be added to the above are: *Allium Moly*, *Bulbocodium vernum*, *Camassia esculenta* and *C. Fraseri*, *erythroniums*, *galtonias* and *Scilla campanulata*.

For early flowering the following are good: *Alyssum saxatile*, with its golden yellow flowers; *aquilegas*, several species, *cœrulea*, *chrysantha*, *glandulosa* and *Stuarti* being the best. *Arabis albidia*, *Phlox procumbens*, *P. subulata* and its varieties are showy dwarf plants. *Polemonium reptans* and *P. cœruleum* are good for blue flowers. There are many kinds of veronicas, the choicest being *V. rupestris*, *V. gentianoides*, *V. incana*, *V. paniculata* and *V. latifolia*.

Pentstemons, which are hardy and reliable, are *P. digitalis*, *P. diffusus*, *P. ovatus*, *P. barbatus*, *P. barbatus* var. *Torreyi* and *pubescens*; *Pyrethrum roseum*, very fine, has many forms, both double and single, the single flowers are very pleasing. *Clematis recta* has panicles of beautiful white flowers. *Dianthus barbatus* and many other species are good. *Campanula Carpatia* makes pleasing tufts of blue. Of delphiniums there are many kinds and all are exceptionally showy plants. *Dicentra spectabilis*, or bleeding heart, is one of the most graceful hardy plants we have in early Summer. *Orobis vernus*, fine early dwarf pea flowering plant. *Lychnis chalcedonica* and *L. viscaria* fl. pl. are both good. *Frimula veris* and *P. vulgaris* and their varieties are well known. *Campanula persicifolia* and its white flowered variety are of medium height bellflowers. Peonies, herbaceous kinds are all excellent plants. *Papaver nudicaule* is a showy dwarf poppy and orientale and its varieties are without doubt the showiest of hardy plants. German irises are good border plants and will flourish in almost any situation. *Iris laevigata* and its numerous varieties are extra fine for late Summer, but require more moisture than the German irises. *Geranium sanguineum* is about a foot high and has a profusion of red flowers. *Baptisia Australis* gives good racemes of blue flowers in June. *Erigeron speciosus* and *Aster alpinus* are the two best compositae we have in early Summer.

For the late flowering kinds the following are good: *Aconitum autumnale*. *A. napellus* and its varieties are good blue kinds. *Anemone Japonica* and its varieties are exceptionally good late white and pink flowering plants. The best asters for border use are *novæ-angliæ* and its varieties, *turbidellus* and *Shortii*. *Boltonia latissuama* and *Bocconia cordata* are tall, showy plants. *Platycodon grandiflorum* is a grand perennial and flowers for several seasons. *Coreopsis grandiflora* and *Gaillardia grandiflora* are choice perennials. *Helianthus mollis*, *Helenium autumnale* and *Hoopeii* are good plants for the back row of the border. *Monarda didyma* is the best of the horseminits. *Pyrethrum uliginosum*,

when well grown, is very showy. The best of the rudbeckias are *speciosa*, *subtomentosa*, and *Golden Glow*. *Scabiosa caucasica* is the finest of all the scabioses. *Statice latifolia* is the best of the sea lavenders. *Veronica subsepalis* is very choice. *Sedum spectabile* is the handsomest of the stonecrops. *Oenothera Missouriensis* has the largest flowers of all the evening primroses. *Eryngium amethystinum* has roundish heads of flowers with a very striking blue color. The best of the day lilies are *Hemerocallis flava*, *H. Dumortieri*, *aurantiaca* var. *major* and *flava*. Lilies, where they do well, are always pleasing. The following kinds are the most easily grown: *L. bulbiferum*, *L. Canadense*, *L. candidum*, *L. croceum*, *L. elegans*, *L. Hansonii*, *L. speciosum*, *L. tenuifolium* and *L. tigrinum*. To these might be added foxgloves, hollyhocks and the late flowering phloxes. If time would permit, many more kinds could be mentioned.

It is very important to know some plants that are not desirable for border use. The objectionable plants are rather showy, but when they get into the border they are a perpetual expense. They grow so rapidly and spread so quickly that they kill the weaker plants that grow near them. The most troublesome of these are *Achillea serrata*, *Aegopodium Podagraria*, *Anemone Canadensis*, *Saponaria officinalis*, *Stachys palustris* and *Helopsis laevis*.

There are many inquiries about perennials that will grow under trees and in other shady places. I have found the following very satisfactory: *Vancouveria hexandra*, *hepaticas*, *asarums*, *Ajuga reptans*, *Orobis vernus*, lily of the valley and many kinds of ferns.

Winter Protection.

The winter protection of herbaceous perennials is important. Plants that are not reliably hardy can be protected with any material which is not too moist or close. Most of the perennial plants that are in ordinary cultivation need no protection, but in the Eastern states we find that a coating of some mulch that keeps them from excessive freezing and thawing during the winter is very beneficial to the plants. If barnyard manure be used a double advantage is obtained; the plants are kept in good condition and, from the leachings during the winter, the plants obtain food. Leaves of deciduous trees, pine leaves and hay are all good for protection. The dressing for protection should not be applied until the ground is well frozen; that will be about the first of December. The covering need not be very thick—two or three inches is enough. The covering is not so much intended to keep out the frost as to prevent alternate freezing and thawing by which the plants are thrown out of the ground, the roots broken and exposed to the sun and air, if the ground is kept frozen all winter this trouble is avoided. The covering should be removed as soon as the weather will permit in the spring.

The propagation of perennials is either by seed, cuttings or divisions of the plants. Plants are easily raised from seed, and a stock of plants can be obtained quickly in this way. Many writers on perennial plants decry the

so-called bedding plants, such as geraniums, coleus, heliotrope and the like. I do not want to do this, as all kinds of showy plants are desirable in garden decoration if they are used correctly. What I do want to point out is that the person who hasn't a greenhouse need not be discouraged. There is ample material to select from among deciduous trees, evergreen trees, shrubbery of all kinds and herbaceous perennials. There are no bedding plants that will compare with irises, larkspur, daffodils and lilies.

Another point which is in favor of the hardy plants is that long before the geranium, coleus and heliotrope have left the greenhouse we have enjoyed the charming early spring flowers, such as squills, snowdrops, crocuses, tulips, phlox, white-cress, hepaticas and violets. Not only have we the hardy plants in the early spring, but late in the fall when all our tender plants are housed.

In conclusion I would like to advise you to have plenty of thrift and honesty in your gardens and you will be always happy. Now I will say good-night to the poppies, lilies, "daffydowndillies" and all the rest of the distinguished company of old-fashioned plants which I love so much.

CATTLEYA MOSSIAE.

In these days of quick transportation, when orchid collecting has been reduced to a fine art, and orchids can be shipped to this country with a comparatively small percentage of loss, we hear now and again of some marvelous specimens which, having successfully withstood the ordeal of shipment, develop into noble plants and delight the orchid lover's eye with their wealth of gorgeous blossoms.

The *Cattleya Mossiae* figured in the accompanying illustration is a case in point. Here we have a plant which was received amongst a case of imported Mossie two years ago. At the

time of writing, there are forty-six blooms on the plant. Personally, I have never seen a more perfect specimen, either in Europe or in this country.

In the illustration only one side of the plant is shown, but the blooms were evenly distributed all over the plant. This specimen is one of many in the Coryell collection at Menlo Park, California. At the time the photograph was taken the plant was doing duty on the table at a reception which accounts for the fern embellishments, which, while more or less necessary, from the decorators' point of view, would have been better dispensed with as an illustration.

WM. Mc. M. BROWN.

Calif.

Boston Public Garden.

ITS EARLY HISTORY AND THE BEAUTY OF ITS TREES.

EARLY SPRING BEDDING
THE LILY POND

Forty years ago, what is now known as the Public Garden was a half-inundated patch that was a very small section of a great tract of useless marshy land comprising much of what is known as the South End and Back Bay of Boston. The residents of the city in those days, still living, delight in rehearsing their boyish escapades in this section, and in the light of its present populous condition a well-developed lump of faith is needed to accept the almost incredible tales of adventure they tell. To be told that where Commonwealth avenue exists with its hundreds of palatial residences, broad drives and velvety lawns, was once an oozy waste of mud seems like a choice fairy tale. But the existence of pictures attest the fact and truth of such conditions. Through many vicissitudes which at times seriously threatened its existence the Public Garden has risen from the ignominy of marsh land to the dignity of being one of the most noted examples of formal gardens in the United States, if not in the world.

The Garden and Common in their early history were one, and it was not until about 1859 that it began to take on its present character. It was in this year that the pond was constructed since which time the process of better-

ment has gone steadily on. Shortly following this, the walks and flower beds were constructed under the then superintendent, John Galvin. In quick succession came the fountains, monuments, fences, etc., and despite some severe criticisms of the work, it can be safely said that the object of utility was kept steadily in view, and if the artistic was slighted in the laying out of the walks, and a few other things, it was done with intent to best serve a busy and hurrying public. The objection to the manner of laying out the walks has been very severe. It has been contended that there are too many, that they lead aimlessly to nowhere in some cases, while in others they are objectionable because of their straight lines. There may be too many walks if the garden was to be treated as a private place, but where the public is concerned, walks straight and in numbers are what must be supplied. The bridge that spans the pond has been very playfully called the Bridge of Size. When one is bent on criticism there is nothing but what can be made to feel the lash.

The facilities for handling plants at the beginning were wholly inadequate, and it was necessary to purchase most of the stock in open market. A small greenhouse that was situated in the Public Garden proved almost useless and it was removed. During his first

A VISTA
THE BRIDGE

year in the office of superintendent, William Doogue turned over his Floral Place Greenhouses to the city, and later, new greenhouses were built in the South End of the city, and some years after larger accommodations were found in Dorchester, where the greenhouses are at present, twenty-five in number.

While the garden has attracted attention for its floral decorations, too little attention has been given to that upon which the success of the floral has been dependent, namely, the trees. Thirty years ago there were but few trees on the Public Gardens, and those of insignificant character. The place at that time had a bare, flat look, and from the main walk almost every walk could be traced in its entirety, bare and unbroken. The sky line was one of chimney tops, brick walls, glaring windows.

To remedy this bareness, and to cover as much as possible the worm-like walks, trees were freely planted, and today, in looking across the garden, only glimpses of walks can be seen, leading in and out through the foliage of the trees, the chimney top sky line has been obliterated, and in its stead are the waving tops of trees. On the Arlington street side, on the sidewalk, a row of elms serve as a screen of green to hide from the view of visitors the sight of the neighboring

residences. The variety and symmetrical growth of these trees on the garden has made the frame which has added to, and made possible, the much-lauded flower exhibit. Comparatively few seem to realize the most important part that the tress play in this setting and the development has been so gradual, and one's memory of what had been so unreliable, that the trees have seemed as something that always existed and were merely incidental to the flower beds.

It is doubtful if in any park of equal size in the world could be found so varied a collection of trees such as there is in the Public Garden in which there are so many magnificent individual specimens and surely in no place so closely situated to the busy city life, almost at the doors of railroads and warehouses. To those that know trees this spot has been a sort of Paradise and it is a matter of regret that the public in general is not more conversant with tree life.

Another great enjoyment which but few avail themselves of, is the openings of vistas that have been purposely arranged. In every direction are these views possible. One across the pond towards the spire of the Arlington Street church is especially beautiful.

In the list of trees to be found here are the following kinds: Purple beech, wonderfully beautiful trees, sumach, mulberry, catalpa, hornbeam, coffee tree, hawthorn, sophora, white birch, golden chain, varnish tree, tulip tree, ginkgo, maple, red bud, red-flowering horse chestnut, peach, yellow wood, willow, linden, English and American elm, spindle tree, crab, etc. On the rockery in the lower part of the pond is planted a group of willows and these in summer form a waving and graceful mass of green that festoons itself to the water's edge. Some years ago this spot was connected by a walk to the main garden but its transformation into an island with the addition of foliage setting has been a distinct improvement. In several places about the edge of the pond small trees have been so grouped as to form an opening to accommodate a number of settees, affording shade to those resting there, but not restricting the view.

At the time most of the garden trees were planted, because of the bareness of the place and looking for an immediate foliage effect, they were placed much closer together than would be warranted in other locations and conditions. As the years passed the evil results of this planting began to manifest themselves, as was anticipated, and to remedy conditions many trees have been transplanted and some removed. The work of transplanting was done in the winter after the pond had frozen. The trees were dug around and at a suitable time were drawn to their new places on skids. Where it was necessary to go across the pond the work was easily accomplished. While a great amount of this transplanting was done for many years the necessity for still more extended work in this line becomes more insistent each year and at no very distant time a thorough renovation and elimination will be absolutely imperative to preserve the

harmony that has contributed so fully to the attractiveness of the Public Garden, in past seasons.

While the summer time is the most favorable time to visit the garden, still it does not lose its attractiveness even in winter. The rhododendron and evergreen beds are protected by the placing of hemlock and spruce trees about them, so arranged to give a natural effect to the grouping. Many of these temporary evergreens are also formed into screens around benches about the walks, and these places thus screened are eagerly sought on pleasant days during the winter. This temporary placing of trees adds an attractive feature and is decorative as well as useful. The pond in winter is kept in good skating condition and the hundreds of skaters gliding about make an animated winter picture. Considerable damage results from careless and thoughtless persons during the skating season but happily this has grown less during late years.

To anyone visiting the Public Garden in the summer I would say, get acquainted with the trees there; notice the beauty of the specimens, their groupings, the colorings, the eliminating of unsightly skyline, the possibility of long vistas. These are the things that make the garden attractive and even a person who feels no particular liking for trees cannot but be impressed by their beauty as here used. The flowers are beautiful but without the setting of the trees which are a monument to the foresight of the late superintendent, their combinations and colorings would amount to but little.

LUKE J. DOOGUE.

ANEMONE SPECIES AND VARIETIES.

At the present season many of these species form attractive plants in English gardens, being planted on rockwork, in the mixed herbaceous border, as edgings to groups and beds of evergreen shrubs, in the partial shade of the latter, in which position they grow and flower admirably. They are chiefly natives of the temperate and southern parts of Europe, northern Hindoostan, Japan, and America. Their flowering season falls mostly in the months of March and two following months; they can be easily propagated by division of the roots or tubers in September and October, replanting the divisions in a fertile, sandy soil. The Hepaticas, the beautiful spring flowering plants of the English cottage gardens, so commonly met with, whose flowers are rose colored, purple, blue, lilac or white, belong to the genus *Anemone*. The plants grow about eight inches in height and flower abundantly. *H. angulosa* is the only other species, and of this species there are but two varieties, differing chiefly in the size of their blooms. Their color is lilac.

A. Japonica, a tall growing species, now numbering some seven or eight varieties or sports, may be propagated from cuttings of the roots planted in light, sandy soil, placed in a cool frame

and kept close till roots form. At the Royal Horticultural Society's gardens at Chiswick, about 60 years ago, this species was crossed with *Anemone vitifolia*—a Himalayan species, the latter being the pollen parent, and some beautiful varieties resulted from the cross. *A. coronaria* and *A. stellata* give us the florist's varieties.

Anemone angulosa is a species with flowers twice as large as those of the common Hepatica and of a sky-blue tint, and distinguished from it by its five lobed and toothed leaves. It comes from Transylvania and is perfectly hardy, although it is a plant that requires protection from cold winds, such as that afforded by other plants, or sheltering rockwork.

Anemone Apennina has starry erect flowers of a bright blue tint, and two inches in diameter. The plant grows in close tufts, above which the flowers appear thickly. It is one of the prettiest of our spring flowers, and is an ornament in the garden border as on a rockery. Its flowering season in these islands is March and April.

Anemone blanda possesses flowers of a rich blue color and larger than those of *A. Apennina*, and it grows to a height of from four to six inches, and flowers in March and in some years in February. The plant is quite hardy, and forms a capital subject for planting on rockwork or in the "wild garden."

Anemone coronaria, known generally as the Poppy Anemone, comes from the Mediterranean region and has been a favorite garden plant from immemorial times. There are many varieties, both single and double, and invaluable for spring flowering. The single flowered varieties come readily from seeds which afford an endless variety of colors; whereas the double flowered varieties should be planted in the autumn or spring, the former being the better season. The plant grows to a height of about seven inches, according to the quality of the soil.

Anemone fulgens is a flower of a dazzling vermilion color, and the plant is perfectly hardy. The flowers are supported on stems one foot in height arising from a dwarf tuft of deeply lobed leaves. The plant is well suited for planting in beds or on the rockery, and its flowering season is April and May.

Anemone Hepatica is one of the commonest plants, and is hardy in every situation, and welcomed everywhere for its exquisite beauty. There are single varieties in red, white, blue, pink, mauve and crimson tints, as well as double blue; all excellent plants for making edgings to beds of dwarf peat loving plants. The flowering season here is March and April. The double flowering Hepaticas are multiplied by division and the single ones by seed.

Anemone Pavoniana, or Peacock Windflower, is a plant rarely seen in our gardens, although it is deserving of more general cultivation. The flowers are of less size than the common garden anemones, and of a cinnamon red color and quite double. The plant is a native of the south of Europe, and is common in gardens in the south of France. Propagation is by division when growth ceases in the summer, or in early spring.

A. Pulsatilla, the Pasover Flower. This species, indigenous in Great Brit-

ain, a fine distinct perennial, flowering in March, April and May, has a bell-shaped flower of mauve purple with yellow anthers, found on the Chiltern Hills, and the downs of Surrey and Sussex, dotted over the turf. In such positions, it just shows through the short grass, but in sheltered places, even there it develops to a larger size and flowers abundantly. In the rich soil of a garden the plant is much more vigorous and freer flowering. There are white, red and lilac varieties.

The above-named species and varieties of Anemones are the more generally cultivated in English gardens. A. Halleri is a late form of A. Pulsatilla.

FREDERICK MOORE.

London.

SOME OF OUR PROBLEMS AS ROSE GROWERS.

A paper prepared by Prof. L. C. Corbett of the Bureau of Agriculture, Washington, D. C., for the Annual Meeting of the American Rose Society, Mar. 16-18, 1909, held at Buffalo, N. Y.

Heat, light, water and soil are the big four with which the plant grower, be he farmer, gardener or florist, is concerned. In nature all of these factors are more or less in the class of variables. The farmer and gardener working in the open and dependent upon natural sources for heat, light, moisture and soil are playing at a game of chance. The two factors that it is within his power to modify are moisture and soil. By irrigation the water content of the soil can be regulated. By the judicious use of fertilizers and manure the food supply of the plant can be modified. Aside from these two alternatives the farmers and gardeners are totally dependent upon nature's kind provisions. The florist carries the cultivation of plants one step further from the field of chance by safeguarding the temperature factor. The florist may or should be able to control three of the determining factors in plant growth, viz., heat, moisture and soil. His variable should be confined to the light factor alone. Our modern greenhouses have been well planned so as to cut out as little light as possible by the use of light framework and large glass. The great weakness in our present scheme of greenhouse construction lies in the total disregard of the laws of reflection and refraction. The fact that a glass roof can be so constructed that it will allow a very large percentage of light and heat rays of the sun to penetrate the house at certain hours of the day and to reflect or throw off a large percentage of the same rays at other hours of the day, has, it would appear, been given altogether too little consideration both by florists, physiologists and physicists. This is one of the respects in which practice is far behind. The available knowledge on this phase of construction seems to have been almost entirely ignored by the practical florist and greenhouse builder. Much thought is spent in designing gutters, sash bars and ventilating apparatus, while the pitch of the roof and the direction of the ridge,

factors which directly measure the value of the houses, are entirely ignored. It is therefore evident that the florist may in a measure at least influence the light factor. While he cannot increase or decrease the actual hours of sunshine, he can by properly planning his houses afford his plants the maximum benefit of the light provided in nature. Researches which have been conducted along this line clearly indicate the value of light as a factor in plant growth. Prolonging the light period by artificial means as has been demonstrated by Bailey, Rane, the writer and others, decidedly hastens growth. Should we not then give this factor the full attention its importance deserves?

The temperature and moisture requirements of plants are given far more consideration than light by florists, but it is surprising to note the great lack of available general information upon so simple a matter of properly providing for the requisite amount of radiation in a greenhouse for a particular purpose in a definite locality. Too often this important matter is left to the local plumber, who has no idea of the problem involved, or how to solve it. Yet heat is the greatest charge against the growing account.

Moisture is the coin of the realm with the gardener and the florist; both deal in products the chief constituent of which is water. A pure and adequate water supply intelligently used is a determining factor in garden and floral undertakings. Now we come to the soil, an absolute essential to the success of every commercial agricultural enterprise, the source of the livelihood and wealth of the major portion of the earth's inhabitants; yet what shall we say of it, it is so complex? If we consider its derivation we find the rocks yielding to the action of frost, water and air to supply the mineral matter, vegetation springs up to ripen and decay, and thus contribute humus, another factor as important as the mineral. The decomposition of organic matter in the soil sets to work other forces which are no less important than the primary constituents themselves. The combination of the organic and the mineral substances creates a condition which makes it possible for many low forms of animal and plant life to exist in this medium we call soil. These low forms are some of them helpful and some of them hindrances to the plant grower. The introduction of this host of tenants complicates things and renders what was formerly thought to be simply a chemical problem, a very intricate, combined chemical and bacteriological puzzle. Some aspects of this puzzle are yet so new and difficult that no prediction dare be made at this time regarding their importance to agriculture. Enough has been determined, however, to prove that an important lead has been struck. The value of nitrogen gathering bacteria is sufficient evidence of the richness of this new field. Knowledge of the way in which nitrogen gathering bacteria work gives us a clue to the solution of one of the most difficult problems in the maintenance of soil fertility. It explains the division of labor in nature and gives a reason for crop rotation. The same laws that govern the

rotation of crops in field operations come into play to our advantage in the soil heap. The compost heap should consist of organic material in the form of sods and manure so combined with mineral matter in the form of loam and clay as to enable decomposition and nitrification to take place rapidly. The florist's business is not merely to place available food in a natural soil, but to combine the several constituents for fertile soil in such manner as to secure that mechanical condition and food supply calculated to best meet the requirements of the particular crop under consideration. In this respect the florist has an advantage again over the gardener and the farmer. But can any one describe the ideal soil for any particular crop? Can any one say that a soil consisting of 10 per cent. organic matter, 30 per cent. clay, 40 per cent. loam and 20 per cent. sand is an ideal soil for roses, for carnations, for lettuce, or for any other crop? I think not. Our knowledge upon these important points is of the empirical kind. An experienced gardener makes up a potting soil; he mixes it with his hands, and if it appears too heavy he adds sand; if not sufficiently fibrous, he adds leaf mould or peat; just why he adds these substances he cannot tell, neither can he describe to you the exact consistency and character of his ideal rose soil; yet his knowledge of the requirements of a particular crop leads him to make the changes above noted to bring the soil to his ideal of the requirements for the particular crop. Can this empirical knowledge or idea be reduced to exact terms? Is the exact amount of available plant food and the proportion of sand, clay, humus in this ideal soil measurable? If it is we can obtain a basis for exact experiments to determine whether or not the gardener's judgment of an ideal soil for a particular crop is correct. If these factors are not measurable we are as much at sea in our experimental work as is the gardener. It is all simply a matter of judgment. Up to the present I am sorry to say that the whole matter is largely dependent upon experiences and judgment. Soils differ so in composition and physical properties even when, so-called, like materials are used in their make-up, and we know so little regarding the influence of bacterial action which is consistently working in the soil that it is practically impossible in the present state of our knowledge to reduce the soil factor to exact measurement. A much more accurate idea of the relative influence of heat, light, water and soil can be secured under greenhouse conditions than in the open, but even here, while we know infinitely more than did the early gardeners, our knowledge is far from exact. It may be that exact data will never be possible, but certain it is that the knowledge that is so rapidly accumulating will clear up many dark places and we hope soon put us in possession of facts to replace empiricism. Until more knowledge is available we must continue, each to determine for himself under his own environment, the most profitable combination for the compost and the varieties best suited to this soil and his market. "There is no royal road to knowledge," and the intelligent, painstaking care is the only way to spell success.

SEED OF THE IMPERIAL PALMETTO ASPARAGUS

I have some seed of this giant brand, selected from the best beds in South Jersey. This Asparagus brings \$100 to \$600 per acre. Now is the time to plant.

WARREN SHINN

WOODSTOWN, - - - N. J.

GERANIUMS, DAHLIAS AND BEDDING PLANTS

We have one of the most complete collections of Geraniums in the country, containing every color and type found in the Geraniums. Every one of our 75 Standard Varieties at \$2.00 and \$3.00 per 100 are Bred and Better Winners, and among our 34 New Varieties of special merit are some that are going to fix the standard in the future. Every one is a Gem, not high in price, only \$4.00 and \$6.00 per 100.

Our Novelties should, coming as they do from the leading introducers of the world, represent the highest development of Geraniums at the present time. A collection of 100 Varieties, our selection of 1907 and 1908 Novelties, will be sent for \$10.00.

Special Offer of 1000 good, strong plants from 2 in. pots, our selection of 20 distinct kinds from among our Standard and Newer Varieties, for \$15.00 cash. From 3 in. pots \$3.00 per 100, \$25.00 per 1000, in a good assortment.

CANNAS

Strong plants from 3 in. pots. J. D. Elsie, Egandale, Alphonse Bonvier, Mme. Crozy, and Florence Vaughan, \$4.00 per 100. Jean Tissot, President Myers, Louisa, Pennsylvania, \$5.00 per 100.

DAHLIAS

We have one of the finest collections in the country of good distinct Commercial Varieties at \$2.00 per 100 and up for plants ready for shipment. Then we have Jack Rose, Virginia Maule, Big Chief, Rose Pink Century, Fringed 20th Century, Rebecca Mayhew, etc., at 50c each, \$5.00 per doz., \$50.00 per 100. We will send 1000 in 20 good distinct Cut Flower Sorts, our selection, for \$18.50.

See issue of April 24th or Our Wholesale Catalogue for complete list of Bedding plants.

THE FULFILMENT OF A PROPHECY.

Bobbink & Atkins' nurseries at Rutherford, N. J., have come to be one of the show places of the New York neighborhood. The grounds are very extensive and are planted with an eye to general impressive decorative effect as well as commercial utility. The flowering shrubbery and hardy perennial fields have been for some weeks a glorious expanse of color and the enormous quantities of this sort of material which have been shipped this season gives confirmation to Mr. Atkins' foresight and sagacity when, some seven or eight years ago, in addressing a meeting of the New York Florists' Club, he predicted this boom on hardy perennials and urged the florists to prepare for it. Many thought he was too sanguine at the time but he has the goods and the business to show for it now. A force of about two hundred men has been employed this spring.

CHESTNUT TREE FUNGUS.

Prof. J. F. Collins of Brown university in a speech before the Rhode Island Horticultural Society May 19, told of a new disease, very destructive to chestnut trees, of which he had found eight or ten cases in the region of Pocasset.

The disease is very conspicuous and, except in the early stages, easy of diagnosis. On limbs with smooth bark the fungus shows dead sunken patches of bark, covered with yellow, orange or brown pustules of the fruiting fungus. If the spot is on the trunk of a large limb with thick bark, there is no obvious change in the appearance of the bark, but the bark, when tapped usually sounds hollow.

He likened this disease to pear blight, and said that no simple method of preservation has been found. The department of agriculture advises everyone who has chestnut trees affected with this disease to destroy the trees immediately.

MOVEMENTS OF GARDENERS.

John Kemp, lately foreman with Mr. A. Price on the G. M. Laughlin place, Woodland road, Pittsburgh, Pa., has taken charge of Mrs. Barr's place, South Orange, N. J.

W. H. Drake of Kenosha, Wis., has taken a position as foreman at Klehm's Nursery, Arlington Heights, Ill.

CHICAGO NOTES.

Poehlmann's New Range.

Eight new houses at Plant A and thirteen at Plant B are nearing completion. All benches will be supported by cement posts. Two half-houses will be supplied with cement benches of the Wittbold construction and six half-houses of the Garland construction, the latter in larger quantity no doubt owing to the fact that they had been tested last year. Of the respective merits of the two time alone will tell and very possibly each inventor will find some points where improvement can be made. One specific difference is that the Garland bench can be taken apart and moved about while the Wittbold bench is stationary, making a difference also in cost of construction. A considerable number of the new houses (the writer has forgotten the exact number) are built with the Garland truss, which it is claimed makes the house more secure in a heavy wind, as it both holds the house from going down and from going up. Chicago is fortunate in having two such young men as Garland and Wittbold and their inventions are always watched with interest, while florists in general realize their good fortune in having a Poehlmann to try them.

Among the Growers.

Chicago growers are gradually working into orchid growing. Poehlmann Bros. are now cutting from their house and will probably increase their stock another year. George Reinberg is already quite well established in the orchid growing business.

A New Wholesale Store.

Vaughan & Sperry's new wholesale store will be one of the finest and best equipped in the district. The floor space is 40 x 90 feet; the refrigerator is 8 x 24 feet placed in a cool room 18 x 40 feet. All the front part is well provided with natural light. The vault and office will be models in construction and the firm will have every convenience for handling their rapidly growing business. Vaughan & Sperry started in the wholesale commission business nearly five years ago and as a live and dependable firm they have made good.

During Recess.

The Chicago Florists' Bowling Club had an enjoyable evening on the 21st at their usual place, 118 Monroe street. Four teams participated and Henry Kruchten made the highest average,

John Zech second, and William Wolf third. At the meeting on the 4th of June prizes will be given for the best bowling. Beginning with that meeting the averages will be kept to make up the team for the convention at Cincinnati.

News and Personal Notes.

"Raisek the Florist", 1553 Ogden avenue, will build a conservatory in connection with his retail store during the summer. Mr. Raisek has a very attractive store and the new addition will further add to his already fine equipment.

Mr. and Mrs. August Poehlmann are in Milwaukee, called there by the illness of Mr. Poehlmann's mother.

Sweet peas are in in enormous quantity. One man sold 22,000 last Saturday. His greenhouse force worked till after dark pulling them. The returns were very small considering quality.

Mr. Brooks of Morton Grove finds the red carnation Nelson Fisher to be just the one for him to grow.

The florists' supply houses are having their usual rush to fill orders.

Wholesale Market.

Complete report of the Chicago Wholesale Flower Market will be found on page 786.

NURSERY NOTES.

Newport, Kan.—J. A. Neede has started in the nursery business in this place.

Wood River, Nebr.—J. W. Weldon has purchased a half interest in the Estelle Nursery.

Harlingen, Tex.—J. George Bowyer has assumed charge of the Harlingen Nurseries and will carry them on this season in connection with the Gonzalez Nurseries, making his headquarters at Harlingen.

The Backward Season.

The weather still remains cold and vegetation is very backward. In this latitude, that of northern New England and New York, trees are not yet in full leaf, and where growth is so slow and long retarded the leaves never attain the size they do when growth is rapid and weather is warm. Planting is still delayed, and even now peas are not all in the ground which should have been in three or four weeks ago. It is time corn was planted yet very little sugar corn has gone into the ground, and that little is more likely to rot than to grow. It is not unlikely that considerable replanting will be necessary and those carrying seed of good sample and vitality can get pretty strong prices for it. Prices on future seed corn are much firmer than a month ago, and this is reflected in the canned product, which has advanced nearly ten cents from the low point and strongly held with probability of further advances in the near future. Canned peas are also firming up and in fact the entire list of canned fruits and vegetables are showing more signs of life and activity. This is of interest to seedsmen, as the canner's trade forms a considerable percentage of their business. The improved business outlook in the canning industry is but one of the many symptoms of a general business revival for which all are devoutly thankful.

A Word for the Cannors.

The strong letter of Dr. H. W. Wiley, head of the Bureau of Chemistry of the National Department of Agriculture, in endorsement of the wholesomeness and purity of canned goods as a whole, and particularly fruits and vegetables, should go far towards offsetting the work of notoriety-seeking ignoramuses. These foolish creatures have filled columns in the yellow press, and even conservative publications have opened their columns to this Tommy rot, as witness the effusion of one Fanny Morris Smith in the Outlook for April. If it were a gambling proposition one might not hesitate to take the long end of a "hundred to one shot" that she had never been in a modern canning factory while in operation, if she has ever seen the inside of one. The writer can state with full knowledge of the facts, that while a few obscure nondescript concerns may possibly use preservatives or "dope" of some sort, no responsible packer ever uses or has occasion to use anything of the kind excepting perhaps in condiments such as catsup, chili sauce, etc., in which 1-10 of 1 per cent. benzoate of soda is

Reliable Flower Seeds

PRIMULA KEWENSIS
New Verbena Scented
YELLOW PRIMROSE

A cross between P. Floerunda and P. Verticillata, of strong, vigorous growth, producing numerous spikes, bearing four to six whorls of bloom, of large size, and of a clear, sunny yellow color. Trade pkg. 500.

HENRY F. MICHELL CO.,

1018 Market St. Phila.

used and one would have to consume an entire bottle to get this 1-10 of 1 per cent. This is the official declaration of the commission appointed by President Roosevelt, and comprising the most eminent men of their profession. So much was said about the canning industry because its prosperity is a matter of grave moment to many seedsmen and seed growers, and every one knowing the facts should make it his duty to dissipate the absolutely unwarranted prejudice which so widely exists.

A Banner Year.

Although now nearly the first of June, counter trade is still active, and bids fair to continue for some weeks yet, though of course, in diminishing volume. As a whole the trade will have little to complain of, and most dealers will doubtless regard this a banner year. The alarming reports which drifted in from California some weeks ago have subsided, as there was probably little foundation for them. Some day the trade will be caught napping by this persistent cry of wolf when there is no wolf. But that is another story.

Suit Against Blue Grass Growers.

Mt. Sterling, Ky., May 17.—Commonwealth Attorney Alexander Connor, of Owingsville, has filed suit in the Montgomery Circuit Court against the Kentucky Blue Grass Seed Company and M. O. Cockrell, J. M. Bigstaff of this city, D. S. Gay of Winchester, J. S. Wilson, Woodford and Caterby Spears of Paris, Bourbon, alleging the formation and agreement between the parties of a pool trust or organization for the purpose of controlling the blue grass seed crop and fixing a specific price. The suit is brought under the anti-trust act in Kentucky, and the sum of \$5,000 each is asked from the individuals and the company, a total of \$35,000. The Kentucky Blue Grass Seed Company has its headquarters in this city, where it has one of the largest and best equipped seed cleaning plants in the United States. The suit will be tried at the September term of the Montgomery Circuit Court.—Lexington (Ky.) Herald.

NOTES.

Toledo, O.—The Ohio Seed Co. has made an assignment to C. K. Friedman, attorney. The assets are given as \$1,000 in personal property.

S. F. Leonard, of the Leonard Seed Co., Chicago, sails for Europe on S. S. Minnetonka from New York, June 5.

D. S. Wright, salesman for the Lake Shore Seed Co. of Dunkirk, N. Y., included Porto Rico in his recent business trip.

NEWS NOTES.

Gardenias have been unusually late in blooming this season in Texas.

Omaha, Neb.—The Dole Floral Co. was among the sufferers by hail in the recent storm.

Vassar, Mich.—Reports come of damage done to several greenhouses by the severe storm of wind and hail on May 16.

Boise, Idaho.—The Boise 50,000 Club asked for exhibits from the farms and orchards to display at the opening of their new rooms.

Newport, R. I.—John R. Drexel has contracted for the construction of a small lake for an aquatic garden on his summer estate here.

Winchendon, Mass.—The greenhouses on the estate of the late Ephraim Murdock were sold at auction on May 17 to various bidders, to be removed within thirty days.

Pawtucket, R. I.—The Rhode Island Greenhouses, when put up at auction May 15 were bid in by the Industrial Trust Co., which held a mortgage for \$8,000 with interest, for \$6,500.

The W. W. Castle Company of Boston, reports a spirited demand for greenhouse heating apparatus. Last week they placed three of their largest size hot water boilers and five automatic hot water circulators.

AN ANNIVERSARY AND A CONGRATULATION.

One of our widely known Boston florists, Julius A. Zinn, has just observed the tenth anniversary of his starting in business. For many years previous, however, Mr. Zinn was no stranger to the flower trade of the city, for in his place of employment he was known as a faithful worker, patiently at his post early and late and it is but natural, now that he has attained a well-earned prosperity, congratulations sincere should be extended. Channing said that "Man owes his growth, his energy, chiefly to the striving of the will; that conflict with difficulty which we call effort." Mr. Zinn is a literal demonstration of this truth. He early sized up the demands of the flower buying people of New England, "butted in" with a generous combination of business sagacity and artistic skill, which has won for him first honors on several occasions in the horticultural exhibitions, and has extended his lines profitably far beyond the environs of Boston. He has made good use of his ten years and there is plenty of equal opportunity in every populous community in the land for more young men with "pluck" in their make-up.

BUSINESS CHANGES.

New York, N. Y.—N. C. Schreiner has given up his wholesale florist business at 41 W. 28th street.

Mobile, Ala.—J. P. Russell, for the last four years connected with the place, has leased the Chatogue Greenhouses.

New Castle, Ind.—The Frederick J. Benthley Co. succeeds the Benthley-Coatsworth Co., with Otto Benthley as manager of the plant here and his brother in charge of the retail branch in Chicago.

Colorado Springs, Col.—The Pike's Peak Floral Co. has bought the greenhouse business and property of William Clark and will now engage in retail business. W. E. Crump will have charge of the sales department for the company and Edward Johnson of the greenhouses and growing. Mr. Clark retains and will continue in his nursery business.

NEWS NOTES.

Peekskill, N. Y.—C. H. Robinson has leased the entire building in which he is now located.

Beverly, Mass.—J. W. Philbrick, florist, is to move into a new store on Abbott street as soon as it is completed.

Cambridge, Mass.—Sands & Conant, who have recently started in the wholesale and retail plant business, are located at 463 Mt. Auburn street.

West Springfield, Mass.—Daniel S. Law, of Centre Barnstead, N. H., has leased Waldheim, the estate of the late Adolph Mieliez, and will carry on the business of fruit and flower growing.

St. Louis, Mo.—The Bentzen Floral Co. expect to have their handsome new store and show house, corner Grand avenue and Herbert street, ready for occupancy by the last of August.

Cincinnati, O.—Arrangements have been made by the Unemployed Protective Association to observe Memorial Day by decorating the graves of the unknown dead in potter's field. Adam Miller, the Clifton florist, is at the head of the committee for this purpose. Several florists have already

consented to donate flowers for this purpose, and the schools and churches will be asked to help out with floral contributions.

Flower Market Reports.

BOSTON This is a hustling week with growers and wholesalers alike. A tremendous quantity of material has been ordered in advance, at full prices and all indications point to a volume of business for Memorial Day, exceeding anything on record for this or any other holiday in the year. The variety of flowers in the market is largely increased by heavy cuts of astilbes, stocks, and other things specially grown for the occasion and roses from cold houses are being received in quantity now. Carnations are called for in enormous quantities, colored varieties especially, but many lots are in poor condition, indicating over-storage and should warm weather ensue at the close of the week, as is probable, the trouble will be greatly aggravated.

Trade has been much on **BUFFALO** the quiet side for the past two weeks and up to Friday last, there being an over-supply on almost everything on the cut flower line. Roses have been too abundant, especially Bride and Bridesmaid of ordinary quality, for which there was little or no demand. Beauties as well were in heavy supply, but moved rather slowly and at prices away below quotations. Peas were also included, together with lilies and outdoor tulips, narcissi, etc. Carnations were not coming in too plentifully, but the market being in such condition they also accumulated and added to the surplus which was being carried along from day to day. On Friday everything brightened up and continued through Saturday and Sunday when a good portion was cleaned up and on Monday, the 24th, the market got back in condition. Roses and carnations as well as other material (save lily of the valley) were sold out early in the day and the outlook for the week-end is bright, orders being booked for Memorial Day, and a record-breaking week's business is looked for by the trade.

Since our last report a change has come over the scene. Not that the week of 17th to 22nd was an improvement as regards business over that of 10th to 15th, but there were a few cold stormy days and these had a decided effect in checking production. A fairly good clean-up of the week's surplus took place on the 22nd, and Memorial week starts out with a clean sheet, and with prospects for an active business. There will not be any great redundancy of stock in any line. If nothing unforeseen happens a satisfactory business will be done at reasonable prices with fair returns to both grower and retailer. Pre-memorial week outlook is decidedly encouraging considering what we have gone through. The American Beauty rose crop is beginning to show the effects of the advancing season and the choicest now coming in are from young plants grown specially as a crop for from now on. Brides and Bridesmaids are also beginning to show the strain; but Richmonds are holding their own splendidly so far. Killarneys are showing up much better than Jardines for the time being, but it will surprise no one should Jardine get into alignment again very soon and

even forge ahead of her running mate. Marylands are improving in quality steadily from week to week. Carnations are taking a breathing spell after their recent blooming spurt. We do not look for any great surplus of these for a while. Peonies in this locality are held back by the cold weather. We thought a flush of them would be in by the 27th but it looks a little doubtful today (24th).

However, a couple of warm days will do wonders. Outdoor sweet peas are just commencing. These are from fall-sown seed, with frame protection, of course. By frame protection is meant boards alongside each row covered with panes of glass, a straw covering being put on or taken off according to the weather. This gives a gain of about three weeks over the regular outdoor product. The demand for gardenias has fallen off somewhat and the crop is smaller also. Cattleya Mossiae is the star in the orchid line at present. Snowballs are the leading outdoor flower this week, outside of peonies. Irises and May tulips are nearly over. Blue cornflower and white spirea are factors. Lilacs are practically over.

Again we have the June girl with us, claiming the choicest for her adornment.

She will want the finest of Sweet Peas, Valley, Cattleyas, Gardenias and Roses, of which we will have a magnificent supply.

SWEET PEAS

Lavender, Pink, White and Flesh; 75c. to \$1.00.

VALLEY

S. S. PENNOCK - MEEHAN CO.

1608-1620 Ludlow Street

PHILADELPHIA, PA.

Twin City business **TWIN CITIES** has been quite good of late. Prospects for Decoration Day are very promising; owing to the late spring there will not be any out-of-door flowers for the next two weeks. Roses and carnations have gone up already, and other cut flowers, like peonies, etc., are bringing a pretty good price.

FLOWER MARKET REPORTS.

(Continued from page 770)

NEW YORK. This is an uncertain week in New York

wholesale markets—a "waiting game" in fact. Local business is exceedingly quiet and the wholesale establishments are loaded up with an enormous amount of material, both outdoor and indoor, and the latter is on the downward road as to quality. As Memorial Day approaches there is a disposition to stiffen up on prices in anticipation of heavy shipping orders from points north and east particularly, but nobody looks for anything sensational in the way of demand. Price quotations as given have very little application to the actual sales as made from day to day of late, but are as near an average between asking and selling rates as it is possible to make.

DETROIT. Business is very satisfactory to all and with the weather becoming more seasonable planting out orders are rushing everyone to the limit. Flowers

of all kinds are coming in in fine quality and quantity and all find a fair market. Many of the growers are badly disappointed with Baby gladioli. They were careful about planting them at different times, but somehow or other they all bloom at once. Decoration Day will find a very low supply here on account of the backward season.

INDIANAPOLIS. The market is somewhat better than it was a week ago and, while there are large quantities of roses beyond what the demand calls for, stock moves along somehow. Carnations move very well and as the weather keeps cool prices have not fallen any; they will probably stiffen up very perceptibly for Decoration Day. Quantities of outside shrubbery is in bloom now. Cattleyas, lily of the valley and sweet peas are extremely plentiful. There seems to be quite a scarcity of greens, especially good common fern. The bedding plant men say that business has never been better and the first of June will see a clean out.

(Continued on page 750)

Flower Market Reports.

(Continued from page 781)

A week of sunshine has
CHICAGO had a tendency to in-
crease the amount of
stock, though the weather has con-
tinued surprisingly cold, the thermom-
eter registering almost to the freezing
point. Sunday morning, May 23rd,
everything was covered with a white
frost. So far as has been learned no
serious damage has been done. Every-
thing in planting has been more or less
delayed, especially in the soft plants.
All idea of home grown peonies was
abandoned some days ago, the buds be-
ing scarcely formed one week before
Decoration Day. Those coming in
from southern Illinois and Indiana are
all that can be desired, arriving fresh
and firm. The stock from Memphis
and points farther south is gone and
florists who shipped to Chicago two
weeks ago are now sending here for
their peonies. Roses are not in so big
a crop as a month ago. Carnations are
not likely to get so low again for some
time. Green stuff is not at all plenti-
ful, smilax decidedly scarce and com-
mon ferns still bringing a good price.
In addition to the usual variety in
carnations and roses there are tulips
in all colors, but some especially fine
red ones, forget-me-not, snap dragons
in every color and with stems reach-
ing to six feet, stocks, sweet peas, ap-
ple blossoms, wild violets, jasmine
from the south and peonies. The great
vases of callas still stand on practi-
cally every counter in the wholesale mar-
ket. The pansy growers are disap-
pointed this year. Sales have not been
up to last year's. The blooms seem to
lack substance and wilt easily. Many
growers find their cut of roses is dim-
inishing just as they will be most in
demand. One of the largest growers
reports his cut as little more than one-
half of what it was two weeks ago.

The heavy rains of
WASHINGTON Friday and Satur-
day last saved the
early crops from almost total destruc-
tion. The drought in this section was
becoming appalling. All out-of-door
roses have been kept back by the cold
and it is hoped that they will be in
their prime for Decoration Day. Near-
by peonies are just coming in in
any quantity, and considering the un-
favorable season are very good indeed.

was installed to heat over six million (6,000,000) square feet of glass during the past three years.

Expressions from the men who know:

Used steam; was advised to change to your hot water boiler. Find it about half the work with your boiler. We would have no other.

Sternitzke Bros., Park Ridge, Ill. Have handled many greenhouse boilers of other makes, but Kroeschell beats them all. I get perfect circulation in 30 minutes.

Wm. Otto, Oshkosh, Wis. Former boiler, 16 horse-power steam; as much difference as between day and night. Your boiler does not need recommendation. Will recommend itself wherever used.

Theo. F. Danner, Waukegan, Ill.

Grosse Pointe, Mich. Your boiler, in my estimation, is the best in use today. We have two of them.

Potter & Sons, Waukegan, Ill. When we rebuilt our plant, we were undecided whether to use your boiler or a cast iron boiler. We are satisfied we made no mistake in using Kroeschell.

Yeatman & Way, Kennett Square, Pa. Have fired greenhouse boilers since 1885, both steam and hot water. Yours suits me the best. I have two of your boilers. At one time I had two cast iron boilers working together and during a blizzard the rear section of one boiler gave out and the front section of the other sprung a crack a couple of months later. No more cast iron boilers for me. I came very close to freezing out in both instances.

G. M. Thost, DeSoto, Mo.

The Kroeschell Generator

prevents boiling over, cures sluggish circulation, saves fuel, smaller mains can be used, water can be heated to 240° without boiling, increases circulation, 3 to 5 times faster; no hot water system complete without it

HAVE YOU EVER INVESTIGATED

the one sure thing

KROESCHELL BOILERS

See the simplicity of construction. Plate material, NOT CAST IRON. Long fire travel, thin water ways. The best and the most heating surface in the world for the money.

THE KROESCHELL BOILER will give you more heat with the same piping required by other boilers, and with less fuel.

Send for our catalogue.

Kroeschell Bros. Co.
35 Erie St., CHICAGO

THE KROESCHELL BOILER

replaced 1346 cast iron boilers in 1905, 1906, 1907, and many in 1908.

Expressions from the men who know:

We are very well pleased with your boiler. I have had fourteen years' experience in heating, six with gravity steam and eight with vacuum, but give me the hot water system for all purposes. Use me for references any time.

B. Lightbiter & Son, Xenia, O.

Have used upright boilers, tubular boilers, and cast iron boilers. Your boiler heats up better and easier than any boiler we have ever had anything to do with. If we ever buy another boiler, it will certainly be a Kroeschell.

Poole & Purlant,

Washington C. H. O.

I have fired boilers both here and in Europe for the last forty years. The Kroeschell is the best type of boiler I have ever used. I have two cast iron boilers, also a locomotive boiler coupled with yours, but did not need to use the cast iron boilers this winter. Your No. 7 boiler is rated at 15,000 sq. ft. of glass and carries 25,000 sq. ft. of glass until the outside temperature goes down to 10 deg. of frost. We have no trouble to keep temperatures in our houses with easy firing since we installed your boiler. The main flows and returns are heating our potting shed, and packing room, which are not included in the amount of square feet of glass. From the boiler to the farthest end of our violet houses and return is 500 ft. and circulates very quickly.

The Saltford Flower Shop,

Wm. D. Saltford, Pres.

Poughkeepsie, N. Y.

The Kroeschell Piping System

is being installed by many progressive florists. 1½, 1½ or 2-in threaded pipe, or 4-in tubing is used. Boiler can be set on level with greenhouse walks. You do not need deep boiler pits.

COAL Pocahontas Smokeless Coal Blossburg Smokeless Coal

The above steam coals are peculiarly adapted to FLORISTS' use. Prominent features are HIGH EVAPORATION, LOW ASH, LOW SULPHUR, HIGH CARBON, and HIGH HEAT UNITS. Permit us to figure on your year's requirements, deliverable as called for.

THE WAY WE BUILD

Here is an octagonal palm house made with our proven Flat Iron Rafter Construction. Just notice how effectively all of the detail is worked out, and though not elaborate, it is undoubtedly pleasing. That passage at the left connects the palm house with the rest of the range.

An attractive, reliable, durable house—the kind we always build. Send for our illustrated circular

Talk About Lightness, How Is This?

It is a north roof view of an L & B Sectional Iron Frame, Shadeless Ridge House, 55 feet 6 inches wide and 300 feet long. Considering that this construction is not alone the lightest, but the most enduring, as its many years use has long since proven—you cannot afford to experiment with a construction that is only a few months old. Let someone else pay for the experiments.

LORD AND BURNHAM COMPANY,
Irvington-on-Hudson, N. Y.
New York — Boston — Philadelphia — Chicago

THE POINT IS THIS—WE ARE HAVING PRINTED A MOST BEAUTIFUL CATALOG OF U-BAR GREENHOUSES—IT IS GOING TO BE BY FAR THE FINEST

thing on greenhouses ever published. It is one of those catalogs that is not only illustrated in the finest kind of a way, but it tells you what you want to know, in just the way you want to know it, and gets at it quickly. Now this complete catalog will not be ready for a few more weeks, but rather than keep you waiting, we have had a very limited number of Advance Sheets of the first ninety pages printed, and bound up, ready to send to you. It is really the cream of the catalog.

If you write at once, mentioning the fact that you saw this mentioned in *Horticulture*, you shall have one of the first copies that comes from the press; but don't wait and then blame us because all the special copies are gone.

Water in the Garden and Home Park

MAKING AN AQUATIC GARDEN

No one will deny that one may possess a garden beautiful without lakes, waterfalls and pools and fountains, but the generality of mankind have a preference for those which have some one of these pleasant adjuncts, as they add to the interest and the enjoyments of a country residence. In hilly and mountainous country there is usually the opportunity of making use of running water for supplying a lake with abundance, or making cascades, and by making devious stretches of comparatively still water on the level by means of suitable excavations. The water may take the form of a stream of varying breadth, furnished with gentle projections jutting out into the stream, and easy outline which when planted with trees, shrubs, and flowering, as well as ornamental leaved plants, afford the gardener facilities for adding interest and beauty to the banks. Such still or slowly moving streams afford admirable sites for patches of water lilies and other aquatic plants.

Before the site of a lake is fixed upon the nature of the soil ought to be ascertained, for if it allows water to percolate too freely, the bottom and sides would have to be made watertight by a six-inch layer of tenacious clay, well worked and beaten to a smooth surface, and carried rather higher than the proposed level of the water. Where no such operation is needed the banks under water and for 6 to 8 inches above it may be simply cased with stone or coarse gravel, so that the soil be not undermined by the action of the water. The outline of a lake will depend in some measure on the contour of the land, but is more pleasing to the eye if it be of a serpentine character with projections at long intervals on which trees and shrubs may be planted to add still more to its intricacy, and supply surprise views, and stations for rockwork, or for choice conifers, or flowering trees such as the catalpas, papias, Paulownia, etc., and weeping willows.

The depth of a lake in a warm climate should not be less than 6 to 8 feet in the deeper part, or more than 2 feet near the banks if it is intended to plant aquatics, excepting such as are quite hardy, deeper water than this being too cold in the summer months for healthy development; moreover there is little chance of seeing the flowers of such plants when they are placed far distant from the banks. If a lake be less than 6 feet and the inflow meagre there is the risk of fermentation taking place in the warm months, especially after the lapse

of years, during which masses of leaves have been blown into it, and settled at the bottom.

In my next article I intend to give examples of planting the banks of lakes and streams; giving examples in England and Ireland, as well as on the continent of Europe.

Fredrick Moore

British Horticulture

THE NEW EXHIBITION

The Imperial International exhibition which has this year taken the place of the Franco-British one at the Great White City at Shepherd's Bush was opened on May 20th. The site covers an area of 160 acres so that there is ample space available for the display of the nurserymen's art. Several of the leading firms have taken space in the grounds for bedding exhibits. Messrs. Waterer & Sons, of Bagshot, Surrey, who are noted on both sides of the Atlantic for their famous rhododendrons, have laid out several beds in a prominent position with some of the most brilliant varieties. The same firm are making their customary display this summer in an immense marquee in the Botanic Gardens at Regents' Park. In addition to the displays made by the firms the exhibition authorities have placed large orders with the trade for the supply of enormous quantities of bedding plants. The exhibition has thus proved a great advantage to the trade in bringing fresh business this season. The public are beginning to more fully appreciate the advantages of having the best music in the open air, amidst pleasant surroundings, an idea which has been borrowed from continental cities.

POPULAR PRIMULAS

A short distance from the mass of London's drab bricks and mortar there has lately been a welcome blaze of color furnished by some 16,000 Chinese primulas at a leading nursery. Special attention has in recent years been paid to this section of spring flowers by several firms, with the result that a high standard has been reached as regards brilliancy of tint, habit, and floriferousness. At the nursery referred to amongst the chief varieties are Holborn Coral, coral pink with yellow eyes; King Edward, pure white, dark green foliage; Holborn Salmon, salmon pink; Princess of Wales, white with carmine flake; Vivid, deep rich carmine; Snowflake, white, slightly tinged with pink; Prince of Wales, large salmon pink.

A SUGGESTED NATIONAL VEGETABLE SOCIETY

Although Britain is well supplied with special floral societies there is not one of a national character solely devoted to vegetables. There has from time to time been a suggestion made for supplying the omission. "The Garden" has lately had a further correspondence on this subject. Several leading experts express the opinion that there is an opening for a society of this kind in order that an increased attention might be given to vegetable culture by means of exhibitions and trials. For about three years there was a National Potato Society but the interest waned after the "boom" of big prices was over, and the organization dwindled and died from lack of sufficient financial support.

The balance, \$9653 is distributed over the trans-Mississippi states of Nebraska, Iowa, Oklahoma, Kansas, Texas and South Dakota. The project of insurance of greenhouses against hail losses was one of the incentives in the organization of the Society of American Florists. It is to be noted that the main strength of the Hail Association is now in those sections where the S. A. F. has the least following and vice versa.

Relaxation well earned

The season for respite and recreation in all departments of horticultural activity is fast approaching. Memorial Day has passed, June floral festivities of various brands will shortly follow it; trees are in leaf and flower and the nurseryman's digging, and packing and planting for the spring of 1909 has already passed into history; counter trade, mail order trade and all other phases of the seedsman's calling have shrunk rapidly within the past few days; interest now turns to the outings and picnics, and the society conventions which, despite their flourish of business, are, after all, the real article in the picnic line for many. Next week the nurserymen start the series with their convention at Rochester—a town with more snap and ginger in it when it comes to jollification than any place of its size on the map; only a few days later the seedsman will gather at Niagara Falls, Ontario, where, if the experience of others who have tried it counts for anything, they will have the time of their lives; Florists' Club outings innumerable will punctuate July from start to finish and the climax of merry-making adroitly interwoven with the acquisition of serviceable knowledge, will be reached in the silver jubilee of the S. A. F. at Cincinnati in August. One needs only to read the names of the active participants in these merry yet industrious events to get a good line on the intellectual and progressive forces, the bone and sinew of present day horticulture. If you want to find out "who's who in horticulture" don't waste your time looking among the chronic stay-at-homes.

A manifest injustice

The attacks upon the canning industry to which extended reference is made in our seed trade notes in this issue should be regarded with grave concern by seedsmen, fruit growers and the horticultural profession in general. Unfortunately no distinction is made by the agitators and alarmists between the "canners" of fruit and vegetables and the products thereof and the "packers" of meats, fish, etc. As to the practices of the latter we have nothing to say at present but sterilization by heat is practically the universal custom in the fruit and vegetable canning business and it is nothing short of rascality to include, even by implication, these people in any denunciation or criticism that may, with or without reason, be made concerning the methods of meat preserving and thus mislead the public and tend to bring suspicion and great injury upon a reputable industry the products of which constitute one of the greatest blessings of modern civilization. The Pure Food Law is something we should all be grateful for and whoever is caught violating its provisions should be given the limit of punishment, whatever branch of food manufacturing or food preserving he may be identified with. Fresh fruit and vegetables need no chemical preservative. If the fruit has reached that condition where chemicals are needed to make it keep it should be destroyed, if not voluntarily then under compulsion. Regulations to this effect will not disturb the canners of garden products, please them rather, as any writer desiring to deal out unprejudiced information can readily ascertain by proper investigation.

The losses adjusted by Secretary Esler of the Florists' Hail Association between May 5 and June 1, 1909, amount to \$11,084. It is interesting to note the localities in which the greatest losses were sustained. None are reported from east of Indiana although it does not necessarily follow that there have been no losses in the east as the reports cover only those cases where hail insurance is carried. In Indiana the amount is \$859, in Illinois \$191, in Michigan \$77, in Wisconsin \$200, and in Missouri \$194, totaling \$1431 east of the Mississippi.

Notes from the Arnold Arboretum

Besides the Lilacs and Azaleas the Honeysuckles are now the most showy flowering shrubs at the Arnold Arboretum and particularly *Lonicera tatarica* and its crosses with *L. Morrowii* and *L. Ruprechtiana*, their flowers varying from pure white to deep pink. Another cross of more recent origin and apparently not yet known in American gardens is *Lonicera amoenula*, a hybrid of *L. tatarica* and *L. Korolkovii* var. *floribunda* raised in Germany several years ago. A similar hybrid of nearly the same parentage, one of its parents being the true *L. Korolkovii*, instead of a variety of it, originated a few years ago at the Arnold Arboretum and produced last year for the first time its flowers in profusion; it was described recently by me as a new variety under the name *L. amoenula* var. *Arnoldiana*. This is certainly the most graceful of all the hybrids and, though we have other graceful species, none of them combines an elegant habit with such a profusion of delicately tinted and rather large flowers. *Lonicera amoenula* var. *Arnoldiana* is a rather dense bush with upright and spreading branches clothed with light bluish green foliage, the leaves being similar to those of *L. tatarica* but smaller and narrower. In June, when the flowers of *L. tatarica* and its other hybrids are passing away, its branches are covered with light pink flowers borne on long and slender stalks well above the bluish green foliage. The whole shrub has thus the appearance of an airy lightness and gracefulness very unlike any other of the hybrids of *L. tatarica*. It is not yet in trade and in fact not known outside of the Arnold Arboretum.

Among the *Diervillas* attention ought to be drawn to *Diervilla praecox* which is now in full bloom several weeks ahead of other species and varieties of this genus. *Diervilla praecox* is of comparatively recent introduction and apparently still little known in American gardens. It is a hardy shrub of upright vigorous habit with pubescent sharply toothed leaves. The flowers appear in great profusion surrounded by clusters of leaves along the branches of last year's growth; they are about one and three-quarters of an inch long and of pale purple color. One cannot deny that the color is not as beautiful as in many other varieties of *Diervilla*, but this drawback has been remedied by the new hybrids raised by Lemoine of Nancy who also introduced originally the species in question; they combine the early flowering time with flowers from delicate pink to carmine purple; the first named color shade is represented by the variety *Gracieux*, the latter by var. *Conquerant*.

Of the well known favorite shade and avenue tree *Aesculus carnea* (*A. rubicunda*) there is at present a variety in flower which seems to be still very little known though it surpasses the original *A. carnea* in beauty and originated about fifty years ago in France. It is *A. carnea* var. *Brioti* with deep red flowers, the two upper petals marked with an orange red blotch. The flowers are so much more brilliant than those of the common *A. carnea* that this variety deserves to be better known and more often planted.

Besides the Lilacs and the Azaleas which are now past

their prime the native and the Ghent Azaleas are now in bloom and the earliest of the *Rhododendrons* begin to unfold their flowers. As the latter have come well through the winter, they give every promise of a splendid show when they will be in full bloom.

Alfred Rehder.

New Plants at the Royal Horticultural Society

In addition to my previous list given in the issue of *HORTICULTURE*, May 29, there were the following: *Odontioda Vuylstekeae* Crawshayanum (*O. Pescatorei* x *Cochlioda Nozthiana*) shown on May 17 at the Vincent Square Hall, by DeB. Crawshay, of Rosefield, Sevenoaks. The variety retains the fine shape of *Odont. Pescatorei*, but in color the flowers are of a glowing scarlet, the crest being of an orange color. The flower shows a variety of tints, but none of the spotting observed in *M. Vuylsteke's* form. The colors and markings are those most probable in such a cross as that given, so that its appearance was a surprise to the raiser.

RHODODENDRON SOULIEI.—The society awarded a first-class certificate to this species from China and shown on this occasion by Messrs. J. Veitch & Sons of Chelsea. The comparatively large flowers have a bright suffusion of rose on a pale ground. The ovate cordate leaves are covered in the young state with a glaucous bloom, and are then of a red tinge, as are the young shoots, but subsequently the tinge becomes green. The flower for one-third of its depth is widely expanded, and has a diameter of 4 inches. The plant has proved hardy in England.

PRIMULA BULIYANA. This plant was shown by Messrs. Bees, Ltd., Liverpool, at the meeting on May 18. Its tall stalks bear orange colored flowers in whorls; sometimes these will number three whorls. The calyx and upper parts of the flower stem are mealy, and the leaves resemble those of a polyanthus. The plant was found in China by Mr. G. Forrest, collector for Messrs. Bees, Ltd., who states that it is a moisture loving plant, growing to a height of 3 feet, and is found in colonies of several acres in extent.

TULIP THE PRESIDENT.—A new and striking variety of the late flowering or cottage tulip is *The President*, shown by Messrs. R. W. Wallace & Co., of Colchester. The bloom is of a very large size, in color a reddish orange, with a dark basal patch. An award of merit was bestowed upon it.

Sunderland Brown

Mr. C. C. Hurst, a member of an English firm of wholesale seedsmen, had many interesting points to offer respecting Mendel's law and its application to horticulture before the members of the R. H. S. at a recent meeting. Recent experiments have shown, Mr. Hurst explained, that many simple characters in garden plants follow Mendel's laws. In many cases, however the Mendelian characters do not happen to correspond with the horticultural characters, and interesting complications then arise.

AMERICAN ASSOCIATION OF NURSEYRMEN

The thirty-fourth annual convention of the American Association of Nurserymen will be held at Hotel Seneca, Rochester, N. Y., June 9, 10, and 11, 1909.

Program.

Much attention has been given to this matter of program by the officers. The aim has been to make it possible to combine business with pleasure in reasonable proportions. To that end arrangements have been made for one session daily. The hope is that members will all attend these sessions which will be interesting and ample time is thus given for social and business intercourse as well as for the special features provided by the Entertainment Committees. It will be therefore a courtesy toward those who have been working hard on this convention if all will be promptly on hand for these sessions and remain throughout.

Wednesday, June 9, 9 A. M.

Address of Welcome, Hon. H. H. Edgerton, Mayor of Rochester.

Response, George S. Josselyn, Fredonia, N. Y.

President's Address, Charles J. Brown, Rochester, N. Y.

Report of Secretary, George C. Seager, Rochester, N. Y.

Report of Treasurer, C. L. Yates.

The President will announce the meeting of the newly elected state vice-presidents to be held Wednesday evening, 8 P. M., Assembly Hall. During the day (Wednesday) the members from each state are requested to get together and select their new vice-president, who will attend the Wednesday evening meeting which will consider the question of nominations and selection of place for next meeting in order to report on Thursday morning. In case but one representative from a state is in attendance he

CHARLES J. BROWN.

President.

will please consider himself vice-president and attend the meeting.

Report of Tariff Committee, Irving Rouse, Rochester, N. Y.

"Nurserymen Pulling Together a Little More," J. H. Dayton, Painesville, Ohio.

"What the Orchardist Expects from the Nurseryman," T. B. Wilson, Halls Corners, N. Y.

Report Transportation Committee, F. H. Stannard, Ottawa, Kan.

"Evergreen Conifers," Samuel C. Moon, Morrisville, Pa.

Appointment of Special Committees.

Wednesday, June 9, Afternoon.

A ride through Rochester streets and parks, as guests of Western New York Nurserymen.

Conveyances will be at the Hotel Seneca at two o'clock P. M. This is expected to be a most attractive feature of the convention. A band concert will be given in one of the parks. All Nurserymen and representatives of allied industries with their wives, children, sweethearts or friends invited. Give the Secretary names of your personal party early Wednesday morning so that proper arrangements can be made.

Wednesday, June 9, 8 P. M.

Meeting of State Vice-Presidents in assembly room to nominate officers and a place of meeting for the year 1910.

Thursday, June 10, 9 A. M.

Roll Call of State Vice-Presidents. Report of State Vice-Presidents. Elections of Officers. Selection of Next Place of Meeting.

"Our Department's Work," R. A. Pearson, Commissioner of Agriculture, Albany, N. Y.

"The Science Point of View," Prof. L. H. Bailey, Cornell University, Ithaca, N. Y.

This is the first time in several years it has been possible for Professor Bailey to be with the nurserymen. The committee is gratified to have been able to arrange for this meeting.

"Commercial Peach Orchards," L. A. Berckmans, Augusta, Ga.

"The Experiment Station and the Fruit Interests," Dr. W. H. Jordan, New York Agricultural Station, Geneva, N. Y.

"Relations Between the Grower and

GEORGE C. SLAGER
Secretary

CHARLES L. YATES
Treasurer.

WILLIAM C. BARRY
Ex-President

the Reliable Nurseryman," R. S. Osborne, Rochester, N. Y.

Report of Legislative Committee, Wm. Pitkin, Rochester, N. Y.

Report of National Council of Horticulture Committee, C. J. Maloy, Rochester, N. Y.

Report of Exhibits Committee, T. B. Meehan, Dreshertown, Pa.

Report of Publicity Committee, J. M. Irvine, St. Joseph, Mo.

Report of Co-operation with Entomologists' Committee, Orlando Harrison, Berlin, Md.

Thursday, June 10, Afternoon.

At one o'clock P. M.—Reception and lunch for Ladies at Genesee Valley Club as guests of the Western New York Nurserymen. A committee to escort the ladies will be in the Hotel lobby at 12:45, noon.

At two o'clock P. M.—Annual meeting of American Protective Association, T. B. Meehan, Secretary, in the general assembly room.

At three P. M.—Annual meeting of the Retail Nurserymen's Association,

C. M. HOBBS
Vice-President.

Guy A. Bryant, Secretary, in general assembly room.

Thursday, June 10, Evening.

For the Ladies—Theatre party at the Lyceum Theatre adjoining the hotel, as guests of the Western New York Nurserymen. Members will kindly give names of their ladies to the Secretary by noon Thursday so arrangements can be made; also call on Secretary for ladies' tickets by 6 P. M., Thursday.

For the Men—As guests of the Western New York Nurserymen, a SMOKER will be given in the Masonic Temple auditorium, at eight P. M. "Something doing every minute," is the promise of those in charge.

Friday, June 11, 9 A. M.

Unfinished Business. Special Orders, if any. Final Resolutions.

It has been thought wise to leave Friday as much open as possible in order to give the nurserymen opportunity for business intercourse, for looking over the exhibits, visiting nurseries, etc.

SPECIMEN DAVALLIAS.

Editor Horticulture:

Dear Sir:—In regard to Mr. Pope's fine specimen of *Davallia fjenensis* illustrated in your issue of May 29, which I rather think to be *Davallia f. plumosa* as evidenced by the photograph, *D. fjenensis* is rather more erect and decidedly paler than its variety *plumosa*. Both form, however, excellent decorative subjects, and, as Mr. Pope states, the fronds are of great durability when cut. In Mrs. J. L. Gardner's collection there is a plant which just now measures five feet nine inches through, and I think that when it makes its second growth this measurement will be exceeded. In all probability had Mr. Pope's plant the rhizomes trained horizontally on the soil inside the pot or tub it would have formed during the period he has had it, an even larger piece than the specimen here, inasmuch as our piece was formed of three plants from four-inch pots purchased in the spring of 1905, being repotted twice in light soil since that time. The whole of the rhizomes are carefully kept on the surface of the soil, and no water is ever allowed to get on the foliage, otherwise discoloration soon takes place. I would be interested to know whether Mr. Pope has any other varieties of this genus, particularly *D. pallida*, usually known as *D. Mooreana*, a variety which a few years ago was largely used as an exhibition plant.

Yours very truly,
VERNON T. SHERWOOD.
Brookline, Mass.

NEWS NOTES.

Brooklyn, N. Y.—J. W. Merritt has opened a florists' supply house at 384 Jay St.

New Haven, Conn.—The Munro Co., florists, are putting up a barn and storehouse.

Sayre, Pa.—J. B. Knapp has the contract for the scenic garden work around the plant of the Sayre Electric Company.

Los Angeles, Calif.—T. Takahashi, proprietor of the New Yokohama Nursery, was severely injured on May 20 by a runaway horse.

Oskaloosa, Ia.—The Mahaska Nursery & Fruit Farm is the name under which A. Branson will carry on business on his recently acquired land here.

Dunkirk, N. Y.—Fire, supposed to have been caused by spontaneous combustion, on May 25, in the plant of the Lake Shore Seed Co., did about \$3,000 damage.

Far Rockaway.—Axel Lindstrom, a florist, has been awarded damages of \$2,000 by the New Jersey Telephone Company for the death of his son caused by dangling wires.—*Brooklyn, N. Y., Times.*

ALWAYS GOOD.

HORTICULTURE is always good and a welcome visitor. I wish it all kinds of success. Please find enclosed amount for renewal.

JOHN McL. CAMERON.
Buffalo, N. Y.

PERSONAL.

James Cottier of Hinchendon, Mass., is now with C. H. Hunt, Providence, R. I.

Joseph Le Clerc of Lexington, Ky., has accepted a position at Olympian Springs.

Donald Carmichael sailed from Boston on the Allan Line steamship for a visit to the land of heather, on May 28.

H. M. Mayer, horticulturist at Belle Isle, Detroit, is mentioned as the probable successor to William Dilger as superintendent of Belle Isle Park.

Messrs. Phil. Breitmeyer and J. F. Sullivan of Detroit are participating in the annual excursion of the Board of Commerce—a four days' water trip on the steamer Cleveland.

Mr. and Mrs. Fred C. Weber and their daughter Adele, and Mr. and Mrs.

C. J. MALOY
Chairman N. C. H. Committee.

Theodore Miller and their daughter Dora, all of St. Louis, Mo., will leave about June 15th, from New York from whence they take a steamer to spend the summer seeing the sights of Europe. Their return home will be about September 1st. They will miss the opportunity of seeing their many friends at the S. A. F. convention this year.

CAN'T DO WITHOUT IT.

Enclosed find one dollar to renew my subscription to HORTICULTURE. I am one of your first subscribers and am going to stay by you. Can't do without it. It is getting better and better with every issue.

H. D. SEELE.

Elkhart, Ind.

The Gardeners' and Florists' Club of Boston will have a field day at E. J. Shaylor's peony gardens, Wellesley Hills, on June 17.

NEWS OF THE CLUBS AND SOCIETIES

FLORISTS' HAIL ASSOCIATION OF AMERICA.

The Florists' Hail Association is a purely mutual, co-operative association, which was incorporated under the laws of New Jersey on June 1st, 1887. No agencies are established, and all business is transacted through the office of the secretary at Saddle River, N. J. Greenhouse glass is insured whether owned by market gardeners or florists, but loose sash not securely fastened against wind, are not insurable.

The basis of insurance is per square foot of glass, the rate of assessment being 8 cents per hundred square feet of single thick and 6 cents per hundred square feet of double thick glass. All members pay, upon joining or insuring additional glass, the sum of \$2.00 for the first 2,000 square feet of glass and 50 cents for each additional thousand square feet of glass. This goes into a separate fund known as the reserve fund which now amounts to \$21,000. The emergency fund is supplied by assessments levied at option of directors whenever such fund falls below 2 per cent of the fixed value of all risks; 19 assessments have been levied in 22 years.

In case of loss the insured receives 5 cents per square foot for single thick and 8 cents per square foot for double thick glass broken, in such ratio as the amount insured bears to the amount owned. Extra one-half an extra whole insurance is allowed, in which case the insured receives a proportionate increase in payment in case of loss.

FLORISTS' CLUB OF WASHINGTON.

The regularly monthly meeting of the Florists' Club of Washington was held on the evening of June 1st at 1214 F street. Owing to the absence of President Kramer, who was in New York, Vice-President Robertson presided. One new name was admitted to membership, viz., George J. Hess of Anacosta, D. C.

Tickets are out for the annual outing of the bowling team, which will be held this year at Chesapeake Beach on June 25th. Wm. F. Gude spoke earnestly in support of the bowling team and advocated that greater recognition be shown that organization. He also moved that the club re-adopt the plan of last summer and hold the summer meetings out-of-doors, first of which should be held at his house. This motion was unanimously accepted. After adjournment refreshments were served by Mr. Gude.

FLORISTS' CLUB OF PHILADELPHIA.

The June meeting held on the 1st inst. was slimly attended, coming so close on the Memorial Day rush and also on account of the street car strike. Even the essayist of the evening failed to put in an appearance. Mr. Lonsdale was to have read a paper on "Bedding Plants," and many came quite a distance to hear him and were correspondingly disappointed. Routine matters of the usual uninteresting kind occupied most of the time. No exhibits. The Lonsdale talk will be the feature of the July meeting.

AMERICAN PEONY SOCIETY

The seventh annual meeting and sixth annual exhibition of the society will be held June 11 and 12, '09, at the Cottage Gardens, Queens, N. Y., and all consignments of flowers for exhibition must be addressed to the Cottage Gardens Co., Queens, Long Island, N. Y.

Express charges on all exhibits must be prepaid, and should be so marked on the boxes, as no charges will be paid by the manager of the exhibition.

All entries must be sent direct to the manager of the exhibition, Mr. R. T. Brown, Cottage Gardens, Queens, N. Y., so as to reach him at least two days before the exhibition. While it is not wished to debar anyone who wishes to make an exhibit, compliance with this rule will greatly facilitate the work of arrangement. All entries not staged by 1 P. M., June 11, will be disqualified from any and all competition.

The society will furnish uniform cards for all exhibits entered in competition and any exhibit not so marked will not be judged in any of the classes.

The premium list includes classes for commercial and amateur exhibitors, with liberal prizes. Copies may be obtained from the secretary, A. H. Fewkes, Newton Highlands, Mass.

The meeting promises to be a very interesting one. Mr. Ward's extensive collection will be in fine condition and owing to the great number of varieties represented it will be worth travelling many miles to see.

All who can do so should send flowers for the exhibition as the facilities for keeping them until the time of the exhibition are of the best and they will be cared for by experienced men in charge.

In connection with the exhibition Mr. Ward wishes to have it distinctly understood that the Cottage Gardens Co. will not be a competitor in any of the classes.

Visitors can conveniently stay at any of the New York hotels, as Queens is situated within the limits of Greater New York, about eleven miles from Herald Square and can be easily reached by the subway connecting with trains every hour at the Flatbush Avenue Station, Brooklyn. Conveyances will meet all trains at Queens during the two days of the convention and lunch will be served to those present at the meeting.

The regular business meeting will be held at 3 P. M., on the first day, June 11.

Officers.

President, C. W. Ward, Queens, N. Y.

Vice-president, C. J. Maloy, Rochester, N. Y.

Treasurer, J. H. Humphreys, Germantown, Pa.

Secretary, A. H. Fewkes, Newton Highlands, Mass.

PEONY SOCIETY MEETING POSTPONED.

Owing to the prevailing cold weather of last week, it has been decided to postpone the meeting of the Peony Association until June 11th and 12th.

ROYAL HORTICULTURAL SOCIETY.

On the occasion of the meeting of this society on Tuesday, May 18, the hall at Vincent Square, Westminster, was, as on the previous meeting, packed to overflowing with plants and flowers in season. Only the orchids were missing, *Laelia purpurata* being the solitary exhibit—good examples in fine bloom.

Of new or rare plants the following were noted, viz., *Verbena Princess of Wales*, a deep blue variety having almost globular flower head; and *King of Scarlets*, of a very bright tint and the same kind of truss. Both make excellent plants for culture in pots or for bedding purposes. *Clorinda*, a geranium of a cerise red tint and having fragrant foliage the shape of an oak leaf, has a flower of 3 inches diameter. It was raised from two Cape species by the late Doctor Bonavia: plants that some nursery firms are trying to force into public favor, but not with much chance of success. These exhibits came from H. B. May & Sons of Edmonton: M. H. Correvon of Geneva, the well known cultivator of Alpine plants, showed many rare plants, but I now only mention two which compelled attention—the scarlet flowering *Silene Virginicum*, and *Gentiana angulosa* of a tint of blue, like that of *G. verna*, but a better expanded flower. Messrs. Bunyard & Co. of Maidstone showed the showy *Statice Suworowi*, a plant with tall compound flowerstalks and violet pink flowers arranged on spikes, ranging from 3 inches to 12 inches in length; the poppy-like *Meconopsis integrifolia* with blooms of lemon yellow color and *Saxifraga McNabiana* producing pyramids of white blooms arranged in corymbs, a good subject for greenhouse decoration when grown in 5 inch pots. This should be a good market plant. Amos Perry of Enfield, Middlesex, was an exhibitor of various hybrids of iris raised by that famous cultivator of the genus, the late Sir Michael Foster. There were *I. Vaga*, *I. Kolkowi*, *I. balcana*, *I. Hungaria*, *I. Calypso* and *I. Andromache*, etc. The colors of the blooms were of various shades of blue and deep purple.

A number of Himalayan and other species of rhododendrons came from the gardens of Sir E. G. Lover, at Horsham, Sussex. I noted *Coombe Royal*, *Aucklandi*, *Kewensis*, *cinnabarina*—two plants of different shades of dull red, very distinct looking species, and not often met with in gardens.

Many plants of the Odier or spotted varieties of pelargoniums, very ornamental for greenhouse use, but which are greatly gone out of cultivation here, were shown by Heath & Son, of Cheltenham. Very good were the varieties, viz. *Vulcan*, *Marchand*, *Souvenir de Madame Royer*, *M. Gaston Alling*, and *Negress* a very dark colored pretty flower.

Some extremely large flowered annual chrysanthemums were shown by Mrs. Bischoffsheim, the best being *Nightingale Star*, the colors being lemon yellow, the disc of an orange color, with a bright yellow ring around it;

Rhododendrons

No Estate Complete Without Them.

We have the hardy ones in unlimited quantity. We can supply

The American Nursery Trade

with the quality and the sizes required.

Talk Now Before Stocks are Depleted.

JOHN WATERER & SONS, Ltd.

American Nursery, Bagshot, England.

Lord Beaconsfield, with smaller blooms, 4 inches in diameter, marked with rings of deep rosy purple and of yellow, and florets of a pale rose tint. Paul & Son, Cheshunt, had a new form of *Kerria Japonica* named *grandiflora flore pleno*. It greatly exceeds the old *K. Japonica* in the size of the bloom. Tulips formed the chief attraction, and next came Rambler and other climbing roses.

FREDERICK MOORE.

CONNECTICUT HORTICULTURAL SOCIETY.

This society held its second semi-monthly meeting on the evening of May 28th, in Hartford, President Huss presiding. William E. Stewart, of New Britain, who was elected to membership, makes the 120th active member. John Gerard and Oscar F. Gritzmacher, both of New Britain, brought specimens of over two hundred varieties of pansy blooms. Mr. Gerard's collection was not for competition, and Mr. Gritzmacher received a vote of thanks of the society, on the recommendation of the judges, Messrs. Stewart, Zuger and Sperry. Mr. Gerard then gave a short, interesting address concerning the pansy, and he has promised to present a paper on the subject at some later time. He is a pansy specialist and is looked upon hereabouts as an authority in pansy lore. J. A. Weber, gardener for Walter L. Goodwin, was awarded honorable mention for specimens of Early Snowball and Thorburn's Gilt Edge cauliflower, and a certificate of merit for an exhibition of splendid-looking mushrooms. At

the next meeting, on June 11th, arrangements will be made for the fall exhibitions of the society.

GEORGE W. SMITH, Sec.

Melrose, Conn.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The peony show scheduled for the 27th of May proved a disappointment, flowers generally being more backward than expected. A good display of hardy perennials was in evidence. The Newbold estate sent a very fine collection of the latter, many of the specimens being rare and all the collection of unusual interest. Herman Van Goden, who had charge of this exhibit, deserves a word of praise for careful and correct labeling. Francis Canning, gardener for Samuel T. Bodine, also had a fine exhibit of perennials. S. Hammond from Ellison's, was the chief exhibitor for the salad prizes.

CLUB AND SOCIETY NOTES.

The Gardeners' and Florists' Club of Baltimore will hold their annual picnic at Avondale on July 14.

At the meeting of the New London County Horticultural Society at Norwich, Conn., on June 1, B. Hammond Tracy on the gladiolus and Mrs. E. M. Rogers on native orchids, were the speakers.

The Rose Festival at Portland, Ore., is to be held on June 8 and 9 and 75 silver cups are offered for amateurs. In the class for nurserymen, for exhibit of roses and shrubbery, the first prize is \$100, second \$60, third \$40.

The Florida Horticultural Society, at their meeting in Daytona, on May 20, elected the following officers: President, H. Harold Hume, of Glen St. Marys; vice-presidents, W. C. Temper, H. B. Stevens, B. F. Chilton; secretary, E. O. Painter, of Jacksonville; treasurer, W. B. Hart.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention June 22-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Lingerhofs, Pres.; Barnet Landseth, Sec'y.

An Unwarranted Attack Upon the Canning Industry.

It would be interesting to know what influences are behind the propaganda conducted by one William Wolff Smith against canned foods. Mr. Smith, presumably, is not conducting this attack for glory or amusement. He is known as a man whose services can be had to help secure the passage or repeal of legislative acts favorable to or inimical to any particular interests through the creating of public opinion against any measure he wishes repealed, and contra in favor of any enactment desired by him or those he represents. He seems to command a publicity bureau which he works assiduously. The writer recalls a specific instance of this kind, but for valid reasons will not mention it at this time. Probably Mr. Smith would object to being called a lobbyist, however.

Going back to the literature which he is disseminating, can it be that he is trying to create a public prejudice against canned foods in general, though possibly aiming to boost some brand in particular? There is a persistent rumor that a certain purveyor of canned foods has been back of the sensational and absolutely false statements appearing in certain yellow newspapers, and one or two more weighty periodicals, which have lent their space to the publication of these utterly ignorant and misleading if not malicious statements.

William Wolff Smith quoted Dr. Wiley against the use of benzoate of soda and plainly seeks to create the impression that it is used in practically all canned foods. He says: "It has been successfully used in ketchup, soups, preserves, apple-butter, soda water syrups, jellies, etc., and it is believed will replace boric acid in the embalming of roast beef, sausage both green and smoked, potted tongue, ham and chicken, etc." He mentions many other items including practically all pickles, jams and preserves, and says further that to the great preservative properties of this drug are we indebted for the wonderful state of preservation of the Egyptian mummies. He criticises the findings of the Remsen board, at the same time saying that during their investigations, "some symptoms were noticed that were not fully understood"; implying that the board were in doubt about the accuracy of their report.

Now, no one questions the preservative properties of benzoate of soda, and as to its harmful effects, authorities at least differ when it is used in very small quantities. William Wolff Smith says it can now be used ad libitum, plainly implying that it will be used in

large quantities, when as a matter of fact those who find its use necessary will reduce the quantity to the lowest minimum required. To what extent it is used in jellies, jams and preserves, if at all, the writer is unable to state positively, but as a general rule its use is limited to such condiments or other products as are not all consumed at once upon being opened, but which are used in small quantities only, and are expected to remain in edible condition for several days. As a well-known universal rule, all food products of fruits or vegetables hermetically sealed either in glass or tin are put up without benzoate of soda or any other preservative.

"The Journal of American Medical Association," is quoted in part as follows: "Benzoate of soda is incorporated in foods either to obviate the necessity of cleanliness in preparation, or to permit the use of inferior products. The use of sodium benzoate to preserve foodstuffs has proved unnecessary." If correctly quoted, here is a responsible—one might say authoritative journal—giving circulation to a most rash and unfounded statement, indicating either absolute ignorance or disregard of facts on the part of its author. It is not improbable that an occasional obscure canner may use unwholesome products and may operate under unsanitary conditions, but to indict all canners in this sweeping manner is rankly unjust, and somebody should be called to book.

It is strange how frequently Dr. Wiley is quoted, showing quite conclusively, it seems to the writer, that the Doctor's statements have created a most unfavorable impression in the past, whatever his intentions were, and his recent letter to Mr. Frost was only the amende honorable. By the way, Mr. William Wolff Smith and all other traducers of the canning industry are cordially invited to read this letter published herewith, and note what the chief authority for most of their misstatements and scurrilous abuse has to say as to the wholesomeness and freedom from preservatives of any kind, of practically all kinds of canned foodstuffs, excluding, of course, condiments. Thousands of experiments and years of experience have demonstrated most fully, that the only preservative required for such products is sterilization by heat, and it would be idiocy to go to the expense and trouble of adding drugs or chemicals. That preservatives and adulterants have been used more or less in the past is not denied, but it can be emphatically stated today that above 95 per cent. of all foods in tin or glass are free from preservatives or drugs of any kind.

Dr. Wiley's letter to Mr. Frost reads in full as follows:

Washington, D. C., May 1, 1909.
Mr. Walter A. Frost,
5 Wabash Ave., Chicago, Ill.

Dear Mr. Frost: I have often regretted the inadvertent injury which is done to the canned goods trade by enthusiastic, well-intentioned, and yet not fully informed writers, implying that canned goods, as such, are adulterated. I think I can safely say that, taking the whole nation of canned goods together, including fish, canned meats, canned vegetables, and canned fruits, only an extra small percentage of them ever contain any added substances whatever, except food and perhaps a little salt or sugar. I think this fact ought to be well advertised and published.

Of course, I do not include in canned

goods, articles which have not been sterilized, for in such articles preservatives are often employed. I do not think the great canning trade should suffer because such an insignificant few persist in either using artificial color, artificial sweetener, or a chemical preservative.

Under the rules of the Department of Agriculture certain substances may be used in foods legally, provided their presence is plainly stated upon the label. Buyers of canned goods, therefore, have a certain method of protecting themselves in this matter, and that is to look at the label. When we consider the immense benefit of the canning industry to the consuming public, it appears to me that we ought to use every honorable endeavor to set the minds of the community right in regard to the composition of such articles. Of course, some canned goods are of better quality than others, that is a natural and necessary consequence; but the impression that some people obtain that all canned goods contain artificial colors, artificial sweeteners, and preservatives, is a most erroneous one and is harmful to the trade. I am, as you know, a believer in canned goods and in the canning process. I think it is a blessing, and a blessing which is not in dispute. I realize, as do any one, that public prejudice is difficult to control and to rectify, but I should like to do as much as I can to help this good trade along by appealing to the public not to condemn the whole trade because occasionally a sample may be found which is not in that state of purity which the public demands. Let the people give their confidence to the trade and let them eliminate those goods which they do not want to purchase, by inspection of the label.

If you think this letter will be of benefit to the trade, I shall be very glad to have you publish it. Respectfully,

H. W. WILEY.

In passing it may be pointed out that Mr. William Wolff Smith does not directly charge that all canned foods are "doped." He says, "it has been successfully used," and again, "it is believed it will replace boric acid," etc.

This is largely innuendo and implication, but it is probably quite as effective with the average reader as specific and direct charges.

Crop Prospects.

Weather conditions have greatly improved and crops are going into the ground rapidly with growing conditions about ideal. Peas are late, but there is ample time for corn, beans and all vine seeds, and there is hope for good crops of these, but peas are starting under more or less of a handicap, though with favorable conditions up to harvest, a good average crop may be looked for.

The Conventions.

Those contemplating attending the forthcoming seedsmen's convention should lose no time in making application for rooms, as with its regular patrons, the hotel will be well filled. Address "The Clifton," Niagara Falls, Ontario.

Atlantic City has been selected as the place for the next canners' convention. "The Randolph" is to be headquarters as in 1906. Something further may be said about both of these conventions in the near future.

Personal.

John Badger and wife of Gardena, Calif., sailed on the S. S. Carmania on May 22 for a European trip.

D. Hamilton and C. C. Massie of Northrup, King & Co., Minneapolis, Minn., sailed on the Baltic on the 26th ult. for Europe.

G. C. Eldering of W. J. Eldering & Son, Overeen, Holland, will sail from New York on June 8 on the New Amsterdam.

AMERICAN SEED TRADE ASSOCIATION.

Secretary C. E. Kendel announces that the Clifton Hotel, Niagara Falls, Ontario, has been selected as headquarters for the 27th annual convention, June 22-24.

A special rate has been obtained for the members as follows, all on the American plan, which includes the banquet on Wednesday evening as well as all other meals.

Room with bath, per person, \$4.00 per day.

Room with bath, one person, \$6.00 per day.

Room with bath, two in a room, \$5.00 each person per day.

Arrangements may be made with the customs authorities to allow automobiles to enter Canada for the three days' stay without paying the customary license.

Word has been received that at least one large grass seed dealer in Darmstadt will send a representative to the convention to meet the dealers on this side, ostensibly, the secretary has been led to believe, to confer on matters connected with this branch of the trade.

Several notable men connected in various capacities with horticulture have promised to address the association, chief among them, Prof. Liberty H. Bailey, of Cornell.

The subjects to be considered are vital and a large attendance is anticipated, especially with the meeting place so attractive and accessible. It is therefore advisable, while the hotel accommodations are ample, to secure rooms in advance.

The program is as follows:

Order of Business.

Reports of the Secretary and Treasurer—Election of Members—Reports of Committees—Reading of Communications—Unfinished Business—New Business—General Discussions—Annual Election and Installation of Officers. Opening Session, Tuesday, June 22, 10 A. M.

The National Organization of Seed Analysts. Its Purpose and Scope. By the President, Dr. E. H. Jenkins (director Connecticut Experiment Station).

Root Crops. Prof. C. A. Zavitz (representing Ontario Agricultural College, Guelph, Ont.).

Seed Legislation. Its Uses and Abuses. Prof. L. H. Pammel (Iowa State College of Agriculture).

A Campaign for Rural Progress. Prof. Liberty H. Bailey (Director New York State College of Agriculture, at Cornell University).

The Deterioration of Types of Cabbage. J. M. Lupton, Mattituck, L. I., N. Y.

Color Photography. Illustrated with Views from Nature. J. Horace McFarland, Harrisburg, Pa.

Tuesday Evening, 8.45.

Concert by Clifton Hotel Orchestra, followed by informal dancing.

Wednesday Evening, 8 O'clock.

Banquet. A few five-minute Talks, followed by Mr. McFarland's Lecture on Color Photography.

Officers 1908-1909.

President, Watson S. Woodruff, Orange, Conn.

INCORPORATED.

Norfolk, Va.—George Tait & Sons, to grow, buy and sell seeds; president, J. C. Tait; secretary and treasurer, Robert Tait; capital, \$100,000.

SEED TRADE NOTES.

Howard M. Earl left on his annual crop inspection tour west by way of New Orleans on the 3rd inst. Mr. Burpee starts a week later by a different route.

It is surprising how little is known of actual conditions by those connected more or less closely with the trade, and if one may judge by what he reads, some persons do not know that most contracts for future peas, beans, corn, and, in fact, most other seeds have long since been closed.

The Routzahn Seed Co. of Arroyo Grande, Calif., report that, "crops in general with us are looking above the average. Especially is this true of sweet peas, nasturtiums and flower seeds in general. Lettuce, salsify, tomato and cucumber are good. Onion prospects about two-thirds of a crop. Pole beans in course of planting."

CATALOGUES RECEIVED.

J. F. Rosenfield, West Point, Neb.—Wholesale Price List of Peonies for Fall, 1909.

King Construction Co., North Tonawanda, N. Y.—Bulletin No. 25, describing their new iron-frame greenhouses. In it is given a description of the house in course of erection for the Florex Gardens, North Wales, Pa., 700 ft. in length and with the unprecedented width of 172 ft. This house covers about 3 acres of ground and is intended to hold 70,000 American Beauty plants. 135 tons of glass, over 10 miles of pipe for frame work, 10 miles of piping for heat, are other factors in the construction, and the beds, if put end to end, would be over six miles in length.

Giant Pansy Seeds

Representing seven of the best growers of Europe. Each color or stain packed separately. The proportion of light and dark is well blended.

PHILADELPHIA NOTES.

Grandmother Lee, the dearly beloved of the Burton homestead at Chestnut Hill, is reported critically ill, June 1st.

C. F. Schermerhorn, assignee of Stern & Co., has sold the effects of the defunct concern to Joseph G. Neidinger.

Visitors this week: Parker Thayer Barnes, of Suburban Life, Harrisburg; P. Joseph Lynch, of Dingee & Conard Co., West Grove.

Mrs. C. P. Poryzees sailed from New York on the 2nd inst. for a trip to the old country. Mr. Poryzees intended to go along but had to change his plans at the last minute.

The monthly meeting of the Florists' Club, held on the 1st inst., was addressed by Edwin Lonsdale on "The Decoration of the Lawn." Mr. Lonsdale is an authority on this subject and we hope to be able to give his talk in full in an early issue.

Griffin Bros. the Frankford florists, have gone into orchid growing extensively. The department is under

the charge of the junior member of the firm, Bruce Griffin. All the leading commercial varieties are included in the collection which is one of the finest in this locality.

The new flower store on 13th street near Walnut is scheduled to open on the 10th inst. T. Nelson Geiger is the proprietor and manager and as chief assistants will have with him Wallace W. Faust and C. W. Moorby, both late of Graham's. The store is number 141 South 13th and is one of the series under the old Hotel Edouard. Roomy, central and will be handsomely fitted up.

A tie-up in the street car system here has hurt business considerably the past week—particularly Memorial Day, in the outlying sections where the cemeteries are located. Many timid devotees were afraid to travel. Business generally is being hurt by the blocking of transportation. Conditions do not seem to warrant a long duration to the struggle. There is a vast amount of idle labor around which is likely to prove the solvent.

Henry S. Pennock, accompanied by his father, Abram L. Pennock, and his mother arrived by the Savannah Line on June 1st from Jupiter, Fla., for a short sojourn at the old homestead in Lansdowne. This is the first time in four years that Henry S. Pennock has honored us with his presence, and we are all duly cognizant of the importance of the event. The change from the fragrance of the orange groves to the crisp atmosphere of the dogwood and "the gang" ought to be a delightful experience. Delaware County is "God's Country" after all.

CHICAGO NOTES.

Personal.

Jens Jensen has opened offices at 80 Steinway Hall, 17 Van Buren street, as a landscape architect.

A. H. Goodwin, vice-president of the W. W. Barnard Co., has returned from his six months' European trip.

Visitors.

A large number of growers and retailers visited the market during the past week. They found the Chicago men too busy to make note of their arrival, but among them were A. Peterson, Hoopstown, Ill.; Carl Hirsch, Hillsdale, Mich.; B. O'Neil, Elgin, Ill.; Chas. Trainer, South

Bend, Ind.; Wm. H. Fininger and Max Spanner, Toledo, Ohio; H. H. Fisher, Kalamazoo, Mich.; Gilbert H. Wild, Sarcexie, Mo.

Flower Market Reports.

BOSTON

As predicted in these columns, the Memorial Day trade of Boston far exceeded any previous record for this patriotic holiday. 1907 was the banner year heretofore but 1909 has left it far in the rear. The florist did business this time under the most favorable conditions of weather. Never was a more lovely day provided for any celebration at any time of the year and the cool pure air of the days preceding it made the handling of flowers an easy proposition for the wholesale shipper. The out of town demand was cared for in an orderly and expeditious manner, prices having been generally fixed two weeks previous and adhered to, as a rule, something that is always desirable but not so easily done on other special occasions as is possible at Memorial Day. The shipments to outside points were so heavy that the market was left almost bare on some lines and late demands by local florists were filled at pretty stiff prices which caused some expostulation on the part of the buyers. This shortage was attributed by some superficial observers to the cool dark weather in the early part of the week. So much the better, if so, and the stock was greatly benefited in quality thereby, but had it not been for the unloading by the industrious wholesale shippers, the final shortage and "record breaker" prices would never have materialized. The variety of material in the market and the lines most in demand did not differ in any great degree from that of previous years. Stocks sold well when good but there were a good many very poor ones in evidence. Carnations were on the whole, the best sellers. The medium and lower grades of roses led and the top quality American Beauties had to associate with the cattleyas and gardenias in the neglected corner, the outlet for this class of goods being very feeble. Astilbe sold well. There were the usual complaints about "sleepy" carnations but they might have been much worse. The handsomest flower offered, in the opinion of many, in this market at present is the Pres. Carnot rose as supplied to Welch Bros. by the Springdale greenhouses. These are from houses which are allowed to freeze up after Thanksgiving and are again started into growth early in February, after a severe cutting back. The present is the second and best crop, the first crop having come in at Easter. It is impossible to supply the demand for these superb flowers.

Early reports indicate a greatly increased demand for our product for Decoration Day as compared with other years. The almost complete lack of out door flowers caused a heavy shortage in roses and carnations. Stock, snapdragon and cold frame tulips were most welcome substitutes. Some wholesalers were compelled to curtail shipping orders from 25 per cent to 30 per cent. The slight advance in prices for Decoration Day will drop away this week. A couple of days of good weather will bring a plentiful supply of first-class stock to this market.

Memorial week
PHILADELPHIA trade on the whole was very satisfactory. An immense volume of

business was done, and prices held firm all along the line. There was no glut in any staple, and on one or two items, notably carnations and peonies, there was a distinct scarcity. The untoward weather held back peonies two or three days—just enough to make the flush of them miss the great occasion. Carnations were away up, bringing in some cases as high as six dollars, and putting them for the minute distinctly ahead of roses of similar quality. Roses were in fair supply—probably less than usual for the season—but prices remained normal, the demand not running specially on these. The lower priced grades of roses were the best sellers, as was to be expected in Memorial week business. The lily of the valley market was weaker than usual, for obvious reasons, and the same may be said of cattleyas and gardenias. These three latter items, however, will have hardened up by the time this appears in print, as the June bride will then be the star attraction in the social firmament. The sweet pea holds its own remarkably; quality good, demand good. Some good lilac sprays are coming in from northern and eastern points—notably Rhode Island. There are lots of snowballs, mock orange,

Cattleyas, Valley and Fragrant June Roses and Paeonies for the Bride to Wear

We mention below a few of these and other specialties.

Order now and push them. No retailer should allow it to be said: "Asleep at the post."

PHILADELPHIA, - - PA.

iris, and other outdoor subjects around, but far less in volume than usual at this season. Many more peonies and carnations could have been sold Friday and Saturday if they had been in sight.

Washington, D. C., reports that the usual Decoration Day rush for flowers of all kinds occupied the dealers Sunday and Monday. No trouble was experienced in selling any kind of a flower.

FLOWER MARKET REPORTS.

(Continued from page 812)

CHICAGO Business sprang with a tremendous bound from the depressed condition

of the entire month to the most lively Memorial Day known in Chicago for many years. It was from one extreme to the other in so short a time that buyer and seller could scarcely understand each other and adjust themselves to the new conditions. It looks like the last blow to the hard times and florists should certainly now drop that expression when referring to their business. Trade began early Friday morning and when wholesalers sought to advise their customers to buy heavily some were inclined to be skeptical, but in a few hours these same ones were almost ready to beg for the flowers which then could not be bought. Buyers were anxious to fix prices for Saturday delivery, but generally no one would agree to it and Saturday found Friday's demand greatly exceeded. The greatest call was for red; the last to go was white, a complete change from a few years ago. Carnations can not be said to be equal to the demand and the Cape jasmine was not at all abundant. Roses were more nearly equal in supply. The demand for flowers Sunday was increased by the fact that it was also Pentecostal

Day, a coincidence that has not occurred for many years. Chicago florists are weary with their three and one-half days' incessant rush, but not so wearisomely weary as when they sat and waited for the business that did not come. Gladioli sold at \$1.50 per dozen on Saturday, but went slowly as compared with other flowers. Mignonette and marguerites also were in the less desirable class. Asparagus plumosa and Sprengeri did not move as fast as had been anticipated. Special reports from H. C. Blewitt of Des Plaines, a specialist in sweet peas, A. Meyer of Dalton, Anton Thén, who had a big crop of red carnations on, Miss Tonner, who displayed the first nasturtiums of the season, Chas. Wiffin, who specializes in stocks (not the Wall street kind), E. H. Hunt Co., Eassett & Washburn, Percy Jones, J. A. Budlong, Poehlmann Bros., George Reinberg, John Kruchten, Zeck & Mann, C. W. McKellar, Miss Gunderberg, Benthly & Coatsworth and Weiler Bros., are invariably to the effect that the quality of material on the market was far above the average and

that the sales were unprecedentedly and unexpectedly large.

Memorial Day, while **NEW YORK**, a big occasion with the suburban and cemetery florists, has in the central flower districts of New York always fallen short of its importance elsewhere. The special demand, as a general rule, is for showy, low-priced material and enormous quantities are shipped to the wholesale markets where it is sold for what it will bring. Peonies were a strong feature this year, coming mostly from points further south. Carnations experienced a lively call and early in the game were held at stiff prices, which, however, had to break in the end. There were large receipts of roses, the lower grades finding most ready buyers. Lilies were plentiful and had to share in the general depression which white material experienced, the best demand being for bright colored stock. Orchids and similar choice goods were only in light request. The business this week, since the holiday shows improvement in this respect, however.

Obituary.

John E. Andre.

A prominent figure in the florist trade of Philadelphia passed away suddenly on the 28th ult. in the death of John E. Andre, of Doylestown, from peritonitis, superinduced by an operation for stomach trouble. Mr. Andre was a native of Detroit, Mich., and came to this vicinity from a rose growing establishment in Long Island to act as foreman for J. Y. Smith, of Doylestown, who was the first to make a success of rose growing in shallow elevated benches in this locality. This was in the early eighties. In 1888 Mr. Andre started for himself in Doylestown, and also rented the old Smith establishment. He made a specialty of Hybrid Tea roses, in which he was very successful. His Brides and Bridesmaids had a more than local reputation. He also grew Beauties, smilax and mushrooms. In the latter he was one of the pioneers and grew same as an important crop for many years.

Mr. Andre was of a very genial disposition and had hosts of friends everywhere he was known. He leaves a widow and one son, the latter grown up and interested with his father in the business—which will in all likelihood be continued by the family. The funeral took place on the 30th ult. and was largely attended by members of the craft from Philadelphia and vicinity. Fred Ehret of Philadelphia, one of his oldest friends, was intrusted with the furnishing of many of the beautiful floral offerings which graced the last rites. Mr. Andre was a member of the Philadelphia Florists' Club, the Society of American Florists and other trade organizations—in most of which he took an active interest.

George W. Earl.

George W. Earl, Jr., son of the late G. W. Earl, well known in horticultural circles in Philadelphia, and brother of Howard M. Earl, manager for W. Atlee Burpee & Co., died suddenly at Wickford, R. I., on the 20th ult. The funeral took place with military honors at West Laurel Hill cemetery, Philadelphia, on the 24th ult., from his late residence at Bryn Mawr. Mr. Earl served in the Cuban and Philippine campaigns, retiring five years ago with the rank of second lieutenant. He was an author of marked ability and contributed many brilliant stories to the magazines. He

had been in poor health for the past two years and it was in hopes of recuperation that he had visited his friend John Kent Kane, who is building a summer residence on Narragansett Bay, and where he was suddenly stricken in the streets of Wickford and died shortly after being taken to the office of a resident physician. Mr. Earl was 40 years of age and unmarried.

Norman C. Cookson.

Cultivators of orchids will learn with great regret of the death of this enthusiastic orchid amateur, which occurred on May 15, at his residence, Oakwood Hall, Wylam on Tyne, Northumberland, England. The deceased commenced in 1880 the crossing of Calanthes, the finest of his earliest crosses being C. Cooksoni, C. Bryan, C. Clive, C. W. Murray and C. Alexanderi; the crosses Ruby, Angela and Chapmanii indicating the fine results that may be obtained by cross-breeding carried out with skill, for these flowers, although almost entirely of a ruby crimson color, were bred from the crimson eye of the otherwise white C. vestita. Mr. Cookson was very successful in raising hybrid Phaius, Dendrobiums, Cypripediums, Odontoglossums, Laelio-cattleyas and other species of great excellence and novel in form and coloring.

George T. Waldbart.

George T. Waldbart, youngest son of Alexander Waldbart, died after a lingering sickness on Friday morning May 28th, at the home of his parents, 3542 Lawton avenue, St. Louis. Both the young man and his father and his uncle, George Waldbart, are well-known in the trade, who extend their heartfelt sympathy. The funeral took place Saturday morning with many in the trade present and many beautiful floral pieces were sent.

Mrs. Marie M. Corneli.

Mrs. Marie M. Corneli, mother of Adolph and Ben Corneli, members of the Schister-Corneli Seed Co., died on Wednesday, May 26, at her home, 3627 Easton avenue, St. Louis. The sons were well-known in local seed circles, also in the floral trade. Her funeral took place on Friday, May 28th. The many friends in the trade of the Corneli boys extend their sympathy in their hour of bereavement.

Julius Friedlander.

Julius Friedlander, son of the late Ludwig Friedlander, died on May 25,

The Greenhouse Conservatory

This is a pleasing combination of a curvilinear conservatory and a straight roof greenhouse.

The conservatory opening out of the dining room, furnishes bright flowers the year round. The greenhouse opening into the conservatory, supplies it with plants and flowers, and also vegetables for the table.

Notice how excellently these buildings fit in with the style of the house itself. Our well known Flat Iron Rafter Construction makes the best of houses, and is light, strong and durable. Send for our interesting circular.

Schizanthus Wisetonensis as a Basket Plant

During my visit to the United States I noticed how well you grow the *Schizanthus Wisetonensis* but did not see any grown in baskets. The accompanying photograph of a plant grown by Mr. R. B. Leech, Woodhall Gardens, Dulwich, London, will convey some idea of what can be done with it in this way. The lasting quality of the flower also adds very greatly to its usefulness. The plant measured over two feet each way.

Har Barnard

Notes from the Arnold Arboretum

Several new species of *Deutzia* have in recent years been introduced from China, one of the handsomest on account of the purplish color of its flowers being the *Deutzia discolor* var. *purpurascens*. This species, however, has not proved hardy in this latitude, but some crosses raised by Lemoine between this species and *Deutzia parviflora* and *D. gracilis* seem to be fairly hardy here and have withstood the winter at the Arnold Arboretum. One of the handsomest of these hybrids is *Deutzia discolor* var. *floribunda* with rather large flowers about three-quarters of an inch in diameter arranged in dense clusters, carmine pink in bud and becoming nearly white with a slight blush when fully open. Very similar, but slightly more pinkish is *D. Lemoinei* var. *Fleurs de pommier* with slender branches covered their whole length with dense clusters of pinkish flowers. *Deutzia Lemoinei* var. *Boule rose* also has slightly pinkish flowers borne in dense clusters along the branches, and there are some other similar hybrids.

A very recently introduced species is *Deutzia Vilmorinae* from southwestern China, a handsome apparently rather tall growing shrub with pure white flowers in large corymbs somewhat similar to those of *Deutzia parviflora*, but larger. The individual flowers measure more than three-quarters of an inch in diameter and are borne in large twenty to thirty five-flowered clusters. The oblong-lanceolate leaves are about two to four inches long and resemble those of *Deutzia crenata*, but have a whitish under side. It is yet too early to say much about its hardiness but it seems to be harder than some of the other recently introduced Chinese species as *D. discolor*, *D. setchuensis* and *D. corymbiflora*.

One of the numerous forms of the Mock Oranges which merits to be better known and more planted on account of its early appearing flowers is the native *Philadelphus hirsutus*. It is perfectly hardy in this latitude, though its habitat is from Tennessee and North Carolina to Georgia and Alabama. It is the earliest of all the species to bloom and a handsome shrub with its slender branches studded their whole length with creamy white cup-shaped flowers. The individual scentless flowers are about one and a quarter inches in diameter and spring usually in short-stalked three-flowered clusters from the axillary buds of last year's branches. The leaves which are not yet fully developed while the shrub is in bloom, are rather small, three-nerved and grayish pubescent on the under side. Though this species is a very distinct one and easily recognized, it is not often found true to name in nurseries, usually other forms of this polymorphous genus are grown and sold as *P. hirsutus*.

The most attractive feature at the Arnold Arboretum is at present the Rhododendrons which will be in their prime the coming week and these in turn will be followed by the Kalmias.

Alfred Rehder

Thrifty French Nursery Practice

The French cultivator has a good knowledge of the right breakage of the soil with which he has to deal and, compared with his French neighbor, the West German has much to learn. The working of the soil goes hand in hand with its improvement. Throughout the year the workers by the piece are to be found in the nurseries; in winter they trench and dig and in summer hoe and chop up the weeds; and naturally the employer pays a wage upon which these people may live in comfort. In the spring when the despatch of goods has ceased, and in the quarters of young stuff earlier, the soil is broken with a three-tined "graff", as it would be called in Kent, and then hoed as soon as a weed shows itself. They do not wait till "goats fodder" can be made. As to manure, it is not so much of the dear stable manure that is used but rather waste from the kitchen of which every big town wants to rid itself, and which the gardener and farmer throws into a heap to decay. The dust and rubbish of the summer months, which contains but a small quantity of coal ashes, and therefore the more humus, are the most made use of. This is mixed with stable manure and cow dung to improve it. About Paris this rubbish is put at once on the land, crockery, metals, etc., picking out these latter, afterwards. This compost is not only a manure, but it helps to lighten heavy loamy soils.

gestions repeatedly urged in HORTICULTURE's editorial columns and is undoubtedly due in part to the incentive afforded by the special features of the recent spring exhibition of the Massachusetts Horticultural Society in Boston which were so eminently successful. Rochester is to be congratulated for her enterprise and should the affair prove the success hoped for we may reasonably expect to see the flower show business take on renewed vitality all over the country and the revival will tend to enlist the participation of those elements in the profession that have hitherto almost invariably held aloof from any active interest in the exhibitions.

The communication from Vice-president Gillett in this issue reminds us that the date for the 25th convention of the Society of American Florists at Cincinnati is drawing near and that it is fully time for those whose position, official or otherwise, endows them with the privileges and responsibilities of leadership to get busy in their respective fields and do their utmost to stir up interest in the Society and in the meeting. This gathering will present features of unique interest and the time is opportune for a reawakening of the spirit and personal enthusiasm which made the first convention the potential factor in the opening of a new era for American floriculture. To attain this the young generation to which the pioneers now give way must have the same quality of inspiration and loyalty, ever bearing in mind that something far more than the payment of membership fees and presence at a convention—commendable as these are—is essential if the grand old Society is to attain its best usefulness in the years to come. We have full confidence that the duty will be worthily performed.

Magnesium as a plant food

The question of food is, and will continue to be in an increasing degree, of supreme importance in animal and vegetable life. Notwithstanding the vast amount of literature sent broadcast by the Department of Agriculture, experiment stations and agricultural colleges, erroneous conceptions regarding plant feeding and stimulation are very general and it must be acknowledged that among those growers who have had the benefit of extended experience the exact knowledge possessed concerning soil, contents and their functions in plant building is often of the crudest character. We commend to our readers the article on magnesium as a plant requirement, by Dudley M. Pray, which we publish in this issue. Mr. Pray is of the Eastern Chemical Company, whose fertilizer and insecticide preparations are regularly advertised in this paper. Mr. Pray has made the question of chemical fertilizers and their availability and comparative economy in plant stimulation his life study and previous articles from his pen have attracted widespread notice. It will be noted that he asks for experiences of others who have given attention to the magnesium subject. Our columns are open to any who may have anything to offer or are disposed to discuss or question.

Mention has been made in our new columns recently of the innovation planned by the florists of Rochester, N. Y., for the exhibition to be given in that city next fall. Briefly stated, the idea is to dispense with all tables and to substitute for the staging methods almost universally in vogue heretofore, artistic groupings on the floor. This is in harmony with sug-

A promising
 innovation

Water Scenery in the Garden

(See Cover Illustration.)

Having in my previous article given the methods of making a lake and supplying the water wherewith to fill it, its inflow and overflow, I will touch now upon the banks and adjacent area. The latter may perchance consist of land which has been under the plow; but in the first place a path for pedestrians if the lake or water course be but small in extent, will appear an essential feature, if not a necessary one. In that case a width of 5 feet would be required, and the path may in a general way follow the windings of the lake shore. These are however, details that admit of great diversity of treatment, depending on local conditions, the landscape views, and other things. If a lake be of great extent, as may be the case when an earthen dam built across a narrow natural hollow encloses a space of many acres, it may be advisable to make a road that may be driven over. Then the cost is so much greater, owing to the need of a foot-deep foundation of hard materials, as well as good sound coating of gravel or finely broken hard stone and a final layer of sifted gravel, seashell, or of sea sand. This last is excellent, surfacing material, as, by the use of the Dutch, or Planet hoes, and a freshening with sand once every fourth or fifth year the surface can be maintained in a presentable condition for any number of years, and afford pleasant walking, riding and driving. I am reminded of many miles of such roads on private estates which are still serviceable although they were made a hundred or more years ago.

As no piece of water can be considered perfect without trees and shrubs on its banks and for some considerable distance beyond these, we come to the point when the planter must be called into consultation, as to the species to be planted and in what manner—a very important matter. It may be stated as an axiom that on the south or sunny side on all land in the northern hemisphere, not much of anything higher in growth than 5 feet may be planted within fifty yards of the water. To do otherwise would be to darken the surface of the water, and thus render gloomy what should be kept cheerfully glistening and bright; and even on the west side the planting of anything that grows to a great height or any dense grouping should be avoided close to the bank, unless it be for the purpose of making "surprise" views, at certain parts. Coniferous plants, such as *Thujas*, *Cupressus*, *Juniperus*, *Retinosporas*, have good effects if planted in groups of one species, or of several; as these if set at distances of 4 to 5 feet asunder, make close masses in a few years.

Around large pieces of water say of fifty or more acres almost any kind of tree suitable to the climate may be planted in more or less proximity to the same with the certainty of the effects being desirable for either in summer, autumn or winter. Some may be chosen for their fine leaves and handsome flowers as *Catalpa bignoniodes*, and *C. b. aurea* for the sake mainly of its yel-

lowish leaves; *B. speciosa*, and, in the warmer states the Japanese *B. Kämpferii*; *Paulownia imperialis*, a species with very large leaves, and purple gloxinia-like flowers, *Kolreuteria paniculata*, *Crataegus* in many species and varieties—as *C. Crusgalli*, of which there are in the nursermen's list some six or eight varieties, all desirable for flower or fruit: *C. Douglasii*, *C. nigra*, *C. oxyacantha*, especially the pink flowered varieties, and Paul's double-flowered, scarlet thorn; *Robina hispida* and *R. h. macrophylla*; *Sophora Japonica*, and *S. J. pendula*, a remarkable looking subject, very hardy and well adapted by its habit of growth for planting near the water; *Hippophae rhamnoides femina* and *H. r. mascula*, the former being covered with masses of orange red fruits in the autumn and winter months; the latter should be planted near it in order to secure a crop of fruits. Many of the maples are most desirable waterside plants including the Japanese species and their varieties where the climate favors. *Acer platanoides laciniatum*, *A. p. Reitenbachii*, *A. p. Schwedleri*, *A. rubrum*, *A. saccharinum*, *A. tartaricum*, *A. colchicum aureum*, *A. c. rubrum*, and *A. striatum* are capital picture trees, mostly growing of moderate dimensions in good soil, and they possess distinct characteristics in the form and color of their foliage. The *Pavias*, a subsection of *Aesculus* should not be omitted if space allows and *P. macrostachya* with its spikes of white flowers is an excellent subject as a bush of six to eight feet high for planting near the borders of a lake. Of the taller growing *Pavias*, I cannot write too highly of *P. rubicunda*, *P. discolor*, and *P. rubra*. The common horse-chestnut in its several varieties looks well by the water. The alders should not be omitted, especially telling being the varieties of *Alnus glutinosa* which differ in the form and color of the leaves. They do best planted with their roots within reach of the water, and may be treated as trees with one stem, or as bushes, cut down to the ground after a few years growth. As solitary specimens—to be employed at rare intervals *Fagus purpurea* and *F. p. pendula* may be recommended for planting near to the water.

As suitable waterside trees the poplars have an acknowledged position, and for lakes of limited area *Abele alba*, *A. argentea* and *A. Bolliana* are among the smaller growing species; *P. balsamifera* and *P. monolifera* and the varieties of this last are more vigorous, and they reach very large sizes, too overpowering for any but the most spacious grounds. The oaks of North America offer in the splendid coloring of the foliage and their ample dimensions some of the finest material for waterside planting, very effective either placed singly or in groups of several trees; but they must have plenty of space in order to show their grand crowns to advantage.

André de Merville

London, Eng.

(To be continued)

AMERICAN ASSOCIATION OF NURSERYMEN

Thirty-Fourth Annual Convention, Rochester, N. Y.

The preeminence of Rochester as a convention centre, combined with its commanding position as the hub of the great nursery interests, proved a great attraction and drew together a most representative gathering of the nursery trade people of the continent. Remote and widely separated sections were well represented and the social and business advantages of the occasion were taken full advantage of by one of the most comprehensive and cosmopolitan audiences that ever congregated to listen to the opening addresses of a nurserymen's convention.

The lecture hall in the Seneca Hotel was well filled when at 10 a. m., June 9, one hour later than the program announcement, President Brown called the meeting to order and introduced Hon. H. H. Edgerton, Mayor of the

Rochester as a city and in the nurserymen's industry. He recommended the Rochester slogan, "Do it for Rochester" as worthy of adoption by every city and town. The spring of 1909, he acknowledged, had been a record breaker in the nursery trade, everything sold at good prices and stocks exhausted. He asserted that the nurserymen were following the most delightful avocation in the world, in daily contact with nature and those who love nature and advised the support and holding up of the hands of those who are interested in park and playground movements. As pertinent subjects he suggested the question of how much capital a nurseryman can afford to invest in land, whether he is not better equipped to carry land than the ordinary investor and advised the young men to keep on the alert for wise purchases of land.

The secretary, George C. Seager, then presented his report, showing receipts and disbursements, and was followed by the treasurer, Charles L. Yates, with a detailed report on similar lines, showing a balance of \$3853.00 in the treasury. Messrs. Hill, Harrison and Moon were appointed an auditing committee.

Irving Rouse, chairman of the Tariff Committee, was then called upon for a report. He intimated that, although much hard work had been done by the committee in connection with the tariff revision now under consideration at Washington, nothing definite had as yet been secured, although the paragraphs in the new schedule as at present accepted by the Senate Finance Committee, levying specific duties on various kinds of stocks, evergreen seedlings and roses, and 25 per cent. ad valorem on all other nursery or greenhouse stock, was now expected to stand and become law. A hearty vote of thanks was accorded this committee.

"Nurserymen Pulling Together a Little More," was the text for a very vigorous paper by J. H. Dayton, of the Storrs, Harrison Co., which came next on the programme. Mr. Dayton urged the need of a better business education for nurseryman, so that they would all realize that the percentage of actual cash cleaned up would be the only criterion of value of a sale of goods. He condemned the methods of price cutting, bargain sales and other depreciative resorts for disposing of stock, and advocated the bonfire as a preferable recourse. The questions of who should be entitled to the benefit of wholesale prices, the necessity of a better system of grading, etc., were referred to and their consideration with a spirit of fairness urged. It was an eloquent and practical paper and elicited tumultuous applause. T. B. Wilson was the next speaker, his subject being "The Relationship Between the Nurseryman and the Farmer or Fruit Grower." He advocated more education for the latter and more consideration by the former as the best means of remedy-

ing existing difficulties and misunderstandings. He emphatically condemned substitutions in filling orders and gave good reasons for his belief. The necessity of budding from prolific bearing stock of the best type of best varieties was strongly urged.

The report of the Transportation Committee by F. H. Stannard was next presented and the committee was accorded a vote of thanks for its successful efforts in having the objectionable "release clause" rescinded at the R. R. meeting in Mobile.

Prof. Wm. B. Alwood then gave a very interesting address on "The By-Products of Food," giving the results up to date of investigations being conducted by the U. S. Department of Agriculture in computing and ascertaining the comparative value of sugar

HENRY B. CHASE
Member Executive Committee.

City of Rochester, who incidentally complimenting the promptness displayed, extended in an informal way a hearty welcome and cordial greetings to the visitors, who, he said, represented the industry that has made Rochester famous. George S. Josselyn of Fredonia, responded on behalf of the Association. Being a man of a poetical turn of mind, his response was in verse, telling in a most impressive manner, how they "do it in Rochester" and reverting in plaintive strain as to how they "did it in Milwaukee." Many local and personal allusions, found favor with the audience which was not slow to "see the point."

President Charles J. Brown then made his address, speaking first as a Rochester man in recognition of the honor to his city which he recognized in this visit and then as representing the Association of which he is the chief official. He referred to the last meeting of the Association in Rochester, twenty-six years ago and called attention to the great awakening which had taken place since that time in

E. M. SHERMAN
Member Executive Committee.

and acid contents of fruit and explaining the necessity of having a well-defined standard to aim for in selecting and developing desirable qualities in varieties of grapes, apples, etc. Many questions were asked from the floor and a very interesting running debate was carried on.

Last on the forenoon program was a paper by S. C. Moon on Evergreen Conifers. It was just such a paper as might be expected from this eminent authority and was listened to with marked attention. In the remarks which followed, it was commented upon as touching on a phase of the nursery business hitherto rather neglected in the programs of the Association, and an innovation worthy of further attention.

Wednesday Afternoon Session.

Wednesday afternoon was devoted to a ride through Rochester streets and parks as guests of the Western New York Nurserymen. Tallyhoses and park wagons and phaetons in long array were required to accommodate the

News of the Clubs and Societies

550 guests who took advantage of this opportunity to view Rochester's charms, and the procession attracted plenty of attention as it wound its attenuated length along the residential avenues and through the park drives. Genesee Park was first visited and then Highland Park; the party being photographed in the rhododendron dell at the latter place, which is now in its full beauty. A special band concert was given at Highland Park, complimentary to the visitors.

Thursday Morning's Session—St. Louis the Next Meeting Place.

The convention assembled at ten o'clock. After the roll call of state vice-presidents their report was presented recommending St. Louis as the place for the convention next year. J. Horace McFarland, presented the claims of Harrisburg, Pa., in competition in an impressive address, and afterward withdrew for this year, substituting next year in advance. An amendment substituting Denver was defeated, and St. Louis was finally selected.

Election of Officers.

The nominations by state vice-presidents for officers for the coming year were supported by unanimous vote, and the following were declared elected: President, F. H. Stannard, Ottawa, Kansas; vice-president, W. P. Stark, Louisiana, Mo.; Secretary Seager and Treasurer Yates were re-elected. Messrs. J. H. Dayton, H. P. Chase, Irving Rouse, D. S. Lake, and Wm. Pitkin were appointed a committee to consider and make recommendations on matters presented in the paper by Mr. Dayton, on Wednesday. Dr. L. H. Bailey then presented his paper, "The Science Point of View," which we can safely characterize as the most remarkable address ever presented before a body of horticulturists in America. It elicited tumultuous applause from an audience which filled the hall. The next speaker was Dr. W. H. Jordan, who spoke extempore on the subject of "The Experiment Stations and Their Work." He gave interesting statistics of work done hitherto, and showed that the public prejudice and misunderstanding, which at first was encountered, had now given place to confidence and liberal support. The stations stand primarily for discovery of truth and should be given time and freedom to pursue this work with less demand for other public services with which they have been somewhat overburdened in the past.

R. S. Osborn then read a brief and practical paper on the relation of growers with retail dealers, calling attention to the mutual dependence of these two interests and decrying the sending of wholesale lists to consumers.

L. A. Berckmans then read a scholarly address on the commercial peach industry. William Pitkin reported for the legislative committee, and a vote was passed in accordance with his recommendations, giving the next committee discretionary power in following up proposed state legislation relative to inspection of foreign importations. The report of C. J. Maloy on the National Council of Horticulture was followed by a criticism by Col. Watrous

THE HORTICULTURAL SOCIETY OF NEW YORK.

The summer exhibition of this society was held on June 5 and 6, and the experiment of holding it open on Sunday seemed to be appreciated, judging by the goodly number of flower lovers in attendance on that day. The unfavorable weather of the last ten days has retarded the development of peonies and roses; not an entry was made in the rose classes.

J. A. Manda received a bronze medal for Laelio-Cattleya Dominiana splendens and certificate of merit for Cattleya Mossiae variety. Julius Roehrs Co. received a special prize for cut orchid blooms and cultural certificate for Cattleya gigas. Miss B. Potter, gardener G. Wittlinger, special prize for plants of Crassula rosea and cultural certificate for Gladiolus Peach Blossom. Lager & Hurrell special prize for orchids.

In peonies the first prize for white, crimson, for the best collection of singles, and for the largest and finest collection, went to The F. R. Pierson Co.; first for light pink and rose to Geo. H. Peterson.

For flowers of hardy shrubs and trees: E. H. Weatherbee, gardener Francis Milne, 1st; F. R. Pierson Co., 2nd. Rhododendrons and azaleas: F. R. Pierson Co., 1st; Theo. Havemeyer, gardener Albert Lahodney, 2d. Hardy herbaceous plants: Blue Hill Nurseries, 1st; Palisades Nursery, 2d. Irises: Theo. Havemeyer, 1st; Bobbink & Atkins, 2d.

PITTSBURG FLORISTS' AND GARDENERS' CLUB.

The meeting on June 1st did not have the large attendance or the "snap" that has characterized our meetings of late. Nevertheless, there was a quietly confident hope for the future, and assured feeling that the August vacation was going to materialize, for Decoration Day had put more money into the pockets than ever before, and though everybody was tired everybody was happy. When the picnic was broached it was quickly voted that a picnic be held in July, and E. C. Reineman, Jno. W. Jones, and W. A. Clarke were appointed a committee with full power to make arrangements and report at the next meeting. The chances are in favor of the selection of Rock Springs, from which resort a cordial letter of invitation was read.

The subject of the meeting was "Outdoor Roses and Peonies," with an exhibition of outdoor roses scheduled for the private gardeners, but the meeting was just a week too early for these flowers and none were exhibited.

Frank Crook, gardener for J. H. Park, showed a very fine specimen of Cattleya Mendellii with 36 blooms. Robert Lillie, gardener for Mr. Barnhart, showed a collection of rhododendron blooms, and Phipps Conservatories, Jno. W. Jones, foreman, showed a collection of German Iris, Helenium Hoopesii and Heuchera sanguinea.

The subject for the July meeting will be, "Seasonable Flowers."

H. C. JOSLIN, Secretary.

CINCINNATI AND THE S. A. F. CONVENTION.

We are now on the eve of the battle. Twenty-four years ago the first meeting of the S. A. F. was held in Cincinnati, since which time as you all well know, the child has grown to an adult, and has assumed the roll of a National Society, under a charter of the United States Government. Again Cincinnati, The Queen City of the West, opens wide her arms and bids you welcome, not only the members who wear the rose leaf, but all florists, private gardeners or others who are in any way associated with the trade will be welcome. Come, you will not only see a fine city but you will see the largest gathering of florists that has ever congregated in one given place. At the same time at Horticultural Hall, Music Hall, you will find the largest and finest display of florists' requisites that you ever beheld. The meeting will also be a little out of the ordinary. On Thursday night the meeting will be turned over to the "Boys of Twenty-five Years Ago," and it will constitute a genuine love feast, and a review of the past twenty-five years; there will also be other new and interesting features of the meetings that I am not at liberty to note at this time; these features you will have to come and see for yourself.

The ladies will not lack for entertainment; they will be first upon the list! The sports are all being looked after by competent committees. The bowling alleys will be cleanliness itself and the choicest fabric will not get soiled. The President's reception will be a feature and many other comforts will be imparted to our guests.

The Cincinnati Florists' Society are working hard to get all details well in hand. The Souvenir Committee are promising us a work of art. Twenty-five hundred copies will be printed at the first issue. If you have not already sent in your advt., do so at once, to J. W. Rodgers, Park Department, City Hall, and your wants will have immediate attention. William Murphy is Superintendent of the Trade Exhibit, and his address is 311 Main St. He is now ready to book your order for space and will be pleased to mail you a diagram and all particulars upon application. Write him; it will be a pleasure for him to answer any and all questions.

Boys! Don't forget to write Captain Frank Dellar, Station F, Price Hill. He has charge of the ball games and is the man to write. C. E. Critchell is chairman of the bowling and shooting, and any information wanted will be cheerfully furnished. William Gardner is manager of the shooting department and his address is 128 East Third St. This contest will be pulled off at the Dayton, Ky., Gun Club, one of the finest in the country, so boys fetch your gun. Ed. Winterson of Chicago is chairman of the national sports committee, and should any public-spirited individual feel that he or they want to contribute a prize for either team or individual, he will certainly be pleased to hear from you at an early date.

Now, we expect to enroll a great

(Continued on Page 832)

number of new members at this meeting and while we do not want or intend to bore you with the proposition, we feel that it is certainly an honor to be enrolled as a member of the S. A. F. and O. H., the only national floricultural society in our great country America.

The cost is very small in contrast to the good the Society is doing and the next twenty-five years will see a wonderful improvement, not only in flowers but in the Society as well. Make up your mind to join, but come and see, even if you don't join. It will set you to thinking, and lead you into channels that you have never thought of.

E. G. GILLETT.

Cincinnati, O.

NEWPORT HORTICULTURAL SOCIETY.

At a well attended meeting of this Society on June 8, a committee of arrangements was appointed to carry out the work connected with the Rose Show which is to be held the 23rd and 24th of this month. This Committee is headed Mr. James McLeish, who has successfully filled that position on many similar occasions. Messrs. Richard Gardner, Andrew S. Meikle and Alexander Fraser, were appointed judges for both exhibitions of the year. James Hooper, gardener for Mrs. T. K. Gibbs, had on exhibition some samples of a stem rot in peonies which gave him some trouble last year as well as this season. The samples resembled the decay often found in the stems of egg plants, and were examined and freely discussed by the many members present.

The committee appointed to provide seeds and plants for the public school gardens reported having supplied a large number of plants to the youthful competitors for prizes offered by this Society.

Much regret was expressed by the members that D. J. Coughlin, our recording secretary, was again in the hospital, this time for an operation for appendicitis performed on him a few days ago, but we are very pleased to hear that he is rapidly recovering and is likely to be with us soon again.

CHICAGO FLORISTS' CLUB.

The new by-laws were passed with some amendments at the regular meeting of the Club, June 3. One of the important changes is the addition of two members to the board of managers which heretofore has consisted of five only. The new members elected were F. F. Bentley and E. C. Amling. Another radical change was combining the offices of the two secretaries into one and raising the salary from ten to twenty-five dollars per year. The names of Louis Winterson and Frank Johnson were proposed for this office and though both gentlemen declined one will probably be induced to accept.

At the bowling contest last week, cash prizes were won by E. Schultz, 1st; John Zeck, 2nd; Henry Kruchten, 3rd. A great deal of interest is shown by the club in the making up of the team for the convention. The record is now being kept for that event.

PENNSYLVANIA HORTICULTURAL SOCIETY.

Meeting of the Executive Council.

A special meeting of the executive council of this society was held on the 4th inst. to consider affairs in connection with the hall property. Among those present were Clement B. Newbold, Dr. Robert Huey, Sydney W. Keith, John W. Pepper, J. G. Cassett, C. Hartman Kuhn, Robert Craig, William Robertson, and David Rust. Mr. Keith reported on behalf of the trustees of the bond holding (or building syndicate) that the property had not proved a paying venture. The revenue from social affairs on which the syndicate counted for its income is becoming less every year on account of the competition of the newer hotels. During last year, with most economical management and nothing spent for repairs, a surplus of \$1800 only over running expenses was realized, and it requires \$6000 to pay the interest on the bonds. After some discussion the following resolutions were introduced and passed, and the secretary was authorized to call a special meeting of the society on June 15th, 3 p. m., to consider and act on same.

WHEREAS, In the judgment of the executive council of the Pennsylvania Horticultural Society it would be of advantage to said society for the property known as Horticultural Hall to be sold, and out of the proceeds of such sale for a sum to be set aside that may be sufficient to equitably pay off the holders of the trust certificates which were issued to raise the funds to erect the building, the balance to be invested and the income thereof to be applied to the furthering of the objects of the society, therefore

Resolved, That the president be requested to call a special meeting of the Pennsylvania Horticultural Society to consider this subject.

Resolved, That the society be recommended at such meeting to adopt the necessary resolutions to authorize such sale—the taking of any legal steps that may be necessary in order to perfect the title to said premises.

June Exhibition.

An exhibition of outdoor roses was held on the 8th inst. Some excellent stock was shown—although if the date had been a week later we think same would have been even better. In hybrid teas, class 11, Samuel Batchelor, gardener for Clement B. Newbold, took first with a well-grown and well-staged lot of twelve varieties. In class 12, which called for 12 varieties, 3 each, Wm. Robertson, gardener for Jno. W. Pepper, was the leader. Class 13 was for 12 blooms of any variety of hybrid tea. The honor went to Taos, A. Archfield, superintendent for C. A. Griscom, for a fine lot of Killarney—although Wm. Robertson gave him a strong fight with a lot of the same variety with better color, although not quite so vigorous. Classes 14 and 15 were Hybrid Perpetuals, and here Robertson carried the day over Archfield. Druschki, Crawford, Hayward, Magna, Bruner and Jacqueminot were the most noticeable good things in these collections. Robertson also got the Huey first in collection of hybrid teas, this class being unlimited as to number of varieties. Mrs. James M. Rhodes exhibited an interesting collection of 12 vases of various classes. Dr. Robert Huey sent some of the latest Dickson productions, among them being: Harry Kirk, Geo. C. Ward, Lady Iva Bingham, Avoca and Dorothy Page Roberts. A well-grown

specimen of Baby Rambler in 8 inch pot came from the Pepper place; and from the same establishment a curious Anthurium sport—the upper part of the spathe green, the lower half red.

PROPOSED NATIONAL SWEET PEA SOCIETY OF AMERICA.

The above proposed society is now taking concrete form. The exhibition will be held in New York City about the middle of July, exact time and place to be stated later. The schedule is now in process of preparation. The following firms have already offered prizes to be competed for at the first annual exhibition as follows:

The Arthur T. Boddington Cup—Class A—for the largest collection of Sweet Peas.

The W. Allee Burpee Cup—Class B—for the largest collection of Sweet Peas.

The Peter Henderson & Company Cup or its value—Class C—for the best 25 vases distinct varieties.

The W. W. Rawson Silver Medal—Class D—for the best 12 vases distinct varieties.

The Stump & Walter prize—Class E—\$10.00 in gold for the best 6 vases distinct varieties.

We would also suggest other classes as follows:

For the best single vases, distinct varieties and colors, first prize, \$5.00; second prize, \$3.00; third prize, \$2.00.

Perhaps you would like to offer a prize along these lines or make other suggestions.

Great interest is being taken in the vicinity and it will be a great boom for the Sweet Pea in this country and an organization of this kind is essential to promote the love for and interest in this popular flower.

I shall be glad to write you further and answer any questions.

HARRY A. BUNYARD,
Secretary pro tem.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual free rhododendron show took place at Horticultural Hall, Boston, on Saturday and Sunday, June 5 and 6. Although rhododendrons are rather backward this year there was a good display by Walter Hunnewell, gardener T. D. Hatfield, also from Francis Skinner, gardener J. T. Kinsella. Ghent and Mollis azaleas were shown in profusion by R. & J. Farquhar, & Co., W. Whitman, gardener Martin Sullivan, and others. German irises were staged by thousands and made a glorious sight. Among the contributors of irises were T. C. Thurlow & Co., W. Whitman, whose display won a bronze medal, and W. W. Rawson & Co., who showed a novelty—a German iris named Success, in which the standards open out flat, similarly to the Japanese species, levigata.

Bellevue Nurseries staged a beautiful collection of hardy herbaceous plants in flower in pots. Old Town Nurseries showed pyrethrums and centaureas. Mrs. J. L. Gardner gloxinias, W. Whitman specimen zonal petargoniums, Mrs. Fred. Ayer fuchsias and from F. J. Rea came Phlox divaricata var. Laphami, which received honorable mention. A bronze medal was awarded to Dr. C. G. Weld for a

in quantities to suit all bidders. Do Not Fail to Attend.

WM. ELLIOTT & SONS

42 Vesey Street,

NEW YORK

pair of specimens of *Cypripedium Lawrenceanum* bearing upwards of thirty flowers each and Dr. Weld's gardener, Wm. Rust, was given a cultural certificate for some fine pots of *Hydrangea Otaksa*. W. J. Clemson, gardener O. Christenson, showed some finely grown vegetables, including forced cauliflowers.

The great feature of the exhibition was the group of hardy herbaceous plants and flowers by R. & J. Farquhar & Co., in competition for the special prize to be awarded next September to the leading winner in five exhibitions. This display covered 500 sq. ft. of floor space, and, arranged in a sloping rockery setting, was gorgeous in the extreme. A great many Alpine rockery subjects rarely seen in exhibitions were included. Hardy asters bloomed in small pots were among the unusual things for this time of year.

CLUB AND SOCIETY NOTES.

The second annual flower show at Bethlehem, Pa., was scheduled for June 9

The Massachusetts Horticultural Society will hold their rose and strawberry show on June 26, 27.

The rose and strawberry exhibition of the Tarrytown (N. Y.) Horticultural Society will be held on June 15.

At the meeting of the New York Florists' Club on Monday, June 14, there will be an exhibition of peonies and outdoor roses.

The first June exhibition of the Wor-

cester County Horticultural Society, Worcester, Mass., was held on June 3 with a good display of flowers but a small showing of vegetables. James P. Porter and C. P. Fish were the only exhibitors of peonies. Irises were shown in splendid variety and L. C. Midgeley had a fine showing of campanula.

PERSONAL.

James Aldous of Iowa City, Iowa, is planning a trip to England this month.

It is reported that George W. West, lily exporter of Bermuda, is critically ill.

A. A. Smith, who has been connected with W. J. Ritterskamp's establishment at Princeton, Ind., has gone on a visit to his home in Norway.

Mrs. Philip Light, who succeeded her late father Henry Burt, in the florist business at Syracuse, N. Y., was married on May 24 to F. H. Robinson.

Among the passengers on the New Amsterdam which sailed June 8, from New York, were P. Koster, G. C. Eldering, P. Ouwerkerk, Jr., Jean Van Waverin and J. Ebbingse.

Governor Gillett has named H. P. Stabler of Yuba, C. O. Bocks, Cupertino, and A. T. Garey, Los Angeles, as horticultural commission examiners for the State of California. An examination will be held in every county in which a horticultural commission is to be established.

Obituary.

Dr. F. M. Hexamer.

Dr. F. M. Hexamer, for many years vice-president of the Horticultural Society of New York and organizer of the horticultural shows of the American Institute of New York, died at his home in Stamford, Conn., on May 29, at the age of 77. He was a native of Heidelberg, Germany. He has held respectively the positions of agricultural editor of the New York Tribune, editor of American Garden, and from 1886 until 1905 editor of the American Agriculturist for Orange Judd. On retiring from this latter position he assumed the care of the publication of the agricultural books of Orange Judd Co. He has suffered from neuralgic troubles for several years. Three sons survive him; one a medical doctor of Mt. Vernon, N. Y.; one a landscape gardener at Jamaica, N. Y., and one a veterinary surgeon at Stamford, Conn.

William F. Andross.

William F. Andross of South Windsor, Conn., died on May 28 at the age of 59. He has held many positions of trust and at the time of his death was secretary of the Connecticut State Agricultural Society.

George Waldbart, Jr.

George Waldbart, Jr., son of Alexander Waldbart, died at his home in St. Louis, on May 28, after a lingering illness, at the age of 30.

ROYAL HORTICULTURAL SOCIETY.

Novelties at the Temple Show.

The great event of the year took place on May 25, 26 and 27, the first day being very discouraging for rain fell heavily in the morning, although the afternoon was sufficiently fine as to induce an enormous number of persons to visit the Inner Temple Gardens, in which the exhibition, by permission of the Benchers, was held for the twenty-second time. Orchids have for many years been the more interesting flowering plants, and it has been usual for many novelties of an extraordinary character to be first exhibited to the public in these gardens. This year there were few startling new species or hybrids although the space filled was as large as in former years. One of the finest orchids shown and the most striking was *Odontoglossum crispum* var. *Solum* shown by F. Sander & Sons, a creamy white flower of good size, having a rich claret colored lip, and a few spots on the sepals. It was first seen in 1907, but in that year the flowers were smaller. Placed near the apex of Messrs. Sander's group stood a splendid plant of *Cryptopodium Saintlegerianum*, and arranged around it there were to be noted graceful sprays of *Odontodia Devassiana*, and good specimens of *Brasso-cattleyas*. There were also many cattleyas and *Laelio-cattleyas* including *Niobe*, with flesh pink flowers; the entirely white flowered *C. Dusseldorfei Undine*; *L. C. amonier Menley*, a pretty flower of white, pink and purple; *Sophran-laelia Danae*, a handsome hybrid, of low growth, flowers pink and white; and *Miltonia Bleuana* Mrs. F. Sander, a white flower having lines of rose on the lip. A fine group of orchids was shown by F. M. Ogilvie, on which were observed several *Odontodias*, viz., *Bradshawiae*, *O. Charlesworthii*, etc. This group contained *Trichopilia Backhousiana*, a striking white flowered variety, and a scarlet variety of *Odontodia Vuylstekeae*. Bull & Sons showed among their new plants *Odontoglossum-crispum Minoru*, a white flower having purple blotches; *Odontodia chelseiensis* a white flower, having suffused blotches of a pinkish lilac tint. Armstrong & Brown had the following novelties: *Odontoglossum Armstrongia*, having white flowers that are regularly spotted with violet; among *Laelio cattleyas* a white variety named *Aphrodite alba* with a lip marked with a ruby tint; *Cattleya Skinneri* Temple's variety, the best colored variety of *C. Skinneri*. Charlesworth & Co. showed a grand group in the best position in the Marquee and out of the fine array of species and varieties secured a first class certificate each for *Laelio cattleya Eurylochus* and *Oncidium Charlesworthii*. The first named possesses well-shaped flowers of a bright orange tint shaded bronze, a lip of ruby and a yellow tube, and the latter is of the *On. crispum* type, doubtless, a natural hybrid. The sepals and petals are of chestnut brown tint, with waved cross lines and the lip is bright yellow at the base and at the front blotched with brown. M. Chas. Vuylsteke of Ghent, received a first class certificate for *Odontoglossum mirum* Emperor of India, white with dense purple blotches; *Od. Aglaon*, in form like *Od. Vuylstekeae*, with

handsome shield like lip of the latter species, flower white as regards the ground, the surface nearly covered with red-brownish orange blotches and bright crimson in some parts, the lip of white with red-brown blotches; *Od. Princess Victoria Alexandra* with flowers of a claret color with a silvery edging.

Roses formed an important portion of the show and five varieties received awards of merit, viz.: *Rosa Wichuriana* *Coquina* shown by W. Paul & Sons and Hobbies, Ltd. The plant has large trusses of single flowers much cupped in form, of a shade of pink tipped with rose. It is a variety of vigorous growth. *Rose Margaret* is a large H. T. of a delicate pink tint, shown by W. Paul & Sons. *Rose Mrs. Taft*, a *Polyantha* variety, produces bunches of double blossoms on rigid shoots; the color is a dark shade of pink. It was shown by Hugh Low & Co. *Rose Jessie*, shown by H. Merryweather & Sons, is a *Polyantha* variety of a crimson tint, dwarf, and not differing much from *Mad N. Levavasseur*. *Rose American Pillar*, a variety having comparatively single flowers of large size, a fine subject for a pergola or as a pillar rose. The color is pink and the base of the bloom is white.

Begonia Pink Pearl, shown by Blackmore and Langdon, is a beautiful variety of a tender salmon rose color, of the type known as rose-centred.

FREDERICK MOORE,

London.

The Temple Gardens, where the Royal Horticultural Society held its annual show, have seen some famous gatherings in their day. As early as 1305 the gardens were the scene of a brilliant military spectacle. The news of Robert Bruce's rising had just reached London, and Edward I. resolved to knight the young men of birth who were going to quell it. The youths kept pious vigil all night in the Temple Church, and on the mor-

Violet Blue Rose

A Remarkable Novelty

THE NEW Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of *Crimson Rambler*, very vigorous and hardy.

row were duly knighted in such numbers that the trees had to be cut down to provide room for their tents and pavilions.

CARE OF HARRISII BULBS AFTER BLOOMING.

HORTICULTURE:

Please let me know how to keep *Lilium Harrisii* bulbs after bloom and *Calla* bulbs and oblige.

Yours truly,

E. C. P.

Lilium Harrisii bulbs after flowering should be thoroughly dried off (I do not recommend the refocing), and then planted in the ground where they will flower again during the month of August of the same year. Give slight protection during the winter in region of frost.

Calla bulbs after flowering during the winter must be thoroughly dried off until all foliage is gone; then store in a cool, dry place. *Calla* bulbs should be replanted after a rest of eight or ten weeks, for if allowed to remain longer they will commence to grow and thus ruin the bulbs.

GERANIUMS, DAHLIAS AND BEDDING PLANTS

We have one of the most complete collections of Geraniums in the country, containing every color and type found in the Geraniums. Every one of our 75 Standard Varieties at \$2.00 and \$3.00 per 100 are Bread and Butter Winners, and among our 34 New Varieties of special merit are some that are going to fix the standard in the future. Every one is a Gem, not high in price, only \$4.00 and \$6.00 per 100.

Our Novelties should, coming as they do from the leading introducers of the world, represent the highest development of Geraniums at the present time. A collection of 100 Varieties, our selection of 1907 and 1908 Novelties, will be sent for \$10.00.

Special Offer of 1000 good, strong plants from 2 in. pots, our selection of 20 distinct kinds from among our Standard and Newer Varieties, for \$15.00 cash. From 3 in. pots \$3.00 per 100, \$25.00 per 1000, in a good assortment.

CANNAS

Strong plants from 3 in. pots. J. D. Elsie, Egandale, Alphonse Bouvier, Mme. Crozy, and Florence Vaughan, \$4.00 per 100. Jean Tissot, President Myere, Louisiana, Pennsylvania, \$5.00 per 100.

DAHLIAS

We have one of the finest collections in the country of good distinct Commercial Varieties at \$2.00 per 100 and up for plants ready for shipment. Then we have Jack Rose, Virginia Maule, Big Chief, Rose Pink Century, Fringed 20th Century, Rebecca Mayhew, etc., at 50c. each, \$5.00 per doz., \$35.00 per 100. We will send 1000 in 20 good distinct Cut Flower Sorts, our selection, for \$18.50.

See issue of April 24th or Our Wholesale Catalogue for complete list of Bedding plants.

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention June 22-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Bruggerhof, Pres.; Burnet Landreth, Sec'y.

Canners' Convention.

The publication of the report that Atlantic City has been selected as the place for the next Canners' convention has been held back for many weeks by HORTICULTURE as the members of the executive committee did not wish the fact made public until negotiations under way with the Hotel Association of Atlantic City were concluded.

Unless the Machinery and Supplies Association reverses itself there will be no exhibits at Atlantic City next winter. This question was put to the Association at its final meeting at Louisville last winter, and it was decided by an overwhelming majority to have no exhibits. A small minority objected and has been conducting a propaganda with the view of bringing about a reversal, but with little prospects of success. However, only accomplished facts are certainties, and the kickers may win out.

Back of this action of the Machinery and Supplies Association is a principle involved. For several years a small number of leading canners have without even submitting the proposition to a vote of their own association, levied special tax on all the association in the form of an admission fee to the Machinery Hall, and the Machinery and Supplies Association who paid for the hall, light, heat and were at heavy expense in fitting up attractive display booths, have been compelled to pay this tax into the treasury of the National Canners' Association to get into the building they had rented and to see their own show. The great expense of transporting heavy machinery back and forth, the cost of installing and operating the same, the booths and all other matters pertaining to the exhibits were to attract the canners, who were really the guests of the Machinery and Supplies Association, and they have resented the tax which has been levied upon them. When they entered a mild protest they were told, in effect, that they had no standing in court, that they were tolerated only during good behavior, and that they had better pay up and keep quiet. As most of them are largely, many of them entirely, dependent on the canners for business, they submitted, but being convinced that the comparatively few who have assumed control of the canners' organization do not represent the main body, they have decided to try it out, and make no exhibit in 1910, being satisfied that the machinery and supplies display are the great attraction to the large body of canners. Just so long as they are dependent on the canners for business they will have to accept their dictum, but the old say-

ing that nothing is ever settled until it is settled right, will be found to apply to this case as to all others.

About ten years ago the leaders of the Western Packers' Association voted to exclude the Machinery and Supplies Association from their conventions. How well they represented their associates the sequel proved. Their next annual convention was held at Chicago. At the same time the Atlantic States Packers' Association met in Buffalo and cordially invited the Machinery and Supply men to meet with them, an invitation the latter gladly accepted. The result was a veritable frost for the Chicago convention, not a corporal's guard aside from the leaders being present, while the Buffalo meeting was a grand success, members of the Western Association being present in large numbers. That ended the attempt of the Western Association to exclude the Machinery and Supply men while the leaders for the most part went into a state of "innocuous desuetude." Will history repeat itself?

American Seed Trade Association.

The forthcoming convention of the American Seed Trade Association, offers a very attractive program, and as the place for the meeting is one of the most attractive in the world, the attendance should be large. The New Clifton, which is to be headquarters, is one of the most up-to-date and best equipped hotels on the Continent, and with good weather the convention offers a most ideal outing. It will be the first real relaxation for many since last fall, and will be greatly appreciated. While the rates may at first thought seem high, it must be remembered that these rates include meals, and will in the end prove cheaper than either of the recent conventions at New York city or Detroit.

Onion Seed Crop.

Another week of splendid growing weather has advanced crop prospects greatly, and conditions at this time are most promising. Good crops, harvested under favorable conditions, are what both seed growers and seed merchants are earnestly hoping for. The reported shortage in the onion seed crop is rather good news than otherwise, as there is no single seed crop which is such a burden to carry when in surplus as onion seed. In money value it mounts into high figures rapidly, while deterioration is quite as rapid. A 50 per cent. crop means more actual clean profit to every one except the growers, than a full one, and even the growers are the gainers over a period of years. Short crops enable them to keep up their prices to good paying figures, while even a small surplus is almost invariably followed by reduced prices the following year.

Notes.

Fred H. Hunter has resigned his position as manager of the Germain Seed & Plant Co., Los Angeles, Cal., and will take a much needed rest.

The Iowa Seed Dealers' Association met at Des Moines on June 1. The Iowa seed law was discussed freely. Officers were elected as follows: President, C. N. Page; vice-president, Henry Field; secretary, B. H. Adams, Decorah; treasurer, J. T. Hamilton.

Of Interest to Retail Florists

PACKING FLOWERS FOR SHIP- MENT.

In packing flowers for shipment by
express the following rules may with
safety be adopted.

Cut flowers should be arranged in
single layers with pounded ice closely
packed along the entire length of the
stems. In cold or warm weather air
should be excluded from the blooms.
To accomplish this end, old newspaper
in quantity may be used as a lining to
the box, the latter to be of wood. The
newspapers will absorb the melted ice
and prevent the leakage so noticeable
in packages where ice is used without
an absorbent of some sort. Paste-
board boxes are apt to become moist-

ened and in turn collapse before reach-
ing their destination.

As the folds of paper left for cover-
ing the flowers are necessarily heavy,
twine stretched from side to side and
directly above the flowers may be used
to prevent crushing. In every instance
paraffine paper must be used next to
the flowers, as any paper of a bibulous
nature operates as a poultice when in
direct contact with dampened vegeta-
ble matter and destroys its vitality.
A wrapping of stout paper on outside
of box is also serviceable, as it helps
to preserve the ice.

In packing floral designs for ship-
ment on any great distance, strong
pasteboard boxes may be used, as no
ice can be employed in such packing.
With the exception of carnations, vio-
lets and orchids, a spray of cold water
on the flowers will help greatly to sus-
tain them. As with cut flowers strings
should be drawn across the box to pre-
vent the heavy weight of paper on in-
side of box crushing the floral part of
the design.

THE Florists' Supply House of America H. BAYERSDORFER & CO., 1129 Arch St., Philadelphia, Pa.

CHICAGO PERSONAL AND NEWS NOTES.

E. B. Washburn is spending a week in New York.

O. P. Bassett is in West Baden, Ind., for a few days.

E. Wienhoeber has just returned from an eastern trip.

Uncle John Thorp is again able to be about after a prolonged illness.

Mrs. C. Fraufenfelder, who has been ill for several months, remains about the same.

Chicago Visitors: P. N. Oberlin, Kenosha, Wis.; Edward Gullett, Lincoln, Ill.; A. C. Rott, of Joliet.

A. F. Longren has started on an extended trip for the E. H. Hunt Co., in the interest of their florists' supplies department.

George Fisher, buyer for H. A. Fisher Co., Kalamazoo, Mich., says trade there has been unusually good this spring.

Mrs. Margaret Port of Maywood has rented her greenhouses to Carl Smith,

who will put the houses in first-class shape and push the business. Mrs. Port will continue the retail store on West Madison street for the present.

W. H. Gullett, senior member of the firm of Gullett & Son of Lincoln, Ill., was brought to Chicago for an operation last week. Reports from Mercy Hospital are that the patient is resting easily and a complete recovery is expected.

The Peony Market.

Among the peony growers who are heavy shippers to the Chicago cut flower markets are H. H. Fisher of Kalamazoo, Mich., and Gilbert H. Wild of Sarcoxie, Mo. The latter has twelve acres of peonies and gives his whole attention to this specialty. He has been in the business over fifteen years and his peonies go to all points. 6000 dozen came to Kennicott Bros. for Memorial Day. Mr. Wild is searching for a red that will come in time for Memorial Day in Chicago. The reds that are the best for the more southern trade are not the varieties that will ship here at this time. Mr. Wild mentions as the most useful market varieties Festiva Maxima and Queen Victoria for white and L'Esperance, Delicatissimo and Dorchester for pink. Mr. Fisher grows Richardson's Rubra Superba for red and likes it, but Mr. Wild finds it a shy bloomer seeming to need the northern climate.

Among new varieties there is a deep red introduced by Rosenfeld which promises to be valuable. Felix Crousse is also a good red. Grace D. Bryan, also by Rosenfeld, now promises well. Emperor William is another red and a fair producer.

Peony growers have much to learn as to the great value of properly bunching peonies for shipping. Many are bunched irregularly and such stock sells much lower than that which has been carefully handled and evenly bunched—that is, with the flowers all on a level.

Among the Growers.

Florists handling bedding stock have had one of the busiest weeks following Memorial Day they have ever known. The backward spring has prolonged this part of the trade and it will take another two weeks to finish up the stock. As most of the growers increased their output this year and it is all going to clean up, it must follow that the volume of business is larger than ever before.

Flower Market Reports.

BOSTON The market has fallen completely flat the last few days, bad weather and an over supply being the cause. Carnations are a drag on the market. It has been a long time since such a glut has been seen. Material of every description is piling up with but little demand. American Beauties alone hold their own. Improved conditions are looked for soon, however, owing to graduations and June weddings.

Rather a little late on **BUFFALO** report of Memorial week's business; nevertheless trade was active throughout the week and prices on most lines were better than on previous years. The main flowers looked for were peonies which were not to be had, therefore the demand for carnations was stronger. A few cool days, with little or no sunshine previously, held this flower back and there could have been thousands more sold had they come in. Some very fine outdoor tulips, narcissus, iris, Persian and Alexander lilacs, dogwood, lily of the valley, deutzia and other stock were to be had which helped out in the right time. Roses were in demand and the weather being cool, there were but few complaints, especially on stock which was shipped. The shipping trade was large and the demand so great for carnations that a good many orders had to be turned away. Daisies, sweet peas and Longiflorums were in good supply and an exceptionally good Memorial week's trade was experienced by all.

On Monday last, trade was still booming and a fairly good cleaning up was had. Tuesday and Wednesday stock came in heavy with trade quiet; Thursday and Friday an abundance of everything and Saturday an over supply on all lines and prices exceedingly low, it being the case of wholesalers carrying all the stock. Bargain signs are again to be seen, but these helped but little to consume the enormous supply that was received during the week and if any weddings were on during this week it was not noticed at the wholesale houses. The few hot days no doubt were the cause of such an amount of stock, which could have been easily disposed of during Commencement week, had there been a way to reserve it.

The market last week **CHICAGO** was very active. A slight lull followed Memorial Day, but the latter part of the week found trade lively and indications are for an unusually good June. Mr. Washburn calls attention to the fact that in this month, Monday, Tuesday, Wednesday and Thursday are the days demanding flowers for commencements while Friday and Saturday bring the wedding orders, these latter events being now week-end affairs rather than as formerly occurring on Wednesday. American Beauties are scarce just when they are needed most, but the throwing out of old plants is to blame for this. Monday's price kept to \$4.00 per dozen, and it is not expected to go lower on best stock for some time. Roses most in demand for school functions are the red and yellow varieties.

The few days of hot and damp weather have somewhat injured carnations and sweet peas at this writing are also showing the effects of the weather, which one day is cold and the next hot, while the rain comes in either case. There are just now no really good sweet peas, but the demand is active. Quantities of peonies are to be had and the quality generally is good. Lilies are selling well for weddings. Lilacs are here in profusion, but by the time out-door stock is in the demand and is about over. In greens there is a shortage, wedding orders requiring so much of both similar and asparagus. New ferns are being received in large quantities from the South and are exceptionally good.

A decided change has **DETROIT** taken place in business as compared with last week, which in great part may be accounted for by Decoration Day. Some few stores report a brisk demand for wedding flowers, while some others hustled to finish outdoor planting orders. There was plenty of stock but of decidedly weak quality. The coming week will see things liven up again

VALLEY, BEAUTIES, PEONIES

The week's leaders. Buy liberally and push them. No retailer should allow it to be said: "Asleep at the post"!

Peonies

First Quality (a good proportion of pink and white varieties) **\$3.00 per 100**
Fancy and novelties **\$6.00 and \$8.00 per 100**

Beauties

Specials **\$3.00 per doz.; \$20.00 per 100**
Other Grades **\$1.00 to \$2.00 per doz.**

Valley

The "come-again" kind. Best quality reaching this market. Unlimited quantity **\$3.00 and \$4.00 per 100**

SWEET PEAS

lavender, pink, white and flesh **50c and 75c per 100**

CATTLEYA MOSSIAE **\$6.00 per doz., \$40.00 per 100**

GLADIOLUS America, May, Bride, etc.

CENTAUREA, YELLOW DAISIES, NIMPHAEAS, HEMEROCALLIS, ISMENE, IRIS SYMBIRICA, and all seasonable staples at market prices. Write Us.

with Commencements and weddings. We are all prepared for the final rush of the season and look forward to opportunities to make it a grand finish as a compensation for the somewhat quiet winter's trade.

Mr. Michael Bloy inaugurated a 5 cent plant sale at his place of business and found it a very well-paying venture.

FLOWER MARKET REPORTS.

(Continued from page 843)

PHILADELPHIA Week of May 31st-June 7th here was rather a disappointment. Trading started off quite briskly in the first day or two; but made a bad slump later. By Friday and Saturday there was a tremendous accumulation of flowers with demand at a very low ebb. Good sweet peas sold well; but there were enormous quantities of inferior stock which would not go at all. Many of the sweet pea shipments opened up badly—appearing soft and watersoaked. Such stock may have looked all right to the grower when packing; but at destination proved quite unsalable as a rule. Roses were altogether too plentiful. Carnations also suffered. The general demand was away below expectations and while the trolley strike undoubtedly hurt local conditions it could not be blamed for the lack of life in the shipping trade. Peonies as a rule were very good and were one of the most satisfactory items. While they did not bring high prices, there was no

great surplus and the tremendous sacrifices that were made in roses were conspicuous by their absence in peonies. Southern gardenias have made their appearance, which practically winds up the market for local greenhouse grown, for the time being. The June girl is using up lots of lily of the valley, which is generally of excellent quality at present. Gladiolus America is arriving, and is in grand shape. May and Bride gladioli are also to be seen in limited lots. Hemerocallis, yellow and orange; Iris sibirica; Gaillardia and Centaurea, are among the prominent outdoor items. Nymphaeas are to be seen in the wholesale market in spots; but these are not from local outdoor sources. Smilax is plentiful, also adiantum, plumosus and all other greens.

NEW YORK June has not shown any special activity thus far. Indeed, the state of business in the wholesale districts is unmistakably on the dull side and sales are effected only at sacrifice figures. Roses and carnations show plenty of evidence of the wear

and tear of the season, many of the roses being very inferior and often badly mildewed and the carnations running small and faded. Cattleyas are very plentiful and there are lots of low grade blooms among them which are practically unsalable, although on fancy flowers of gigas top prices are generally maintained. The gardenia situation is peculiar at present. Southern outdoor blooms are being peddled by basketsful on the streets, yet the price on the greenhouse product remains high for first quality but very few of that kind are seen, most of the stock being far inferior to the southern shipped and consequently unsalable at any figure. Peonies are abundant, some of them being of superb quality. Corn flowers, stocks, gladioli, pyrethrums, irises, etc., are seen in quantities everywhere, sweet peas of every description and grade are crowding in and the first shipments of mountain laurel in bloom have begun to arrive. Lilies are experiencing a hard time, the receipts being far in excess of the normal requirements of this market.

Johnstown, Pa.—H. H. Mishler, two houses, one 40 x 125, one 12 x 60. D. Mishler, two houses, one 12 x 100, one 32 x 100.

Ithaca, N. Y.—Plans have been completed at Cornell University for the construction of three houses, one two stories high, of terra cotta blocks, with laboratories and work rooms.

The Board of General Appraisers has reversed Collector Loeb in his assessment of a 50 per cent. duty on wreaths composed of artificial flowers, and mounted on wire frames. Collector Loeb held that the articles should pay duty as "artificial flowers" with a tax of 50 per cent.

A NOTABLE PUBLICATION.

Catalogue Edition, No. 2 of the Pierson U-Bar Company has just been issued. It comprises 64 pages, size 9 1-2 x 12 inches, embracing the following topics: Why the U-Bar?—The U-Bar Described.—Other Things to Consider.—A Word About the Subjects.—The Subjects.—Workrooms and Their Equipment. The next section which will shortly follow will treat on Garden Frames and Sash.—Standard Greenhouse Sections.—Interior Views. The third section, which will complete the work, will include: Side Wall Constructions.—Alternate Foundations.—Dome Construction.—Ridge and Furrrow Construction.—Plant Tables and Beds.—Examples of Structural Details.—Distinctive Architectural Treatments.—Specification, Illustrative and Descriptive.—Estimates: How to Obtain Them. The text and illustrations are printed in "duo-tone" on dull surfaced paper and the effect is artistic in the fullest sense. A full page picture of the Brewster range, erected at New Haven last year, forms a striking frontispiece. The catalogue starts with an illustration of the simplest kind of a lean-to house and the subjects follow along gradually larger and larger until the largest and most luxurious structures are reached. Each subject has interesting descriptive text matter, also technical plan description with cross references to pertinent matter on other pages. The views are all those of standard sections and their various combinations, photographed from representative ranges erected up to the present time by this company. The technical plans, etc., are all drawn to a uniform scale and with such completeness of detail that full working plans might be prepared from them.

We have now said enough to indicate somewhat of the comprehensive character of this catalogue and great amount of work done in its compilation. Nothing in its line, remotely approaching it, has ever been put out. It contains a prodigious amount of valuable suggestion and information and cannot fail to exert a potent influence in its field.

STANDARD FLOWER POTS

Packed in small crates, easy to handle.

Price per crate		Price per crate	
1500 9 in. pots in crate \$4.88		144 6 in. pots in crate \$3.16

AMERICAN ASSOCIATION OF NURSERYMEN.

(Continued from page 831)

of the value of the council to the nurserymen and no action was taken. The reports of the Publicity Committee, by J. M. Irvine, and of Co-operation with Entomologists' Committee, by Orlando Harrison were presented and the latter committee was discharged.

Thursday Evening.

On Thursday evening the ladies attended the Lyceum Theatre as guests of the Western New York Nurserymen, and the men enjoyed the smoker in Masonic Temple auditorium. The promise of those in charge of "something doing every minute" was carried out to the letter.

THE EXHIBITION.

The catalogue and color plate men were well represented in the exhibition rooms, also the periodical department. HORTICULTURE'S issue for the current week was on display, also New Fruits. The McFarland Organizations made an extensive exhibit of the new French Autochrome color process. McMillan & Co. had Bailey's Cyclopaedia of Agriculture on view. B. G. Pratt Co. demonstrated the value of Scalecide to the nurseryman. Paul C. Koehler Co. showed their photo-gelatin color process. Color plates were also on view from Vredenburg Co., M. Brunswick & Co., Rochester Lithographing Co. and the Stecher Lithograph Co. Nathan R. Graves showed photograph illustrations for catalogue purposes. The Fruit Grower displayed examples of nursery catalogue printing. The National Nurseryman was, of course, in evidence. The Dayton Fruit Tree Label Company had an exhibit of their wares and did a well-deserved business. McHutchison & Co. showed raffia. John Charlton & Sons had a display of irises and peonies, also mammoth rhubarb. The Chas Nursery Co. showed "C. A. G., nurserymen's supplies; the Ohio Nursery and Supply Company, shipping tags and Clark Nursery Co., a nice exhibit of nuts.

In a room on the street floor of the hotel a number of exhibits, including the tree and plant groups, were placed. Here were Ellwanger & Barry, Dundee Nurseries and Jackson & Perkins Co., with general nursery stock; L. J. Farmer, strawberries; Thos. A. McBeth, Hydrangea arborescens sterilis; P. J. Berckmans Company, evergreens; Vincennes Nursery Co., cherry trees; C. M. Hooker & Son, Perfection currant; Perfection Planter Co., Perfection Planters; Niagara Sprayer Co., spraying machinery and solutions; Wm. Cooper & Nephews, tree spraying fluids; E. C. Brown Co., Auto Spray; Clinton Falls Nursery Co., soil firmer and trencher; C. Betscher, display of peonies; Stecker Lithographic Company. All reported a good line of sales.

BUSINESS CHANGES.

Oakland, Cal.—The Oakland Floral Co. has purchased the store of N. Rollieri.

Sarcoux, Mo.—Sarcoux Nurseries and C. & M. Wild have united under the title of Wild Bros. Nursery Co.

San Diego, Cal.—E. S. Langford, formerly of the Oceanside Floral Co. has leased land in Grossman Park for commercial purposes.

EPSOM SALTS AS A FERTILIZER.

It will be a pleasure to elucidate somewhat the question raised by one of the readers of HORTICULTURE by the article "Planting for Winter Effect in the Northern States," written by Mr. Geo. E. McClure and published on page 482 of your paper, in which he says that to use Epsom salts in such planting assures success.

Most of us have a pretty good idea of what Epsom salts are, for as the veterinarian would say, they are good for "man or beast," and, without joking, this particular soluble chemical is widely used for mankind and likewise for almost all of our domestic animals and fowls. This chemical as ordinarily made is a white crystal substance containing 50 per cent water and something under 14 per cent of Magnesium, calculated as Oxide of Magnesium, which is the usual manner of calculation, just as Oxide of Potash is the way in which we calculate the amount of Potash in a substance.

This was first called Epsom from the springs at that place, and is an almost inevitable constituent of our mineral table and medicinal waters. This element is found in many rocks and thus it slowly gets into our wells and streams and finally finds its way into the ocean, where it is found in some quantity along with Mr. Jernege's gold and many other elements. As the great deposits of Potash and Magnesium salts in Germany were made from the ocean we can readily understand that here are enormous quantities of Potash and Magnesium mixed with other impurities.

Salts imported to this country which contain Magnesium are the Sulphate of Magnesium, also known as Keiserite, Kainit, Sylvanite, and the double Sulphate of Potash and Magnesia, and naturally small amounts are usually found in the Sulphate of Potash. All these salts may be included under the term of "Chemicals for agricultural purposes," but Magnesium is so widely distributed throughout the land that its presence by no means ends here, as plants almost invariably have it, getting it from the rocks through the water, and in turn nearly all animals have it in their composition, and thus in running through the list of ordinary fertilizers we find that Magnesium is noticed more by its absence than by its presence. It is thus found in blood, bone, fish and all the animal refuses which are used for manures. It is also found in Thomas slag and in hardwood ashes, always in the latter as almost no tree, bush or ordinary land vegetation is without its Magnesia. In fact, to a chemist Magnesium and Lime are dromios. They are always hand in hand and are found almost everywhere in the vegetable world, although in the case of trees and the ordinary plants and vegetables, Lime is more abundant than Magnesium.

We do not commonly hear as much about Magnesium as we do about Nitrogen, Potash and Phosphoric Acid, because the amount of Magnesium is usually less than the amount of any of these (although it is often more than that of Phosphoric Acid) and because

it has been assumed that the three most essential elements to plant life that have to be supplied with most soils are Nitrogen, Phosphoric Acid and Potash, when as a matter of fact Magnesium may be just as important but is needed in smaller amounts, and is pretty widely distributed, so that in many cases Magnesium shortage may have been overlooked.

DUDLEY M. PRAY.

(To be continued)

NEWS NOTES.

Lewiston, Pa.—Herbert Bratton will start in the florist business here at an early date.

Marietta, O.—Walter Smith, florist, will move to the building on Putnam near Front street.

Dover, Del.—The failure of Wm. Schaffer & Son is reported; liabilities \$1,500; assets, none.

Jamestown, N. D.—A fire in the furnace room of the Wheeler Floral Co. caused a loss of \$2,000.

Newport, R. I.—Wadley & Smythe and Joseph G. Leikens have opened their stores here for the summer.

Springfield, Mass.—George and Frederick Mieliez have opened an office at 85 Main street as advisory horticulturists.

Handsboro, Miss.—D. P. Magruder is starting a nursery here and will give special attention to the cultivation of oranges.

Adams, Mass.—Adolph Koch, florist, was thrown from his wagon while delivering stock on June 3, and received severe injuries.

Salem, O.—The Grandview Greenhouses of which Case & Weirick are proprietors, opened for business just before Memorial Day.

The baseball game between the employees of the retail and the wholesale florists of New York came off last Sunday at "The Oval." The retailers won.

Ernest Winkler, a florist employed at Crystal Farm, Gibsonsia, Pa., was killed by a trolley car on June 1st, at Elfinwild.

FRENCH BULBS HIGHER.

Information from several exporters of Roman hyacinths and other French bulbs is to the effect that prices have materially advanced, especially on 12-15 and larger sizes, as a result of unfavorable weather last season. This is an unexpected turn as many dealers on this side looked for a decline.

Cold storage giganteum lily bulbs are, and have been for some weeks, scarce.

ORCHIDS

The following freshly imported ORCHIDS have arrived in excellent condition. Prices here quoted are for this month only.

	Per doz.	Per 100
CATLEYA Trianae , plants with 6 to 8 bulbs.....	\$15.00	\$100.00
Plants with 9 to 12 bulbs.....	20.00	150.00
Or in case lots of 400 bulbs, \$45.00.		
C. Percivaliana , plants with 10 to 12 bulbs.....	15.00	100.00
Or in case lots of 450 bulbs, \$48.00.		
C. Mossiae , fine early flowering type, exceptionally fine, strong stock. Plants with 6 to 8 bulbs.....	15.00	100.00
Plants with 9 to 12 bulbs.....	20.00	150.00
Or in case lots of 400 bulbs, \$48.00.		
C. Mendellii , plants with 6 to 8 bulbs.....	30.00	150.00
Plants with 9 to 12 bulbs.....	20.00	200.00
Or in case lots of 400 bulbs, \$75.00.		
C. Skinnerii , plants with 8 to 10 bulbs.....	15.00	
BRASSAVOLA Digbyana , plants with 5 to 6 bulbs, \$8.00 per 100; \$80.00 per 1000.		
Plants with 7 to 10 bulbs.....	12.00	
EPIDENDRUM Vitellinum Majus , plants with 8 to 9 bulbs.....	7.50	50.00
LAELIA Superbiana , plants with 4 to 6 bulbs.....	24.00	
L. Anceps , plants with 8 to 9 bulbs.....	5.00	60.00
L. Anceps , plants with 10 to 12 bulbs.....	10.00	75.00
L. Anceps , plants with 13 to 15 bulbs.....	15.00	110.00
L. Autumnalis , plants with 5 to 6 bulbs.....	10.00	75.00
L. Autumnalis , plants with 7 to 9 bulbs.....	12.00	90.00
L. Albida , plants with 6 to 7 bulbs.....	7.50	50.00
L. Albida , plants with 8 to 10 bulbs.....	12.00	75.00
CHYSIS Species . A limited number only.		
Plants with 6 to 9 bulbs.....	9.00	
ONCIDIUM Varicosum Rogerii . All smaller sizes of these are sold. Those we offer are only extra strong plants, with 5 to 8 bulbs.....	24.00	175.00
O. Crispum , large plants only, with 7 to 8 bulbs.....	24.00	
With 9 to 11 bulbs.....	36.00	
O. Forbesii , plants with 5 to 8 bulbs.....	20.00	
O. Sarcodes , plants with 5 to 8 bulbs.....	20.00	
O. Splendidum , extra fine, even stock, with 4 to 5 heavy bulbs.....	\$18.00	\$125.00

If you do not have our catalogue, write us.

	Per doz.	Per 100
O. Wentworthianum , plants with 6 to 10 bulbs.....	18.00	
ODONTOGLOSSUM Grande , extra fine plants, with 7 to 8 bulbs.....	18.00	
O. Crispum , Peck's type, plants with 4 to 5 bulbs.....	15.00	
With 6 to 7 bulbs.....	24.00	
MILTONIA Candida , superb plants, with 6 to 8 bulbs.....	15.00	100.00
With 9 to 12 bulbs.....	20.00	150.00
M. Spectabilis , fine plants, \$1.00, \$2.00 and \$3.00 each.		
M. Flavescens , fine plants, \$2.00 and \$3.00 each.		
ZYGOPETALUM Crinitum , a few nice plants, \$2.50 each.		
Z. Maxillare var. Gaultieri on fern stumps, large clumps, \$5.00 and \$7.50 each.		
SCUTICARIA Steelii , fine plants, \$2.00 each.		
VANDA Coerulea , fine, well leaved plants, about 12 in. long.....	18.00	125.00
About 16 to 18 in. long.....	24.00	175.00
ONCIDIUM Incurvum , fine, well-leaved plants with 9 to 12 bulbs.....	12.00	90.00
DENDROBIUM Formosum Giganteum . This is the finest lot of plants ever arrived here.		
Plants with 6 to 8 bulbs.....	18.00	125.00
Plants with 9 to 12 bulbs.....	30.00	200.00
Plants with 13 to 15 bulbs.....	36.00	275.00
Plants with 16 to 20 bulbs, \$5.00 each.		
D. Noble , plants with 9 to 10 bulbs.....	12.00	90.00
Plants with 12 to 15 bulbs.....	18.00	125.00
Plants with 16 to 20 bulbs.....	24.00	
Plants with 21 to 25 bulbs.....	36.00	
Large specimens, \$5.00, \$7.50 and \$10.00 each.		

All of the above is in A 1 condition; if anything does not prove to be as here represented, return at once at our expense. We also have a large stock of established orchids; also materials, such as selected orchid peat, live sphagnum moss and orchid baskets.

Water Scenery

AN AQUATIC POOL

In continuation of my remarks on styles of tree and shrub planting in the vicinity of lakes of large areas it will be understood that only trees which have decided characteristics are mentioned. These consist of the pendulous, the horizontal branched, and the columnar or pyramidal in form, all of which have special effects in the landscape and contrast admirably with the horizontal plane of the water. According to fancy, they may in the case of the pendulous be planted in small groups or in a continuous line on portions of the banks, and so close to the water as in the course of years to hang over and into the water. Of such mention may be made of *Salix babylonica* (the common weeping willow), one of the most effective by reason of its pendulous shoots and a rapid grower. It is perfectly hardy in even the colder parts of North America, and it is not affected by any insects excepting the wood leopard moth, whose caterpillars bore galleries in the trunks of aged trees. It is, however, well to keep a sharp lookout for these and kill them by inserting a piece of stiff wire into the galleries, as if left to the woodpeckers ugly wounds are made by these birds in their efforts to reach them.

Other willows suitable as weeping trees are *S. Caprea pendula* (Kilmarnock weeping), and *S. regalis*, *syn.*, *S. alba argentea*. *Tamarix*, which when aged has a pendulous habit, looks well on the banks; and *T. gallica* and *T. germanica* are among the more effective species. Of the *Robinias*, *Pseudo-acacia Bessoniana*, *R. p. a. inermis* and *R. p. a. inermis foliis variegatis* are of value

when their shoots are left to grow to their natural length, so as to become pendulous. *Pyrus* of the apple and pear section, always beautiful in flower and in fruit, offer the weeping habit in *P. Malus Elise Rathke* and *P. salicifolia pendula*. Other *Pyrus* destitute of this habit of growth, yet desirable trees or half trees, are *P. coronaria*, *P. c. florepleno*, *P. Malus Halleana*, *P. M. Scheideckerii*, *P. prunifolia*, *P. spectabilis*, etc. The Flowering Ash (*Ornus europæa*) is a handsome pendulous tree when aged. *Laburnum vulgare* in its numerous varieties has the weeping habit in so far as its blossoms go. *Fraxinus excelsior pendula* and *F. oxyphylla pendula* and *Fagus purpurea pendula* are good waterside trees. As a small tree of great hardiness, of which the pendulous habit is a marked feature, *Cornus florida pendula* is a beautiful Dogwood worthy of a place near the water. *Cerasus* (cherry) *sinensis pendula rosea* is a beautiful half tree; *Celtis* (nettle tree) *occidentalis*, has a weeping habit, and it does well where its roots have access to water. The insignificant flowers are succeeded by small, black edible berries.

The trees with horizontal branches are mostly to be found among conifers. The silver firs (*Abies*), of great hardiness, are *A. concolor*, *A. c. Louriana*, *A. grandis*, *A. lasiocarpa*, *A. magnifica* and *A. nobilis*. The hemlock spruces as *A. Albertiana*, *A. A. aurea* and *A. Douglasii*, all have this habit when aged. *Pinus Strobus* is the most characteristic of all the conifers in the matter of habit.

Trees of columnar or pyramidal habit among deciduous species are plentiful among those of a hardy nature. Suitable positions may be found for them among masses of round-headed trees, in clumps of half a dozen specimens planted sufficiently wide as to afford full development without crowding and spoiling each other. *Betula fastigiata*, a form of the common birch, *Corylus Colurna*, *Ginkgo biloba*, *Populus Bolleana*, *P. nigra pyramidalis*, *Quercus pedunculata fastigiata*, *Ulmus montana* (Wych Elm) *fastigiata*. Most conifers have this *fastigiata* form, and in the *Thuias*, *Cupressus*, *Juniperus*, *Taxus baccata* (Upright Irish), *Sciadopitys verticillata*, the hemlock, silver, and spruce firs we see it in the more pronounced manner. Not only do these species of conifers contrast and relieve the monotony of the round-headed deciduous trees, but when planted in conspicuous positions as solitary specimens, or in small groups or at bends and promontories of the banks, they attract the attention of the beholder, and add to the general effect. On the banks of large lakes the planting of flowering shrubs, excepting such as grow to large dimensions, is better omitted, the effect being to fritter the more noble arboreal, imposing features of the trees. In the background, or distant landscape, 100 yards or further from the water's edge, shrubs of any kind would be in their proper place, and quite admissible, more especially if paths led in their direction.

In my next article I will touch upon water in the home garden, and methods of decorating the adjacent area of land.

It would be futile to attempt to convey in cold type to anyone who has never seen such a sight an adequate idea of the impression made by a vast field of ten acres of blooming peonies such as those who attended the meeting of the American Peony Society a few days ago were privileged to see at Queens, N. Y. The peony as a specimen bloom is lovely: in garden clumps, singly,

by dozens or by hundreds, it is gorgeous; but when seen in rows five hundred feet long, of established plants, one variety to the row, it is dazzlingly splendid and impressive in a way that the smaller quantities never suggest and which no words can fittingly express. When privileged to see them thus, one is convinced of the fact that the peony's strongest vantage lies in generous massing of single colors, using the most distinct types of color, floriferousness and sturdiness. After gazing on such a picture and breathing the spice-laden perfumed air that floats afar from a peony field one finds little to interest in any cut-flower exhibit, however choice in selection and artistic in arrangement it may be. The rhododendron may shine resplendent in captivity indoors or under cover—the peony never.

The earnest plea of one of the speakers at the recent Nurserymen's Convention for more regular and stable market values on nursery stock generally, quickly struck a responsive chord in his audience and will undoubtedly find an equally appreciative reception wherever it may be read by a reputable member of the nursery trade. Inordinate price cutting is a most demoralizing evil, one of the worst consequences of which is its effect upon the public, and the public's estimate of the people engaged in the business affected and of the presumed profits it affords. The florist business has suffered much in the public eye in this regard, and it may be well to consider whether in the nursery industry as well as in that of the florist a valid reason for distrust may not be found in the excessive disparity existing between standard wholesale and retail price quotations. So wide a variance cannot fail to present a menace to desired stability, an ever-active source of uncertainty, a field for unsavory fluctuations, and a lure to unprincipled and unwelcome elements to obtrude themselves. The suggestion that a remedy for the abuses complained of should be sought in the burning up of surplus stock will carry no weight. Human nature as it is constituted at this stage in its career is not built that way. The speaker said that the nurserymen invariably "show a spirit of fairness 'twixt one another until it comes to the disposal of their products." We might add—likewise until it comes to the burning up of their products. In looking for a practical solution it might be well to give thoughtful consideration to the question from the standpoint of the public, who are today taking more interest in the nurserymen's products than ever before in the history of the world, and in its relation to the still broader theme of the prosperity of the nursery trade as affected by the public's estimate of and consequent attitude towards the nursery trade. The ceaseless struggle between the forces working to extort the highest selling prices, regardless of cost of goods, and those aiming to sell at the lowest prices consistent with cost, probably dates back to the infancy of commercial activity, and what constitutes "price slashing" depends very much upon which side one's sympathies happen to lie.

Notes from the Arnold Arboretum

The native Highbush Cranberry is an often planted and familiar shrub, while its Asiatic representative, *Viburnum Sargentii*, seems still little known, though it is in several respects superior to the native species. It is of more upright and denser habit with handsome dark green foliage and with the sterile flowers somewhat larger and of a purer white, the color being the more striking, as the central fertile flowers have a darker hue on account of the purple color of the anthers. The purple color of the anthers is also one of the best characters to distinguish it from the native Highbush Cranberry. In its typical form *Viburnum Sargentii* has pubescent branches and leaves, but the variety *calvescens* has glabrous branches and leaves, like the native species. In one respect, however, in regard to the fruits, the common Highbush Cranberry is much superior to *Viburnum Sargentii* which has smaller fruits, not produced in great abundance and therefore the native species ought to be preferred for general planting, as the clusters of scarlet fruits are the chief ornamental features of this shrub and particularly attractive during the winter.

Some remarks on the proper botanical name for our native species seem not to be out of place here, though they are more of strictly botanical interest. Almost 150 years ago the famous English gardener Philipp Miller noticed that the American Highbush Cranberry then introduced into English gardens, was different from the European species and called it *Viburnum americanum*, but most botanists, united it again with *V. Opulus*. Nowadays, however, the tendency among botanists is to make nicer distinctions and to separate again the forms lumped together by the older botanists into large variable species. This modern tendency is also apparent in the latest edition of Gray's Manual where our plant is at least distinguished as a variety and is called *V. Opulus* var. *americanum*. At the Arnold Arboretum, however, we prefer to call it *V. americanum* and leave the name *V. Opulus* to the European species where it properly belongs. The horticultural difference between the two species is very slight; the European species is of a somewhat denser habit, but seems more likely to be infested and disfigured by aphides. The chief distinctive character is in the petioles which have a rather narrow channel and large glands at the base of the blade and in the longer peduncles and longer stamens.

Quite a number of new Chinese *Viburnums* have been introduced into cultivation during the last years, some evergreen and some deciduous. The evergreen ones as *Viburnum rhytidophyllum*, *V. propinquum*, *V. utile*, *V. Veitchii* and *V. buddleiifolium* seem unfortunately too tender for our climate, but some of them are worth trying in the southern states or in California, particularly *V. rhytidophyllum* which is of striking beauty with its large leaves from 4 to 8 inches long, dark green and lustrous above and yellowish white beneath, and the white flowers in large cluster followed in September by scarlet berries add considerably to its ornamental value. The deciduous species as *Viburnum foetidum* (*V. ceanothoides*), *V. corylifolium* and *V. betulifolium*, all similar to *Viburnum dilatatum* and *V. Wrightii*, are probably hardy, but it is still too early to pass definitely upon their hardiness and ornamental value.

Alfred Rehder.

Seasonable Observations by a Boston Gardener

In Mr. Moore's remarks upon the last meeting of the Royal Horticultural Society, London, he mentions the comparatively new scented geranium *Clorinda*, which in his view has not much chance of success in the public favor. As a matter of fact his own description of this variety, the very best of the scented type, precludes the necessity of being obliged to force it upon the public. A geranium of a cerise red tint and having fragrant foliage the shape of an oak leaf, has a flower of three inches in diameter, to which I append the fact that the flower is very similar to the Lady Washington type, but not striped. It is quite equal to an ordinary zonal with the additional advantage in being sweetly scented. It is of sufficient merit to have induced a florist from America to acquire a stock of it, and I have little doubt that when it finds its way to the exhibition tables here it will be looked upon as a decided acquisition. To Mr. H. B. May, who exhibited the above-mentioned plant, further credit is due for the cultivation of verbenas, varieties suitable for pot work, which include Miss Willmott, which I believe was the first to catch on and from a selling point of view is the best; King of Scarlets and Princess of Wales, a deep purple blue, the King not so flat in truss as Miss Willmott; Queen of Whites and the auricula-eyed The Queen, rosy pink, Model, heliotrope, Adonis, scarlet, Vulcan, crimson, Admirable, claret. The foregoing include an admirable range of shades, and grown four or five plants to the five-inch pot very rapidly make an excellent plant, although it should be borne in mind that they require to be pinched early and all points simultaneously to produce even growth.

It is interesting to note that the 22nd Temple Show, London, has gone on record as being the greatest ever, and I have no doubt but what your correspondent, Mr. Moore, will suitably comment upon it. What I wished to say is, why could not Boston have a similar summer show? A public spirited lady or gentleman, necessarily living near Boston, could possibly be induced to lend their grounds for this purpose. If this could be attained I would venture to state that if not in magnitude or number of exhibits as the London Show, the setting up would be far superior, inasmuch as the question of space is the greatest difficulty those on the other side have to contend against, exhibitors being approximately limited to about 25 per cent. of the space they apply for. I give the suggestion for what it is worth; the time must come, if indeed it is not already here, when the confines of the Horticultural Hall will not adequately stage intended exhibits.

Vernon G. Sherwood.

As is well known, the National Horticultural Society of France publishes a list of chrysanthemums, and their values, which for three years in succession have been brought before it. Recently, the following varieties have received the commendation of the society: W. R. Church (raiser Wells), M. F. and S. Vallis (Calvat), Duchesse Orleans (Chaubrier), Dr. J. Roche (Ragout), Riverie (Bonafous), Mlle. Therese Mazier (Mazier), Princesse Alice de Monaco (Nonin), Baronne de Vinols (Bruant), Mme. Paolo Radaelli (Calvat), Mme. Gustave Henry (Calvat).

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

A full attendance was had at the closing meeting of the season last Tuesday evening. There was no regular speaker or subject, but a big list of questions and miscellaneous topics of general interest and the meeting at no time lacked in liveliness. The question of the annual picnic brought out some amusing episodes and much oratory. After the dust had cleared away it was settled that 50 cents should be charged for men's tickets, women and children should be admitted free, the latter to include boys under 16 years, that there would be plenty of games and lots of prizes and that the time and place should be selected by the executive committee.

There was a splendid display of brilliant flowers on the exhibition stage. The committee, consisting of Wilfrid Wheeler, Kenneth Finlayson, M. A. Patten and J. F. Flood reported honorable mention for seedling peony *Snowdrift* from George Hollis; report of cultural merit to Eber Holmes for Killarney roses; vote of thanks to each of the following: Blue Hill Nurseries, collection of herbaceous perennials; Geo. Hollis, for ten varieties of peonies; Old Town Nurseries, herbaceous perennials; Wm. Thatcher, *Platyclinis filiformis*; J. W. Duncan, collection of hardy roses; R. & J. Farquhar & Co., herbaceous perennials; Duncan Finlayson, *aquilegias*; T. D. Hatfield, *Dimorphothea aurantiaca*; E. F. Dwyer & Son, collection of irises.

Briefly stated, the subjects variously discussed brought out the facts that *Rosa cinnamomea*, *blanda*, *altaica* and *lucida alba* are valuable roses for massing effects in borders, in addition to *rugosa*, *Wichuraiana* and *setigera*; that in selecting garden roses the *H. T.* are now indispensable; that the Dawson and Carmine Pillar are among the earliest blooming climbing roses and should be in every list; that *Vaporite* is a good insecticide for cut worms but must be put under surface of soil to be effective—in drills 2 in. deep and 3 in. apart was recommended; that cut worms will not touch violets or carnations that have been sprayed with *Disparine*; that *Sulphonaphthol*, half pint to 12 gals. of water is effective against red spider; that in spraying mixture for fruit trees it is judicious to have an excess of lime to neutralize the copper sulphate as a protection against burning the foliage; that *Anemone* *cap. alba*, *Phlox* *Miss Lingard*, *Acchillea The Pearl*, *Campanula Medium* and *C. persiciflora*, *As-tille Gladstone*, *Coreopsis grandiflora*, also peonies, irises, *candidum lilies*, *lily of the valley*, *gypsophilas* and *tritomas* should be grown for their value as cut flowers by every florist having available ground.

On Thursday, the 17th, the club visited the peony gardens of E. J. Shaylor, where they found a gorgeous display of Mr. Shaylor's specialties—peonies—and were hospitably entertained by that gentleman.

LENOX HORTICULTURAL SOCIETY.

The regular meeting of this society was held June 5 and was largely attended. President A. Jenkins in the chair. Messrs. J. Cant, J. Green, W. McGregor and L. C. Peters were elected active members. An exhibit on which special praise was bestowed was a magnificent vase of extra fine varieties of *Odontoglossum crispum*, exhibited by A. J. Loveless. The flowers were remarkable for their size and substance, several of the spikes being fully three feet in length, and we question if a finer exhibit has ever been seen in Berkshire County. They were awarded the society's highest award—a first-class certificate and cultural commendation. Mr. Loveless gave a short talk on their culture which was greatly enjoyed. E. Jenkins was awarded a diploma for a fine vase of *Gladiolus Golden West*.

We were all pleased to welcome back George Foulsham, who has lately been appointed to take charge of Mr. W. B. O. Field's estate at Lenox, and he gave us an interesting description of his sojourn in Savannah, Ga., and also spoke of his recent visit to Messrs. Charlesworth's Orchid Nurseries, England.

The following firms have generously donated premiums to be competed for at the fall exhibition: A. T. Boddington, R. & J. Farquhar & Co., W. W. Rawson, Scott Bros., Bay State Nurseries, Bon Arbor Chemical Co., Pierston U-Bar Co., Howard & Morrow, Hews & Co., Lager & Hurrell, Peter Henderson & Co., W. E. Marshall Co., Chas. H. Totty and Julius Roehrs Co.

GEORGE H. INSTONE,
Secretary.

CINCINNATI FLORISTS' SOCIETY.

Convention Preparations.

The annual meeting of the Cincinnati Florists' Society was called to order by President Peterson, Saturday evening, at 8.30 p. m., about 20 members being present. The finance committee reported favorable progress in getting in the money subscribed for the entertainment fund. Committee on sports reported progress and by the next regular meeting, which occurs July 10th, everything will be in readiness for the entertainment of the S. A. F. This being the annual meeting the election of officers was necessary, and resulted in the re-election of the present officials, viz.: J. A. Peterson, Pres.; C. E. Critchell, Vice-Pres.; Albert Sunderbruch, Secretary; D. Rusconi, Treasurer, and Gustave Adrian, Associate Director.

The members of the Cincinnati Florists' Society extend a very cordial invitation for all florists in the United States and Canada who possibly can so arrange to attend the Silver Jubilee of the "Mother Lodge," the S. A. F. We certainly extend to you the glad hand and bid you welcome. Those who have never visited Cincinnati will find a beautiful city whose suburbs are unequalled by any city in the United States. Come!

E. G. GILLET.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The special meeting held on the 15th inst. to consider the advisability of selling the Hall property resulted in a vote entirely favorable to the bond-holding syndicate, who seemed to have their forces much better marshalled than the opposition. In fact, if it had not been for Joseph Heacock, it appeared that there was no opposition. Clement B. Newbold, the president of the society, was in the chair for the first time and his keen handling of any timid protests that arose, said much for his standing as a millionaire. Congressman Morrell and Dr. Mears also added their eloquence at critical points, and when the clinching of the nail was required George Vaux, a keen lawyer and one of the Schaffer trustees, made a speech. So that when a vote was taken it was a foregone conclusion. The disinterested members of the society hope that the end is not yet; but there seems very little hope for the ancient and honorable P. H. S. when their property is coveted by a lot of hungry capitalists. The beautiful building, the crowning masterpiece of the splendid artist, Frank Miles Day, seems in a fair way to be pulled down and be replaced by some soap-box hotel. The society may get a few dollars out of the wreck and can look for some other home. They will never get one anyway comparable as to location or beauty to the one they have this day been roped out of—with hardly a protest. The principal speakers before mentioned (excepting Mr. Heacock) seemed to think the P. H. S. stood condemned because it was not a money-making institution. Which shows that there is something fundamentally wrong in their conception of the functions of a horticultural society. They must be money mad.

NATIONAL SWEET PEA SOCIETY.

Harry A. Bunyard, secretary pro tem. sends the following list of additional prizes offered for the National Sweet Pea Society Exhibition:

Class F. Henry A. Dreer. \$10.00 in gold for the best ten vases of Sweet Peas Spencer or Unwin flowered in ten varieties.

Class G. Henry F. Mitchell Co. Largest and best vase Mixed Sweet Peas \$5.00.

Class H. W. A. Burpee. For the best vase of waved or Spencer type Sweet Peas introduced 1909. 1st, \$5.00. 2nd, \$3.00. 3rd, \$2.00.

Class I. J. M. Thorburn Co. For the best 15 vases Sweet Peas. 1st, \$10.00. 2nd, \$7.50. 3rd, \$2.50.

Class J. Watkins & Simpson, London, England. For the best 3 vases of Sweet Peas disseminated in 1909. 1st, \$5.00. 2nd, \$3.00. 3rd, \$2.00.

Class K. F. R. Pierson Co. Three vases Sweet Peas. Three distinct colors. 1st, \$5.00. 2nd, \$3.00. 3rd, \$2.00.

Class L. John Young. Best vase Sweet Peas, crimson. 1st, \$5.00. 2nd, \$2.00. 3rd, \$1.00.

Class M. Jerome B. Rice. Best vase Sweet Peas, white. 1st, \$3.00. 2nd, \$2.00. 3rd, \$1.00.

AMERICAN ASSOCIATION OF NURSERYMEN.

In our account of the proceedings at the annual convention in Rochester, N. Y., in last week's issue, we left the visiting nurserymen in Masonic Hall on the night of Thursday, 10th inst., up against the real thing in "smokers" as presented by the Rochester contingent. In an editorial note the previous week we remarked that the visiting nurserymen would find Rochester "a town with more snap and ginger in it when it comes to jollification than any place of its size on the map." We don't doubt that a practically unanimous endorsement of our statement would be forthcoming from all who attended that smoker. It certainly was a daisy and it speaks well for the staying powers of the aggre-

mittee who manœvered the affair consisted of E. S. Osborne, chairman; C. L. Yates, J. M. Pitkin, C. H. Vick, W. W. Wyman, O. G. Chase and E. O. Graham.

AMERICAN NURSERYMEN'S PROTECTIVE ASSOCIATION.

At the Rochester convention last week the American Nurserymen's Protective Association held its annual meeting and elected the following officers: President, J. W. Hill, Des Moines, Iowa; vice-president, W. F. Heikes, Huntsville, Ala.; secretary, Thomas B. Meehan, Dresher, Pa.; treasurer, Peter Youngers, Geneva, Neb.; executive committee, J. W. Hill, Chas. J. Brown, H. B. Chase, J. H. Dayton, D. S. Lake, E. R. Taylor, J. S. Kerr.

THE SOCIETY OF GERMAN LANDSCAPE GARDENERS.

On the 10th of May, last, a party of the members of the Society of German Landscape Gardeners, fatigued apparently by their exertions at the International Exhibition held in Berlin, and desirous of a change, paid a visit to the Royal Botanical Garden, and to the Schiller Park, now in course of formation, on May 17th, and on the 19th viewed the operations now in progress in Rathausplatz at Stiglitz. The visit to the Royal Botanical Gardens on May 10th took place under the friendly guidance of the oberinspektor, F. Ledien. The grounds which were first inspected showed, in spite of their very exposed position and need of shelter, great progress, the plantation

VISITING NURSERYMEN AMONG THE RHODODENDRONS

At Highland Park, Rochester, N. Y.

gation that they were able to turn out the next day, three hundred strong, for the special train to Newark as guests of the Jackson & Perkins Company and there traverse the company's 350 acre tract at Lyons and Newark, enjoy supper at Gardinere Hotel and return to Rochester at 10.45 p. m. without a grunt.

The ladies were being well cared for at theatre and luncheon by the local committees while the sterner sex were enjoying the smoker, the music, the vaudeville, moving pictures, etc., and chorusing themselves hoarse with Yip-I-Addy-I-Ay!, the Rhubarb song and "My Country, 'tis of Thee," under the leadership of the Rochester Male Quartette and with the assistance of the band. The com-

ST. LOUIS FLORIST CLUB.

The regular monthly meeting of this club was held on Thursday, June 10. Only twenty members showed up. The trustees reported that they had made all arrangements for the annual outing at Romona Park on the Suburban line, on Wednesday, July 21. They also reported that they had not as yet found a suitable meeting hall so it was decided to retain the old quarters for the summer. Treasurer Weber's report showed a healthy balance in the club's treasury. Trustee Smith announced that he had arranged with the Big Four R. R. for a special car for the convention at Cincinnati in August.

President Young urged a large attendance at the July meeting when nominations would take place.

of conifers more especially, which to some extent begin to assume their true characteristics, and must soon be transplanted at wider distances apart. The party then passed through the Japanese Magnolia Grove, and over the Primula field of the Himalaya, the Aubrietia lawns of the mountains of the Orient, and along the ridges of the Riesengebirges to the German plains of the lower lands. Everywhere was noted abundance of material to stimulate the observer; too much indeed to be more than alluded to in a notice of this kind. At the following meeting at Abbrechtshof at Stiglitz an interesting discussion took place concerning the past Exhibition and the efforts put forth to create a central horticultural society.

F. MOORE.

AMERICAN PEONY SOCIETY.

The annual meeting and exhibition of this society was held at Cottage Gardens, Queens, N. Y., on Friday and Saturday, June 11 and 12. President Ward being unable to be present, Prof. Craig of Ithaca served as temporary chairman at the two meetings held Friday afternoon. Geo. C. Thurlow, Guy A. Bryant and A. H. Fewkes were appointed judges of the exhibition. Adjournment was made until Saturday and the visitors spent the afternoon in looking over and admiring the unprecedented display of peonies blooming in the fields of the Cottage Gardens Co.

Address of President C. W. Ward.

It is my extreme regret that I am compelled to announce my inability to be with our beloved society at the fourth annual meeting and to also announce that after I shall be unable to take any laborious part or position with you or any other horticultural body. My connection with and labors among horticulturists have been most agreeable, pleasant and instructive and I would much like to continue them; but the condition of my health during the past year warns me that I must cut off all detail work possible and save my strength for tasks that I cannot avoid. I wish, however, to assure you all that my sympathy and support will always be heartily exerted in aiding all horticultural societies, not only in America but in other lands as well, in the grand works they have undertaken.

The work for which the Peony Society was organized to perform has been but fairly begun. Some errors and omissions have likely been made, but these should not discourage you all in continuing the work already planned nor in planning additional work that experience shows to be needful, but we all should rather work with renewed vigor and a determination to accomplish all that which we set out to accomplish.

Nomenclature: With the data at my command I am at this time unable to make many suggestions of value, but the work already mapped out should be continued to the end that American peony growers should have at least an authentic list of named varieties most desirable for general culture on our continent and that duplicate names should as far as practicable be eliminated from that list.

Your nomenclature committee should be composed of practical men who are willing and able to give it the necessary time, observation and attention.

Essays:—There should be provided at each annual meeting two or three able essayists, covering subjects of interest to peony growers both amateurs and professional. Among the subjects that will likely prove of interest might be mentioned: Cultivation of the peony. Propagation of the peony. Originating new varieties by cross fertilization. Commercial peony growing. The value of the peony for cut flowers. The peony for the amateur. The peony as a decorative plant. The use of the peony in landscape gardening. Peony colors—painting and shades of color that are not desirable and not worthy of cultivation. The peony as exhibition illustrating the best methods for keeping, shipping and staging peony blooms at exhibitions; and several other subjects that will suggest themselves as time passes.

The Cornell Experimental Plot. The Cornell experiment has not proved as successful as might be desired, owing very largely to the unfavorable nature of the soil and the lack of continued culture and fertilization, and the condition of the plants at the station is not such as to enable a correct study of the varieties, nor to enable one to judge as to the value of different varieties. Some means should be adopted to provide for proper culture, for fertilization and favorable soil conditions, for until the peony can be observed in fairly favorable conditions, the observations and the deductions therefrom will not likely prove of great general value.

Annual Exhibition. Should be held in places where an attractive and effective exhibition of peony blooms may be assured, and at such seasons as would enable nearby growers to stage fine displays to good advantage.

Premiums:—Substantial premiums should be offered under such conditions as will

attract extensive entries and thereby assure fine displays, and rules and regulations should not be so technical or severe as to discourage or drive away exhibitors.

Introducing New Varieties: While the Society should encourage the growers of new varieties and give ample recognition to all improvements of merit, it should carefully avoid the endorsement of the commercial value of any new peony, and its awards should be of such a character as would prevent the use of the Society's name in advertising worthless varieties or varieties that may be practically duplicates of kinds already existing in commerce.

In conclusion I desire to express my great gratitude to the members of this Society for the uniform, kind and courteous treatment they have one and all accorded me, and for the generous assistance all have rendered the Society, as well as for the enthusiasm manifested in our work. I feel that I ought to apologize for the little time I have been able to devote to the duties of the office with which you have thrice honored me and to offer as the only explanation lack of sufficient strength to attend to them properly and at the same time care for the business duties which have crowded upon me and which could not be avoided. I feel certain that any one of your members whom you may choose as my successor will more ably fill the office than I have been able to do and that under his guidance our society will prosper and accomplish the needed work.

C. W. WARD

Honorary President of American Peony Society.

You all have my best wishes for success collectively and individually and I desire to express to each and everyone of you my warmest friendship and sincerest wishes for a long, successful and happy career.

Secretary's Report.

The present membership of the Society, not including four honorary members, is 54. We have lost during the year one member by death, Mr. E. V. Hallock, who joined the Society at the last meeting at Ithaca. Although his membership was of short duration his loss will be keenly felt, for his horticultural attainments and genial personality made him a most valued member.

The work of the Nomenclature committee is progressing. The Peony Bulletin published by Cornell University was issued early in the year and distributed to members. It contained the Coll essay on the peony and a partial descriptive list of varieties. This list forms the beginning of the official catalogue of the Society. In his introductory note Professor Craig says: "It is to be regarded as a preliminary step, and therefore subject to modification in the light of future experience." I will therefore say without other authority from the chairman of the Nomenclature committee that these descriptions are submitted to you for your approval or criticism both as to method and accuracy. If they do not meet with your approval it is suggested

that your objections be communicated direct to Professor Craig, his representative, Mr. Leon D. Batchelor, as it is through a frank expression of opinion on these matters that the best results will be obtained.

In connection with the nomenclature work the question suggests itself to me whether as individual members we are doing all we can to further the work of the committee? It certainly is not enough for us to simply send our collections of roots to Cornell and expect the confusion to be straightened out by the committee there while we keep on selling and distributing doubtful varieties under the names we happen to have attached to them. We should cease being too confident of the accuracy of our own list of names unless we have taken extraordinary means for proving them to be correct.

For instance, if some of us have invested in the Lady Alexandra Duff "gold brick" we should not pass it along as the true thing, but sell it upon its own merits, if we are fortunate enough to have received one of the few good ones out of the dozen or more varieties sent here for it and solve the problem as one member at least has done, by advertising it as having been received for the true variety, but expressing a doubt as to its accuracy while giving it full credit for quality. There are many other varieties of uncertain identity which should be treated in the same way and if we are to be consistent members of the American Peony Society some such course as the above should be followed.

Another matter which should receive attention at this meeting is the premium list for our exhibitors and the way our exhibitors of providing for it. The exhibitions form an important adjunct to the meetings and some special provisions should be made whereby prizes can be given to them without making too heavy demands upon the treasury.

The exhibition at the last meeting at Ithaca was a fairly good one, but was made up principally of flowers cut from the test collections. T. C. Thurlow Co., West Newbury, Mass., and Professor A. P. Saunders, Clinton, N. Y., were the only other exhibitors and great credit is due them for making so good a showing of blooms. The former entered in the commercial, and the latter in the amateur classes.

A. H. FEWKES, Secretary.

The society reconvened at 11.30 a. m., Saturday. Many localities were placed in nomination for the next meeting and Messrs. A. H. Fewkes, R. T. Brown and W. A. Peterson were appointed a committee to select a suitable place. The Treasurer's report showed a balance on hand of \$456.89, a substantial increase since the last report. The membership is 55.

Officers were elected as follows: President, B. H. Farr, Reading, Pa.; vice-president, C. J. Maloy, Rochester, N. Y.; secretary, A. H. Fewkes, Newton Highlands, Mass.; treasurer, J. H. Humphreys; director to succeed Theodore Smith, Prof. A. P. Saunders of Hamilton College.

Prof. Craig and others spoke appreciatively of Mr. Ward's liberality and kindness and Messrs. Saunders, Batchelor and Bryant, who had been appointed a committee on resolutions, recommended a message of good wishes to Mr. Ward, which was carried. On recommendation of Prof. Craig, Mr. Ward was made honorary president of the society. L. D. Batchelor was elected an honorary member and resolutions of regret on the death of E. V. Hallock were adopted.

The judges report showed B. H. Farr winner of first in classes 1, 8, 9, and second in classes 2, 4, 5, 7. Geo. H. Peterson first in classes 2, 5, 7, and second in classes 1, 9. S. G. Harris first in classes 10, 11. The prizes in the amateur classes were all awarded to T. S. Havemeyer, gardener, A. Lahodny. Special mention was made of collections by B. H. Farr and

G. H. Peterson, and irises and lilies by John Lewis Childs.

Important changes were decided upon in the classification for next year's schedule after considerable interesting debate.

After dinner speeches were made by the new president and Mr. Batchelor and by Nicholas Hallock, former owner of the tract now occupied by Cottage Gardens Co.

THE BEST PEONIES.

Mr. George C. Thurlow of Cherry Hill Nurseries, West Newbury, Mass., acceding to our request for a list of the most desirable varieties of peonies for effective garden display and for cut bloom writes as follows:

There are so many really good varieties that I doubt if two different growers could be found who would give the same list.

I have selected these varieties from a list which I had previously compiled and from notes which I made at Queens last week. In making these selections I am influenced by the following:

1st. Varieties which are very floriferous.

2nd. Varieties which have strong stems to support the flowers.

3rd. Varieties which will open readily during a rainy season. (Some really fine flowers will during a wet season become waterlogged and not open at all.)

4th. Varieties which are lasting as cut flowers.

5th. Varieties which in a mass planting will give a good color effect. The peony can be used for landscape work with good results, either among shrubbery or alone. Their foliage is good when they are out of blossom and some of the early flowering plants may be used with them, such as daffodils or narcissus.

There are a number of fine varieties which I do not include in this list, desirable for the grower who is getting a collection for study or for the value of the individual flower, such as some of the tri-color varieties or anemone flowered or single and semi-double. There are also some very fine new varieties which will probably prove ahead of some in the list given, but I have not as yet made enough study of them to really decide as to their relative value at the present time.

Best Double White or Cream.

Festiva Maxima, Duchess de Nemours (Calot), Mad. de Verneville, Couronne d'Or, Avalanche, Festiva, Mons. Dupont, Mad. Crousse, Baroness Schroeder, Marie Lemoine.

Best Flesh or Light Pink.

La Tulipe, Marguerite Gerard, Mad. Emile Lemoine, Germain Bigot, Mad. Emile Gallee Pottsi Alba, Grandiflora (Richardson), Euphemia.

Best Rose Pink.

L'Esperance, Modeste Guerin, Rosea Superba, Mad. Ducl, Mons. Jules Elie, La Coquette, Etta, Lamartine.

Best Red or Crimson.

Eduard Andre, Dr. Caillot, Felix Crousse, Henry Demay, Louis Van Houtte, Thurlow's Double Red, Mons. Martin Cahuzac, Marechal MacMahon, Marechal Valliant, Plutarch.

NEW YORK FLORISTS' CLUB.

The last meeting of this club for the season was held on Monday evening, 14th instant, President Turner in the chair and fifty members present. There was no special topic for discussion but a great variety of important matters were brought up and it was late before the very interesting session came to a close. These topics we shall touch upon only briefly.

Resolutions were presented by Robert Schultz on the death of Herman Dreyer, and by W. E. Marshall on the death of John Scott. John Birnie reported for the Committee on plant market, speaking of the busy mornings and crowded streets and inadequate accommodations now obtained. Mr. Nugent reported that a promising proposition for desirable quarters for a general market had on investigation proved to be spurious. The old committee was discharged with thanks and a new committee consisting of A. L. Miller, A. Schultheis, H. C. Steinhoff, John Birnie and F. H.

Violet Blue Rose

A Remarkable Novelty

THE NEW Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy.

Joseph Heacock Co., WYNCOTE, PA.

vention and were given full power to make official selection for the club members. The house committee was given a generous appropriation in this connection. Mr. Bunyard presented a spirited report on the program and souvenir book which will soon be ready. A nominating committee for officers for next year was appointed, consisting of Messrs. Weathered, Totty, Bunyard, Elliott, Manda and McManus. A committee consisting of Messrs. O'Mara, Hendrickson and W. A. Manda was constituted to prepare resolutions on the death of C. L. Allen. Secretary Young announced a lengthy list of new members.

State Vice-President Bunyard of the S. A. F., distributed membership application blanks for those who desired to join the national society. A discussion on the inadequate pay received by professional gardeners in the public parks as compared with the wages of ordinary laborers brought out some brilliant oratory, notably by Robert E. Berry.

The only exhibits were from W. A. Manda, who received cultural certificates for a number of fine hardy herbaceous plants.

CONNECTICUT HORTICULTURAL SOCIETY.

The first June meeting of this society was held on the 11th inst., at the County Building, Hartford, President John F. Huss occupying the chair. Much of the evening was spent in making plans for the fall exhibitions; and many of the rules of the New Haven County Horticultural Society, relating to exhibitions, were adopted for our

convenience. An arbitration committee, consisting of Messrs. Howard A. Pinney, Carl Peterson, and C. H. Sierman, was appointed for service at the fall exhibitions. The dahlia show is set for September 23d, at Unity Hall, Hartford, and the chrysanthemum show for November 4th and 5th, probably at Putnam Phalanx Hall, Hartford. A special feature of the evening was a beautiful collection of cut flowers, all hardy varieties, brought by Mr. Huss, who received a vote of thanks for his display. They included aquilegia, dianthus, heuchera, lychnis, campanula, poppy, phlox, pyrethrum, armeria, and lupinus. The next meeting of the society will be held June 25. GEORGE W. SMITH, Sec'y.

NASSAU COUNTY HORTICULTURAL SOCIETY.

This society held its regular monthly meeting in Pembroke Hall, Glen Cove, on the evening of June 9, with a small attendance, owing to the unpleasant weather. Vice-President Emslie occupies the chair during the absence of President Everett. A great deal of business was transacted. Final arrangements were made for the summer show, which is to be held in Pembroke Hall on June 23. This is the first time the society has held a summer show, and everything possible is being done to make it a success. They intend to hold it annually in future. Preliminaries were discussed regarding the dahlia and chrysanthemum shows. Mr. Dean, Glen Cove, offered a silver cup for the best collection of dahlias shown on long stems. His idea in offering the cup is to encourage the culture of the

dahlia as a cut flower. The fall exhibition is to be held the last week of October instead of the first week of November as formerly.

The monthly exhibits were as usual of a high order. The judges for the month were Messrs. Duthie, Garrett and Holloway. Their awards in the points competitions were: Paul Reul, lettuce, 912-3; H. Gaut, peony, 881-3; V. Cleres, tuberous begonia, 881-3; G. Wilson, roses (outdoor) 862-3. G. Wilson and P. Reul were awarded culture certificates for a collection of vegetables and three heads of lettuce respectively. Special attention was drawn to the fine cauliflower shown in G. Wilson's collection. On request, Mr. Wilson told briefly how it had been grown.

S. J. Trepass exhibited a yellow carnation seedling. V. Cleres was awarded honorable mention for an exhibit of May King lettuce. H. Turner, Castle Gould, Wm. Millar, Oyster Bay, and Wm. Marshall, Glen Cove, have been asked to officiate as judges at the rose show. J. Hearn, Roslyn, was elected to active membership.

THE NEW ENGLAND NURSERIES, Inc. BEDFORD, MASS.

ENGELMANN BOTANICAL CLUB.

The Engelmann Botanical Club of St. Louis held its regular monthly meeting on Monday night, June 14, in the rooms of the New Central High School Building. The interesting feature of the meeting was a paper read by Dr. S. M. Coulter of the Shaw school of Botany of Washington University on "The Relationship Between Physiographic Conditions of Plant Life." Other interesting discussions followed. The meeting was well attended. Secretary W. W. Ohlweiler announced that this would be the last meeting of the club until September although there would be field meetings during the summer months.

The club has enjoyed a very successful season and all of its meetings have been well attended. The members are looking forward to interesting meetings for the coming fall and winter months.

CLUB AND SOCIETY NOTES.

The Nassau County Horticultural Society will hold their rose show on June 23.

The Newport (R. I.) Horticultural Society will hold their June exhibition on the 23rd and 24th inst.

The gold watch found by Wm. J. Stewart at Highland Park, Rochester, on the occasion of the visit of the Nurserymen's Association, has been restored to its owner, Mrs. B. Van Herff of Yonkers, N. Y.

The North Shore Horticultural Society will hold their rose show on June 30 and July 1 at Manchester, Mass. The numerous prizes, cups and medals that are offered are making this show of more than ordinary interest to those outside of the immediate territory.

DURING RECESS.

At the Astoria (L. I.) Florists' Bowling Club last Tuesday evening an interesting feature was the presentation of a fine ball to President W. H. Siebrecht in recognition of his many courtesies to the members and as a token of the esteem in which he is held by the florist fraternity. The speech of presentation was made in eloquent form by Alfred Blackwin. W. H. Siebrecht, jr., was not overlooked in the general round-up and was presented with a rattle in consideration of a recent youthful arrival at his home. The famous auto car is bespoken for a tour to Patchogue on Saturday, 19th, to inspect the establishment of Frank Niquet.

DIANTHUS NAPOLEON III.

A subscriber wishes to know where seeds of *Dianthus Napoleon III* can be purchased. This is a hybrid and does not produce seeds. Plants only. These can be procured from Dreer. In this connection one of the latifolius varieties (*atrococcineus plenus*) is an excellent companion to *Dianthus Napoleon III* and seeds freely. It is a deep blood red, flowers all summer and is a splendid cut flower. Seeds can be purchased at 50 cents an ounce.

G. C. W.

PERSONAL.

Lebanon, Ore.—At the recent flower show G. L. Allen, florist, was one of the judges.

Dr. L. H. Bailey of Cornell will go abroad in October and expects to be absent about six months.

New Castle, Ind.—Peter Welland has taken charge of the greenhouses which he recently purchased from L. A. Jennings.

Joseph Street, foreman for C. A. Anderson, of Buffalo, N. Y., will sail with his wife on July 3 for a two months' stay in Germany.

J. H. Hadkinson and wife left Omaha last week for Tacoma, Wash., where he will enter on his duties as manager of the city parks.

Fall River, Mass.—William Byard, the local tree warden and florist, has been ill for several weeks and little hope for his recovery is now entertained.

W. H. Siebrecht, Sr., has bought a new place in Connecticut a few miles from Ossining, N. Y., consisting of six acres. He may erect greenhouses later, but his main object is for a home and to enjoy himself.

Ludwig Zimmer, florist, Biddle Market, St. Louis, will leave next week for a trip to Germany, where, at Hamburg, he will settle up an estate left by his father. Mrs. Zimmer will look after the business while he is away.

Visitors in St. Louis last week: Harry Balsley, Detroit, Mich.; G. Reising, of the L. Baumann Co., Chicago, offering florists' supplies; Simon Maloney, who represents the American Forestry Co., of Little Lake, Mich., soliciting Christmas green orders.

Robert Graham, a florist living at Carrollton, Mo., who was disappointed in love, tried to kill himself last week by swallowing a dozen grains of bichloride of mercury. He was taken to the city hospital in a serious condition but at last accounts was improving a little and may pull through.

INCORPORATED.

Knoxville, Tenn.—Standard Nursery Co.; N. W. Hale, W. P. Wilson, C. W. McCormick, S. J. Herrell; capital, \$35,000.

Brooklyn, N. Y.—The Broadway Floral Co., 1010 Broadway; Elias and Esther Freedman, Bessie Silverstein; capital, \$5,000.

Litchfield, Conn.—The Rosemere Nursery; president, W. T. Marsh; vice-president, Dr. J. L. Buel; secretary and treasurer, A. T. Bulkley; capital, \$10,000.

STRAWBERRIES.

Burnett Bros., 72 Cortlandt street, New York City, are ready to distribute their new catalogue of pot-grown strawberry plants. The list is strictly up-to-date and in it are carefully described the newest and best varieties of strawberries as grown by one of the leading specialists. All interested in strawberries should send for a copy.

The National Nurseryman distributed a very interesting and finely gotten up souvenir pamphlet at the Nurserymen's convention. Views in Rochester parks and nurseries with portraits of eminent men in the trade embellished the pages.

Of Interest to Retail Florists

UP-TO-DATE FLOWER BASKETS.

We have all seen flower baskets. Some of us have watched their development from year to year, from old brown willow, Swiss, plateau, white and gold, and grass trimmed straw, down to the present day artistic and dainty "creations," but never before this year's crop came in sight do we think anyone has seen such a variety and as many specially adapted to particular uses by reason of their color or trimming, the material of which they are composed, their shape or fitness to hold and conceal a vase, jar, flower pot or other receptacle. The values are equally diverse, and fine taste and proficiency are evident in the make-up of those intended for the flower buyers with scanty funds as

well as those for the patron blessed with a plethora of purse. These reflections are inspired by a cursory look through the well-stocked warehouses of Bayerdorfer & Co., Philadelphia, who display for inspection a bewildering array of new home made and recently imported material, well fitted to inspire the heart of the florist who wishes to excel and knows the value of having a handy reserve of just such goods for various uses when a particular customer drives up to the office door.

THE Florists' Supply House of America

H. BAYERSDORFER & CO., 1129 Arch St., Philadelphia, Pa.

CHICAGO NOTES.

Action by the Flower Trade.

Chicago florists are making strenuous efforts to have the action taken by the board of education, three years ago rescinded.

The school board under the influence of Superintendent Cooley at that time placed an embargo on the giving of cut flowers to the graduates of the Chicago High Schools. This was a serious matter to the florist trade and the action was not submitted to gracefully, each year bringing it up afresh, but the board remained firm.

This year the matter has taken on a new aspect inasmuch as President Cooley is no longer in Chicago, having resigned his position during the early spring. At a meeting of the representative florists at Amling's Friday evening, a committee was appointed to confer with the school board at their next open meeting, June 16th. The committee represents the wholesale as well as the retail trade and consists of eleven members, as follows: F. F. Benthey, A. C. Amling, Phil.

Schupp, C. A. Samuelson, John Zeck, W. N. Rudd, J. C. Vaughan, G. C. Yarnell, A. Lang, J. B. Deamud and Peter Reinberg. From these F. F. Benthey and W. N. Rudd have been selected as speakers to plead for a return of the old days when the sweet girl graduate could close her school-days amid banks of flowers bestowed by admiring friends.

General News.

In the many new greenhouses now being erected in and about Chicago cement posts are quite generally used. Many florists are also trying the cement benches, and the results so far have been on the whole quite satisfactory. According to the E. H. Hunt Co., which specializes in this line, there is a saving in first cost of 25 per cent. They have a valuable little booklet out on this subject, free for the asking, and many dollars are to be saved by the man who reads it carefully.

Incongruous, as it at first appears, it is a move in the right direction to have the unoccupied places in the Chicago stock yards embellished with flower beds and clumps of shrubbery. The planting began around the office, but has spread to the various parts of the grounds, and though for the benefit of the visitors it is to be expected that the workers in this gruesome place will appreciate the touch of beauty.

The pansy season is very backward. The cut flowers were not satisfactory this year and now the cold weather is greatly retarding the outdoor stock. Chas. Cassier of Maywood has completed the first two of his range of greenhouses.

Personal.

Visitors: W. W. Coles, Kokomo, Ind.; J. Northrup, Minneapolis, Minn.; Mr. Davis and Mr. Timme, Morristown, Ill.; C. P. Braslin, San Jose, Cal.; Frank Budlong, of J. A. Budlong's Sons' Co., Providence, R. I.; Mrs. A. L. Glaser, Dubuque, Iowa; Mr. Van Aken, Cold Water, Mich.

Miss Hertha Tonner has received word of the critical illness of her sister, Mrs. T. D. Cobb, in Los Angeles, Cal. Mrs. Cobb was for many years in Chicago and had a flower store at 23rd street and Cottage Grove avenue.

Springfield, O.—Samuel F. McGrew, receiver for the Fairview Floral Co., has asked permission to sell the property, as the business as carried on at present cannot be done at a profit.

Flower Market Reports.

BOSTON

A very satisfactory activity is noticeable in the market, due to the graduation exercises in the many colleges, seminaries and other educational institutions in which New England abounds and which are an annual adjunct to the shipping trade of Boston. Outside of this special call, however, the demand seems to be very light in what may be designated the regular trade channels. Carnations are very abundant and as they only figure as one of many factors in the graduation demand the values, based upon the street call, are very low. On the other hand, Richmond, Killarney and Carnot roses are exceedingly popular with the debutantes and consequently are holding their own when of good quality. Sweet peas also enjoy a special popularity, but on account of recent damp, muggy weather, are arriving in bad shape from growers who neglect necessary precautions in packing and only those that reach the consumer in crisp, dry condition get a look-in at the quoted prices. Cattleyas are plentiful and in very light demand. Stocks are in unwieldy supply also, and the market doesn't need them. Peonies are on the rising tide, magnificent in quality but facing trouble in a very few days. Lily of the valley is of nice finish and in fair request. In the entire list the most unfortunate item seems to be the Divine Flower just at present.

Prices are unchanged.

CHICAGO

The market was greatly depressed early last week but improved later, but is still unsatisfactory. Cold, damp weather prevails and carnations are suffering most, many being worthless. Roses are of fair quality but sales are slow. Peonies are the main stay of trade. Commencement orders are a great boon to those having shipping trade. Wedding calls are about as usual. Plant business is fine. It is predicted that the trade usually considered over in June will hold on well into July.

NEW YORK

New York florists experienced an unsatisfactory week up to last Saturday and the early part of the present week has shown no appreciable improvement over its predecessor. Roses continue abundant and of variable quality. There is not much encouragement toward the production of high grade blooms, however, as under present conditions all have to be lumped in at bargain counter valuation and everything has to go. Carnations are even more unfortunate as to selling results and in the case of these also the extra goods get but little reward for being extra. Cattleyas continue in over-supply; there are many very inferior blooms in sight and, on the other hand, some gigas flowers of unexcelled beauty. Lily of the valley is abundant and selling somewhat better. Peonies are in the ascendant and will make the wholesalers' tables gorgeous for a few days more. The retail stores are satisfied with a vase or two of peonies, irises, oriental poppies or mock-orange for their window displays and the greenhouse industry profits little from this source at present. The mock-orange is seen in enormous quantities. Out-

door moss roses are also a feature just the now.

PHILADELPHIA

Trading was fairly brisk during the week (June 7th to 12th), especially towards the latter part, when a good many churches celebrated Children's Day, and used up large quantities of the lower-priced grades of flowers. The clean-up on Saturday was better than expected, and on the whole the situation wound up in fairly satisfactory shape. American Beauty roses continue plentiful, and of excellent quality, the growers now having their relay planting operations so well arranged that they have enough to supply all ordinary demands, no matter what the season. Liberty has the call over Richmond, the latter not being nearly as good a hot weather rose. Brides and Bridesmaids are showing the effects of the warm weather, and Jardine for the same reason is a negligible quantity. Killarney, Maryland and Kaiserin are all in excellent shape and are the leaders in their respective classes. Only a few of the carnation growers are able to send in first-class stock at present—the great majority of receipts show-

VALLEY, BEAUTIES, CATTLEYAS,

The week's leaders. Buy liberally and push them. No retailer should allow it to be said: "Asleep at the post!"

ing the effects of the advancing season. The worst sufferer of all from the damp, warm weather is the sweet pea. There are very few local gardenias arriving—but the southern cut is very good and fills the gap nicely. Cattleyas are not nearly as plentiful, and have hardened in price. Mossiae is over, and Gaskelliana is now the leader.

PHILADELPHIA NOTES.

The Pennock-Meehan Co. will close at 6 p. m. for the summer months, commencing June 21st.

The sweet pea show will be held at Horticultural Hall, Broad and Locust street, Tuesday, June 29th, from 3 to 10 p. m.

Edwin Lonsdale, superintendent of Gardens and Grounds at Girard College, and Mrs. Lonsdale are contemplating a trip to Bermuda in the near future.

Miss Elizabeth Burton, daughter of John Burton, the well known rose grower, of Chestnut Hill, graduated with honors from Swarthmore College, June 5th.

J. Max Nietschke, late of Hoffman's, Boston, is now with Habermehl's Bellevue-Stratford establishment, doing the debonair and handsome for the four hundred of Philadelphia.

George D. Clark of Dreer's has a good word to say for the latifolius section of the Dianthus family. They

are very valuable as cut flowers. He gives Dr. Van Fleet much credit for good work in this connection.

Andrew Wilson and his plant oil have been with us. He thinks the Philadelphia gardeners are very bright boys. That means some good orders of course. The way has been well paved for him in advance, as he has been an intelligent and consistent advertiser.

Ernst F. Hoehl, late of Madison, N. J., is the lessee of the Bunting place at 58th and Elmwood avenue, and is making a success of it. His specialties are sweet peas, Asparagus plumosus, adiantum, mignonette, and daisies. He will add pot plants to the list the coming season.

The date for the Waretown opening has just been announced by Commodore Westcott. It will be Friday, June 25. Who the lucky participants will be is not yet known. The accommodations are limited to twenty, and the outsiders—composed of a million or so—are all putting on their sweetest for the time being—when the commodore is around. He'd in-

vite everybody if it were possible. The commodore's heart is much bigger than his club house. What we want is a few more club houses on this lovely location. Come on you tired western millionaire florists. Lots of room. Buy a few acres.

Alfred E. Burk has built a seventy-five thousand-dollar mansion at Jefferson and Carlisle streets, and will shortly add to it an eighteen thousand-dollar conservatory and garage. Mr. Burk is a leather merchant of this city and is an orchid fancier like his brother, Louis Burk, the wealthy pork packer. Louis Burk resides at Olney and conducts his private conservatories there on a commercial basis under the name of the Groveland Nurseries. He has a fine collection of orchids and the estate also boasts one of the best examples of Japanese gardening in this vicinity. He is superintending the work of laying out the grounds, and building and stocking the conservatory on his brother's new place as he personally takes great delight in this sort of pastime. He is a member of the Florists' Gun Club and the Horticultural Society.

Begonia President Taft. Winter Flowering.

Begonia Gloire de Lorraine and Agatha, propagated from leaf cuttings, \$15.00 per 100; \$140.00 per 1000. Only good strong plants sent out. J. A. Peterson, McHenry Ave., Westwood, Cincinnati, O.

Begonia Verdon and Lumnosa, \$5.00, \$6.00 and \$7.00 per 100. Rose Hill Nurseries, New Rochelle, N. Y.

Now ready for delivery, Begonia Gloire

de Lorraine, strong, healthy stuff, all

propagated from leaf cuttings, and ready

for 3 and 4 inch pots; \$15.00 per 100, \$140.00

per 1000. New winter flowering Begonia

"Pres. Taft." Awards—Bronze Medal, S.

A. F. Chicago, Nov., 1908; Certificate of

Merit by Pittsburg and Allegheny Florists'

Club, Newport, R. I., Horticultural Society,

and New York Florists' and Gardeners'

Club. This beautiful winter-flowering

Begonia originated in our nurseries about

two years ago; it is stronger, sturdier and

more beautiful than any of its predecessors.

In color it is similar to Agatha; it is free

and continuous flowering from November

to April; each flower the size of a silver

dollar. \$4.00 per dozen, \$25.00 per 100. Cash

with order from unknown correspondents.

ABOUT SPECIMEN DAVALLIAS.**Editor of HORTICULTURE:**

It was with much interest I read Mr. Sherwood's note on specimen Davallias in your issue of June 5th and in reply would like to say the following:

In my article on the species in the issue of May 29th I should have said: It took more than two years to grow this fern to this size, instead of: "It takes more than two years," etc. The fact is, I did not try to see how big I could grow the fern, as it is now plenty big enough to suit our requirements. No doubt but what the plant could be as big again if we had followed the method advised by Mr. Sherwood, but it would then be too big for ordinary purposes in decorating and very awkward to handle. A plant in a 10-inch pot can easily be moved about and can be used to good advantage in decorating.

I am not prepared to say whether the plant here is *D. f. plumosa* or not, as I am not an authority on ferns, it is the only Davallia here outside of D. bullata.

(I can send a frond to Mr. Sherwood for comparison with his specimen.)

Our plant is watered overhead daily as it can not be avoided on account of the orchids which are suspended from the roof and which are syringed every bright day, but discoloration does not take place so easily, on account of the dense shade in which the plant has to grow. It is true, however, that the fronds will discolor quickly if watered overhead in strong light.

M. J. POPE.

Naugatuck, Conn.

CLARKIAS AS SPRING BEDDERS.

It is a great surprise to many cultivators that the various clarkias, easily managed plants of great floriferousness are so little cultivated for these purposes; and others. The best mode of growing these annuals is to sow the seed in the month of October, and place the pots 4 1-2 inches or 6 inches in diameter in a well ventilated, low house or cold pit from which frost can be excluded in the winter months; and when the seedlings have grown an inch or two, thin them out, leaving from 10 to 14 in each pot. Water should be afforded in moderation during the cold months, keeping the pots near the roof glass, and applying air during the warm parts of the day, tickling the soil to prevent it caking, and removing the weaker plants if there is a risk of their being crowded over much. When mild weather ensues in late spring the plants may be inured for a week or two to the open air gradually, and subsequently planted (without the pots) in prepared beds. They will make a pretty display in May and June.

F. M.

As advertised in our issue of last week, the third big annual sale of decorative greenhouse stock by Wm. Elliott & Sons will take place at high noon Tuesday, June 22. Growers looking for such goods will find much in this anniversary event to interest them. It was a great success last year.

NEWS NOTES.

Des Moines, Ia.—The Lozier Floral Co. are to move into a new building at 410 East 6th street.

Greenfield, Mass.—P. E. Burtt, florist, has secured a five-years' lease of the new building now being erected on Davis street.

Houston, Tex.—The Texas Nursery Co. has secured the order for the landscape work for improving the San Jacinto battle ground.

Easton, Pa.—D. B. Nevins succeeds to the business of A. L. Raub & Co., who failed recently. Mr. Nevins "stands well" with the trade.

Baltimore, Md.—W. E. Burnham secured the contract for erecting the county agricultural school near Sparks. His bid was for \$16,873.

Colorado Springs, Col.—A terrific hail storm swept over this section on June 11 and the majority of the florists were sufferers to a greater or less degree.

Portland, Ore.—After being made the beneficiary of a bequest from C. E. Hoskins, valued at between \$20,000 and \$30,000, the Oregon Horticultural Society are in danger of losing it through a suit filed by the heirs of Mr. Hoskins, who were practically cut off in the will.

Brookline, Mass.—Holm Lea, Prof. C. S. Sargent's beautiful estate, was open to the public on June 12 and 13, according to yearly custom when the rhododendrons and azaleas are in bloom. Many thousands of visitors took advantage of the prized opportunity. The display this year has been exceptionally fine.

Providence, R. I.—Joseph Kopelman of J. Kopelman & Co., has purchased the range of greenhouses operated as the Rhode Island Greenhouses, containing about 50,000 feet of glass, and will move them from Pawtucket to Oaklawn. J. F. Barclay, who was formerly connected with the business, will have charge of the place when completed.

The dedication exercises of the Zabriskie playground in Jersey City, N. J., will take place on June 19. Rev. Dr. Lyman of Brooklyn will make the presentation address and Mayor Witten the address of acceptance. There will be competitive games, exhibition drills, etc., by the children. It is hoped that Mrs. Zabriskie will be present to distribute the prizes. The committee of arrangements is John T. Withers and M. R. Wise.

OBITUARY.**Charles Zuber.**

Charles Zuber, youngest son of Vincent Zuber of Whitestone, N. Y., died at St. Catherine's Hospital on June 5 after a short illness. The young man was engaged with his father in business.

W. D. Chase.

Watson D. Chase of New London, Ohio, died on May 30, aged 61. He was senior member of the firm of W. D. Chase & Son and had been engaged in the florist and nursery business for thirty years.

INDIANAPOLIS NOTES.

The bedding plant season is drawing to a close with very favorable comments from these interested. It is with difficulty that good stock can be obtained, as most of the growers are cleaned out. Owing to heavy rains and excellent weather, outside flowers and vegetation never looked better at this time of the year. There ought to be a plentiful supply of asters this fall, judging from the enormous quantity being planted.

The market in some lines has been very active since Memorial Day, weddings, school exercises and garden parties forming the outlet for the many flowers coming into the market. All kinds of flowers are plentiful and the prices have dropped away down. There is quite a crop of June weddings on but none of them very extensive. Smilax is in good demand and none too plentiful. There seems to be an abundance of wood ferns.

FLORISTS' TRADE IN WINNIPEG.

Reports from Winnipeg indicate that the demand for bedding stock is enormous, far and away ahead of previous year. Weather conditions are fine. The cut flower trade is good also, while wedding work is coming very fast, keeping all the florists in the city busy. The prospects are the best ever seen for a humming business all round this season. Lots of good stock on the market, with fair prices and good demand.

EPSOM SALTS AS A FERTILIZER.

(Continued from Page 881)

Magnesium is found in relatively large amounts in many of our root vegetables, as potatoes and beets. This question of Magnesium has received considerable attention at the hands of the sugar beet people, and the following is quoted from an abstract published by the American Chemical Society lately and concerns the work of F. Rigaux, a French investigator:

"Joulie holds that a soil in a good state of fertility should contain 0.30 per cent. MgO. On this basis and as the result of numerous analyses of Belgian soils the conclusion follows that Belgian soils naturally deficient in this element have been further depleted of it. From a consideration of the ash analysis of various field crops, MgO is at least as important as the other elements of plant food, K₂O & P₂O₅. A number of field tests with sugar beets during the past ten years indicates that the yields are greater and that the sugar content is greater where MgO was used in the fertilizer than where it was omitted, or where no fertilizer was applied. Cereals and potatoes also gave better returns where MgO was present in the fertilizer.

Now, this is about sugar beets and not about shrubs and small trees of any kind, but from analyses made of evergreens and other trees we find that Magnesium is always found in the seed, leaf, bark and in the substance of the tree itself.

The character of Magnesium is part way between that of Lime and that of Potash or Soda. It appears probable that like Potash it is usually found in the soil and extracted therefrom by the plant roots, and that the particular form of soluble salt in which it was applied to the ground would not make much difference as far as its availability was concerned.

Without digging up all the work ever done on Magnesium it seems to the writer that nothing would be gained by applying amounts of Magnesium salts much larger than we would apply of Lime (with a mental reservation we will consider later). Like Lime, Magnesium may act indirectly and thus unlock plant foods.

Your inquirer seems to have the idea that Magnesium was of distinct disadvantage to plants. This idea is erroneous, although large quantities of any soluble salt in the soil would be disadvantageous and Magnesium is a very soluble salt and would without doubt get to the roots of the plant when other more insoluble salts, as those of Lime, would soon be fixed in the ground and could then do no further injury.

It might be interesting to note that in the so-called alkaline plains salts of Magnesium are almost always found, and Magnesium itself is an alkali not

so strong as Potash but partaking of that nature.

If your readers desire further information it would be a pleasure to quote more definitely the amounts of Magnesium in the various salts, or if they want Magnesium Sulphate (Kieserite), it may be had at about \$1.25 per 100 lbs., or the refined Epsom salts may be obtained at a little more or about \$1.50 per 100 lbs. Crude is quoted at \$20.00 per ton.

It would be very interesting for all of us if the users of soluble chemicals would modestly state their experience with Magnesium, as I have no doubt that many of them will say they have tried and in many cases by overdoing it have had bad results, and on the other hand it would be of greatest interest to hear from those who have used very small amounts of this chemical and are convinced they have had good results.

Up to this time we have considered Magnesium entirely in the light of an element that gets in by the roots and, whether absolutely necessary or not, happens to be found in almost every part of almost every thing in the vegetable world, it being an element well nigh all-pervading. Just how far it may take the place of Lime or other elements is not entirely settled, but there is no doubt but that the amount of this element in the soil is seriously depleted by successive croppings and it is true that this has been recognized and that fertilizers containing Magnesium have been applied to offset this shortage.

Starting from the main idea of the rotation of crops there have been a good many reasons that we could advance to account for the success of some sort of rotation. Among other advantages that have been alleged is that of destroying or combating poisons left in the soil by previous crops and making new ones that would not increase the undesirability of the soil for other crops, in other words to destroy all poisons left in the soil from the presence of living plants. Now, there is no question whatever but what such poisons are left. They have been extracted by water, and other solvents, and considerable work has been done on them, and chemists have recognized among them many well-known poisons familiar to them under various guises. It has also been shown that many of these plant poisons may be rendered innocuous by certain chemicals, and among these are many of the soluble fertilizers as Nitrate of Soda and others. Although Magnesium has not been especially mentioned in this category it may be that this element (on account of its cheapness and its solu-

bility, and the fact that it is a plant food) is desirable to apply in such quantities entirely apart from its use as an ordinary fertilizer.

The government has made geological surveys of most of the country and from this the content of Magnesium may be found without going to the expense of having the soil analyzed. In most cases where there is recourse to this survey and recourse to the State Experimental Station the question of the scarcity of Magnesium or otherwise, would be pretty well decided, except for a particular case, when the real experiment would be to have the plant or tree have its own say.

DAVID HERBERT & SON,

Successors to L. K. Peacock, Inc.
 ATCO, N. J.

Dear Sir:

BUSH HILL PARK, ENFIELD, MDD'X, June, 1909

HUGH LOW & CO. Dissolved

In consequence of the voluntary Dissolution of my late Firm, I have much pleasure in informing you that I have taken over the Royal Nurseries with the greater part of the stock. These Nurseries were formed by me in 1881, under the instructions of my late Father, and since his death, I have taken an active part in the direction of the business.

The staff which is transferred, practically intact, includes such well-known men as my representatives — Mr. Harry A. Barnard, Mr. F. W. Ashton, and Mr. Laurence J. Cook. Mr. Edward Tack as Orchid Specialist and Grower, and Mr. M. C. Allwood, the enthusiastic Carnation Man. Messrs. Moore, Reid and Meades, amongst the Roses and Fruit Trees, and Mr. Phillips in the General Department.

I feel that with such men at my back, clients can rely upon the same care and attention being given to their business as under the old regime.

Esteeming your orders and enquiries, believe me to be always at your service as heretofore.

Please address all communications

Obediently yours,

STUART LOW & CO.,

Bush Hill Park, Enfield, Midd'x, England

STUART H. LOW**Araucarias OUR Specialty**

Araucaria Robusta Compacta and **Excelsa Glauca**, Specimen Plants, Spring 4,000 importation, 7 inch pots, 25, 30, 35, 40 inches high, 6 years old, suitable for the veranda, porch or lawn, \$2.00, \$2.50, \$3.00 each, worth double that amount. **Same Varieties**, April 1,000 importation, 15-20-25 inches high, \$1.00, \$1.25, \$1.50.

Araucaria Excelsa, 5, 5½, 6 inch pots, 2-3-4 years old, 100, 500, 600, 750, \$1.00.

Kentia Forsteriana, 6-7 inch pots, 25, 30, 40, 50 inches high, \$1.00, \$1.25, \$1.50, \$2.00, \$3.00 each.

Belmoreana, 6 inch pots, 5 to 6 leaves, \$1.00, \$1.25, \$1.50.

Cocos Weddiana, 3-4 inch, 150, 180, 250.

New Hybrid Calceolaria

The accompanying photograph is that of a new hybrid Calceolaria raised by Robert Shore, head gardener in the Botanical Department of the University of Cornell. Forty-five plants were obtained as a result of crossing a small shrubby variety, which originated as a chance seedling from seed supplied by the Peter Henderson Co. of New York, and a plant of the herbaceous type commonly grown in greenhouses.

A strange feature is the tallness of the hybrids, seeing that the parents are of dwarf habit. However, the tall character does not in any way detract from their beauty; rather it lends a charm which is not possessed by the parents. The flowers stand well up above the foliage and are beautifully mottled, the colors ranging through all the shades of yellow and bronze to a shade of purple,

the plant possessing the latter coloring being very distinct, and should it be reproduced from seed will undoubtedly prove a valuable acquisition as a greenhouse subject. In size, the flowers and leaves are intermediate between those of the parents, while the general habit of the plant is not unlike that of *C. kewensis*, although perhaps more graceful. An individual plant gives but a poor idea of the decorative value of the hybrid, which is seen to the best advantage when massed or grouped together with other ornamental plants.

Many beautiful hybrid plants have been raised by Mr. Shore, but being of a modest disposition very little has been heard of him as a hybridizer.

H. J. Moore

Crassula coccinea, Syn. Kalosanthes coccinea

This beautiful fleshy shrub is a native of Table Mountain, South Africa, and has been known to horticulturists for a great many years. As a young man in the old land I can remember seeing some magnificent specimens at exhibitions. Here around Boston I have seen very little of it and several well-known plantmen have told me it was a failure in this climate, which is certainly a very erroneous idea. As a summer flowering plant I don't know of anything that will more quickly attract attention and its bright scarlet flowers, lasting for over five weeks, make it very suitable for piazza decoration.

Crassulas are easily propagated. After the plants have finished flowering in July we take the stems and cut them into pieces about an inch and half long and insert in sand. They will root in about three weeks at that time of the year and each piece will break two or three eyes. In this age of hustle it takes a good deal of patience to wait for a single cutting to make a decent sized specimen. The quicker way is to prick the cuttings when rooted thickly into the desired size of pot; a ten-inch pot is what we generally use. Fill the pot full of a good rich open soil (the above size will hold about eighty cuttings), keep a little close for a day or two and set outdoors in the full sun as long as there is no frost.

In winter we keep them in the coolest end of a house where calceolarias and cinerarias are grown, the thermometer quite often being as low as 34 degrees. When the plant is about ten months old a few straggling flowers will set which we cut off. Right here I suppose is where some get discouraged with the plant and give it up as being no good for this climate, but if kept for another season one will be rewarded with a plant about three feet high with two hundred or more flowers if grown in the above-mentioned pot.

If a dwarf plant is desired the following method will answer. After a plant has set for flower make cuttings of the shoots the required length and fill a pan of good sandy soil and set them in as thick as you can get them and put for three weeks in about sixty degrees of heat when they will be all rooted. Remove to a cool light house as soon as they are rooted and give a little weak liquid manure occasionally until they show color. They will flower beautifully although not so large as the older plant.

 Another
 mile stone

With this issue closes Vol. IX of HORTICULTURE. It contains forty-eight pages more than the corresponding volume, first half of last year, necessitated by the very gratifying increase in advertising business. It is a matter of no small satisfaction to the publishers of

HORTICULTURE to note the increasing and steady growth of confidence in the paper as unquestionably indicated by the support accorded by the most reliable advertising houses. We believe this to be based upon real value as an advertising medium, due to the high character of the reading matter which we have been enabled to present, and we take pleasure in stating that still greater advancement on this line is assured for the immediate future. We realize that no better foundation can be laid for an effective advertising medium in the horticultural industries at their present stage of development than readable and instructive matter from the pens of the most advanced and representative men of today in the profession. We shall endeavor, as in the past, to steer clear of threadbare and overwritten subjects and aim for the best in up-to-date fields that have not been worn out.

"Time is a sort of river of passing events." The change in the personnel of the old and world-renowned firm of Hugh Low & Co., which is announced in our advertising columns will doubtless prove of more than minor interest to many of our readers, for from this establishment have graduated a large number of our leading gardeners. In the early part of the last century it was already a power in the horticultural world—under the late Hugh Low whose enterprise brought to notice many varieties of Mexican plants, California conifers, New Holland species, Cape heaths, camellias, etc. When the reins were taken up by the late Stuart Henry Low orchids were a specialty and no corner of the world was exempt from his collectors, his brother Sir Hugh Low, Blunt, Boxall, Smith, Tucker, Bruckmuller, Lehmann, White, Currow and others all sending home large shipments of what are now the main occupants of our orchid houses and during his regime the glass at Clapton Nurseries was increased four-fold and the present Bush Hill Park Nursery was started with his son Stuart Henry in charge and assisted by his younger brother Edward V. Low who is well known personally among the trade in the United States.

This week, from the Atlantic to the Pacific, the country is all aglow with the peony and the rose—than which Nature has given us no fairer benefaction. At sight of their splendor and scent of their perfume humanity is constrained to stop for a moment its strenuous rush and submit to the sway of the gentler emotions and the fierce struggle of traffic and speculation is temporarily forgotten in the contemplation of the garden glory. Nurseryman or florist, have you ever given a thought to the part you are privileged to perform in the great onward and upward march of refinement? To your industry and skill, perhaps more than to any other influence, is due the fact that the land is decked in such loveliness today. Eloquently these flowers are speaking in your behalf—better persuaders than all the pictures and agents and books. The pity is that so many who seek to sell these things to the people neglect to use the splendid means that is within their grasp, paying no more attention to the floral adornment of their homes or business premises than a bricklayer or sausage dealer might be expected to show. There is something radically wrong with the florist or nurseryman who fails to display his art in its most impressive possibilities in and around his place of business. The surroundings of the offices and work rooms of the men who deal in trees, plants and flowers should invariably set the standard of home adornment in the neighborhood.

Notes from the Arnold Arboretum

Though the number of *Spireas* cultivated in our gardens is by no means small, the new Chinese *Spirea Henryi* promises to be a valuable addition on account of its blooming so late for a species of the spring flowering group, its flowers appearing about the middle of June, when all the other hardy *Spireas* of this group have passed. The white flat flower clusters are produced in great abundance along the spreading branches of the previous year as in the other species of this particular group, while in the summer-flowering *Spireas* the flowers appear at the end of the usually wand-like shoots which gives them an entirely different and as a rule less graceful habit. *Spirea Henryi* is a compact shrub three feet in height or more with upright stems and spreading branches clothed with neat bright green foliage, the leaves being about an inch long or a little longer and oval to oblong in outline with a few teeth toward the apex. The white flowers appear in flat clusters about two inches in diameter along the whole length of last year's branches. As it has stood at the Arboretum the last two winters without being injured, it may be considered as hardy in this latitude. Two other species from China, *Spirea Veitchii* and *S. Wilsonii*, have not yet bloomed here, but to judge from herbarium specimens and descriptions they are very similar in habit and general appearance and probably as hardy as *S. Henryi*. It was a happy thought or may be unintentional to commemorate in the names of these three closely related species introduced recently from China the names of the three men who have been in recent years so successful in bringing to our knowledge as well as introducing into cultivation so many beautiful plants from China the flora of which seems unexpectedly rich and almost inexhaustible.

Among the Honeysuckles attention may be drawn to two recently introduced species which like the above mentioned *Spireas* are valuable on account of their blooming later than the other species in cultivation; these are *Lonicera deflexicalyx* and *L. leycesterioides*. The former is an upright shrub with long and slender arching or nearly pendulous branches studded with rather small two-lipped flowers about three-quarters of an inch in length, pale yellow when they open, but changing soon to almost golden yellow; they are borne on short stalks in the axils of the leaves which are about two inches long and lanceolate in outline. The berries which ripen in autumn are orange yellow. The other species *L. leycesterioides* has also yellow flowers of about the same size borne at the end of the branchlets in the axils of the upper leaves smaller than those of the preceding species and more ovate in outline. The berries are bright red but partly enclosed by an involucre formed of the bractlets. Both species seem to be perfectly hardy here and though not very showy, worth planting on account of their late flowers. Another comparatively new Honeysuckle, *Lonicera Altmannii* from Turkestan, is now very attractive with its numerous pea-sized twin berries of a bright scarlet color. It is an upright shrub three feet high or more with dull green rather small foliage and whitish not very showy flowers appearing early in May together with the leaves. It is perfectly hardy.

European Horticulture

TUBEROUS BEGONIA GRAF ZEPPELIN

In recent years not much has been seen or heard of Begonia Graf Zeppelin, and it looks as if it had quite disappeared. It is not easy to find any plants prettier than this light brick-red colored begonia for a bed. It is the usual practice to propagate the plant by cuttings made from the young shoots, and by the leaf. Earthing-up is an advantageous method. For this purpose a few plants should be planted in frames rather wide apart; and when these mother plants have produced a number of shoots, the soil should be drawn over the tuber a few inches high, or it should be added from an outside source. In about three weeks the whole of the earthed-up shoots will have formed roots at the point where the earthing-up is closed. The rooted shoots may then be detached in such a way as not to make wounds in the tubers, and planted in pots of suitable sizes, in a mixture of two parts leaf soil, one part peat, and a good proportion of sharp sand. This method of propagation may be carried out thrice during the course of the summer.

THE BOTANIC GARDEN, REGENTS PARK, LONDON

The Royal Botanic Garden has not been a financial success for many years past for the probable reason that it has not served any useful scientific purpose. The few shows held are not well patronized by the public, excepting always on the occasions when some special society, as the National Rose, decides to hold one there, when the highest in the land come in large numbers, or some ridiculous floral fete is being held. Now, the society is passing through a financial crisis. The debenture debt amounts to £30,000, and there are numerous creditors, the chief one being the office of Woods and Forests, to whom rent is owing. The matter was brought before a special meeting of the Fellows on Tuesday, May 25 last, and it was resolved almost unanimously that Fellows should give five guineas each to pay the debts and save the garden from going into liquidation. This decision was reported to a general meeting. Towards the end of last year a writ was hanging over the garden, and to prevent it being served Mr. C. Brinsley Morley, vice-president and treasurer, paid the money. After a stay in Germany he returned to London a few weeks ago to find another writ. Again he paid the money to save the garden. The sum required to place the society in a fair condition on January 1, 1910, was about £5000. He proposed that each Fellow should subscribe a minimum of three guineas; but an amendment that the subscription should be five guineas was carried, only three voting against it.

THE CANNA FAMILY (*Das Geschlecht der Canna*)

In recent years M. Arpad Muhle, florist and nurseryman, Temesvar, Hungary, has proved himself to be the most successful raiser of new varieties of cannas. He has now brought out a brochure consisting of 118 pages, in which everything is stated that a cultivator and raiser of new cannas needs to know. Particular chapters deal with the crossing of varieties, natural and artificial propagation, cultivation and employment in the garden. The greater part of the contents of this pamphlet consists of a scrupulously worked out catalogue of the true species and large flowered varieties of cannas.

AMERICAN SEED TRADE ASSOCIATION

Twenty-Seventh Annual Convention at Niagara Falls a Notable Event

Officers Elected

PRESIDENT, J. C. Robinson, Waterloo, Neb.; **FIRST VICE-PRESIDENT**, M. H. Duryea, New York; **SECOND VICE-PRESIDENT**, F. W. Bolgiano, Washington, D. C.; **SECRETARY-TREASURER**, C. E. Kendel, Cleveland, Ohio; **ASSISTANT SECRETARY**, Leonard H. Vaughan, Chicago.

EXECUTIVE COMMITTEE, W. S. Woodruff, Orange, Conn.; Geo. S. Green, Chicago; Alex. Forbes, New York; C. N. Page, Des Moines, Ia.

The twenty-seventh annual convention of the American Seed Trade Association convened at Clifton House, Niagara Falls, Ont., June 22, President Watson S. Woodruff, of Orange, Conn., in the chair. An address of welcome was made by Hon. R. P. Slater, Mayor of Niagara Falls, and was responded to by H. W. Wood, of Richmond, Va., in felicitous manner.

President's Address.

President Woodruff's annual message congratulated the membership upon a successful year in business, and said that the fact that so few failures occur in the seed business augurs well for the honesty and probity of the seedsmen. He referred feelingly to the loss which the association has suffered in the death of Warren W. Rawson, Boston, Mass.; S. W. Flower, Toledo, Ohio and C. L. Allen, Floral Park, N. Y., in the past year. Committee on obituary consisting of Messrs. C. H. Breck, W. T. Phillips and M. H. Duryea was appointed pursuant to this item. President Woodruff called attention to bills introduced in the legislatures of New Hampshire, Wyoming, North Carolina, North Dakota, Michigan, Missouri, New York, South Dakota, Wisconsin, Iowa, Rhode Island, Minnesota and Tennessee, during the 1909 sessions, and enacted in a number of these states, New Hampshire, Wyoming, North Carolina, Wisconsin and Tennessee. The committee of seven appointed last year to consider the question of unwise state legislation and federal legislation on the general subject of seeds has done able and conscientious work during the year, and has materially assisted to stem the tide of unwise legislation. In one state a license of \$25 yearly was established, which is doubtless unconstitutional. Several states have endeavored to establish arbitrary and unreasonable standards of purity and viability of seeds.

President Woodruff called attention to the large number of laws which have been introduced recently into state legislatures, the character of which is so severe as to be most alarming, many of them containing absolutely impracticable provisions. In Europe such legislation is not attempted, but a safe and sane policy followed. The Kentucky Seed Act stands alone in American state legislation as adopting the reasonable pro-

vision as to intentional deception which characterizes the Seeds Act of Great Britain. In almost all the states there is no attempt to relieve the seedsmen from the rigors of the law in the case of an honest mistake. Owing to the difficulty of local seedsmen always being informed as to the legislation that is attempted, President Woodruff recommends the appointment of a special committee to look after the general work connected with seed legislation to have the benefit of legal advice from a regularly retained counsel. This recommendation was adopted by the association in convention. The Wholesale Seedsmen's League are to co-operate in the employment of the counsel.

President Woodruff further recommended that in future legislation, separate statutory provisions be made to cover sales of garden and flower seeds from those governing the sale of grass, clover and field seeds. This recommendation was also approved by the convention after it was favorably endorsed by the special committee appointed on President's address. President Woodruff passed a high encomium upon the work of J. C. Vaughan for his efficient work on the Committee on Tariff and Customs. The great and all-important question has been the matter of specific rather than ad valorem duties, and the Senate having approved the specific duties it now remains for the House to follow suit.

President Woodruff expressed the belief that the knell of low grade seeds is sounding through the land, and that seeds of high grade will command a much better price than formerly, and the cheap seeds go begging. Publicity is the cure for many of the evils that have confronted the seed business of recent years, and all seedsmen will lend their aid to the correction of any abuses that may creep in the trade most cheerfully.

President Woodruff paid his respects to the abuse of government free seeds and commented on the same in a forceful way, stating that the total expended by the government for free seed distribution, not over ten per cent of which were ever used for any useful purpose, from 1903 to 1909, inclusive, amounts to the sum of \$2,197,800; and next year each senator, member and delegate will be allowed 20,600 packages of vegetable seeds, and 2,000 packages of flower seeds. Small fractional currency for mailing purposes was favorably mentioned as a possible great aid to the mail order business.

President Woodruff referred to the subject of mutual insurance against fire by seedsmen, and recommended

that a standing committee of three be created to work out the whole subject to some conclusion for report to the next convention. He was informed that considerable saving had been effected by the hardware people in this way. With the recommendations that the Executive Committee and J. C. Vaughan be allowed their traveling expenses, and with a pronounced note of optimism for the future of the seed business, President Woodruff held up "Quality" as always and ever the watchword of the trade, and his belief that seedsmen of all others leave the world better than they find it, as they cause two blades of grass to grow where only one grew before.

The President's address was referred to a committee of five, Messrs. J. C. Robinson, Walter P. Stokes, C. H. Breck, Chas. Dickinson and Albert McCullough, who recommended concurrence in various recommendations. A vote of thanks was returned to the President for his able address on motion of Capt. Landreth.

Reports of Officers and Committees.

The report of Secretary-Treasurer Kendel showed the finances in good shape and membership increasing. New members elected were Kirby B. White, Detroit, Mich.; Cargill Elevator Co., Minneapolis, Minn.; Edwin C. Foltz, Louisville, Ky., and D. B. Gurney, Yankton, S. D. The Auditing Committee, F. W. Bolgiano, S. E. Briggs and Ben P. Corneli reported books in good shape and accounts correct; report accepted. Albert McCullough presented report of Delegates to National Board of Trade. Himself and W. Atlee Burpee had participated in important work on committees of the National Board of Trade, on postal and other matters of mutual interest to the two Associations. C. E. Kendel presented report of delegates to National Council of Horticulture, showing the great value of the work of the Council to the seed trade and horticultural interests. Report accepted.

Two Reports on Seed Legislation.

Geo. S. Green, chairman Committee on Seed Legislation, presented report of the committee referring to its general federal aspects, and Chas. N. Page, vice-chairman, presented a separate report referring to seed legislation in the various states and territories. Mr. Green's report favored laws to prevent the importation of adulterated and low grade seeds as for the general good of the trade and the public; he recommended the passage of a proposed bill carrying out this idea. With regard to absolute freedom from dod-

der in the minutest ratio he felt that a minimum percentage should be favored such as will not exclude commercially valuable seed in years when a sufficient supply cannot be obtained in this country. The European screenings should be excluded from this country. In regard to prohibited seeds a reasonable margin of tolerance should be shown. As to germination hard and fast rules should not be adopted. The methods of testing for germination are so variable and the results of tests vary so much in various hands that it is really unreasonable to try to enforce a criminal law, the punishment based on such evidence as can be possible with regard to germination of seeds. Seeds that are above a certain minimum standard should not have to be labelled, for while there are laws against burglary the seedsmen should not have to be compelled to tag himself as not a burglar. He deprecated the fact that much of the legislation seemed to be class in its nature in that it endeavored to except the farmer from the operation of the same law that was sought to be enforced as against the seedsmen. Chas. N. Page's report commented on the large amount of crude and ill-considered legislation that has been attempted, and gave an exhaustive review of the present condition of seed legislation in the various states. In many of the states legislation so drastic had been attempted that its effect would have been not only to knock all the seedsmen out of business but to absolutely render unsalable all the seeds produced in the states affected. In conclusion, he said that the American Seed Trade Association do not object to any reasonable sane national or state legislation affecting seeds. The Committee recommended that a committee of three be appointed to confer with a similar committee from the National Association of State Seed Analysts to agree if possible on the draft of a uniform state seed law to take the place of the many objectionable laws which now exist. This recommendation was concurred in, and also the recommendation by President Woodruff that in future statutory enactments separate provisions be inserted governing the sale of vegetable and flower seeds from those covering the sale of grass, clover and field seeds.

C. F. Wood, of the Committee on Weights and Measures, read a letter from F. Reichman and D. C. Palmer, Sub-committee of the Nat'l Conference of Weights and Measures, and same was filed without action at this time. The application of Linnaeus Allen to continue the membership of C. L. Allen, deceased, was favorably reported by the membership committee and concurred in.

National Association of Seed Analysts.

In the absence of the author Mr. F. C. Woodruff read the paper by the president of the National Organization of Seed Analysts, E. H. Jenkins, setting forth purposes and scope of his organization, to improve and unify present methods of seed testing and to work for more uniform and satisfactory laws regulating the sale of agricultural seeds. This work is being forced upon the attention of agricultural stations of the country by the

logic of events and from the side of the retail purchaser, and follows as a consequence of other kinds of control work which state institutions are doing. Determinations as to species as labeled, whether relatively light or heavy, what percentage of foreign matter contained and percentage of pure seed capable of germinating are obviously of greatest value to the buyer. The results to be accomplished are similar in nature to what has been done in the past twenty-five years by the Association of Official Agricultural Chemists in securing accuracy and uniformity in fertilizers, etc. The association will welcome any facts or suggestions from American Seed Trade Association membership, and expresses cordial relations with them, and in no sense is the organization hostile to producers or dealers, but aims to foster fair trade and legitimate competition.

In the absence of the author Secretary Fendel read the paper on Seed Legislation by Prof. Pammel, and on motion of Mr. C. F. Wood a special vote of thanks to Messrs Jenkins and Pammel was adopted, and 2,000 copies of Prof. Pammel's paper were ordered printed for distribution.

Irrigation of the East.

Capt. Burnett Landreth of Philadelphia read a paper on the application of irrigation to old eastern farms, and presented some of the difficulties that might confront the establishment of such at first because of riparian rights of farmers who would object to the water from any small stream being diverted by farmers above who might undertake to irrigate their own farms; therefore, farmers in the east will be dependent for such irrigation upon wells driven on their own farms unless they reside upon the banks of large rivers from which they can draw water without objection. He then presented the following resolution, which was adopted unanimously:

While the American Seed Trade Association heartily approves of the promotion by the United States Government of irrigation practices in the New West, the association is as firmly impressed with the belief that there is pressing room for some federal promotion of irrigation practices in the Old East; consequently I move that there be appointed a committee of three to urge upon the Secretary of Agriculture of the United States and the Agricultural Committees of the Senate and House such congressional legislation as will establish a national irrigation station near the city of Washington where may be assembled pumps, irrigating machinery and all appliances so that working processes may be shown as adapted to Eastern conditions.

The convention adjourned until Wednesday morning, the evening being occupied with social pleasures, concert and dance.

Closing proceedings of the Convention will appear in our Seed Trade columns next week.

Bay City, Mich.—The firm of Schweers & Potratz Floral Co. has dissolved and the business will be conducted hereafter by Carl B. Schweers.

ST. LOUIS NEWS.

The Henry Shaw Banquet.

The members of the St. Louis Florists' Club have all been extended an invitation to attend the Henry Shaw banquet given to gardeners, florists and nurserymen at noon, Thursday, July 1st, to take place in the open air at the Missouri Botanical Garden. This is the first time that this yearly banquet is given at the garden and in the open. Secretary Benitzen of the Florists' Club was asked by Prof. Wm. Trelease to notify each member of the club, which he has done and it is hoped that the entire membership, which numbers nearly one hundred, will respond and spend a pleasant afternoon at the home of the late Henry Shaw, who in his will provided for these social entertainments yearly.

Personal.

A. W. Murray has moved from his old location, 3032 Eastern avenue, to Union and Page Boulevards.

John F. Quinn, who for many years was on Grand and Finney avenues, has moved around the corner to 3607 Finney avenue.

Miss Margaret Klickenkern and Miss Adele Brix, both daughters of well-known St. Louis florists, were married recently. Both husbands are outside of the trade.

Visitors in town last week were T. E. Waters, representing the A. L. Randall Co., Chicago; Mr. Guy M. Reyburn, Chicago and F. H. Macke, traveling salesman for the Chicago Tin Foil Mfg. Co.

Walter Retzer, late vice-president of the St. Louis Seed Co., who resigned his position to take charge of a railroad in South America, has changed his mind about leaving St. Louis and has taken a position with Grimm & Gorley on Cass avenue.

ROCHESTER PERSONAL AND NEWS NOTES.

Salter Bros. are contemplating rebuilding several of their houses.

H. Salmon, a newcomer at Mt. Hope Cemetery contemplates building a 30x150 ft. house, King construction.

F. Thoman is going to Europe for an extended trip through Holland and Belgium, to visit growers there.

J. B. Keller's Sons are having their store remodelled and, when completed, they will have a first-class floral emporium.

The firm of Crooke Co. are building a propagating house, King construction, on Mt. Hope. The grower here is F. Scofield.

A number of new roses are being tried out by Mr. Ogston, gardener at the Kimball estate. A visit to this place is certainly of great interest to any florist.

BUSINESS CHANGES.

Sandusky, O.—D. R. White has taken the Central Greenhouses and is remodeling and improving them.

Erie, Pa.—R. Olsowski has bought the greenhouses of John Stelle, but will raise flowers in the place of vegetables.

Indianapolis, Ind.—The sons and daughter of Alfred Pahud have leased his greenhouses and propose to incorporate and carry on the business with Charles Pahud as manager.

NEWS OF THE CLUBS AND SOCIETIES

MASSACHUSETTS HORTICULTURAL SOCIETY.

Probably never has a finer display of peonies been shown at an unscheduled exhibition at Horticultural Hall than that which was given last Saturday. While the exhibition was unheralded, many visitors were attracted to the show, which was opened at 10 o'clock and closed at 2 p. m. No regular prizes were offered, but gratuities were awarded, the superior character of the exhibits demanding official recognition from the society. The small exhibition hall was used, and this was filled, peonies predominating, although there were other flowers, including irises, lilies, Kalmias, etc. The peonies made the show, however. William Whitman (gardener Martin Sullivan) was the leading exhibitor, with 105 vases of double peonies and nineteen vases of singles. Of the former, the Dean Hole, a pink, was one of the handsomest, while the singles had their most attractive specimen in Lady Lillian Ogle. Moonstone, a red with yellow pistils was another handsome variety. These were displayed on a side table along the hall, and seventeen more vases were on a centre table. At the end were five vases of the pink and white Magnifica, the finest peony shown, from the same estate. On one of the centre tables Mrs. John L. Gardner, gardener William Thatcher, had twenty-five vases of peonies.

E. J. Shaylor, of Wellesley Farms, staged 117 varieties, one of the finest of which was the Lady Alexander Duff. T. C. Thurlow also had 117 vases of peonies. George Hollis showed fifteen varieties of new seedling peonies, including the Rev. L. W. Atwood, white; Seraph, light pink; Mrs. Josephine March, white and President C. W. Eliot, pink, none of which had ever before been exhibited.

TARRYTOWN HORTICULTURAL SOCIETY.

The June Flower Show was held on the 15th instant. The collection of roses exhibited by General McAlpin, gardener John Woodcock, was the most extensive that we have seen in this section. It contained over fifty varieties of H. P.'s, and forty varieties of H. T.'s. It was a grand collection, and shows that our rose collections generally are far too limited. "All of the varieties," Mr. Woodcock says, "are perfectly hardy, with the ordinary winter protection." We noted in his collection such sorts as, viz.: Tea and H. T. Antoine Rivoire, Belle Siebrecht, Clothilde Soupert, Caroline Testout, Catherine Mermet, Gruss an Teplitz, Grace Darling, J. B. Clark, Kaiserin Augusta, Victoria, Killarney, Koniger Carola, La Tosca, La France, La France (98), Cochet—White and Pink—Mrs. Cant, Mildred Grant, Mme. Chateaufort, Mme. Hoste, Mme. Jules Grotz, Mme. Ravary, Prince de Bulgaria, President Carnot, Malmaison, Pierre Notting, Vicountess Folkestone, Clara Watson, Gustave Regis, Etoile de France, Mme. H. Leuliot, Mme. Philip Rivoire, Reichthgroff Von Kottledast, Reaute Inconstant, Mme. Helen Cawlin, Le Innocence, Amateur Teyseur,

Augustine Guinoiseau, Apothica Gen'l Hofer, Rosomane Gravereaux, Etienne Levet, Gloire de Ducher, Reme, Caroline de Sachs, Ferdinand Jaimaine, Ellen Wilmot, Mme. C. de Luce, Mme. Jean Gilmot.

Amongst the H. P.'s we noted: Victor Hugo, R. Lambertin, Alsace Lorraine, Star of Waltham, La Rosier, Countess of Oxford, Jean Liebaud, Marquise Castelaime, Mme. G. Luizet, Gov. Wm. Wood, Ben Cant, Mrs. R. G. S. Crawford, Ulrich Brunner, Pride of Waltham, Mrs. J. Laing, Marie Baumann, Druschki, Earnst Rohan, Marie Finger, Horace Vernet, Jacq., Chas. Lefebvre, S. A. Rodocanachie, Eclair, and others. The rose collection from Mrs. Trevor was also good, and Miss Blanche Potter's Druschkis were marvellous. Robert Angus had on exhibition a vase of Chrysanthemum Golden Glow.

The sweet peas were excellent, and competition keen. The most conspicuous sorts were: Satopian, Emily Henderson, First of All, Lady G. Hamilton, Helen Pierce, Janet, Lady Clarke, Royal Rose, Prince of Wales, Nora Unwin, and Mrs. Wilmot.

Mr. Nicols, gardener for Mrs. J. B. Trevor, says that he sows his sweet peas outdoors, from the 1st to the 5th of October, and protects them during the winter with small sashes, covered in hard weather with salt hay. He certainly gets fine results, and claims he got them earlier and finer than if sown indoors in February and planted out.

The collection of wild flowers by the school children was a great attraction. Annie Lee staged over fifty species and varieties, and Caroline Rosenstein had nearly as many; all were correctly named, and were in themselves an educational feature worth going to see. We noted amongst the hardy shrubs a nice vase of Magnolia parviflora, and one of Pterostyrax lespidium—both hardy here but very seldom met with. The exhibition was free to the public and from every standpoint was a grand success.

COMMERCIAL FLORISTS' ASSOCIATION OF ROCHESTER, N. Y.

At the meeting on Monday night, 14th inst., "Doing it for Rochester" was much in evidence. With President Vick in the chair, further plans for the fall show were discussed and the numerous attending members took the greatest interest in all proposals. There is no doubt, that this show is going to be "it" and several florists have already started preparations.

At this meeting the vice-president, A. H. Secker, handed in his resignation and it was received with expressions of regret by all present. Mr. Secker has always been the first to consider the association's welfare, and has given much of his time to same. On hearing that he has accepted a position in Philadelphia on the staff of the Florists' Exchange, congratulations were general and his many friends, both at Salter Bros., where he for two years was foreman, and outside the trade, have asked me to voice their good wishes for his future career.

A. PENGEL.

MORRIS COUNTY (N. J.) GARDENERS' AND FLORISTS' SOCIETY.

The society had to hustle to clear the table of all unfinished business at the regular June meeting as there will be no session until next September in accordance with custom. The 14th Annual Flower Show, as has been previously stated, is to be held October 27 and 28 in the assembly rooms, Madison, N. J. There are a number of attractive special prizes. Robt. D. Foote of Morristown, on whom we can always count, offers a special prize of \$25 for the best vase of 25 carnations, any variety, open to all (undisseminated varieties barred). This liberal prize ought to bring in many outside competitors, as it is a nice little scalp to hang on one's belt. Dr. D. H. McAlpin of Morris Plains, another enthusiastic friend of the society, offers a prize of \$25. What it goes for has not been decided upon yet. Still another friend offers a silver cup, value \$25, which also is to be placed. Another special of \$25 is offered for three vases of chrysanthemums, 6 flowers, varieties, O. H. Kahn, Merza and Wm. Duckham; 1st \$15; 2nd \$10. There are many more special prizes which will appear in the schedule. The show promises to be better than any of its predecessors as far as prizes go, and we hope that meritorious exhibits will not be lacking either, as it would be a great reflection on the club.

Florham Farms put up a fine show of peonies and gladioli as the evening's exhibit.

Arthur Herrington, always in our councils, was absent on account of a painful illness. He is past the acute stage and is expected to be around again soon.

EDW. REAGAN, Sec.

NEW JERSEY FLORICULTURAL SOCIETY.

The regular monthly meeting of the society was held on June 11 at their rooms in Orange when Rev. L. H. Lightipe read a paper on the nomenclature of plants. The subject was handled in a practical and thorough manner and suggested many points for the interesting discussion that followed in which W. A. Manda led. The tendency of the times to multiply names was deplored and adherence to botanical names was favored.

In the floral display of which W. A. Manda and H. Halbig were judges for the evening, carnations, roses and peonies predominated. Fine lettuce and cucumbers were displayed by Samuel J. Wyatt, gardener for A. C. Van Gaasbeck, whose name was placed in nomination for membership. The society adjourned for the usual summer recess.

J. B. DAVIS.

POSTPONEMENT OF NEWPORT SHOW.

On account of roses being late, the Newport Horticultural Society has postponed its Rose Show from June 23 and 24 to June 28 and 29, and a good exhibition is now fully expected.

ROYAL HORTICULTURAL SOCIETY.

Some New Plants.

On the occasion of the meeting of the various committees at the hall in Vincent Square on June 8, Messrs. J. Veitch & Sons contributed hybrids of *Gesnera* and *Gloxinia*, which exhibited many interesting additions to a class of stove plants possessing drooping flowers of a blue or purple coloring of much decorative value. These are derived from *Gesnera Regina*—a plant with blue, pendant blooms, and leaves with light colored veins and ribs. Sometimes this species was employed as the male, and sometimes as the female or seed-bearing parent, the crosses being made with different varieties of *Gloxinias*, *Gloxinia Deva*—a fine crimson flower—being apparently the more prepotent in the production of rich coloring in the hybrids.

Large flowered abutilons in yellow, crimson rose and white came from H. B. May. Mr. J. Douglas, the veteran carnation and auricula raiser, was to the fore with *Dianthus* hybrids of the garden pink and the Sweet William; very good in regard to form and bright of color. He also showed a cross with this last named plant and the old Uriah Pike carnation, the color of the flower being crimson with a purplish tint. It is a showy border plant. Stuart Low & Co., Ltd., showed a new hardy pink called *Progress*, and Louis Stuart carnation; and W. Cutbush & Son, Highgate, staged the new Lady Coventry of the Malmesdon section, that received the Society's award of merit in May, last. The flower is large, in color scarlet with a suspicion of orange in it.

The Orchids.

Orchids were less numerously shown on this occasion, and but few awards were made. F. Sander & Co. showed among other things *Cypripedium Gowernianum magnificum* Schofield's var., with a flower of purple brown, tall growing and handsome; six plants of *Laelio cattleya Canhamiana* Rex; the bloom of opaque white, and lip of rich purple; *Laelio cattleya Eudoxa*, a cross between *L. purpurata* and C. Mendelli. J. Veitch & Sons showed *Laelia Othone*, an orange-colored flower; *Disa Luna* has bright rose pink flowers carried on stems 3 ft. high, and withal of much decorative value. In Charlesworth & Co.'s, *Spathoglottis aurea* Niwiliardie attracted attention.

The following brief descriptions of remarkable species and varieties of orchids shown on this occasion will, no doubt, have interest for lovers of these plants:

Laelio cattleya Mikado—This is a hybrid, of unrecorded origin, shown by Lieut.-Col. Holford, and one of the most beautiful of its color. The flower is of a pleasing form, excelling in brightness, and of considerable size. Its lip is of good expanse, ruby-colored in the front, and possessing a yellow margin. A first-class certificate was awarded. The same exhibitor sent *Cattleya Mossiae* A. Dimmock, a beautiful variety of the *C. Mossiae* of the Reineckiana breed. The flower has wide petals and sepals of a bluish color; the lip is of the same color, only slightly paler at the base; the disc yellow,

and the white margin is crimped, and of much breadth—a special feature of the bloom. *Laelio cattleya Feronia* (C. Enid L.-C. Haroidiana) was shown by Sir Trevor Lawrence; a large showy flower, rivaling in size that of L.-C. Canhamiana. The lip is of a bright ruby tint; sepals and petals cream-colored, having a yellow tinge, the latter a pink suffusion. *Odontoglossum amabile* Fowlerianum, a hybrid with flowers of great width, and tinted with pink towards the margins, and the interior surface blotched with brown, whilst the front of the lip is white.

These last three received awards of merit. *Cirrhopetalum vaginatum*, and *Angraecum expansum*, from Sir T. Lawrence's garden, were awarded botanical certificates.

FREDERICK MOORE.

AMERICAN ROSE SOCIETY.

Several persons have advised that the last schedule of premiums be adhered to by the A. R. Society for the next Rose Exhibition to be held in New York City in March, 1910. President Poehlmann has requested the committee which drew the last schedule to act, and if in their judgment it seems best, that the same be adopted and published without delay. The committee is composed of the following: Messrs. Robt. Simpson, Alex. Montgomery, John N. May, Frank R. Pierson and Benj. Hammond. Life certificates have been issued to Mrs. Gertrude M. Hubbard, who by unanimous vote at the Buffalo meeting was elected the first honorary life member, and to Peter Crowe of Utica. Treasurer Harry O. May reports that with all bills paid he has a net cash balance on hand.

There is one thing which surely should be done if the American Rose Society is to grow among amateurs, and that is to issue a special quarterly—something whereby the interest in the Association would be aroused in those who do not see our excellent trade papers. Two propositions have been submitted—one from the "Gardeners' Chronicle," the other from the "Garden Magazine." A general meeting of the Rose Society will be called during the session of the S. A. F. in Cincinnati. His Honor the Mayor of Detroit, Philip Breitmeier, offers a cash prize of \$100 for the best collection of hardy outdoor roses, in pots or tubs, to be exhibited at the next annual Exhibition. The gentlemen who provided the promised contributions last November toward the prize fund of the Society have loyally redeemed their promises then made.

BENJAMIN HAMMOND, Sec'y.

Fishkill-on-Hudson, N. Y.

GREENHOUSE GLASS DROPS IN THE TARIFF SCHEDULE.

Amid the clash of interests in the U. S. Senate pertaining to tariff rates, the one large item of expenditure in all greenhouse construction—window glass—is affected. The Aldrich Committee refer the clause back with a much lower rate than existed under the present tariff.

Senator Elihu Root of New York, threw his powerful influence in favor of this action.

BENJAMIN HAMMOND,
Secretary Tariff Committee, S. A. F.

WESTCHESTER HORTICULTURAL AND AGRICULTURAL SOCIETY.

The exhibition of this Society took place in the Mount Kisco Opera House, Friday, Saturday and Sunday, June 18-20. There was a splendid display of roses, strawberries and perennial flowers. Mr. Spavins, the local florist, worked very hard to make the exhibition the success that it was and is entitled to great credit for his decoration of the exhibition hall. There was a particularly noteworthy display in the peony class, the first prize going to Mr. W. Cowdin, Matthew Rall, gardener; second prize to Mr. Clarence Whitman, W. Wills, gardener. The second prize exhibit was remarkable in that fifty varieties of the finest peonies were exhibited, all correctly named, but unfortunately, the flowers were a little past their best. A collection of pressed native flowers exhibited by Chas. Hilderbrandt, gardener to Senator Agnew, was of much interest. The awards were as follows:

Hardy Perpetual Roses—1st, Chas. Whitman, gardener W. Wills; 2nd, J. Borden Harriman, gardener M. J. O'Brien. Hybrid Teas—1st, Chas. Whitman, gardener W. Wills; 2nd, Moses Taylor, gardener R. W. Beatty; 3rd, Hon. Seth Low, gardener Hugh Birch. Vase of 12 Roses in Variety—1st, J. D. Laying, gardener David Francis. Vase of 12 Roses, White—1st, Col. Jay, gardener A. L. Marshall; 2nd, Hon. Seth Low, gardener Hugh Birch. Vase of 12 Crimson Roses—1st, Moses Taylor, gardener R. W. Beatty; 2nd, Col. Jay, gardener A. L. Marshall. Collection of Peonies—1st, W. Cowdin, gardener Matthew Rall; 2nd, Clarence Whitman, gardener W. Wills. The class for the best strawberries was won by the Hon. Seth Low, gardener Hugh Birch, and the second prize by M. B. Fuller, gardener J. Fleuti. Perennials—1st, J. Borden Harriman, gardener J. M. O'Brien; 2nd, Clarence Whitman, gardener W. Wills.

The Westchester County Horticultural and Agricultural Society is all alive. It will hold another exhibition in the autumn in addition to the Chrysanthemum Show. The work of the various members is increasing the interest of a great many amateurs in that locality.

The judges, who gave complete satisfaction, were Harry A. Bunyard of New York, and Robt. Angus of Tarrytown.

HUNTINGTON HORTICULTURAL AND AGRICULTURAL SOCIETY.

The annual Rose and Strawberry exhibition of the Huntington (N. Y.) Horticultural and Agricultural Society was held on June 15. The season was good for strawberries and brought out a fine display. Roses were also numerous and excellent. The Huntington Nursery Co. exhibited fifty varieties. The judges were Walter Riddell and John R. McCulloch.

On strawberries, Clinton Gilbert was awarded first for size, H. T. & A. H. Funnell for flavor and finish, H. Paulding for shipping, and John S. Baylis for collection of named varieties.

On roses, Walter Jennings, gardener Richard Cartwright, took first for pink, white, red and roses of any other color, also for 12 roses, assorted, collection of roses and vase of hardy flowers. W. J. Matheson, gardener Jas. Kirby, took first for collection of hardy flowers, sweet peas, carnations and collection of peonies.

PENNSYLVANIA HORTICULTURAL SOCIETY.

Resolutions passed at special meeting, June 15th:

Whereas, The Executive Council of the Pennsylvania Horticultural Society has recommended that the Society adopt the necessary resolutions to authorize the sale of the premises on the west side of Broad Street south of Locust Street, in the city of Philadelphia and known as Horticultural Hall, And

Whereas, in the judgment of the Society it will be to its advantage for said property to be sold, the net proceeds thereof, after paying off the trust certificates which were issued to raise funds to erect the building, to be invested and the income thereof to be applied to the furthering of the objects of the Society; therefore

Resolved, That the Pennsylvania Horticultural Society does hereby approve the sale of said premises and building at a price not less than \$500,000.

Resolved, That the officers and Executive Council of the Society be authorized to take all legal steps necessary to accomplish such sale and to perfecting the title to the premises.

Resolved, That the officers be and they are hereby authorized and directed to execute under the corporate seal of the Society such deeds or other writing as may be necessary to convey the title to the purchaser or purchasers thereof in fee simple.

Resolved, That the officers and Executive Council be authorized out of the proceeds of such sale to pay off the certificates issued to raise the funds to erect the building, provided the funds so paid shall in no case exceed the face of said certificates.

Resolved, That the President be authorized to appoint a committee of three to act in conjunction with the Trustees who now hold legal title to the property under deed of gift of Elizabeth Schaffer in effecting such sale and the other necessary arrangements in connection therewith.

Resolved, That the expenses incident to such sale, etc., be chargeable to the proceeds thereof.

R. C. Lippincott, C. Hartman Kuhn, Sidney W. Keith, committee of the Pennsylvania Horticultural Society, to act with the trustees of the Schaffer Deed of Gift:—George Vaux, Jr., Wm. Hacker, Robert Craig and the Girard Trust Co.

PARK SUPERINTENDENTS VISIT BOSTON.

Members of the Eastern Branch of the national association to the number of twenty visited Boston on June 18, and enjoyed an auto ride through some of the parkways and reservations. A short business session was held at the residence of Superintendent Pettigrew, where lunch was enjoyed, as guests of Mr. and Mrs. Pettigrew. Several invitations for the honor of the next meeting were extended.

The floral parade on June 11 was a leading feature of the carnival at San Mateo, Cal.

CLUB AND SOCIETY NOTES.

The Minnesota State Horticultural Society will hold their summer meeting on June 29 at the State Agricultural School, just when the strawberries will be at their best.

The Transportation Committee of the New York Florists' Club have decided to go by the New York Central to the Annual Convention at Cincinnati, but have not selected the train.

Bertrand H. Farr, president-elect of the American Peony Society, left

B. H. FARR

President-elect American Peony Society.

Reading, Pa., on June 19 for Ithaca to meet with the Nomenclature Committee and study the peonies at the test plot at Cornell University.

The Worcester County Horticultural Society (Mass.) at the show on June 17 had but two entries of roses, neither of which was up to the usual standard. Peonies were in fine form and strawberries made a good showing.

The next event of interest with the Utica (N. Y.) Florists' Club will be a beefsteak supper in the woods at Ilion, early in July, on invitation of Theo. Schesch, who promises also a surprise for those who attend.

The executive committee of the St. Louis Horticultural Society has closed a contract with the Coliseum company to hold a fall flower show, combined with a pomological display at the Coli-

seum. The dates will be made known soon.

The Grand River Valley Horticultural Society met with W. K. and J. P. Munson of Grand Rapids, Mich., on June 15. Prof. Eustace of the Agricultural College, W. K. Munson and Mrs. Campbell were among the speakers.

The Dutchess County Horticultural Society (N. Y.) have decided on November 4 and 5 for their fall show. The June meeting was held on the 17th at Annandale, and the society was entertained by Miss C. C. Cruger of Barrytown.

The New Haven County Horticultural Society (Conn.) at their meeting on June 15 were addressed by Peter Zuger, head gardener of Elizabeth Park, Hartford, on roses. The subject was well covered and presented in an interesting manner, and at the close of the talk it was unanimously voted that the society should visit Elizabeth Park on June 28.

PERSONAL.

Mrs. T. H. Westwood of Boston, sailed on June 15 for Scotland.

John J. Dervan, of Orange, N. J., has taken a position with R. H. Hunt of Rochester, N. Y.

Visitors in Boston: Theodore Outerbridge, Sunnyslands, Bermuda; C. B. Weathered, New York.

Joseph Linfoot of Cincinnati, and Miss Isabella Ross of Walnut Hill, O., were married on June 12.

David Welch, of the firm of Welch Bros., the wholesale florists of Boston, sailed from New York on the Lusitania on June 30, for a short period of rest and recuperation, after a strenuous season in which his health has suffered somewhat from the strain.

Advices from Albany state that Elihu S. Miller of Wading River had been appointed by Governor Hughes as one of the trustees of the New York Agricultural Experiment Station. The Governor has made a good selection. Mr. Miller will prove a valuable assistant in this work, for he has had years of experience in experimental work on his own account.

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention June 22-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Brueggerhof, Pres.; Burnet Landreth, Sec'y.

Bermuda Onion Seed—Crop Prospects.

Some time ago I made a report on the probable yield this fall, and, whilst I surmised for only a fair return, other growers more sanguine than myself predicted a large crop on account of increase in the planting of onions. This fact could not bear any weight on the crop, since the over-planting was not the outcome of speculation, as it used to be done at other times, but the natural consequence of a greater demand for our seeds from the United States and other consuming markets. Thus the increased yield over 1908 is absorbed by further contract orders from different parts of the world and there will not be this year any surplus, particularly of "White," to meet orders coming at the eleventh hour.

From the impression that I have obtained in the different producing districts, I think that as the fields look up to this date and the average size of the heads bearing the seeds, the crop will not permit of filling the contract orders to their full extent, although it will come very near it.

The progress of the developing plants has been somewhat checked by a small touch of disease but the evil localized itself and the damage done was not so considerable as predicted by some growers. The rainfall has been this season very scanty, and plants, although looking pretty well developed, have not reached their full seed capacity.

If we are not visited by high winds between this and the full harvesting time, the crop may be said to be much more encouraging than last fall and a good seed, too.

The earlier seedsmen contract in advance the better chance they will stand of obtaining full delivery of their orders and the more satisfactory it will be for the growers here.

I would like to say for your readers' information that I have raised a White Bermuda seed which is earlier than the earliest onion known, and I will forward some of this to my friends in the United States.

The famous White Crystal Wax is becoming a great favorite onion in other markets and as the genuine selected seed is rather scarce, it is probable that before long the price will be raised from 50 to 75 cents per lb. It will be advisable if seedsmen inform their clients—the growers—of this possible event.

FEDERICO C. VARELA.
Teneriffe (Canary Islands), May 29th, 1909.

The Corn Crop.

While the weather as a whole has been favorable for growing crops, corn has not advanced much. Nights have been cool as a rule, and on the night

of the 18th light frosts were general throughout central, western and northern New York. It is also reported from Michigan that frost was noticed early in the morning. It was heavy enough to cut down corn in many sections, but it will, no doubt, come up again. However, as the corn crop is backward quite generally, any event that will retard it still further gives cause for anxiety.

Canning Peas.

Peas are, as a rule, looking well in Michigan, but not so good in Wisconsin. The harvest is two months hence, however, and no one can say what it will be. Delaware, Maryland and Indiana have finished their canned pea packs. The Baltimore pack was about 60 per cent. of an average, but Maryland and Delaware, excluding Baltimore, were up to about the average for those states. New York and Wisconsin, which furnish fully 60 per cent. of all the canned peas, have not started, but New York will be in full swing on early peas—Alaskas—before July 1st. The crop is promising, but the acreage considerably reduced from last year.

The Wisconsin crop is nearly three weeks late, and it will be close to the middle of July before they are really busy. It is generally reported that the crop has suffered to some extent from excessive moisture, while the acreage, notwithstanding the new factories operating this year for the first time, will not exceed last year. More full and accurate information will be given in a week or two. It may be mentioned that 80 per cent. of the peas packed in Maryland, Delaware and Indiana are Alaskas.

The Value of Experience.

The graduation of the staff of the National Department of Agriculture into the seed business is a matter of general interest. These "Scientists" who were trying to regulate the seed business of the country have probably discovered how little they knew about it, and how poorly qualified they were for their more or less self-imposed task. Several of those remaining of more or less exalted station would be vastly more useful and less hostile to the trade with a few years' practical experience. Our California friends may feel inclined to offer them inducements. It would be quite fitting.

CATALOGUES RECEIVED.

Reade Manufacturing Company, New York—Folder of "Herbicide," the weed exterminator.

Liverpool Orchid and Nursery Co., Gateacre, England—Special Offer, No. 37, of Orchids.

M. Herb, Naples, Italy—General Catalogue of Bulbs and Seeds for Autumn Sowing. Text in English, German and French languages.

Van Heiningen Bros. & Co., Boskoop, Holland—General Trade Catalogue, 1909-10. Conifers, Rhododendrons and hardy material generally are listed in this useful catalogue. This firm purchased the stock of Parsons' Hardy Rhododendrons when the Kissena Nurseries discontinued and are now propagating them in Holland.

JOHN GERARD, New Britain, Conn.

PANSIES AT PITTSBURGH.

The finest pansies ever seen in this district have just flowered in the Homewood Cemetery. The strain is particularly fine containing colors we have never seen elsewhere. We were told it is Mr. Allen's own. The size of the flowers and the vigor of the plants are remarkable. The seed is sown in July and the plants planted after the bulbs in October, and left all winter without protection. A pleasing effect was noticed where the crocus foliage had been allowed to remain amongst the pansies.

This cemetery is, in Mr. Allen's hands, becoming one of the most beautiful in western Pennsylvania. William Allen, late of Boston, is a stickler for order, and objectionable features common in most of our cemeteries are practically unknown here. We understand that to complete the equipment a range of Pierson U-Bar greenhouses is soon to be erected.

A letter has been received by M. H. Duryea from Hon. Albert S. Callan, State Assemblyman of New York and maker of the Callan Pure Seed Bill, under date of June 11, advising that the Governor has not signed the bill, consequently no further legislation can be accomplished on same until both Houses meet next winter.

THE Florists' Supply House of America
H. BAYERSDORFER & CO., 1129 Arch St., Philadelphia, Pa.

CHICAGO NOTES.

This is peony week in Chicago. This popular flower has been in the market now for many weeks, coming as it does in great quantities from the South, but when the Northern stock is in it has not lost any of its popularity, but rather otherwise. People are even more ready to welcome the home-grown article. Shipping is now in the opposite direction and the Northern growers find a market in the South. The season seems to have been a successful one, but reports will be more definite in another week. Carson, Pierie, Scott & Co. had their large department store decorated with thousands of peonies last week and the effect was enjoyed by their patrons, many of whom tried to purchase, thinking so many flowers could only be for sale.

Serious Accident.

Wm. J. Smyth was seriously injured in a peculiar automobile accident Sunday, June 20th., at his summer home at Lake Marie, Ill., about fifty miles from Chicago. Mr. Smyth was preparing to take Mrs. Smyth for a ride and was standing beside the machine. In clanking it he caused the machine to run over himself, causing internal injuries of a very serious nature. Mrs. Smyth summoned a physician who hastened the injured man to St. Luke's Hospital, where an operation followed in the hopes of saving his life. At this writing his condition is very serious. Mr. Smyth is one of Chicago's best known retail florists on the South Side.

Flowers at Commencements.

The subject of the use or non-use of flowers at commencements in the Chicago high schools was not brought up at the meeting of the Board of Education as expected on the 16th. A special committee was appointed, however, consisting of members of the board to look into the matter and report at the meeting on June 24th.

Personal.

Uncle John Thorpe has again been under the physician's care during the past week.

Supt. West of Lincoln Park, who has been away on account of illness is again at his post of duty.

W. W. Barnard is now considered as safely past the danger line. He has a carbuncle near the base of the brain and an operation at the hospital was necessary to prevent blood poisoning.

Frank Ben leaves this week for an extended trip east. He will visit Washington, Philadelphia, New York, Atlantic City and other eastern cities, spending the greater portion of his time with his parents at Philadelphia.

F. H. Henry, of Henry & Lee, New York, was in Chicago last week, accompanied by his wife and daughter. They are on their way to Japan, where they will spend the summer and Mr. Henry will combine business with pleasure, making a tour of the world before they return home.

Other visitors were: W. A. Hartman, South Haven, Mich., and J. G. Crozier, Cedar Rapids, Iowa.

Denver, Colo.—At the last meeting of the State Horticultural Board D. R. Stofler was elected to succeed Martha Shute as secretary. Thurston White of Canon City was elected president.

Flower Market Reports.

BOSTON

There is a good demand for certain lines of flowers this week and buyers will take nothing else. The favored items are American Beauty, Richmond and Carnot roses, orchids and lily of the valley. Outside of these the traveling is very hard, especially for peonies, stocks, candytuft and sweet peas, all of which are a drug and many of which are unsalable. Add also carnations to the list of "under dogs." Of these there are no first quality flowers coming in and some of them are so loaded with red spider and other creatures that it is almost a question as to which—carnations or bugs—is the chief article of merchandise and which is the "by-product" of the growers' labors.

The situation in the BUFFALO flower market has improved considerably for the past two weeks. Only certain lines of stock are in demand and only the best of it can be used, and the balance drags along from day to day making the wholesaler feel uneasy most of the time. Owing to the warm weather roses and carnations are decreasing in size. Beauties are of only fair quality, Richmonds good, Kaisers, Carnots, La Detroits are of excellent quality but not any too plentiful, while ordinary Bridesmaids and Brides of poor, mildewed quality, are overplentiful. The outdoor material has come on abundantly and has had a fair demand at moderate price. Sweet peas and lilies of the valley have had

the call. While the outdoor peas are not of the best as yet, the indoor have brought good value and clean sales daily. Weddings, graduations and other social gaieties are in order for the balance of the month and should the severe warm weather hold off for a while it may give the wholesaler a chance to send out satisfactory returns. Greens of all kinds including new fancy ferns are to be had in quantity.

Business above the average here. There have been an unusual number of June weddings, likewise of funerals. Pond lilies are unusually fine and plentiful. Carnations have kept much above the average in quality, due to the absence of hot weather. Out-door sweet peas are practically ruined by the rain and there is a great scarcity of same. Green not any too plentiful.

FLOWER MARKET REPORTS.

(Continued from page 907)

CHICAGO

The past week was a most uneventful one in the eyes of most of the florists, wholesale or retail. The plant men are the only ones who did not feel the reaction after the unusually brisk Memorial Day trade. Various theories have been advanced to account for the extreme dullness of the month of June but none of them seem wholly satisfactory. The fact remains that flowers are not selling as they should at this season of the year, except with florists who have a large shipping trade. Kaiserin and Carnot roses are getting into fine shape now. Carnations are hardly worth considering so light is the demand. Ferns have taken a big drop and are now selling at less than one-half the price they brought two weeks ago, the price at that time being abnormally high. Most of the florists report their sales as comparing well with one year ago notwithstanding the low prices. Florists are preparing to close at 5 p. m.

during July and August, and an effort is being made to close Sundays also. And why should not the florist who has worked hard all the week rest as most of the world does on Sunday?

INDIANAPOLIS

Business has been moving along very quietly the past week, but it is pretty generally conceded that present conditions are an improvement over those of a year ago. Though June weddings and commencements have not greatly enriched the florists they have helped some. At present the market is weak with falling prices. Much inferior rose stock is coming in. American Beauty and Killarney are the best grade of roses at the present time. Carnations are in fair condition and moving nicely. There is not much of a variety of stock but abundance of the kinds at hand. Calla season is about over but Harrisii lilies are very much in evidence. Iris, Shasta daisies, corn flowers, larkspur, Coreopsis and stocks furnish diversion from the blossoms generally seen. Peony season is over

and cold storage stock is being used. Bedding plants have had a big run this season and stock is now pretty well cleaned up. Vincas and good geraniums are almost impossible to obtain at the present time. Hardy cut ferns are good property and meet a good demand as well as asparagus and other greens.

Hot weather, abundance of stock of all kinds and very little business is the discouraging condition we are facing now. Roses and carnations are showing the effect of the high temperature. The usual spurt incident to the school closings has not materialized as yet. Everything is cheap and not all of the stock can be moved except at ruinous prices. Lilies are particularly plentiful. Some improvement is hoped for before the end of the week, but it would require considerable of a demand to consume the material now coming into the market at even fair figures.

OBITUARY.

Mrs. T. D. Cobb.

Mrs. T. D. Cobb, formerly Miss Emma Tonner, passed away at a hospital in Los Angeles, Cal., June 18th, after six weeks' of typhoid fever. Mrs. Cobb was a Chicago girl who had grown up closely connected with the florists' business and for several years conducted a retail store on Cottage Grove avenue. Her father, who died ten years ago, was a landscape gardener and laid out some of the Chicago parks. One sister, Hertha Tonner, is in the Flower Growers' Market and another is at the head of the Randall Supply Department. Another sister, also a florist, went to be with Mrs. Cobb during her last illness and telegraphed the sad news to her mother and sisters in Chicago. The deceased leaves a husband and three small children, one of whom is also suffering with typhoid.

Mrs. Julia D. Stroud.

Mrs. Julia Darling Stroud, widow of William C. Stroud, who was a member of the Baldwin Locomotive Works firm of Philadelphia at the time of his death eighteen years ago, died at her home at Overbrook, Pa., on the 16th inst. Mrs. Stroud had been ill for three years. She is survived by one son, Edward A. Stroud, and a daughter, Mrs. Westray Ladd. Edward A. Stroud has made a name for himself in commercial horticulture, especially in carnation culture, and owns two establishments, one at Overbrook, Pa., the other at Stratford, Pa. We extend our sympathy to Mr. Stroud in his bereavement.

FLOWER MARKET REPORTS.

(Continued from page 9-13)

PHILADELPHIA

Stock dropped off a little both in quantity and quality last week, but demand was fairly good as there were a great many weddings, commencements and other social functions. American Beauty roses are still plentiful but not quite so gilt edge in quality as they were. Eastern grown Killarneys have the call over local stock for the present on account of the difference in season; but this will probably not last very long. Bride roses suffer badly from the weather and are coming in very poor. Bridesmaids hold their own better, and Kaiserins are fine. The few growers who took good care of their plants as to watering and keeping down red spider at the waning of the season, are reaping their reward now. Many just let their stock go as it pleased, and the results in poor quality and little for it are very apparent. Lily of the valley was in normal supply but the demand was unusually brisk so it looked at times as if there might be a scarcity, but this was not really so. Only southern gardenias now—no local coming in. Cattleyas are in satisfactory supply and meet with ready market at good prices. Sweet peas were in short supply and poor last week on account of rain. They show up better at this writing. Mostly outdoor stock arriving. Japanese irises have made their advent. Gladioli—varieties like Shakespeare, May, America, are in evidence—also fine galliardia and snapdragon.

ROCHESTER FLOWER AND PLANT TRADE.

Although the spring rush is over here, florists are still busy selling and they are unanimous that the spring, 1909, has been one of the best. The public seems to act on the motto, "Do it for Rochester," and along the residential streets beautiful beds and window boxes abound. The result of this extra beautification and expenditure is that several firms contemplate extensions or rebuilding. It is to be hoped that Rochester will continue to suffer with "geaniumitis." Local florists all report an unusual demand, not only for bedding plants, but for chrysanthemums and Nephrolepis Scottii, the latter being all cleaned out.

BUSINESS CHANGES.

Racine, Wis.—R. J. Mohr has sold out his florist business on Wisconsin street.

Andover, O.—Grant Chase has purchased the greenhouse business of Mrs. R. A. Pardee.

Evanston, Ill.—Frank Kadlec, nurseryman, of Chicago, has taken up his residence here.

Rochester, N. Y.—The Webb Floral Co. is the new title of the former A. J. Webb Co., florists at 133 Saratoga avenue.

Monticello, Ind.—The Reynolds property on South Illinois street has been sold to F. Switzer, who will carry on the florist business.

HELP WANTED

GOOD MEN

When you need good men, skilled or unskilled, Write:

THOS. H. BAMBRICK

34 South 7th Street Philadelphia

Help of all kinds, including that for Florists, Nurserymen, Seedsmen and the Horticultural trade generally.

WANTED—Assistant florist: must be careful at watering, tying and potting. Wages to start, \$12.00 per week. Address, with copy of references, experience, etc., Plant Grower, care HORTICULTURE.

SITUATIONS WANTED

SITUATION WANTED—By intelligent young German, 27, sturdy, of good character and ability, to learn American nursery trade. Good propagator, grafter. Five years' experience in German nurseries. Speaks and writes English fluently. State wages and particulars in first letter. R. S. care HORTICULTURE.

FOR SALE

FOR SALE

About 30,000 feet of glass in good condition, will sell at a low figure, or will lease to the right party, with privilege of buying. My object for selling is, I do not know anything about the business and can't hire men that do.

H. F. CRAWFORD
Montello Sta. Brockton, Mass.

SECOND HAND BOILER

For sale, suitable for heating purposes. Robinson make, 4½ x 15 ft., 64 tubes, 8 in. trimmings and settings in good condition.

BENNETT BROS. CO., Lowell, Mass.

For Sale Greenhouse Property

Located at Somerset and Howard streets, North Plainfield, Somerset County, New Jersey. Dimensions 28 x 108 ft. Contains three greenhouses 20 x 175 ft. steel frames. Trolley lines pass property. Will sell cheap and on easy terms. For particulars apply to F. B. DAILEY, care F. EERG & CO., - Orange, N. J.

FOR SALE—Five greenhouses, house, five rooms, improvements; barn, carriage house, sheds; all in good repair. One minute to depot, on main street; 20 minutes to Boston; five minutes to two lines of electric. Only florist in large town. Established twenty years. For further particulars address E. G. Blaney, Swampscott, Mass.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSELSKY BROS., INC., 59 Montrose Ave., Brooklyn, N. Y.

FOR SALE, CHEAP—A good, second-hand Horizontal Tubular Steam Boiler, 85 H. P. Auburn Last Co., So. Framingham, Mass.

FOR SALE—Three thousand lights, 16x 21, double thick glass, 20 lights per box, 10c per light. P. O. B. Littleton. Frank M. Richardson, Littleton, N. H.

GREENHOUSES BUILDING OR CONTEMPLATED.

Lee, Mass.—James A. Rice, one house.
Monticello, Ind.—Floyd Switzer, one house.
Springfield, Mass.—J. A. Rice, one house.
Springfield, O.—G. Schneider, two houses.
Evansville, Ind.—O. S. Smith, two houses.
E. Rochester, N. H.—E. A. Corson, one house.
Gloversville, N. Y.—R. E. Loeben, one house.
Mansfield, Mass.—W. Holmes, two houses, 25x200.
Holly, Mich.—H. J. Green, improving and enlarging.
Niles, Calif.—California Nursery Co., house, 15x100.
Ashtabula, O.—Roger Griswold, twelve houses, each 300 ft.
Gibsonia, Pa.—Pittsburg Rose & Carnation Co., house, 50x400.

E. W. Fengar is adding five new houses of King construction, to his existing range of carnation houses at Irvington, N. J., and contemplates a still further extension in the fall. The heating will be done by Hitchesings & Co. Two of the largest size Castle Automatic Circulators have been contracted for, Mr. Fengar asserts, after a thorough investigation of all the circulators, pumps and other devices for forced circulation of hot water that are on the market, none of which in his observations can compare in practical utility with the "Automatic."

PATENTS GRANTED.

923,921. Tile Greenhouse Bench. Byron P. Wise, Cleveland, O.
924,318. Cutter for Lawn Mowers. Adelbert B. Case, Springfield, Mass.
924,392. Weed Cutter. Joseph J. Smith, Woodburn, Ore.
924,498. Weed Destroyer and Gatherer. Benjamin Pomije, New Prague, Minn.

TO LET

TO LET—Three greenhouses, one 18x85, two 15x75 each; six and one-half miles from Boston market; all modern conveniences. Also lot of land for outside use. Terms reasonable to right party. Apply to Samuel Brown, 320 Beale St., Wollaston, Mass., N. Y., N. H. & H. R. R.

MISCELLANEOUS WANTS

WANTED TO BUY—Complete green house plants and all kinds of greenhouse material, to be taken down and removed at once. Terms cash. Address I. Susserman, 229 Livingston St., Newark, N. J.

WANTED—Second-hand bags and burlap, any kind, any quantity, anywhere. Richmond Bag Co., Richmond, Va.

A PEONY DAY.

Reposing in simple rural dignity on the crest of a richly wooded eminence in one of the loveliest sections of eastern Massachusetts, overlooking the valley of the winding Charles river and a verdure clad landscape of rare beauty, far removed from the disturbance of train or trolley car, is the home of one of the best known and best informed peony specialists of our day, E. J. Shaylor. Skirting the grounds adjoining the broad piazzas just now are great masses of rich color and the air is redolent with the incomparable aroma from the peony fields where this peony enthusiast spends most of his waking hours and if he should ever be accused of sleeping with his beloved plants I question whether he would not plead guilty.

To this enchanted spot, a few days ago, came a delegation from the Gardeners' and Florists' Club of Boston and spent an afternoon of rare enjoyment in inspecting the flowers, inhaling the country air, admiring the view and enjoying the unconventional hospitality of a host and hostess who are excellent exponents of the art of making visitors feel at home and it may be recorded as having been one of the best field days the club has ever had.

There are larger peony fields than Mr. Shaylor's but it is a question whether there are any where can be seen more new varieties or a better selection of the really distinct and high-class varieties. There are many seedlings but only one has been named thus far, Georgianna Shaylor, and none of the others will be given a name unless they demonstrate some special distinction or quality as compared with existing varieties. Georgianna Shaylor has developed quite noticeably since it was certificated last year by the Massachusetts Horticultural Society. It is a broad petalled soft pink, than which there is nothing in the whole list more promising.

Some time ago when Mr. Shaylor had a controversy as to the identity of the much-lauded Lady Alexander Duff, Messrs. Kelway sent him, under the label of "Lady Alexander Duff, True," a plant which has now flowered and proves to be both lovely and distinct, unquestionably different from any variety Mr. Shaylor has ever seen. It bears some resemblance to Germaine Bigot but the stigma is pink in Duff whereas in Bigot it is crimson.

Improvement in the peony follows the line of the broad petalled type. Mme. Savrean by Brochet is a remarkably handsome flower. This variety has not yet been put on the market in America. It is creamy white with petals of great substance, foliage and stem remarkably sturdy. Le Cygne is one of Lemoine's new ones, a pale yellow and Prime Vere is another from the same raiser. Both are very promising, but as they were only received last fall their full character has not yet been developed as it takes at least three years after division before a fair estimate of a variety can be made. Of Deseret's novelties very few have even bloomed this year. One of them, Madeline Gauthier, has flowered and is a beautiful single pink with bright yellow centers.

Mr. Shaylor has proved Pottsi Alba as sold by some nurserymen to be none other than Eugenie Verdun. It

is a noble variety with broad softly flushed petals. Kelway's Summer Day is very close to Festiva Maxima in every respect.

Mr. Shaylor pronounces the lists of the most useful varieties as given by Geo. C. Thurlow in last week's issue of HORTICULTURE to be about as good as anyone could name. Among the most impressive varieties in his own collections are Mons. Dupont, a very symmetrical creamy white with petals occasionally red tipped; Mme. Emilie Lemoine, an exquisite flower, pink in centre, with strong upright habit; Therese, a beautiful soft pink flower with broad cupped petals; Marie Crousse, similar in color; Asa Gray, pink uniquely veined and pencilled with darker pink; James Kelway, an enormous white with very leathery foliage; Avalanche, very handsome white with crimson-tipped cupped petals; Rosa Bonheur, one of Deseret's, a late blooming, full, deep pink; Adolph Rosseau, one of the best of the reds, not the darkest but a tall grower and sure bloomer. Among Mr. Shaylor's seedlings one or two very promising reds are under watch.

PHILADELPHIA NOTES AND COMMENTS.

The Leo Niessen Co. will commence the 6 p. m. early closing for the summer on Monday, June 28th.

Marguerite II, the new yacht being built by Blatz of Kensington, for A. B. Cartledge of Pennock Bros., will be launched in the near future.

Miss Marguerite Harris, daughter of William K. Harris, with a party of friends sailed from New York on the 16th inst. for a European tour.

John McIntyre has treated himself to a new office, nicely fitted up and will prove a great comfort in the conduct of his rapidly extending business.

Frank Bennett, of Bordentown, N. J., will take a trip to Europe in the near future, and among other points of interest will visit his old home in England.

William Warner Harper cordially invites visitors to Andorra Nurseries, City Line and Wissahickon Drive, Chestnut Hill, to view their magnificent collection of Japanese Irises, which are now at their best.

George Anderson had to go to Jenkintown last week to answer a charge of auto speeding. The defendant knew very well they had the wrong man on their list as his wagon had not been cut of the garage on the date specified. Still, it was some satisfaction to go up and get a smile at the expense of the Montgomery County authorities.

Louis and Charles Berger, scions of the well-known family of florists of that name in Germantown, have started in the insecticide business under the title of the Philadelphia Insecticide Co., at 6117 Germantown avenue. Their new insect powder is highly spoken of by those who have tried it. They are also offering nicotine of their own manufacture at very reasonable prices.

Robert Kift has purchased the property at 1821 Chestnut street, one block

"Every Bug Has his Dose."

Insect-destroying preparations that do their work well and effectively are the cheapest. Bowker's Arsenate of Lead and Bowker's Pyrox are recognized standard insecticides and fungicides for both indoor and outdoor use. Bowker's Insect Emulsion destroys many kind of plant lice, black and green flies, etc. Call or send for catalogue.

BOWKER INSECTICIDE COMPANY
43 CHATHAM ST. BOSTON

west of his present location. The price stated is fifty-five thousand dollars. The building is profitably rented at present, but is intended in the near future for the new Kift flower store and office building. This should prove a profitable investment as real estate values are rapidly advancing in the neighborhood.

William Falck, of the Pennock Bros.' establishment, will be given a farewell dinner at Boothby's on Saturday evening, 26th inst., by his store associates. Mr. Falck will shortly sail for the other side and will locate with his brother, who is in business in Copenhagen, Denmark. Good wishes from the many friends he has made in Philadelphia during the past fifteen years go with him.

Commencing last Monday, June 21st, the McKissick flower market closes for the summer at 6 p. m., daily. To accommodate out-of-town customers, they have arranged to keep the store open for two hours each Sunday morning from 9 to 11. It is seldom we see such Kaiserin roses as those they had on sale there last Saturday. Centaurea imperialis, the first of the season, and a fine assortment of gladioli were also conspicuous features.

"Make your garden glad," is the happy slogan and trade-mark of the E. Winterson Co., Chicago. Why didn't I think of that! They are branching out and are now seedsmen, plantsmen, and nurserymen—besides being large commission handlers of cut flowers and florists' supplies. Their catalogue is original and it will pay

anyone to get a copy. Write for it. Philadelphia is a long way from Chicago, but it seems short when we have HORTICULTURE to carry messages between us. Besides, Ed. Winterston is well known to us in the Quaker City and we all think a lot of him.

John H. Dodds, superintendent of the Wanamaker estate at Jenkintown, will sail on the S. S. Baltic, July 17th, for a visit to the famous county seats and public gardens in England, France and Germany, not excepting a glimpse at his native town of Hawick, Scotland, where many memories of wonderful things—wooden-legged hens, jail doors two miles wide, Scots' Greys, strong blacksmiths and so forth, remain to be revived or dispelled. If he should happen into Jedburgh (the late William Elliott's burg) we advise him to keep his hand in his pouch. They'll get it there, unless his purse has a severe attack of lock-jaw.

William F. Kasting of Buffalo, and F. H. Cordes of Tonawanda, N. Y., attended the convention of the Credit Men's Association in Philadelphia,

June 15 to 18. Among other places of interest visited was Girard College, the pilots in that case being David Rust and G. C. Watson. Mr. Lonsdale had many interesting things to show horticulturally—not the least being the splendid bedding in which his new crotons, Robert Craig and Edwin Lonsdale, form conspicuous features.

A trellis line of the various species of rambler roses proved an engrossing attraction. Particularly noticeable was the desirability of the Farquhar for its fine color and vigorous free blooming habit. It is also considerably earlier than its great rival, Dorothy Perkins. Juanita, although a fine thing, is completely eclipsed as to distinctiveness in color when viewed from a short distance and compared with its companion, Newport Fairy. The more we see of Hiawatha the more lovely and desirable it appears. A discussion on the hardness of the gladioli formed an interesting interlude in the personally conducted tour.

Mr. Kasting and friends were hospitably entertained by E. J. Fancourt of Pennock-Meehan Co. on the 16th inst.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

The FLORISTS' HALL ASSOCIATION OF AMERICA, insurer of 29,000,000 sq. ft. of glass. For particulars address

John C. Esler, Sec'y, Saddle River, N. J.

Satisfactory Dealing

It is one thing to get estimates and to place your order. It's another thing to know that after you have given the word to go ahead, that the work *will go ahead*. No cluttering up of the premises for an indefinite period, waiting for material that isn't ready — when we start, we finish.

WHAT DO YOU THINK ABOUT THIS?

The architect of the great Metropolitan Tower, designed this house for a steep hillside location at Montclair, N. J. It is results like this that the U-Bar Construction makes possible. Architects recognize the U-Bar's superiority in both attractiveness and durability. Gardeners, whether they have a U-Bar house or not, admit it is the best growing house. Advance sheets of our new catalog now ready.
